Senator HITCHCOCK. Is there any danger, under this system, of debate and disagreement between the various committees, so that, instead of the order being placed promptly, it hangs fire for a couple of months?

Secretary BAKER. That might easily happen, and it might happen in this way. So far as the War Department is concerned, its five bureaus, or five supply sections, head up to a single committee. Now, suppose the Signal Corps and the Ordnance Department both want something and each thinks he is in the biggest hurry, and Gen. Pierce and his associates make a decision about it, but they are not satisfied—the one who loses is not satisfied; he can come to me. That strains out for my personal decision only those cases in which agreement and reconciliation is impossible. Now, I decide, assume, that the aircraft need is more urgent than the other, and I settle that priority where they have been unable to accept the decision which their own conference suggested.

The decision is made. Then they go over to the clearance committee and they find the Navy is there pressing for something that they must have immediately, which if they did not want, would free facilities for the immediate manufacture of the thing that the War Department wants. Now, it may be that the clearance committee will award priority to the Navy, and the War Department may say that was a mistaken decision; that was wrong.

The CHAIRMAN. Is that the only coordinating link between the Navy and the Army?

Secretary BAKER. That is the immediate coordinating link. That is the place where they work it out if they can. If they fail to work it out and agree, the president of the War Industries Board will at once be appealed to. That is a single individual—Mr. Willard. He will hear the two sides and decide the question. If they are satisfied with his decision, as they will be in nine thousand nine hundred and ninety-nine cases out of ten thousand, that is the end of it. If they are not satisfied with that, and they say, "Mr. Willard, I can not leave the War Department's need second to the Navy's need, and in this particular instance I wish you would rehear the question," or, if they desire any further argument about it, the chairman of the War Industries Board will send for the Secretary of the Navy and me and we go over it and work it out. That will work, because from the very beginning the Secretary of the Navy and I have had very many cases of that kind and we have always agreed.

The CHAIRMAN. Mr. Secretary, the organization of the Navy and the Army are very different. It is impossible to coordinate the efforts of the two branches of the service as they are now organized, is it not?

Secretary BAKER. It never has proved difficult. The Secretary of the Navy and I met immediately after it became necessary for us to have any understandings at all, and a perfect system of coordination was worked out.

The CHAIRMAN. The Navy Department is practically under one system, one head—Admiral McGowan—is it not?

Senator WADSWORTH. The supply system of the Navy Department?

Secretary BAKER. Yes.

The CHAIRMAN. That practically covers everything except two or three items.

Senator HITCHCOCK. On an important matter like that, is there any reason why you and the Secretary of the Navy and the president of the War Industries Board could not sit right down and decide it?

Secretary BAKER. It would be done that way if there was the slightest question about it.

The CHAIRMAN. There have been a great many questions pending before the department for a long while that were not worked out, have there not?

Secretary BAKER. I think that is true.

Senator HITCHCOCK. As I recall it, this artillery program for the present war was not agreed upon until 60 days after we had gone to war.

Secretary BAKER. I think that is entirely likely, Senator. I do not know the dates.

Senator HITCHCOCK. It seemed to us a strange thing that that first 60 days should have been lost in having these various branches of the War Department mull over the details when the important thing was to get the contracts started.

Secretary BAKER. It does seem strange; and yet, is it? In Europe there were the French and British forces with two theories or artillery used, employing different types of weapons and different calibers. Each of those countries was having made in this country artillery, practically using all the artillery manufacturing capacity of the country. So our artillery program had to be built up first thinking of which theory of artillery used in warfare commended itself best to our experts, because we had to adopt one theory or the other; and, second, where we could purchase the articles which we desired with least dislocation to existing paramount needs of the allies who were actually at the front fighting. That necessitated not merely somebody making up his mind, but it necessitated collecting a very great deal of data, considering European conditions at the moment.

Senator HITCHCOCK. In view of the possibility of war for several months preceding the actual declaration, could not that work have all been done in advance?

Secretary BAKER. It all was done and all had to be discontinued because when we went into the war we had an established artillery program. One of the grave criticisms which Senator WADSWORTH has seemed to press is that we have adhered to some part of our prewar program, the keeping of the 9.5 heavy piece. We had a program involving the use of certain calibers in certain quantities, and yet when we went into the war we found that the French were using one theory of warfare and the British another, that the preponderance of the so-called middle heavy in the British use was substituted by a vastly greater number of 75's in the French theory. It was necessary for us to elect, and the election had to be not only upon the military soundness of the respective theories but it had to be upon the availability of productive capacity for the respective types.

Senator THOMAS. Mr. Secretary, you think that those first 60 days were not lost, as all the factories that were capable of producing these arms and equipment were engaged to their limit in producing such things for our allies?

Secretary BAKER. I think, Senator, every bit of available gunmaking capacity in the United States was largely under contract and actively under operation manufacturing for the allies.

Senator FRELINGHUYSEN. How did you connect this organization up with the over-seas force?

Secretary BAKER. How do you mean connect it up, Senator?

Senator FRELINGHUYSEN. Determining the question of priority.

Secretary BAKER. Questions of priority of shipment?

Senator FRELINGHUYSEN. Yes; the needs of the Army.

Secretary BAKER. Those are determined by Gen. Pershing. Gen. Pershing sent us a long time ago a schedule of priorities showing the order in which he would need things, and the things he needed. That is changed from time to time as wisdom on that side justifies the change and the attempt of the director of transportation, in charge of the transportation system both on land and over seas, is to comply with Gen Pershing's program as rapidly and fully as possible.

Senator FRELINGHUYSEN. Where does that direction of transportation come in this organization?

Secretary BAKER. On the third page.

Senator HITCHCOCK. Traffic and storage, that is Gen. Goethals?

Secretary BAKER. Yes.

Senator FRELINGHUYSEN. Supposing Gen. Pershing wanted 200,000 uniforms. Who would determine the priority on that?

Secretary BAKER. Gen. Pershing himself.

Senator FRELINGHUYSEN. Through you?

Secretary BAKER. He could determine it in this way. He would send a cablegram to me—"I need 250,000 uniforms. Insert that in my priority schedule between items 13 and 14."

Senator SUTHERLAND. One of the papers of the last few days stated that a large number of mechanicians and welders and other artisans were immediately needed on the front over there, and were only now being gotten together for that purpose, a force which it was stated should have been gotten together months ago. Was that statement correct, or not?

Secretary BAKER. The first part is perfectly accurate. I think the second part is a misapprehension. This is true. After we went into the war it became immediately apparent that a very large force of technically trained men would be the earliest assistance we could render in the war. As a consequence, about 120,000 men were organized into technical forces, railroad regiments, stevedore regiments, foresters. Our foresters were turned loose in the forests of France and England, assigned to them to get out lumber for cantonments and for shacks and things of that sort, our railroad operatives undertaking reconstruction of railroads near the front, operation of railroads, and our stevedore regiments undertook the unloading of our own ships, transports, and the construction of additional dock facilities, and so forth. Those forces were sent aggregating, I think, about 120,000. There may be a few thousand more now. They have been continuously operating over there for many months, and the Senate committee knows that at the time of the Cambrai drive American railroad regiments were actually constructing the railroads which followed the British advance.

From time to time needs of additional technical men are brought to our attention, and wherever they can be satisfied, they are satisfied.

The fact that it ought to have been done some time ago is hardly just. The program is changing. Originally, certain things were proposed to be done on this side, and articles were proposed to be sent over in certain stages of completion to be finished on the other side. As the program has developed, it has been found or thought wiser to do more of the finished work on that side and less on this side That means, of course, the transportation of mechanics. The need for mechanically trained men in the Army is exceedingly large, and one of the gravest problems the War Department has is not only to select mechanically trained persons in this country without serious dislocation of our own transportation and industrial interests but it is to train additional persons in mechanical ways to send abroad.

Senator SUTHERLAND. Did you not have observers over there on the front during the progress of the war, prior to the time we went in, who would be able to have information in the department when the war was started as to these needs?

Secretary BAKER. Exactly, Senator; but the war as it was fought in 1915 was no more like the war now than the Civil War was like that in 1914.

Senator SUTHERLAND. You mean there has been a matter of development?

Secretary BAKER. Enormous and daily development. Whole programs of things which in 1916 were regarded as indispensable for immediate execution are now disregarded and something else takes their place.

The CHAIRMAN. I am inclined to believe that an aeroplane that was in vogue eight months ago would be obsolete now, practically.

Secretary BAKER. Aeroplanes which we were planning to construct in large quantities in August are now completely disregarded. Nobody would have one if you gave it to him in large quantities.

The CHAIRMAN. Mr. Secretary, have you undertaken to bring the War Department under one head, or I mean the supply department, as it has been brought together and successfully operated in the Navy?

Secretary BAKER. I am not sufficiently familiar with the Navy plan to say "yes" to that, and be through with it. As I understand it, the Navy operates entirely in its supplies through the supply division.

The CHAIRMAN. Yes.

Secretary BAKER. If that is so, then the thing I have done is the same thing.

Senator MCKELLAR. Who is to be the head of it?

Secretary BAKER. Col. Pierce.

Senator WADSWORTH. Mr. Secretary, it is not quite that way, is it, because there are still five bureaus left, each placing orders and inspecting manufacture, whereas in the Navy there is but one placing orders and inspecting manufacture.

Secretary BAKER. I think not, Senator, unless I am incorrectly advised about it. I think in the Navy there are some nine or ten, but I am not certain.

Senator WADSWORTH. Admiral McGowan testified that 99 per cent of the supplies furnished the Navy were contracted for and inspected during the course of manufacture by his own department.

Secretary BAKER. But it would seem entirely clear that the purchase of uniforms for the marines, and uniforms for the sailors, and big guns for the Navy, and powder for the Navy are not all either bought or inspected by the same individual.

Senator WADSWORTH. He made the one exception of big guns, armor, and shells. Everything else is under the supply division of the Navy.

Secretary BAKER. They will all be under the supply division here.

Senator WADSWORTH. Yes; but there is only one authority in the Navy Department placing orders for that vast amount.

Secretary BAKER. That will be substantially true here.

Senator WADSWORTH. As I understand from your own description, there will be at least five in the War Department placing orders and inspecting manufacture.

Secretary BAKER. There will be.

Senator WADSWORTH. Then it differs from the Navy.

Secretary BAKER. No; I think it is the same. In the Navy, for instance, the quartermaster general of the Marine Corps is Gen. McCauley. Now, undoubtedly, Gen. McCauley places contracts for supplies under Admiral McGowan's direction, a centralized control, and that is exactly what will happen in the Army under this plan.

Senator MCKELLAR. Will the same plan of secrecy in regard to contracts, not publishing the terms of contracts, be carried on under the new régime?

Secretary BAKER. Senator, I have never been able to satisfy myself that the plan adopted by the War Department was either unwise or unnecessary.

Senator MCKELLAR. So it is going to be continued?

Secretary BAKER. I will issue all the orders necessary to let any Senator or any Member of Congress see all those secrets.

Senator MCKELLAR. It is not a question of that, Mr. Secretary, it is a qustion of the people understanding it. I take it for granted, that any Congressman could see that now or see about any contract. None has ever been kept from me.

The CHAIRMAN. Mr. Secretary, you are speaking of the Marine Corps and the Navy. While they are under the Secretary of the Navy, they are distinctive forces, that is, the head of the supply department in the Navy is not the head of the supply department in the Marine Corps.

Secretary BAKER. But they are correlated through the supply division. If the Marine Corps wants to buy uniforms or rifles—they buy rifles through us—but if they wanted to buy things which they buy instead of things which they get through the War Department, if they wanted to buy things which they buy, Gen. McCauley would undoubtedly take it up with Admiral McGowan and work it up through Admiral McGowan's list of prospective sellers, and all that sort of thing, and then Gen. McCauley would follow it through.

The CHAIRMAN. If you consider it workable to coordinate the different bureaus of the War Department, as you claim you have attempted to do, if it is deemed feasible to coordinate all these departments in the Navy, why is it not wise to coordinate all of these departments in every branch of the service?

Secretary BAKER. I think that is what we have done.

The CHAIRMAN. It does not seem to me that you have.

Secretary BAKER. I think we have gone further than any other country in doing it, Senator.

The CHAIRMAN. Well, the conditions which have confronted us here during the last eight months practically were the conditions which confronted the British at the time the munitions minister was created, and led really to a change in the ministry. They have undertaken to coordinate there all of these activities, have they not, under one head?

Secretary BAKER. No, sir. The munitions minister does not buy a penny's worth for the Admiralty; has nothing to do with the Navy. The British situation is so different from ours, Senator.

The CHAIRMAN. Is it?

Secretary BAKER. The British munitions ministry is a glorified ordnance department, and nothing else.

The CHAIRMAN. But it has been a practical one if it is glorified.

Secretary BAKER. It has been practical and I do not want to discount its success. What actually happened in Great Britain was the same thing that is happening here. At the outset there was the confusion of a new and vast problem, and a very great many steps were taken. The British people felt that they were not acting rapidly enough. Their system of Government, of course, makes their heads of departments really a committee of the House of Commons. They felt that they were not progressing rapidly enough and they reorganized, made the munitions minister, and all the steps which had been taken up to that time began to bear fruit under the munitions ministry, and some of the things which have happened since the munitions ministry was created were the fruits of earlier efforts.

We have done exactly the same thing. We had a vast new problem, a tremendous amount of confusion caused by the size of the problem and by the enthusiasm of everybody wanting to help, the fact that we were not a closely centralized industrial organization in the country, and a vast number of steps have been taken to head up to this organization.

The CHAIRMAN. I am not criticizing what you have done. I glorify all of your efforts of coordination of these different bureaus, but it seems to me you might go further and put them under one head rather than under the different heads that you have here.

Secretary BAKER. I was dealing only with the parallel between the English situation and ours. Further to illustrate that the British munitions ministry in England has nothing to do with allied purchases. The English have not that problem very largely; they have it in a slight sense. Gen. Pershing, for instance, is authorized to make large purchases in France and England, and in any other country where he can find nearby things, which saves tonnage, brings the supply immediately to hand, and he has organized a very fine commission of business men who make those purchases, but England has no such industrial and commercial problem as we have, due to allied purchases.

The CHAIRMAN. They have practically put that in the hands of one or two men?

Secretary BAKER. England?

The CHAIRMAN. Yes.

Secretary BAKER. I do not think so. That is not my information, Senator.

Senator WADSWORTH. It is under one administrative body, Mr. Secretary?

Secretary BAKER. It is under one administrative body but it is relatively a small problem to start with. It is relatively a small problem to start with, and the administrative body which has charge of it is a very large body to end with.

The CHAIRMAN. They certainly have gotten out ordnance, and so forth, in such quantities, and everything in such quantities, as has France, that they are able to make America feel safe over there and furnish her with supplies.

Secretary BAKER. Absolutely; that is true.

The CHAIRMAN. But that has all been developed and evolved under the systems that France has been driven to and Great Britain has been driven to.

Secretary BAKER. Yes, sir; and we have adopted it. We have reached the place which they reached, and the reorganized Ordnance Department shown on these charts is the ministry of England, except that the Ordnance Department does not have the same relation to aircraft that it has in Great Britain.

Senator THOMAS. When did they reach that degree of efficiency? After how many months of the war did they reach that degree of efficiency?

Secretary BAKER. I do not remember when the munitions ministry was created.

The CHAIRMAN. In June, 1915.

Senator WADSWORTH. Mr. Secretary, you say that we have practically the same thing. I think that would be accurate if when this decision was made by the War Industries Board as to where the order should be placed for these goods, the War Industries Board placed them and inspected them in the course

of manufacture, and supervised the production, and handed them back to the Army.

Secretary BAKER. The only difference between those two things, Senator, is the question of whether the Chief of Ordnance and the Chief Signal Officer, and the Chief of Engineers, and the Chief Quartermaster, and the various persons in the Navy shall report to the chairman of the War Industries Board, or report to their respective chiefs. That is the only difference.

Senator WADSWORTH. The difference is this, Mr. Secretary: That after the War Industries Board, under your plan, decides where the goods can be produced, and the question of priority, then the system is scattered again.

Secretary BAKER. Yes.

Senator WADSWORTH. It goes back in the case of the War Department to five purchasing officers?

Secretary BAKER. Yes.

Senator WADSWORTH. Who place their respective orders and inspect them, and endeavor to speed up production?

Secretary BAKER. Yes.

Senator WADSWORTH. The testimony before this committee, I think, Mr. Secretary, points out very clearly that that is not a soldier's job.

Secretary BAKER. I am perfectly willing to admit that.

Senator WADSWORTH. But it goes right back to the soldiers.

Secretary BAKER. Not at all; not in the least.

Senator WADSWORTH. The inspection of the manufacture?

Secretary BAKER. Of course not.

Senator WADSWORTH. The speeding up of the program?

Secretary BAKER. Of course not.

Senator WADSWORTH. It goes back to the Chief of Ordnance.

Secretary BAKER. It goes back to some officers out of 3,700, who, when we went into the war, were inspectors in private industry, and who have since put on a uniform, but they are trained industrial experts. The mere fact that they wear the uniform does not make any difference in their expert capacity.

Senator WADSWORTH. It does make this difference, that they are subject to the military authority of their superiors, and that they are not independent of military authority.

Secretary BAKER. Nobody is independent in that sense. Inspectors are accountable to somebody. They would have to be. If you have them reporting to the chairman of the War Industries Board, they would not be independent of him.

Senator WADSWORTH. Of course they would not be, but would it not be better if they were accountable to the War Industries Board, or a munitions department, that had the industrial side of it alone to take care of?

Secretary BAKER. I think not. I think it would be better to have them report to the man who knows about the use of what they are to get.

Senator WADSWORTH. It is already decided what they are to get before it reaches that point.

Secretary BAKER. That kind of decision does not have quite the finality you attribute to it. In the process of manufacturing for the Army, for instance, variations are constantly made. New industrial processes are suggested. The question as to whether a particular part of a rifle will bear a tolerance of two one-thousandths instead of one one-thousandth is a question that has to be considered at the time the thing is going on, and the only people who can tell that are the experts.

Senator WADSWORTH. Perfectly true, but why can not they tell that to the industrial head and have him do it instead of trying to impose their authority on the manufacturing business of the United States about which they know very little?

Secretary BAKER. Let us take a particular case instead of a general statement of it. Suppose we were manufacturing heavy Browning guns in a factory.

Senator WADSWORTH. Yes.

Secretary BAKER. And the inspector who was there was told by the shop foreman that a particular piece which goes into that, not having a very rigid duty to perform, was much more easily made in quantity and much more easily made if a tolerance was allowed of one one-hundredth of an inch instead of one one-thousandth of an inch, as shown on the origial specifications. That inspector has no right to depart from instructions. Let us assume that he goes to the chairman of the War Industries Board and says to him, "These people tell me that one one-hundredth of an inch will do instead of one one-thousandth of an inch." What would the chairman of the War Board do about that? He could not decide it out of his head, and he would have to go to the Chief of Ordnance and report that, and the Chief of Ordnance would consult his engineering bureau to find out whether that larger tolerance could be permitted. The Chief of Ordnance would then report it to the chairman of the War Industries Board, and he would report it to his inspector, and he would go back and permit it.

If the inspector, instead of reporting that to the chairman of the War Industries Board, reports it directly to the Chief of Ordnance, he saves one step.

Senator WADSWORTH. To the munitions minister in England are detailed a sufficient number of experts to handle matters of that sort, so that the entire effort of producing the goods on a vast scale and conducting the inspections of these vast amounts of goods is in the hands of one department.

Secretary BAKER. Yes.

Senator WADSWORTH. Now, in this it is not.

Secretary BAKER. Yes; with regard to several things. That is to say, ordnance is in the hands of the procurement or the production department. The thing has gotten past the procurement department into the production state; the production department has had all there is to do with it.

Senator WADSWORTH. Is that all there is to do with it, Mr. Secretary, when there are other departments under your plan which will also be engaged in the same kind of work?

Secretary BAKER. There are no other departments.

Senator WADSWORTH. The Quartermaster General?

Secretary BAKER. Not at all. He will be in Lenox, Mass., while the ordnance chief is in Lowell.

Senator WADSWORTH. But there are five of these departments who will be engaged in that kind of effort?

Secretary BAKER. Yes.

Senator WADSWORTH. In England there is one.

Secretary BAKER. I think that is an appearance rather than a fact, Senator.

Senator WADSWORTH. That is so far as the Army is concerned.

Secretary BAKER. Of course, this is true. As you organize business the more it is centralized, the more efficient it is up to a certain point. Then, when you get to that point you reach the elastic limit of concentration and organization. You know that so well that I am dealing with platitudes when I say it, but many men, many business men have said that any enlargement of the United Steel Corporation, for instance, would be beyond the elastic limit of further organization; that the attempt to organize all of the railroads of the country into a single private management would probably be beyond the elastic limit of effective organization.

Senator WADSWORTH. But it is not supposed to be beyond it under governmental control?

Secretary BAKER. That is very different. Government control is very different. They are not there coordinating private interests.

Senator WADSWORTH. Is this in effect Government control of these industries?

Secretary BAKER. Yes. Now, it is not Government control of the industries; it is Government control of purchases.

Senator WADSWORTH. Does that not really involve control of the industry?

Secretary BAKER. It involves control of industries which the Government uses exclusively.

Senator WADSWORTH. Or in part?

Secretary BAKER. Well, perhaps those in part, too.

The CHAIRMAN. It can use all of them exclusively if it wants to.

Secretary BAKER. Undoubtedly.

The CHAIRMAN. So in the last analysis it is Government control of the industry?

Secretary BAKER. It is Government control of the industries which are in use and to the extent that they are in use it is control of them.

Senator WADSWORTH. So, if the Government can be intrusted to run all the railroads of the United States under this management, I should think another department of the Government could be trusted to run the industries.

Secretary BAKER. If the Government of the United States were running every railroad in this country, it is not to be supposed for a second that somebody here in Washington would buy all the spikes that are used on the Atchison, Topeka & Santa Fe and buy all the spikes that are used on the Maine Central at the same time. They have to use the organizations of those railroads scattered around over the country and break the railroads up into divisions for centralized control.

The CHAIRMAN. But it is all coordinated under one head.

Secretary BAKER. It is all coordinated here.

Senator FRELINGHUYSEN. As a matter of fact, some central authority would buy all the spikes, and he would direct where those spikes were to be sent.

Secretary BAKER. I doubt that very much, Senator.

Senator FRELINGHUYSEN. Certainly that is the way it would be done.

Secretary BAKER. I think there is a good deal of doubt about that. It seems to me that for a man in Washington to attempt to buy all the spikes needed on the railroads of the United States and distribute them from California to New Mexico and Maine and Vermont would be an impossible problem.

Senator FRELINGHUYSEN. It would be the easiest problem in the world. What he would do would be to buy the spikes that are needed on the Pacific coast of manufacturers on the Pacific coast, and direct where they should be sent. He would not buy them all at one place, but he would buy them at the nearest point where they were to be used. He would buy the spikes and make the price all over the United States. It would be a very simple proposition.

Secretary BAKER. But not at a uniform price all over the United States.

Senator FRELINGHUYSEN. Perhaps not.

Secretary BAKER. What he would have to do would be to send to California to find out the spike market in California, and then he would direct a contract according to the spike market in California, and he would do the same thing in New England.

Senator FRELINGHUYSEN. Of course, he would have that information of what the spike market was.

Secretary BAKER. No.

Senator FRELINGHUYSEN. And that would be the same in price, barring the difference of cost of raw materials.

Secretary BAKER. With great deference, there has never been made a human being who could have that information. He would have to send and get it.

The CHAIRMAN. He has it when he acts, though?

Secretary BAKER. He has it when he sends and gets it, and in the meantime a vast army of people have to be constantly getting it so it will be ready for use when he wants it.

Senator MCKELLAR. Is it not true that here we have the concrete example of the Navy Department, where all of these five divisions are concentrated in the hands of one man, and it is working splendidly? Why not profit by the concrete example of the Navy Department, which has been a wonderful success and in which all the men of the Navy have been properly looked after and the supplies of the Navy properly obtained and economically obtained? Why not do that?

Secretary BAKER. I think we are doing it, Senator. I am proposing to do it.

Senator MCKELLAR. No; in the Navy Department one man controls it, Admiral McGowan, whereas in the proposed plan that you have here, on page 2, five men control the purchase and supply accounts, and they are under an inferior officer. That is quite a difference.

I want to call your attention to this further fact: Will it not produce the greatest confusion to have the Surgeon General, who is a major general, and the Chief of Staff, who is a major general, and the Chief of the Engineering Department, who is a major general, and the Chief of Ordnance, who is, I believe, a major general, and the Quartermaster General, the same way, reporting to a man, or under the superintendence of an officer, who is a colonel in the Army?

Secretary BAKER. I do not think so.

Senator MCKELLAR. I differ with you.

Secretary BAKER. I suggested a remedy for that that is so easy that there is no difficulty about it. We can give Pierce any rank that is necessary.

Senator MCKELLAR. In which case I think you would offend every man that you promoted him over, and you would have confusion worse than it is.

Secretary BAKER. Oh, no.

Senator MCKELLAR. That is my judgment.

The CHAIRMAN. What is your serious objection, Mr. Secretary, to a secretary of munitions? I assume you have glanced over the bill I have drafted?

Secretary BAKER. I have, Senator.

The CHAIRMAN. What is your serious objection to a so-called secretary of munitions, a member of the Cabinet, and an office created during the existence of the war?

Secretary BAKER. Of course I have no right to comment on a question of adding a member to the President's Cabinet. That is a question on which I have no right to comment. My objection to the bill, as you have drawn it is, first, that it creates an impossible task. I think that the committing to a single agency, and all of the theorizing on the subject, deals with an individual, some one person who can decide. I think that no human being can be found who can decide all the questions which that bill would commit to an individual.

The CHAIRMAN. That is what you are doing. The Secretary of War practically does it here.

Secretary BAKER. Quite the contrary, Senator. I am dealing with the War Department needs only. You are proposing to give to a single individual the War Department needs, the Navy needs, the allies purchase needs, the Shipping Board needs. You would have to equip that individual with control over fuel, raw material; in other words, you would have an industrial dictator of the entire industry of the United States.

The CHAIRMAN. Well, of course no one man can do all of that except through organized agencies.

Secretary BAKER. Exactly.

The CHAIRMAN. What is to prevent such a man at the head of such a department from utilizing the governmental agencies to do that very work? You have undertaken to do it?

Secretary BAKER. Nothing is to prevent him from doing it, Senator, and he would have to do it of course.

The CHAIRMAN. Of course every one realizes that one man could not do it.

Secretary BAKER. Therefore, you would simply be changing from a thing which is already being done to the same thing done by another man with another name.

Senator KIRBY. Which necessarily would have to be done through the agencies already developed or to be developed.

Secretary BAKER. Exactly so.

The CHAIRMAN. But would you not save a duplication of work, Mr. Secretary? Here you have an organization which you have spoken of developed from less than 100 men to thousands of men, the Ordnance Department, the same way in the Quartermaster General's Department, and the same way in each one of these departments, and therefore why would there not be an economic saving by a combination of these several agencies?

Secretary BAKER. But, Senator, you are not proposing to combine them. You are proposing to subdivide them.

The CHAIRMAN. No, sir; we are proposing to put it under the head of one man who can consolidate and use any part or all or none.

Secretary BAKER. But you say "it," when you mean "them."

The CHAIRMAN. I mean the secretary of munitions.

Secretary BAKER. What you are proposing is to have the secretary of munitions take over the construction and the contracting divisions of a large number of enterprises which thereafter will have to correlate and coordinate with the new man. In other words, instead of the Secretary of War being able to decide a question which involves a correlation of military men and civilian production, you would have the Secretary of War being obliged to submit his judgment on that to the secretary of munitions, who is a civilian, and who knows nothing about the military men or the men who use the thing, and instead of having the Secretary of War's decision final on that question you have him going as an advocate for a particular view before a nonmilitary tribunal.

Senator WADSWORTH. That very thing has worked with marked success in England.

Secretary BAKER. Quite the contrary, Senator. I saw a few days ago in the New York Times a very carefully written article describing the confusion which exists in England by reason of the fact that it has not worked with marked success. That it is a vast advance over what they had at the outset goes without saying, just as this is a marked advance over what we had at the outset.

An improvement should not be revolutionary, which means stopping and starting, but should be progressive.

Senator FRELINGHUYSEN. Has there been any indication that the British Government is thinking of dispensing with the minister of munitions?

Secretary BAKER. Not that I know of.

Senator FRELINGHUYSEN. My information has been that it has brought order out of confusion, and that the British public and Government would not think of changing the system.

Secretary BAKER. In the first place, I do not know the British system sufficiently to criticize it, but I refer to the fact that it has not been deemed universally to have accomplished all the things on some hands that are claimed for it; but the history of the British ministry of munitions and of the growth and development of that ministry as a supply department for the army shows two things: First, it deals with relatively few of the supplies. It is a large ordnance and aircraft program dealing not with aircraft for the navy, not with navy supplies, not with quartermaster supplies, not with food supplies, but dealing only with munitions. So that it is in effect, as I said a moment ago, a glorified ordnance department. That is what it actually is. The history of its growth and development in England shows exactly parallel steps to what has happened here. Originally there was confusion by reason of the vastness of the program and the necessity of training new men, giving

them both military knowledge and using their civilian talents, their coordination into this glorified ordnance bureau, subsequent success, gathering up the previous steps and adding to them, and that is exactly what this does.

Senator FRELINGHUYSEN. Did you consult the representatives of the English Government who were familiar with the methods over there?

Secretary BAKER. Yes, sir. I have not recently consulted them, but when each of those missions were here I consulted many times and for long times together with the people who represented the munitions ministry.

Senator FRELINGHUYSEN. About these particular details?

Secretary BAKER. Not about all of them. The chief problems which the munitions minister has had to solve has been the labor problem. The labor division of the British ministry of munitions is the one which apparently they have had to put most accent on. At the time that the agitation for the munitions ministry was in the newspapers in England, the question which seemed to call for some further coordination was the labor problem, and a correct solution of that, so that the most conspicuous success of the munitions ministry in England has been in its coordination of the labor of Great Britain in the manufacture of munitions. That problem has not troubled us. I do not mean that it is an easy problem and that it is without difficulty, but I mean it has not given rise to any halt in the program.

Senator FRELINGHUYSEN. It has given rise in some direction; for instance, in the shipping program.

Secretary BAKER. Yes; it has been difficult.

Senator FRELINGHUYSEN. Have you consulted the French Government about their methods of handling the same general proposition?

Secretary BAKER. Yes; I have talked with them, but not very recently.

Senator FRELINGHUYSEN. Have you any reason to think from the advices that you have received on this side that this is materially better than would be a single head?

Secretary BAKER. You mean the plan I am exhibiting here to-day?

Senator FRELINGHUYSEN. Yes. I want to say before you answer that, that undoubtedly this plan is an advance on what we have had. It is perfectly apparent that that is true. It is a very complicated plan, and it is difficult for one to gather all the features of it in a single sitting; but have the men who would naturally advise about matters of this sort approved of this plan—the advisory committee, for instance?

Secretary BAKER. You mean the advisory committee of the Council of National Defense?

Senator FRELINGHUYSEN. Yes.

Secretary BAKER. I can not say that they have, Senator. Let me illustrate what I mean by that. The advisory committee of the Council of National Defense has on it Dr. Martin, Dr. Godfrey, Mr. Coffin, Mr. Willard, Mr. Baruch, Mr. Gompers, and Mr. Rosenwald. Mr. Willard, who is the chairman of that board, is in daily conference with many of those members, and in frequent conference with the advisory commission has given his approval to this entire plan. A portion of it is the result of his own work.

Senator FRELINGHUYSEN. Does he approve of this plan?

Secretary BAKER. I understand so.

Senator FRELINGHUYSEN. Has he told you that he does?

Secretary BAKER. He has told me that he did.

Senator FRELINGHUYSEN. Is the President correctly reported in this morning's paper as being opposed to a single head?

Secretary BAKER. I can not quote the President.

Senator FRELINGHUYSEN. That would not seem to be an improper thing to do. I would not expect you to quote the President, generally speaking, but he is quoted in the paper, and I do not know whether he was correctly reported.

Secretary BAKER. He is not quoted in the paper through me, Senator, and I can not quote him.

Senator FRELINGHUYSEN. Do you know whether the advisory committee of the Council of National Defense has considered this question?

Secretary BAKER. So far as I know, the advisory committee of the Council of National Defense as a body has not considered this plan. I feel quite certain that Mr. Willard's approval of it reflects the approval of Mr. Baruch and Mr. Rosenwald. Beyond that I do not know. But I do know that this plan, both in its details for the bureaus of the department, for the coordination of the department, for the establishment of relations of the several departments through the War Industries Board has had the serious and prolonged study of the best civilian organizing genius in the country.

The CHAIRMAN. That is your proposed plan?

Secretary BAKER. This plan as it is now.

The CHAIRMAN. You put it up as a plan. Did you put it up in discussion with any other plan?

Secretary BAKER. Of course, Senator, if I may enlarge your question to mean what I gather from it, you ask me whether I have asked the opinion of experts as to this plan in comparison with the ministry of munitions?

The CHAIRMAN. Yes.

Secretary BAKER. I have asked a great many that and I find a wide divergence of opinion.

The CHAIRMAN. Do you not find the consensus of opinion amongst the members of the War Council and the Council of National Defense rather favoring the consolidation of these bureaus under one ministry of munitions?

Secretary BAKER. No, I think not.

Senator MCKELLAR. Mr. Secretary, have you submitted your plan to the Council of National Defense proper; that is to say, the six Cabinet officers?

Secretary BAKER. Yes.

Senator MCKELLAR. And they have approved it?

Secretary BAKER. Yes. They have taken no action about it I exhibited it to them. Secretary Daniels and I, who were primarily affected in the matter, went over it carefully and approved it. I showed it to Secretary Lane and Secretary Houston and Secretary Wilson. I do not recall whether others were present at the time or not.

Senator BECKHAM. Mr. Secretary, if there was a secretary of munitions, would he not have to have substantially the same kind of an organization as is shown here, subdivided into these different branches, such as surgeon general, chief signal officer, engineers, ordnance, and quartermaster?

Secretary BAKER. Senator, he would have to have most of them. The suggestion is that a good many of the existing persons could be transferred to his department and that some would remain, but I think, I have no basis for the thought except as I try to think out loud, that it would increase the number of persons needed, because each of the departments from whom men were taken would have to add men and the munitions minister would have to add men.

Senator BECKHAM. He would have to do the work through some such similar subdivisions or organizations in this department?

Secretary BAKER. I think so.

Senator BECKHAM. Just as the chief of the purchase and supply division will have to do it.

Secretary BAKER. Exactly.

Senator BECKHAM. So, in the end, it is really merely a controversy over terms, whether we have a secretary of munitions or a chief of that branch of the work in the War Department, is it not?

Secretary BAKER. Not exclusively. There is this difference: If a minister of munitions were created by law he would have legal authority back of his decisions, while the chairman of the War Industries Board has not the basis of law for his decision. Now, with that distinction aside, there is no difference in function between the two plans proposed. With the President first in command of all the executive departments, and his supervising approval of our coordinating in the fashion here shown, I think there is no defective power nor uncertainty of action in the plan proposed.

Senator BECKHAM. You think, then, that you will get just as much unity and concentration and efficiency of service under this as you would if the man at the head of this organization was a secretary of munitions?

Secretary BAKER. I think so, sir; and if it should turn out otherwise, it would be a very simple matter to come and say to you gentlemen that the chairman of the War Industries Board needed additional authority, and you undoubtedly would be willing to grant it if the need developed.

Senator FRELINGHUYSEN. Mr. Secretary, I dislike exceedingly to quote him, and I am not going to quote him by name, but two of the gentlemen to whom you have referred as probably in favor of this plan, and two of the most active general members of the Committee of National Defense, to those two, I am told, and I think without any question that one of them went to the President and advised the President that in the end if we did not do it now we would have to come to a single head. One of the others, and a man for whom I have the highest regard, told me last night that after a careful investigation of this situation he had come to that conclusion that there was no escaping a single head for this purpose, and that if we did not do it now we would do it later.

Secretary BAKER. Senator, I know that to be the fact. I do not know who the two members are.

Senator FRELINGHUYSEN. I do not wish to give the names.

Secretary BAKER. It does not matter who they are. While we were in the process of reaching the place where this form of organization was possible, there was a very great deal of recklessness on the part of everybody who wanted to go forward fast. The mind naturally ran to a munitions ministry as the way some other country had solved it. Mr. Willard, for instance, was quite clear that ultimately we would have to come to the single head, the munitions minister. When we finally got down to it and showed him how the organization would be perfected and was being perfected, and what its relations were, Mr. Willard said very frankly, "I was of that other opinion; I think this will work, but if it does not work at once, or absolutely right, as a matter of organization, the one missing thing will be very easy to supply." Mr. Willard having originally believed that we would have to come to the single minister, realizing the inconvenience of it and the duplication that it necessarily entailed, now believes that this will work and that if it does not work that it is exactly the right step to take now.

Senator FRELINGHUYSEN. How recently have you talked to Mr. Willard?

Secretary BAKER. Yesterday.

Senator FRELINGHUYSEN. And he told you that yesterday?

Secretary BAKER. Yes, sir.

Senator KIRBY. Mr. Chairman, if we are not to continue longer, or if we are to continue after recess, I think it is time for lunch, and if we are not to continue to-day, to continue to some other time. Of course, if we are going to continue the examination and conclude the entire examination now I have no objection to continuing here until it is finished.

The CHAIRMAN. It is in the control of the committee.

Senator KIRBY. I suggest that we take a recess.

The CHAIRMAN. Until what time?

Senator KIRBY. Until Monday. If we could not finish until Monday, unless we can finish this afternoon. If the committee thinks we can finish the entire investigation this afternoon, I say it ought to be finished.

The CHAIRMAN. What is the pleasure of the committee?

Secretary BAKER. My time is entirely at your disposal, gentlemen.

Senator KIRBY. I move that we adjourn until Monday, unless it is the consensus of opinion that we can finish this afternoon.

Senator HITCHCOCK. I think we should go on this afternoon.

Senator KIRBY. I move that we take a recess until half past two.

Senator HITCHCOCK. I second the motion.

The motion was carried.

(Thereupon, at 1.20 o'clock p. m. the committee took a recess until 2.30 o'clock p. m. on the same day.)

AFTER RECESS.

The committee reconvened at 2.30 o'clock p. m., Senator HITCHCOCK presiding.

The ACTING CHAIRMAN. The committee will please come to order. The chairman is compelled to leave and asks me to take the chair. At the time of the taking of recess the Secretary was still engaged in explaining the work of his new organization.

Secretary BAKER. I had finished that so far as I had any contribution to make, unless questions are to be asked.

The ACTING CHAIRMAN. Are there any other questions to ask the Secretary as to the changes which have been made in the department?

Senator WARREN. Under this scheme, Mr. Secretary, each one of these agencies, as depicted on the charts, would have the duty of speeding up and organizing the industries.

Secretary BAKER. The War Industries Board would have knowledge of the general industrial condition of the country for the use of the various departments which are coordinated to it.

Senator WARREN. Would they have the power to speed up and issue orders?

Secretary BAKER. No. If the War Industries Board were to recommend the placing of a contract for a thousand rifles with the A. B. C. factory the progress of that order through that factory and the power for speedier production would lodge with the production department of the Ordnance Department.

Senator WARREN. Then, if an addition was thought necessary to the factory it would be the Ordnance Department which would conduct negotiations for that?

Secretary BAKER. The Ordnance Department; yes, sir.

Senator WARREN. And in the case of uniforms for troops it would be the Quartermaster Department to conduct negotiations for them?

Secretary BAKER. Yes.

Senator WARREN. Then, in that regard the speeding up of industrial operations of the actual increase of productive capacity would be subject to the jurisdiction of four or five departments in the War Department?

Secretary BAKER. As to each industry only one, but as to several industries, several.

Senator WARREN. As to several industries, several?

Secretary BAKER. Yes; that is to say, the Ordnance Department will speed up production in a factory producing ordnance material, and the Quartermaster General's Department in a department producing quartermaster's stock.

Senator WARREN. Then, if an increased supply, we will say, of saddle blankets was thought necessary, increase in the productive capacity, that would be attended to by the Ordnance Department?

Secretary BAKER. I think they would both be in the Quartermaster Department.

Senator WARREN. But the blankets for the men would be attended to by the Quartermaster Department?

Secretary BAKER. Yes, sir.

Senator WARREN. Does this new scheme contemplate any change in the functions of the War Industries Board?

Secretary BAKER. A very wide change, Senator. The War Industries Board, up till now, has dealt with the question of selecting contractors, recommending them to the several departments, to supply committees of the industry. Most of that funcion is no longer left with the War Industries Board. It deals with the capacities and facilities of the country as a matter of information, while the actual making of the contracts and making of the terms of the contracts is left in the department itself and not in the War Industries Board, so that nobody who gave information on the War Industries Board, or was consulted by it, would have any sort of relation to a contract for supplies in which he might be interested, or in which he had a similar interest.

Senator WARREN. The question of housing the men, for instance, additional home facilities for workmen who were called upon to come to a town where a factory was located without housing facilties, the question of those increased housing facilities would come to the Ordnance Department if the factory happened to be making ordnance, and to the Quartermaster's Department if the factory happened to be making Quartermaster's supplies?

Secretary BAKER. Probably ultimate, yet there would be one intervening step. The whole question of labor supply in this plan is remitted to the Labor Department, and the question of moving a body of labor from one place to another, and the conditions under which the labor, when moved, would live and work, is in the Labor Department rather than in either the War Industries Board or the War Department.

Senator WADSWORTH. Mr. Secretary, do you not think that section ought to be handled by the supply department?

Secretary BAKER. It would have to be handled by the supply department on the advice of the Labor Department.

Senator WADSWORTH. Why bring the Labor Department into it?

Secretary BAKER. Because this is the only department that knows or has means of knowing.

Senator WADSWORTH. Could not the War Industries Board have a bureau under it which could take care of that so the whole thing could be coordinated?

Secretary BAKER. Yes; perfectly possible, but it would duplicate nine-tenths of the work already done by the Department of Labor.

Senator WADSWORTH. Proper executive orders, of course, could prevent that duplication, could they not?

Secretary BAKER. No; I think not. I think the labor the War Department was doing would have to be done, nevertheless, because it is only part of a larger work. The places where the two fields rather meet that contract are the places where there would be duplication of effort.

Senator WADSWORTH. Then, as I understand it, it is your idea that under this system the question of housing would be under the Labor Department?

Secretary BAKER. Yes.

Senator WADSWORTH. I thought it was somewhat closer and more intimately related to this whole industrial proposition, or problem, which is a big side of it, the industrial side, that it would be wise to concentrate it so it would work singly.

Secretary BAKER. It is probably the most difficult problem we have. At present it is being met in this fashion: The several departments, possibly the Ordnance Department. I do not know of an instance in the Quartermaster Department; all the cases I know are either in the Ordnance Department or in the Shipping Board, but a committee is working on that, headed by

Mr. Eidleitz. When a contract is about to be placed at a particular factory they inspect the housing facilities as to their adequacy, and, in the way of supplementing them, whether by increased transportation facilities or by a better use of existing housing facilities, or by adding to them, and by contracts which provide for plant extension an effort is made to decide the housing problem.

Senator WEEKS. What do you mean by a housing expert?

Secretary BAKER. I mean by that, such a man as Mr. Eidleitz, who for a great many years has studied the problem of housing industrial workers.

Senator WEEKS. Where?

Secretary BAKER. In New York, I think. Mr. Eidleitz is relatively unknown to me, but he came to me recommended as the most expert person in the country on the subject.

Senator WEEKS. Recommended by whom?

Secretary BAKER. I could not recall all the persons who agreed to that, but among them Mr. Gompers, Mr. Ralph Easley, Secretary Wilson, I think—I am not sure of Secretary Wilson—and a pretty large and representative committee of coworkers and employees who were studying the question at the outset.

Senator WEEKS. Has he been a builder of houses or simply studying the welfare conditions?

Secretary BAKER. I think he has been a builder of houses.

Senator FLETCHER. Mr. Eidleitz testified before the Commerce Committee yesterday that he and his firm had been architects and builders for a great many years in New York and had large experience in the construction of buildings. He is an architect, I think, mainly, and a contractor, too.

Senator WADSWORTH. You say he is working with the Labor Department now?

Secretary BAKER. He will work with the Labor Department, but at the present moment—what I meant to say is he is working with a representative of the Ordnance Department and with the Shipping Board and with the Navy. They have a conference committee, with Mr. Eidleitz at the head of it, and they are attempting to deal with each case as it arises by inspection and representation.

Senator WADSWORTH. Just such a case as that to my mind is a pretty good illustration. Why would it not be better for him to work with the War Munitions Board, which is at the top of the pinnacle, according to these charts, of this whole program?

Secretary BAKER. Senator, if he were to view comprehensively the housing problem, he would have to work with two others who have dealt comprehensively with the general labor problem. Housing, of course, is not merely a question of finding a place for the man to eat and sleep, but it is a question of finding a place where a man may take his family when he moves from one place to another.

Senator WADSWORTH. Yes; I understand that.

Secretary BAKER. And it is a question of contented labor as well as mere protection, so he would have to take it in with the general labor problem.

Senator WADSWORTH. Does not the general labor problem naturally fall under this heading?

Secretary BAKER. It is so related that it has to be worked out in conjunction with it, but I do not think it ought to be regarded as so inseparable a part of one problem that one man has to do both, nor do I think it would be wise for one man to try to do both.

Senator FLETCHER. What does the department do with respect to housing?

Secretary BAKER. Different things in different places, sir. For the most part the relief so far actually extended has been in better transportation facilities. Take, for instance, the Locust Point situation in Baltimore, where a very large number of men are employed in shipbuilding. The first suggestion made there was the immediate erection on a very large scale of small houses. Upon investigation it was found that the men who worked at Locust Point preferred to live in Baltimore itself; they would not relish going to Locust Point to live, because of the lack of public school facilities for the children; it was remote from the different markets; it separated them and their families from recreation and amusement facilities of the city. As a consequence some additional transportation facilities in the way of additional trains on the railroads, and I think a boat or two making trips during the day shortened the time and relieved that situation. It may be necessary yet to build some houses there, but the relief so far has been chiefly in transportation facilities.

Senator WADSWORTH. Have you actually built houses anywhere?

Secretary BAKER. I think not, although at the Bethlehem Steel plant and the Midvale and perhaps others, in providing for largely increased plant facilities there was had in contemplation the fact that additional housing facilities would have to be provided.

Senator WADSWORTH. In this contemplation do you consider you have the appropriation and the authority for it if it becomes strictly necessary?

Secretary BAKER. In those two instances, yes, because there it can be included in the cost of the production and amortized. In the powder plant which the Government proposes to build, a very large housing scheme is included as part of the cost of the plant, and that is true of some others, but maybe we shall have to come to Congress and ask further authority and appropriations.

Senator WADSWORTH. I think we provided especially in the proving grounds something of the sort.

Secretary BAKER. Undoubtedly. That is remote from any central place of habitation.

Senator WADSWORTH. Had you become familiar with the housing problem in England since the war?

Secretary BAKER. Yes; I had studied that very carefully. It is of course just as different as the places are different. They have done everything in England under the munitions ministry; in some places they have aided the cities; in some places commercial bodies have aided; in some cases they have made plans by which sales could be made to a worker on the rental basis, covering the equity in the case only by governmental appropriation, but there is no uniform rule and no uniform practice.

Senator WADSWORTH. Our understanding was it was all done under the munitions ministry.

Secretary BAKER. It is all done under the munitions ministry, but each problem is taken up separately and the local possibilities exhausted.

Senator WADSWORTH. That would have to be the case in this country.

Senator WARREN. I am assuming the policy of the War Department is to first make use of existing facilities and adapt them as far as you can before entering in upon the construction of new dwelling houses.

Secretary BAKER. Yes, sir.

Senator FLETCHER. I think you will find this question of transportation very often is more important than the one of housing, and the question might be whether you had the power to commandeer, for instance, street car lines and other means of transportation. Have you examined as to that to see whether that power exists?

Secretary BAKER. I would not have any doubt about the power to commandeer any means of transportation. There is very grave doubt about the power of the Government, under existing law, to commandeer places of residence.

Senator WEEKS. When was Gen. Goethals appointed?

Secretary BAKER. I am sorry, but I can not answer that question, Senator.

Senator WEEKS. Do you remember about when?

Secretary BAKER. Well, it was near the 15th of December, so near that that date will suffice. I saw him and went over the plan with him and he went away and took several days to consider as to whether it was a plan he approved and thought he could justly say appealed to him sufficiently to be an attractive opportunity of service.

Senator WEEKS. Had he undertaken any plan of organization or done any work—thought about this general scheme which you have submitted to the committee?

Secretary BAKER. No; he had not until he came here.

Senator WEEKS. Did you submit to him what had been prepared?

Secretary BAKER. Yes; I did not personally submit it to him, but it was submitted to him. The experts previously secured by Gen. Sharpe, and in conjunction with Gen. Sharpe they took up their consultation with Gen. Goethals.

Senator WEEKS. Did it occur to you that in adopting this plan that possibly the committee might have some recommendation to make as a result of the examinations that are being made?

Secretary BAKER. Practically everything that I have done, Senator, I have done with regard to this—was conceived and in process of execution before the committee met—practically everything.

Senator WEEKS. Did you think that it might be wise to wait until the committee had completed its examination?

Secretary BAKER. No; that never occurred to me.

Senator WEEKS. As a method of cooperation, do you not think it would have been well?

Secretary BAKER. Why, no, Senator; I think not. Everything that had been done up to the last thing that was done headed up to that, and it seems to me that after the committee began to consider the problem the committee, it seemed to me

laid most accent on the delay, and to have delayed any further would have been to justify the feeling on the part of the committee that delay was the thing I was doing.

Senator WEEKS. You do not mean the purpose of delay?

Secretary BAKER. Quite the contrary. I mean that so far as I could discover these things which the committee has found open to question about the action of the department is there has been delay here and there. Now, it does not occur to me to make any delay; I have tried to avoid making delay; it never occurred to me to make any.

Senator WEEKS. Of course the committee's one purpose was to see whether there were things to be jacked up.

Secretary BAKER. I was not anxious to hold anything in status quo, so I never could find anything to jack up, so I never jacked anything up before I found it. I have been running away with myself for eight months, Senator, and I have never stopped a second.

Senator WEEKS. I wondered if you were moved, in adopting this plan, by that very sentiment.

Secretary BAKER. No; I was not moved by that.

The ACTING CHAIRMAN. This change, by which the initiative is left with the Government purchasing agent and the War Industries Board, comes in as a secondary authority, has been made as the result of experience, has it, Mr. Secretary?

Secretary BAKER. Yes, sir; we have been aiming to that, Mr. Senator, ever since the beginning.

The ACTING CHAIRMAN. Do you think that will reduce the delays that may have resulted by having two bodies pass upon the matter?

Secretary BAKER. Undoubtedly.

The ACTING CHAIRMAN. Has any such method of prosecuting the war been adopted by any other country, as the war council?

Secretary BAKER. The war council?

Senator WEEKS. That may not be the correct title of the new board that has just been appointed.

Secretary BAKER. You mean the one which I called the war council in this chart?

Senator WEEKS. Well, the one——

Secretary BAKER. Gen. Sharpe, Gen. Crozier, Gen. Weaver, and so on?

Senator WEEKS. Yes.

Secretary BAKER. I do not know. It is substantially the same, as I understand it, as the board which exists in the British war office.

Senator WEEKS. Does exist now?

Secretary BAKER. Yes; and has from the beginning existed there.

Senator WEEKS. I noticed in one case, in the case of Gen. Sharpe, he did not remain at the head of the board, and in the other case Gen. Crozier does. Is there any particular reason for that?

Secretary BAKER. The statement is inaccurate, Senator. They both remain, respectively, as Chief of Ordnance and Quartermaster General, both on detached service, and neither has any more connection with his department than the other.

Senator WEEKS. In one case, I assumed in the case of Gen. Sharpe, that all of his duties, even if the title had not been turned over to Gen. Goethals, while in the other case Gen. Weaver was simply acting in the place and under the direction of Gen. Crozier?

Secretary BAKER. That is not the fact. Gen. Weaver is acting in the place and acting independently, and Gen. Goethals is acting in the place and acting independently.

Senator WEEKS. You mean Gen. Crozier will not have anything to do——

Secretary BAKER. So long as he is detailed to the war council he will have nothing to do with the Ordnance Department. He is in the war council.

Senator MCKELLAR. Why, then, was he recommended for Chief of Ordnance and his nomination sent in to the Senate?

Secretary BAKER. That recommendation was made in midsummer; Congress was not in session; it met with the President's approval and was sent down here as soon as the Congress assembled, but in any event I think it was a proper recommendation to be made.

Senator MCKELLAR. If he was not to have charge of the ordnance, why not, upon ascertaining that fact, or coming to that conclusion, why not withdraw his nomination and nominate him for some post that he is going to occupy, not for a post he is not going to occupy?

Secretary BAKER. His detail to the war council is subject to the continuing pleasure of the Secretary of War, and he might be detached as operating chief of ordnance at any time if the Secretary of War so determined.

Senator WEEKS. Would Gen. Sharpe be in the same category?

Secretary BAKER. Exactly; they are both subject to the action of the Secretary.

Senator WEEKS. Are you personally satisfied with the work those two officers have done?

Secretary BAKER. Why, yes; I am perfectly satisfied under the circumstances they did the best that could possibly be done.

Senator WEEKS. The best that anybody could do?

Secretary BAKER. I can not answer that. There are too many people in the world. I do not know.

Senator WEEKS. Any one that would have been likely to have been in that place?

Secretary BAKER. I am perfectly certain that there must be hundreds of men who could now look back on the experiences of the past and suggest ways in which other things might have been better done; but that anybody could, at that time, with the information they had at their disposal, do better, I am not prepared to believe.

Senator MCKELLAR. Is not the natural result of action by boards delay, is it not, to complete my question, is it not true that wherever executive action has to be submitted to a number of men and passed upon by a number of men, that the result is a greatly delayed result, over an action by individuals?

Secretary BAKER. Yes, sir; I think so.

Senator MCKELLAR. Then, would it not be better in any scheme of operation of the War Department at this time to have, as one witness expressed it here the other day, a "he" man in charge, and enough of "he" men under him to get action and to get it rapidly?

Secretary BAKER. In charge of what?

Senator MCKELLAR. In charge of the entire conduct of the war.

Secretary BAKER. Senator, I can not answer that. Of course, if you want my opinion as to whether a "he" man is better than some other kind of man, presumptively the more vigorous and virile men you get the better you are off.

Senator MCKELLAR. You mistook the question. I mean, do you not think it is better to have a man in charge rather than a board in charge of so many things? For instance, we have the Council of National Defense and a Munitions Board and a General Staff and a War College, and now it comes along and we have a Council of War. Apparently many of them are doing the same things, or their duties are so interwoven that I doubt whether one board knows what it really has authority over. Would it not be better to have it all under one man and just let him do the thing rather than have these correlated boards with divided authority and very doubtful jurisdiction?

Secretary BAKER. If you had an omniscent and omnipotent man, he would be far better than any multitude of mortals. Wherever you multiply persons, you presumptively increase wisdom and decrease speed. The object of the organization as designed is to get every question up to an individual to the extent that that is possible, but it does not obviate the necessity nor can it be obviated of a council in order that accuracy may follow speed.

Senator WEEKS. I had not thought of asking this question, but is not what is being done in the war council directly contrary to what is being done in the General Government? Congress is frequently asked and constantly turning over to the President unusual powers, not to a board and not to a department, but to one man.

Secretary BAKER. I do not want to criticise any action of Congress in the matter, Senator.

Senator WEEKS. Congress is simply doing what is recommended by the administration.

Secretary BAKER. After all, what Congress has done has been to give certain general powers to the President, and leave to the President the allocation of the exercise of those powers. Many of the functions thus conferred involve broad problems of great intricacy, about which individual judgment, unaided by counsel, perhaps would not be wise. I am not disposed to criticize what has been done.

Senator WEEKS. I do not mean to put words in Senator MCKELLAR's mouth or thoughts in his head.

Senator MCKELLAR. Go as far as you like.

Senator WEEKS. But I thought what you said lead to that conclusion.

Secretary BAKER. Of course the main purpose of this discussion was in regard to the organization already submitted, and it seems to me, taking the Senator's own argument, that it is very much better to leave the thing coordinated under the Secretary of War than it is to discoordinate it, than to create a ministry of munitions.

Senator MCKELLAR. Very frankly, my objection to your plan is, if I understand it, and I think I do, you have decentralized the operations of the department under five distinct heads; you have five distinct purchasing agencies of the War Depart-

ment, and I think such a decentralization of power at this time, when we have centralized power in every other department of Government and in the Government itself, is a plan that will not work, and I am very frank to say to you that I disagree with that plan. I think it ought to be under one man.

Secretary BAKER. But that is not what I have.

Senator KIRBY. Is it not under the Secretary of War?

Senator MCKELLAR. It is the purchasing agents there, of which there are five.

Secretary BAKER. What I have done, however, is not to subdivide, but to centralize five separate functions under a central, single executive direction.

Senator HITCHCOCK. Those agencies have not heretofore been centralized?

Secretary BAKER. They have not been, except as the Secretary of War personally centralized them.

Senator WEEKS. I was going to say they had always been under your direction.

Secretary BAKER. In the original scheme of the War Department organization, they are reported directly to the Secretary of War. They are now brought together in a single focus and correlated in this supply and purchase section.

Senator WEEKS. Of course, no one can tell whether this is the best plan, but in your judgment it is an improvement over what we have had and will answer the purpose; is that correct?

Secretary BAKER. Exactly, Senator. More than that, I think it is the logical development of all which has gone before it.

Senator WEEKS. That is, the logical development of all up to this point?

Secretary BAKER. Up to this point.

Senator FLETCHER. Based upon your experience it is?

Secretary BAKER. It is the outgrowth of the experience of the department.

The ACTING CHAIRMAN. Suppose instead of being one war industries board, directly subordinate to the Council of National Defense, there was a war industries director?

Secretary BAKER. In fact it is that.

Senator HITCHCOCK. Who directs it?

Secretary BAKER. The chairman of the War Industries Board. Mr. Willard.

The ACTING CHAIRMAN. He has four associates?

Secretary BAKER. More than that. He has the three ally purchasing commissioners, Messrs. Lovett, Baruch, and Brookings; he has an Army representative, Gen. Beatty, and a Navy representative, Admiral Fletcher; also a representative of labor, Mr. Franey.

Senator WADSWORTH. Now, Mr. Secretary, these five purchasing agencies in the five departments are the ones which have the intimate contact with the manufacturers, are they not?

Secretary BAKER. Yes.

Senator WADSWORTH. So that under their jurisdiction will practically fall the industrial problems at close quarters?

Secretary BAKER. Under their jurisdiction will fall the industrial problem so far as it affects the purchase of supplies for which they are contracting.

Senator WADSWORTH. Of course, take it, for instance——

Secretary BAKER. Allow me to complete that, because I do not want to be confused in my answer. I do not mean to say they deal with the industral conditions of the country.

Senator WADSWORTH. They are dealing at close quarters with the industrial problem, so far as concerns supplying the Army of the United States?

Secretary BAKER. Yes.

Senator WADSWORTH. Do you think they can do that?

Secretary BAKER. I have not the least doubt about it.

Senator WADSWORTH. I have a great deal of doubt, Mr. Secretary. The chiefs of these departments, who must carry the responsibility in the initial negotiations, in the first place, are not men versed in industrial conditions.

Secretary BAKER. I think that assumption, Senator, is at variance certainly with the intention in the matter. Mr. McRoberts, for instance, who has actually been in business and is operating as the head of the procurement section of the Ordnance Department, is a man of large experience with exactly that kind of problem in civil life?

Senator WADSWORTH. He has been commissioned?

Secretary BAKER. Yes.

Senator WADSWORTH. And he is subordinate to Gen. Wheeler?

Secretary BAKER. Yes.

Senator WADSWORTH. Then, if Gen. Wheeler disagrees with Mr. McRoberts, Gen. Wheeler has the say?

Secretary BAKER. Yes.

Senator WADSWORTH. I think that is a mistake, on the industrial side.

Secretary BAKER. Well, the mistake runs all the way through, because if he disagrees with Gen. Wheeler, Gen. Wheeler can overrule him, and if I disagree with Gen. Wheeler I can overrule him, so it finally gets back to the Secretary of War, where it must come.

Senator WADSWORTH. Under your plan it must?

Secretary BAKER. Under any plan, if you are going to coordinate the needs of the man who uses an arm with the views of the man who makes it. Somebody has to be that coordinating agency. You can call him Secretary of War; you can call him anything you choose to; but there has to be one person whose mind will function on that problem and reach a conclusion.

Senator WADSWORTH. I am surprised to hear you insist on that as the only suggestion, when, to the best of my information, other countries have reached a different solution and are carrying it out successfully. They have apparently taken away from the military branches of their Governments the function of production and purchase, and have put it under the charge of men, the biggest men they can find, that are thoroughly informed on that side of the question.

Secretary BAKER. Senator, we have done that for generations in the American Army, and the greatest criticism I would make of the organization of the War Department, as I found it, was exactly that it did that thing.

Senator WADSWORTH. In what way did it do it?

Secretary BAKER. It created of the Ordnance Department a manufacturing industrial board, and it gave to the men who were in the Ordnance Department, the officers, certain preferential rank by reason of their being there. It separated them from the line of the Army so they did not have the experience of using the things they manufactured, and they had the point of view, or tended to have the point of view, of a manufacturer rather than a man who is seeking a customer, or a man who knows the customer's needs.

Senator WADSWORTH. The testimony that has come to this committee is not to that effect, Mr. Secretary, if I may say so. The criticism has been that the officers in the Ordnance Department do not understand the manufacturers; that they are merely tacticians.

Secretary BAKER. That is another criticism; but it does not militate at all against the existence of the other one.

Senator WADSWORTH. I stated it was my idea, my impression, that foreign governments had taken the industrial problem away from the military.

Secretary BAKER. Yes.

Senator WADSWORTH. In reply to that you state that is just what we have done in the Ordnance Department.

Secretary BAKER. I still state it.

Senator WADSWORTH. But the Ordnance Department is military?

Secretary BAKER. It wears uniforms and has titles.

Senator WADSWORTH. And graduates from West Point?

Secretary BAKER. Yes.

Senator WADSWORTH. And has never been in business?

Secretary BAKER. Exactly. It has never been in the Army, either. Gen. Crozier has not led troops, Gen. Wheeler has not led troops; Gen. Babbitt, Gen. Bell, and others have been manufacturers at the head of the Rock Island Arsenal or the Springfield Arsenal.

Senator WADSWORTH. They have on a very small scale been manufacturing.

Secretary BAKER. There were not many of them. Take the kind of controversy which arose in the Army. You have had detailed here to you the machine-gun controversy, and you have had, doubtless, the view expressed by Gen. Wood. Gen. Wood was a man who saw weapons as men use them, and he had one view; Gen. Crozier was a man who saw weapons as a mechanical expert, was able to judge them from a mechanic's view, the scientific and mechanical excellence of the Army itself. Now, controversy arose between those two men. It would have been very much better, I think, if Gen. Crozier had commanded troops in the field. I have recently asked the Senate to confirm Gen. Babett as a brigadier of the line in the Field Artillery. I think it is wise for a man to serve there for awhile and then go out and see service with the troops and actually use the things they make, and then come back to the Ordnance Department.

Senator WADSWORTH. Yet the intimate contact still is retained between the soldiers and the manufacturers under your plan?

Secretary BAKER. I do not think I understand what you mean by that.

Senator WADSWORTH. The Ordnance Department is headed by Army officers, and they are the ones to do the driving of the production.

Secretary BAKER. I do not think I agree to that. They may be Army officers in the sense that they wear uniforms and have a title. Mr. McRoberts is a colonel. The fact that he has

put on a uniform and is called colonel has not deprived him of any experience he brought with him.

Senator WADSWORTH. It deprived him of authority by comparison——

Secretary BAKER. No; I do not think it deprives him of authority. If he were a civilian adviser or a civilian authority, he would still have to be under the chief of division.

Senator WADSWORTH. Our minds can not meet on that.

Secretary BAKER. Let me pursue it if I can. I should like to get an agreement, because I think we ought to be able to agree about that question. Suppose instead of making Mr. McRoberts a colonel he were made the civilian chief of the procurement division of the Ordnance Department. Now, would he be less subject, do you think, to the Chief of Ordnance than he is by virtue of being a colonel?

Senator WADSWORTH. Mr. Secretary, this has no personal reference, but I would not put him in the Ordnance Department as a colonel. I would use that kind of ability as a civilian in the department that had control of the industries.

Secretary BAKER. You would put him in the munitions department?

Senator WADSWORTH. I would.

Secretary BAKER. And would he then decide not only the question of the mechanical production of the weapon but its use to soldiers?

Senator WADSWORTH. Not at all.

Secretary BAKER. Who would decide that?

Senator WADSWORTH. The soldiers.

Secretary BAKER. How would they get correlated with Mr. McRoberts?

Senator WADSWORTH. Just the same as they do in England—the Ordnance Department. It tells the munitions ministry what it wants and the munitions ministry produces it if it can.

Secretary BAKER. Then you have exactly what we have, you have two people deciding two questions and bringing them to a common meeting place. That is exactly what we have here.

Senator WADSWORTH. But all the production is under one head.

Secretary BAKER. This is all under one head.

Senator WADSWORTH. No, Mr. Secretary, it is under five heads.

Secretary BAKER. I feel as though I had only one head. It is all under me.

Senator WADSWORTH. The five bureau chiefs pass the orders?

Secretary BAKER. Yes.

Senator WADSWORTH. And under their jurisdiction the inspectors inspect the goods as they are being manufactured?

Secretary BAKER. Exactly; and that is so in the English munitions.

Senator WADSWORTH. No, Mr. Secretary, it is not so in the English ministry of munitions.

Secretary BAKER. Mr. Senator, I have seen at least three heads of departments of the English munitions ministry.

Senator WADSWORTH. Yes; all in the same department and responsible to one chief.

Secretary BAKER. Exactly. These are all in the same department and responsible to one chief.

Senator WADSWORTH. Yes, Mr. Secretary; but the British system placed, as I said so many times, the industrial problem under a separate department, regarding it as a problem so vast and so beyond the view of the average soldier man that it was wise and proper to do so, and Heaven knows it has been a success. Now my criticism of this is, if you will let me state it, that this system still leaves with the soldiers in the Army, graded according to military rank, each man subject to the orders of his superior officer, that task of speeding up the industries of the United States.

Secretary BAKER. And that, with very great deference, I think, is not an accurate description of this plan.

Senator WEEKS. Let us take the case of Col. McRoberts. There is not very much purpose in discussing personalities, but as long as we have used him as an illustration let us take his case. Undoubtedly he is a very able man in the business with which he is familiar, and he was connected with that business when commissioned by being put as the chairman of a board which had to do with credits, and solely with credits, and that is exactly what Col. McRoberts has done all his life, and he is peculiarly well fitted, perhaps none better in the United States, for that particular work. Now you have taken him from that work and put him in charge of something he probably never had anything to do with.

Secretary BAKER. Quite the contrary. What we have done is to hand Col. McRoberts the detailed plans and specifications of material desired to be bought and turned over to him the negotiations of the credits and financial working out of those contracts. That is the thing in which he is a specialist.

Senator WEEKS. Is he not going to purchase?

Secretary BAKER. He is going to make the contracts according to plans worked out by the engineering section and handed to him. Then when the contract is actually made it is turned over to the production section, which ought to be headed, and I know will be headed, by a man who is an expert in shop production.

Senator WEEKS. If you are looking for a man to make contracts, you ought to employ a lawyer.

Secretary BAKER. Oh, quite the contrary—quite the contrary.

Senator WADSWORTH. Right you are.

Senator WEEKS. I tell you when I want a contract drawn I employ a lawyer, and I have been doing business all my life.

Secretary BAKER. I am a lawyer and I do not want to make any reflections on my union, but what we lawyers always want to have clients tell us is what they want put in the contract. They think it and we pen it.

Senator WEEKS. You will be unpopular with the lawyers' union, even if you are popular with all others.

Secretary BAKER. I seem to get so little chance to practice at my trade that that may be less important than otherwise.

Senator MCKELLAR. Mr. Secretary, in creating this plan you have submitted to the committee, did you consider the very marked success of a definite plan which has been in operation in our own Navy for some time and which has been so admirably proved by the chief of that supplies division of the Navy, Mr. McGowan?

Secretary BAKER. Senator, I know Admiral McGowan. I think he is a man of the very highest capacity, and I think he has done admirably in the Navy, and the plan which has worked in the Navy is substantially duplicated in the plan now proposed for the War Department.

Senator MCKELLAR. Quite the contrary, if you will let me use one of your expressions. In the Navy, Mr. McGowan, with three exceptions, which are not material, has the absolute control of the supplies of the Navy, and in carrying out that absolute control he has officers under him, some civilians, some expert civilians, working on salaries, innumerable officers, I do not know exactly how many, but he is the executive head, and I understand that all Secretary Daniels has to do is to ratify what Mr. McGowan does, and the thing is a good job. Now it strikes me if we just had one executive head instead of those five heads, I would agree with you on this proposition, but as long as you have the supplies of our Army bought by five different officers—the plan that you have—I am frank to say I do not agree with you.

Secretary BAKER. Your plan.

Senator MCKELLAR. It is not my plan, it is the plan of the Navy Department.

Secretary BAKER. But you are approving it?

Senator MCKELLAR. I am.

Secretary BAKER. It is fatally defective from Senator Wadsworth's point.

Senator MCKELLAR. It may be. I am not answering for Senator WADSWORTH. Let him answer for himself.

Secretay BAKER. He is a naval officer.

Senator MCKELLAR. I think Admiral McGowan was not a Navy officer.

Senator WEEKS. No member of the pay corps of the Navy is a graduate of the Naval Academy or ever exercised command over troops, or ever has.

Secretary BAKER. How long has he been in the Navy?

Senator WEEKS. He has probably been in the Navy 20 or 25 years; his age is between 40 and 50.

Secretary BAKER. At least he has not been in active industrial life.

Senator WEEKS. Prior to that he was in industrial occupations for 20 years. His whole life he has been doing this work. He never exercised any command and he is not an Annapolis man.

Secretary BAKER. I am not questioning his ability to do it, Senator. I am only trying to prove there is no difference between the buttons worn by the Army and the Navy, so far as business capacity is concerned.

Senator WEEKS. There is a vast difference between a man who is a graduate of a military academy and who spends a considerable part of his life with troops, then is transferred to a technical corps, and a man always in a technical corps and is not even a graduate of the Naval Academy.

Secretary BAKER. I do not think that graduation at the Naval Academy hurts them.

Senator WEEKS. I hope not.

Senator MCKELLAR. The Senator is one himself.

Senator KIRBY. As I understood Admiral McGowan these different studies for the conduct and purchase of supplies for the Navy were all under the head of an expert in that line.

Senator MCKELLAR. And he is the expert?

Senator KIRBY. No; he is not. He swore he has eight different experts, and told what each one's experience had been and that man always stood between him and the trade and made suggestions to him and recommendations, and it came back to him just like these boards will necessarily do when it comes up for final approval on authority, as I understand it.

Secretary BAKER. As a matter of fact, Admiral McGowan had one civilian who was guiding the purchase of one line of supplies in his bureau, and by some process I discovered this morning that I now have that individual as the manager in the War Department, doing the same thing for us he did for Admiral McGowan. I hope it was amicably arranged; I did not intend to rob his bureau.

The ACTING CHAIRMAN. There has been some testimony before the committee, Mr. Secretary, and to a considerable extent it has come from manufacturing experts themselves, that the military education at West Point and the military rank in the department seems to disqualify men from understanding the manufacturing problems, one being an industrial question, with which they are not familiar and are not educated at West Point on, and they cite, for instance, the management of the arsenals during the last five years, and state that as manufacturing institutions they are gloomy failures, using the same old methods that were used 25 years ago; that they have not kept pace with modern industries because the officers in charge of them do not understand industrial questions.

Secretary BAKER. Senator, I had a long talk with the same gentleman, Mr. Colvin, who testified to that before you, some years ago, I think it was. He came to see me and gave me his views, his theory, and I confess it seemed attractive to me at the outset; I thought that modern industry had become so highly specialized and developed that in all likelihood civilian industrial experts would be more likely to give economic and efficient productive control to a purely manufacturing establishment than a military man, and I made a pretty careful inquiry into it, with this most astonishing result, which you gentlemen know better than I, because you had it constantly brought up to you, that everything the War Department makes in its arsenals it makes cheaper than it can buy from anybody.

Senator WEEKS. Mr. Secretary, I take issue with that statement.

Secretary BAKER. I am only giving you my information about it.

Senator WEEKS. I understand the information was to that effect, but I doubt if the Government can make anything cheaper than the individual. There is some evidence to that effect, but it never included all of the elements which should enter into manufacturing.

Secretary BAKER. I took the case as a test case, and I took the question of pistols, because the Colt automatic pistol, which was adopted by the Army, was a thing which was made by the Colt Co. and also made at Rock Island Arsenal and probably at the Springfield Armory. The actual fact was, at the time I investigated it, that the War Department paid the patentee of the Colt automatic pistol $2 per pistol and still made the pistols cheaper than we could buy them from the Colts, and in the cost to the Government there was included, or attempted to be included—I did not have any opportunity to go into details to see how accurate it was—a charge for overhead, plant, cost, depreciation, insurance, and those equivalent overhead items which ordinarily are included by a private manufacturer.

Senator WARREN. Interest on money?

Secretary BAKER. And interest on investment.

Senator WEEKS. And pay of officers employed doing the work, and all that?

Secretary BAKER. Yes; it was an attempt to be a perfectly accurate comparison.

Senator MCKELLAR. I agree with you entirely about that; I think those facts have been proven before our committees time and again; I know it was before the House committee several times, and I will give you another illustration in the matter of powder. When the Government was manufacturing powder at 25 or 26 cents—to be accurate, I think it was between 25 and 26 cents—at the same time the War Department was paying the private manufacturers about 35 cents per pound, and I recall distinctly that it was 9 cents difference, and in those calculations all overhead charges and interest and every other charge was charged up to the Government on the manufacture.

Senator WEEKS. I should like to make the statement that, without qualification, that assuming that—leaving out that question of profit and the pure question of manufacture—there is not and never has been a case demonstrated that that could be done.

Senator MCKELLAR. Leaving out the profit, that may be.

Secretary BAKER. Those cases are very difficult to demonstrate, and, of course, the Government manufacture is always under certain limitations which private manufacturers do not have. Congress, for instance, has provided long periods of vacation time, and things of that sort, which make the conditions of the man who works for the Government industry ideal as compared with any private industry, yet the best judgment I could get after a rather expert accountant's view of a comparison of these specific instances did not show unfavorably to Government manufacture under the control of these military men.

Senator WEEKS. After the war is over and I have time I should like to examine you further on that.

Secretary BAKER. I am sorry to put off so pleasant a task for so long, Senator.

Senator WEEKS. If no further questions on this line, I have two or three matters to bring up.

The ACTING CHAIRMAN. All right.

Senator WEEKS. I am not sure whether this is a matter you want to discuss except in executive session, and if you feel that way I will withdraw the question.

What have you done on the other side about developing terminal facilities, and have you sufficient terminal facilities in the ports where you are landing supplies?

Secretary BAKER. I would rather discuss that in executive session.

Senator WEEKS. I have several questions about that I should like to ask you. Have you examined and do you know anything about the question of bombs and detaching bombs from aeroplanes and aerial torpedoes, and the question of chlorine? Would you prefer to discuss those in executive session?

Secretary BAKER. I think I know those too slightly to be helpful to you, Senator. If you would be good enough to ask the experts on that, you can get any information you want from them, and let me supplement it with anything you have difficulty in getting, I would be obliged to you.

Senator WEEKS. I will do that in another form. Has there been any increase during the war in the building plants for heavy artillery—I mean anything from 75's to middle heavies?

Secretary BAKER. Yes.

Senator WEEKS. To what extent?

Secretary BAKER. I can not answer that. I know only of the one negotiation which I personally helped conduct, and that was in regard to Midvale and Bethlehem, but I can get for you an exact statement on that subject.

Senator WEEKS. To what extent have they developed?

Secretary BAKER. I would have to get that for you. I do not have it in mind.

Senator WEEKS. Has it been developed in your opinion sufficiently to provide us with all the heavy artillery the Army will need?

Secretary BAKER. I am sorry I can not answer that, Senator. You have before you the artillery program with prospective deliveries, and those, of course, are predicated upon plant capacity to equal that demand.

Senator WEEKS. Is that being increased or is the increase being made?

Secretary BAKER. Some has been made and some is being made.

Senator WEEKS. Do you know when that was undertaken?

Secretary BAKER. Yes; early, some of it; the Midvale and Bethlehem very early. The extension of our plants at Springfield or Watervliet—Watervliet, I believe—and Rock Island; some of them began even before we went into the war.

Senator WEEKS. Have any of those extensions been completed?

Secretary BAKER. I can not answer that, sir.

Senator WEEKS. Will they be sufficient, in your opinion, what have been undertaken, to provide artillery for the plan we now have?

Secretary BAKER. I can only say I am told that the plant facilities now in process of completion will be adequate to the program as contemplated, but whether they will turn out so I can not answer.

The ACTING CHAIRMAN. At the early outbreak of the war, Mr. Secretary, an effort was made, as I recall it, to utilize the inventive genius of the American people by providing a branch of the National Council of Defense to investigate projects, to investigate inventions. Am I right in that?

Secretary BAKER. I do not think there ever was a section on that, Senator.

The ACTING CHAIRMAN. Mr. Edison was called down here, was he not?

Secretary BAKER. Mr. Edison was called here as a member of the National Consulting Board, and that board has a very large membership and has considered a very great many suggestions, and made some of its own, very fruitfully.

The ACTING CHAIRMAN. I only speak of it because I have had, and I suppose most Senators have had, a great many applications of inventors, so called, who have come here with models and without, and with plans and without, and with great ideas they have had patented in some cases, and I have referred them to the Council of National Defense down here, and they seem to be lost in the woods. They can interview a good many different people, who can neither give them any decision nor satisfaction, and they wander around from one place to another, and, so far as I know, they never arrive.

Secretary BAKER. The agencies of that subject which occur to me at the moment are these: In the Navy Department and in the War Department there are officers who have nothing to do but scrutinize inventions and deal with inventors and suggestions, so that each department has an officer, or a group of officers, who do nothing else. In addition to that the aeronautical board, the advisory board for aeronautics, headed by Dr. Walker, of the Smithsonian Institution, and having a large number of men, is very hospitable to inventions dealing with aircraft. The Aircraft Production Board, which is a body with a legal foundation, is similarly interested in inventions about aircraft. The Bureau of Standards, under the Department of Commerce, is most helpful and ready in testing out inventions. They have tested an enormous number of them, a great many for me; men have brought me suggestions and I send them to the Bureau of Standards, and they have the best facilities for actual test there are anywhere. Those are the agencies that occur to me as actively interested in that sort of thing.

The ACTING CHAIRMAN. Has anything been found of advantage or value in the way of recent invention?

Secretary BAKER. Yes, Senator; a number of very striking things have been found.

The ACTING CHAIRMAN. Because there must be a great many thousand of men at work, judging from the number that have come from Nebraska with ideas to prevent vessels from being sunk and to stabilize aeroplanes and to arrange bomb droppers from aeroplanes, if other States are doing it in the same proportion.

Senator MCKELLAR. They are not confined to Nebraska. Mr. Secretary, I want to ask you about a statement that was made to me that the Bethlehem Steel Co. had erected a plant over near Baltimore for the purpose of carrying out certain contracts with the War Department, as I understood it, and that recently they had begun to dismantle the plant and take it away.

Secretary BAKER. That is not my information, Senator. The Bethlehem Co. had—I know this only in a casual way—but the Bethlehem Steel Co. had a plant at Sparrows Point near Baltimore, and before the war they had planned a very large addition to that plant. The part of it which was devoted to war uses is in process of completion. A certain part of their plant, which was intended to supplement their capacity for civilian and industrial manufacture, has been temporarily discontinued.

Senator MCKELLAR. This gentleman, who said he saw it yesterday, said he saw the plant being dismantled and he had seen it lately; he lives in Baltimore; and was confident the whole plant was being dismantled, and said that was his information.

Secretary BAKER. I had a talk with Mr. Schwab about it, and as I understood it, he told me the part they intended to enlarge for civilian manufacture was discontinued.

Senator MCKELLAR. I had no point in the matter only to know how it happened such a thing could be.

Secretary BAKER. No part of the plant intended for war uses is slowed up at all.

Senator WEEKS. There is one other question which may be open for discussion in open session—that is, the question of mail facilities for our men on the other side. Have you had any complaints?

Secretary BAKER. Yes; I have had more complaints of civilian mail than I have had of soldier mail. I have had some.

Senator WEEKS. These are cases that actually occurred. Troops that are in France, that are not at the battle front, have been as long as three weeks without any mail from the United States. I have brought the matter to the attention of the Post Office Department two or three times. The Postmaster General always comes back at me by saying it is the fault of the War Department.

Secretary BAKER. That is generous.

Senator WEEKS. And that the mail, generally speaking, is carried in transports and the transports do not take it. I have replied to that that there were mail steamers running, and that we had three or four of the American Line certainly as capable of carrying mail as ever, and that, as a matter of fact, there were a great many steamers going to France and to England which might carry mail every week. Now, one of the things that will keep our men over there in a better frame of mind than anything else will be to keep them in direct communication and frequent communication with their own people. They value the mail, the letters, more than they do packages or anything else, and it does seem to me a woefully bad service which prevents a group of men over there from getting mail for three weeks.

Secretary BAKER. Three weeks from when?

Senator WEEKS. Three weeks from anytime.

Secretary BAKER. You mean three weeks from the time it is sent?

Senator WEEKS. No; three weeks from the time they received one mail they get another mail; another one comes in the meantime.

Senator MCKELLAR. Before the Secretary answers that question, may I supplement what Senator WEEKS says by reading a letter dated January 9 from one of the supreme court justices of Tennessee?

Our boy left this country for France in September and arrived in France in the early days of October. His mother has written him almost every day and sent him a number of woolen garments for the winter. We had a letter from him dated December 7 in which he said he had received only two letters from his mother and has not received the garments at all. They were mailed November 12, 1917. A great many parents of my acquaintance have not received any letters from their sons in France, and this, of course, occasioned great anxiety.

That is the kind of letter, and I just put it in my pocket as I started over. I had just received it from one of my intimate personal friends. We all receive them, and I was just wondering if we could not improve that mail service in some way.

Senator WEEKS. I think my complaint is even more to the point than that. Those men have been over there a comparatively short time, and the men with whom I am in touch have been over there a long time, and that has been the general condition of the mail facilities. This is a case of three weeks' lapse between any delivery of mail from the organization, and that has taken place within six weeks, a long time after the men reached the other side. I think there are a great many cases where letters and parcels are improperly directed, which may cause some delay in sending them, but there should be arranged a continuous flow of mail to the other side, and if it has not been brought to your attention in that way I think it should be investigated.

Secretary BAKER. It has been brought to my attention, Senator, and every effort is being made to accomplish exactly the purpose you suggest, because we realize its importance. It is a very important thing. I went to New York and at the Hoboken dock I saw more than 400,000 parcels sent by parcel post to members of our expeditionary forces about Christmas time. Each of these parcels had to be opened and matches and perishable things unwisely put in them taken out, and each separate part of the contents rewrapped in tissue papers and put in a better box to bear ocean transportation, and an entire regiment of soldiers gave up its time to doing nothing else but that. I cite that only to show the vast bulk of this mail.

Senator WEEKS. I do not for a minute question the parcels mail; I do not complain of that. I am speaking of letter mail.

Secretary BAKER. Yes.

Senator WEEKS. And that alone.

Secretary BAKER. Now, of course, letter mail and parcels mail are all mail. The Federal Government, under a contract or a series of contracts with certain steamship lines, arranged the taking of the mail. They take what they can take. The transports take the rest, and they take all they can take; they take it as fast as they can take it. The distribution problem on the other side is not simple, because the organizations are not always kept in the same place for any length of time; they move, and there is very little exactly to mail to.

Senator WEEKS. This organization has not been moved in three months.

Secretary BAKER. It may be that the case you have in mind is one in which there must be explanations of which I do not know. It is an intricate problem, but the Post Office and the War Departments appreciate its importance and are cooperating to solve the problem.

Senator MCKELLAR. Mr. Chairman, before we go into executive session I should like to offer for the record an article published in the Textile World Journal of January 6, 1918.

The ACTING CHAIRMAN. The article may be included in the record at this point.

Senator MCKELLAR. I have a letter of date December 19, 1917, to the American Association of Woolen and Worsted Manufacturers, which should be included as supplementing Mr. Stevens's testimony. He has appeared before this committee.

(The letter referred to is here printed in full, as follows:)

DECEMBER 19, 1917.

To the American Association of Woolen and Worsted Manufacturers and the National Association of Wool Manufacturers:

Your joint committee of manufacturers cooperating with the committee on supplies of the Council of National Defense reports a brief summary of its work which has now closed with the sending of the resignations requested by Mr. Julius Rosenwald, chairman of the committee on supplies of the Council of National Defense, in the letter herein set forth.

The joint committee was created in pursuance of action taken at a special meeting of the woolen goods exchange held on February 7, 1917.

As it was then manifest that war was impending, the manufacturers present at that meeting—representing both the American Association of Woolen and Worsted Manufacturers and the National Association of Wool Manufacturers—unanimously requested Col. John P. Wood, president of the National Association, in cooperation with Mr. Herbert E. Peabody, president of the American Association, to select a committee of seven members, of which Col Wood himself should be chairman, to assist the Federal Government in securing an adequate supply of woolen and worsted fabrics for the enlarged Army and Navy of the United States. The committee as designated was as follows: Col. John P. Wood, of Philadelphia, chairman; Mr. Nathaniel Stevens, president of M. T. Stevens & Sons Co., of North Andover, Mass.; Mr. Robert T. Francis, selling agent of the Pon oosuc Woolen Manufacturing Co., of Pittsfield, Mass., and New York City; Mr. Moses L. Shuttleworth, agent of the Washington Mills of Lawrence, Mass., of the American Woolen Co.; Mr. Charles H. Wilson, of James & E. H. Wilson, of Pittsfield, Mass.; Mr. George C. Hetzel, president of George C. Hetzel Co., of Chester, Pa.; Mr. Spaulding Bartlett, treasurer of S. Slater & Sons (Inc.), of Webster, Mass.

Col. Wood resigned in July on the mobilization of his regiment, the First Pennsylvania Cavalry, and Mr. Nathaniel Stevens, vice chairman of your committee, was elected to succeed him. There were added to the committee: Mr. Francis R. Masters, of Lawrence & Co., of Boston and New York; Mr. C. Brooks Stevens, treasurer of the United States Bunting Co., of Lowell, Mass.; Mr. Frederick R. Edington, of the American Woolen Co., of Boston.

Messrs. C. Brooks Stevens and F. R. Edington were selected by the committee on supplies early in October for permanent duty in Washington as technical advisers to that committee. Subsequently they were elected members of our committee.

On the original appointment of the committee due notice was given to the Council of National Defense, and the first meeting of the committee was held in New York on March 28, 1917, with a representative of the depot quartermaster at Philadelphia, the principal cloth-purchasing depot of the Army. On March 30 the joint committee had its first conference in Washington, with Chairman Rosenwald and Mr. Charles Eisenman, of the committee on supplies of the Council of National Defense, and having been previously appointed by the council was thereupon formally recognized as one of the committees cooperating with the council. Thereafter until the middle of September the joint committee held almost weekly meetings in New York or in Washington.

Until Col. Wood reentered the Federal service he passed a considerable part of his time in consultation with the committee on supplies in Washington, and with the purchasing agencies of the Quartermaster and Ordnance Departments of the Army and of the Navy and Marine Corps. Mr. Stevens, since succeeding Col. Wood as chairman of the joint committee, and members of the subcommittees have had frequent conferences with the officials in Washington.

The joint committee has rendered service not only to the Army and Navy but also the American Red Cross. Moreover, the committee, through other subcommittees formed by it for the especial purpose, has taken the initiative and helped in organizing the wool-manufacturing industry for wool conservation, in promoting the import of wool and in protecting the newly developed export trade in woolen goods.

One of the first and most important tasks of your joint committee was to recommend certain changes in the specifications for Army and Navy fabrics, with a view (1) to conserving the wool supply of the Nation, (2) to make it possible for the maximum number of mills to undertake the production of these fabrics and thus to insure prompt delivery, and (3) to maintain a just and reasonable range of prices.

It is keenly to be regretted that the representatives of the Government did not see their way clear immediately to accept last spring (1917) the earnest recommendation of the joint committee and also of the wool trade of the United States, that the entire available supply of wool be taken over by the Government, in accordance with the offer of the wool trade presented through the joint committee. Had this recommendation been adopted it would have saved the Government many millions of dollars.

The early policy and recommendations of the committee are set forth in the following excerpt from our records:

"The wool manufacturers' committee most earnestly recommends, as the real heart of the problem of securing just and reasonable prices on the military fabrics of the Government, that immediate steps be taken by the Government to control the present prices of raw wool of the one-half blood, three-eighths blood, and one-fourth blood grades required for the manufacture of military fabrics. To accomplish this it is essential for the Government to control the prices of these wools in all the primary markets of the country. The wool manufacturers are eager to furnish the Government with the requisite military fabrics at a proper price, but they can not undertake to do this so long as their indispensable materials are advancing in the present uncontrolled market as they are from day to day. It is as necessary for the manufacturers to have their materials for Government fabrics guaranteed to them at a fair price as it is for the Navy to have an assured price for its supplies of coal and oil fuel.

"What has been said above of the need of Government control of raw-wool prices applies also to the various wool substitutes authorized in the manufacture of these military fabrics.

"The wool manufacturers' committee suggests that Mr. Baruch call together the raw-wool committee to devise some means whereby the advance of the wool market can be checked until the Government can place present desired contracts for military fabrics.

"The manufacturers' committee suggests further that the wool merchants agree to give prices to their customers for sufficient time to enable the mills to receive a definite answer from the Government as to whether their bids are acceptable.

"That the grade specifications for wool for overcoating, uniform cloth, and blankets be changed from 'three-eighths blood' to 'low quarter blood or finer.'

"That for shirting flannels there be added to the specifications of February 17, 1917, one made with a cotton warp and worsted weft, in which fabric the proportion of cotton shall not exceed 30 per cent, and that the carded woolen shirting flannel in No. 1243 have the proportion of cotton reduced from 40 per cent to 30 per cent.

"That an additional type of olive-drab uniform cloth be included, to be made of worsted (all wool) warp and worsted weft, weighing 14 ounces to the linear yard.

"That the overcoating (30-ounce melton) be made of all wool fiber, of which not to exceed 35 per cent may be of noils or reworked wool, the minimum strength to be 65 pounds warp way, and 50 pounds weft way.

"That the all-wool blanket specifications provide for the use of noils and reworked wool in a proportion not exceeding 35 per cent of the whole weight.

"That an additional blanket type be adopted, to be made with cotton warp and wool weft. Such blankets to be used for saddle blankets, and made available for issue to troops as a selective alternative for the all-woolen blanket.

"That the border be omitted from the blankets.

"That the Government purchase from growers, merchants, and mills at to be established uniform prices the requirements of wool and other raw materials required for the manufacture of its needs in woolen goods, and issue at fixed prices to the mills making goods for the Government the raw materials required therefor.

"That prices for the goods made for the Government be based upon an agreed cost of conversion and profit plus such uniform cost as is fixed by the Government for each kind of raw material required to make the respective fabrics."

The following further excerpt from our records states the position of the committee:

"Col. Wood spoke of the committee as representing a proposition of service, not of mere manufacturing competition. The committee was working in an entirely detached way for the primary purpose of best service and best economy to the Government itself."

Minutes of all the meetings of the joint committee have been duly kept and recorded, and periodical reports of all the activities of the joint committee, including the above, have been furnished to the Council of National Defense. For detailed information of the work of the committee these minutes and reports are permanently available. As a committee it has never made or recommended any specific purchases by the Government; it has simply recommended what it regarded as proper specifications, and has urged that these specifications should be faithfully complied with. It further recommended maximum prices on the 30-ounce olive drab overcoating and the 3-pound olive drab blanket which it regarded as reasonable and fair alike to the manufacturers and to the Government.

The members of the joint committee are officials of mills which have undertaken Government contracts, but these contracts have been matters of negotiation upon individual action and have not come before the committee for any consideration whatsoever. All the manufacturers of the country capable of making military or naval fabrics were urged by the committee, and practically the entire trade promised to undertake their share of service, but the activities of the committee ceased at that point and each manufacturer was left to make his own terms and arrange his own contract with the accredited officials of the Government, separate and apart from the committee.

The joint committee strongly recommended strict adherence to specifications securing fabric standards and at all time advised against purchases below accepted standards.

For "emergency purchases" of inferior goods, the joint committee insisted that it should not be exposed to any charge that it in any manner acquiesced therein or was in any manner responsible therefor, and that it be entirely freed from and relieved of any accountability therefor.

In this connection we submit this extract from the minutes of the meeting of September 13, 1917, in Washington:

"After a period of general discussion the joint committee called on Mr. Eisenman at his office in the Munsey Building. Mr. Eisenman asked if it were true that the committee were dissatisfied with the character of some of the goods purchased for Army use. Acting Chairman Stevens replied that it was true—that the committee were disturbed at some recent happenings, and he instanced the purchase of certain low-priced shirting fabrics.

"Mr. Eisenman asked what the joint committee would do if the Secretary of War suddenly asked for 1,200,000 more yards of shirting flannel than had been anticipated—spot goods. He explained that the troops going to France had to carry with them a six months' equipment, and went on to say that affairs were moving very rapidly and he would like to have the committee designate a man or men to stay on the job permanently in Washington. The acting chairman inquired if it were true that the committee on supplies were getting up a 20-ounce fabric. Mr. Eisenman replied that there was not a word of truth in it, and added that he wished that goods could be manufactured as rapidly as rumors.

"Mr. Eisenman stated he kept a careful record of the emergency demands of the War Department—demands for immediate delivery. Acting Chairman Stevens said, 'If you will give us a letter to keep our records straight, we will be satisfied.' Mr. Eisenman replied, 'You can have access to our records at any time.'"

Particularly to define and emphasize the position of the joint committee concerning the character and quality of goods to be accepted under emergency purchases, the committee on the following day addressed the letter to Mr. Charles Eisenman, of the committee on supplies (which is here set out):

NEW YORK, *September 14, 1917.*

Mr. CHARLES EISENMAN,
Committee on Supplies, Council of National Defense,
Washington, D. C.

DEAR MR. EISENMAN: You may recall the request of Chairman Stevens at our conference with you yesterday when the emergency purchases were being considered, that if you would give us a letter to keep our record clear of responsibility for these hastily bought fabrics we would be quite satisfied. As we understood it, you were entirely willing to state that for any defects that might develop in these emergency goods your advisory committee was not accountable.

I am very sure that this would greatly ease the minds of the members of our committee, and they feel that it is due to them.

I am sending you inclosed the minutes of yesterday's meeting and a copy of the call issued to-day to the members of the executive committees of the manufacturers' associations for a preliminary conference to take up in earnest the conserving of the wool supply.

You will also note that the committee has invited Mr. Hetzel and Mr. Wilson to act as representatives in Washington. With cordial regards,

Sincerely, yours,

WINTHROP L. MARVIN,
Acting Secretary Joint Committee of Wool Manufacurers,
Cooperating with the Council of National Defense.

To this letter no reply was received.

From the time of the appointment of your committee until the early autumn (1917) we had been extremely active in advising the representatives of the Government and facilitating the production of woolen fabrics by the maunfacturers of the country on a great scale for the use of the various departments of the Army and Navy. Although Messrs. Edington and Brooks Stevens were attached to the staff of the committee on supplies as technical advisers and subsequently elected to your joint woolens committee, for some time prior to their appointment and since, the advice and assistance of your committee have been rarely sought.

The circumstances regarding the existence of the Base Sorting Co. and its reported methods of operation in connection with Government O. D. clippings first came to the attention of certain members of the joint woolens committee through market rumors. The executive committee of the American Association of Woolen and Worsted Manufacturers and such of its directors as could attend met to consider the situation. Mr. Nathaniel Stevens, chairman of the joint woolens committee, and Messrs. Francis, Bartlett, and Wilson, of the committee, were asked to be present.

At this meeting, held October 17, 1917, the matter was referred to the joint woolens committee for proper investigation by the following resolution:

"*Resolved*, That the entire matter (Base Sorting Co.) be referred to the joint woolens committee, to be brought by it to the attention of the authorities in Washington."

Our chairman went to Washington the following day and asked the vice chairman of the committee on supplies for an appointment with our committee to discuss the general subject of the Base Sorting Co. He stated that he felt the matter was outside the domain of your committee and objected to discussing the subject with us.

In early December the individual members of your committee received the following letter:

COUNCIL OF NATIONAL DEFENSE,
Washington, November 28, 1917.

SIR: To obviate the present embarrassing situation in which the members of the committees appointed by me or under my direction have been placed by being called upon to act both as Government agents or advisers and also as the representatives of their respective industries, it has seemed wise to terminate the existence of your committee, and hence the tender of your resignation is requested.

You will understand that this action is not taken in derogation of the very valuable services which you and your committee have rendered the Government in the present emergency, but is necessary to relieve your committee and the council from a situation which has been the subject of criticism, and is also in the interest of establishing a more closely knit organization.

I want to assure you that we are deeply appreciative of your efforts in the service of our country and of the patriotism and good judgment that have guided your services as our advisers.

It is hoped that a committee representative of your industry will be formed by it in the near future and that in this way you will be able to continue to give us advice on the many problems which necessarily arise.

Very truly, yours,

COMMITTEE ON SUPPLIES,
By JULIUS ROSENWALD, *Chairman.*

Promptly the members of the committee transmitted their resignations to Chairman Rosenwald. So the relation of the joint committee with the Government has now been completely dissolved, and the committee respectfully presents this, its final report, to the associations responsible for its creation.

The joint committee, as stated, has insisted upon and regarded it as a vital and imperative obligation and duty to maintain a strict adherence to fabric standards for Army and Navy use to insure the comfort and protect and guard the health of every soldier and sailor in the service of our Nation.

Your committee have to state as their united conviction that the resources of the woolen manufacturers of this country were, and are, adequate to fully and properly equip the land and naval forces of our country.

All of which is respectfully submitted.

NATHANIEL STEVENS.
CHARLES H. WILSON.
MOSES L. SHUTTLEWORTH.
ROBERT T. FRANCIS.
SPAULDING BARTLETT.
GEORGE C. HETZEL.
FRANCIS R. MASTERS.

Senator FRELINGHUYSEN. I move that the committee go into executive session.

(The motion was put and carried, and the committee accordingly went into executive session, and thereafter adjourned to meet on Monday, January 14, 1918, at 10.30 o'clock a. m.)

(The following communications from the Secretary of War in connection with the Army clothing supply have been received by the committee:)

WAR DEPARTMENT,
Washington, January 14, 1918.

MY DEAR SENATOR CHAMBERLAIN: On Saturday morning one of the members of the committee said that he had just talked with the commanding officer of Camp Sherman, and that there were, as I recall it, 3,000 men there without uniforms. You will recall that I asked the Assistant Secretary to direct at once that a telegram be sent to the camp to find out the facts.

I inclose a telegram which came on Saturday, the same day upon which the statement was made, and which states that the 31,024 men now at Camp Sherman were at that time all in uniform, and that a previous shortage of approximately 7,000 coats was at that time provided for.

I send this information because, as you will recall, I ventured at the time the statement was made quite definitely to express a disbelief in its accuracy. This telegram, I think, should be called to the attention of the members of the committee, as it is of the highest importance to have them know both that this provision has been made and that the information upon which I have been relying in my testimony to the committee is not inaccurate.

Cordially, yours,

NEWTON D. BAKER,
Secretary of War.

Hon. GEORGE E. CHAMBERLAIN,
United States Senate.

—

CAMP SHERMAN, OHIO, *January 12, 1918.*

GOETHALS,
Quartermaster General of the Army, Washington, D. C.

Re tel date. 31,024 men now at this camp all in uniform. Previous shortage of approximately 7,000 coats provided for.

CASE, *Camp Quartermaster.*

—

WAR DEPARTMENT,
Washington, January 15, 1918.

MY DEAR SENATOR CHAMBERLAIN: I send you a telegram which has just been received from Camp Sherman. The information in it differs from that contained in the earlier telegram which I sent you yesterday and which arrived on Saturday. Apparently the information given to you by Gen. Glenn as to the blouses was accurate. This telegram, however, shows that an adequate supply is in shipment, though not received by the time the telegram was sent.

Cordially, yours,

NEWTON D. BAKER.
Secretary of War.

Hon. GEORGE E. CHAMBERLAIN,
United States Senate.

—

CAMP SHERMAN, OHIO, *January 15, 1918.*

GOETHALS, per HARDEMAN,
Office Quartermaster General, Washington, D. C.

Thirty-one thousand one hundred and four men now in camp. All have overcoats and woolen breeches. Twenty-four thousand two hundred and four have complete uniforms. Sixty-nine hundred not yet supplied with coats, supply of which is now in shipment.

CASE, *Camp Quartermaster.*

—

WAR DEPARTMENT,
Washington, January 12, 1918.

Hon. GEORGE E. CHAMBERLAIN,
Chairman Committee on Military Affairs, United States Senate.

MY DEAR SENATOR: Pursuant to telephonic request of your committee to The Adjutant General of the Army that a report be obtained showing in percentages the shortages of articles of equipment C, quartermaster supplies, at the different divisional camps as of January 1, or as near that date as possible, a telegram was sent all division commanders, and I now have the honor to submit to your committee, attached herewith, a tabulated sheet showing the state of equipment as disclosed by these replies.

Figures represent shortages in percentages. Where blank spaces exist no shortages were reported.

Very respectfully,

NEWTON D. BAKER,
Secretary of War.

WATERS OF ALASKA AND THE PACIFIC COAST.

The VICE PRESIDENT. Are there further documents, petitions, or memorials?

Mr. POINDEXTER. I ask to have printed as a Senate document the report of the United States Coast and Geodetic Survey on the neglected waters of the Pacific coast, Washington, Oregon, and California, by E. Lester Jones, Superintendent of the United States Coast and Geodetic Survey, Department of Commerce. It is an extremely valuable statement of the needs of the coast survey of the waters of Alaska and the Pacific coast of the United States. I have a letter here from the Superintendent of the Coast Survey stating that the very limited number of copies which he was able to have printed——

Mr. HARDWICK. Mr. President, I trust the Senator will not present that out of order. It is not in order now.

Mr. POINDEXTER. I may have misunderstood the Chair, but I understood the Chair to ask if there were any other requests for documents to be printed.

Mr. HARDWICK. No.

Mr. POINDEXTER. Or petitions or memorials.

The VICE PRESIDENT. The Chair did so ask.

Mr. POINDEXTER. That was my understanding.

The VICE PRESIDENT. It is in order unless there is an objection.

Mr. HARDWICK. If the Senator can have it done without debate, I do not object.

Mr. SMOOT. It is already a departmental document, and the Committees on Printing of both Houses have agreed, and the Senate committee is not going to recommend the printing as public documents of the documents issued by the different departments of the Government. If they do, much of the printing of all the departments of our Government will be thrown upon Congress instead of being paid out of the funds appropriated to those departments for printing purposes. So I object.

The VICE PRESIDENT. The Chair understands that there is objection.

LANDS FOR RESERVOIR PURPOSES.

Mr. PHELAN, from the Committee on Public Lands, to which was referred the bill (S. 3646) to grant rights of way over Government lands for reservoir purposes for the conservation and storage of water to be used by the city of San Diego, Cal., and adjacent communities, reported it with amendments and submitted a report (No. 239) thereon.

AMENDMENT OF ESPIONAGE LAW.

Mr. CULBERSON. From the Committee on the Judiciary I report back favorably without amendment the bill (S. 3522) to amend an act entitled "An act to punish acts of interference with the foreign relations, the neutrality, and the foreign commerce of the United States, to punish espionage, and better to enforce the criminal laws of the United States, and for other purposes," approved June 15, 1917, and I submit a report (No. 238) thereon. I ask unanimous consent for the present consideration of the bill.

The VICE PRESIDENT. Is there any objection?

Mr. HARDWICK. Mr. President, I should like to have the bill read before I can consent to its consideration.

The VICE PRESIDENT. The Secretary will read the bill.

The Secretary read the bill, as follows:

A bill (S. 3522) to amend an act entitled "An act to punish acts of interference with the foreign relations, the neutrality, and the foreign commerce of the United States, to punish espionage, and better to enforce the criminal laws of the United States, and for other purposes," approved June 15, 1917.

Be it enacted, etc., That section 3 of title 1 of the act entitled "An act to punish acts of interference with the foreign relations, the neutrality, and the foreign commerce of the United States, to punish espionage, and better to enforce the criminal laws of the United States, and for other purposes," approved June 15, 1917, be, and the same is hereby, amended so as to read as follows:

"SEC. 3. Whoever, when the United States is at war, shall willfully make or convey false reports or false statements with intent to interfere with the operation or success of the military or naval forces of the United States or to promote the success of its enemies, or with intent to obstruct the sale by the United States of bonds or other securities of the United States or the making of loans by or to the United States, and whoever, when the United States is at war, shall willfully cause or attempt to cause insubordination, disloyalty, mutiny, or refusal of duty, in the military or naval forces of the United States, or shall willfully obstruct the recruiting or enlistment service of the United States, to the injury of the service or of the United States, shall be punished by a fine of not more than $10,000 or imprisonment for not more than 20 years, or both."

Mr. CULBERSON, from the Committee on the Judiciary, submitted the following report:

The Committee on the Judiciary, which has had under consideration S. 3522, being a bill to amend an act entitled "An act to punish acts of interference with the foreign relations, the neutrality, and the foreign commerce of the United States, to punish espionage, and better to enforce the criminal laws of the United States, and for other purposes," approved June 15, 1917, report the same to the Senate and recommend its passage without amendment.

The object of the bill is to amend section 3 of Title I of the act referred to, commonly known as the espionage act, by adding to it ", or with intent to obstruct the sale by the United States of bonds or other securities of the United States or the making of loans by or to the United States," so that as amended section 3 of the act aforesaid will read as follows:

"SEC. 3. Whoever, when the United States is at war, shall willfully make or convey false reports or false statements with intent to interfere with the operation or success of the military or naval forces of the United States or to promote the success of its enemies, or with intent to obstruct the sale by the United States of bonds or other securities of the United States or the making of loans by or to the United States, and whoever, when the United States is at war, shall willfully cause or attempt to cause insubordination, disloyalty, mutiny, or refusal of duty, in the military or naval forces of the United States, or shall willfully obstruct the recruiting or enlistment service of the United States, to the injury of the service or of the United States, shall be punished by a fine of not more than $10,000 or imprisonment for not more than 20 years, or both."

The bill is recommended by the Department of Justice and the Treasury Department, as shown by the following letters from the Attorney General and the Secretary of the Treasury:

DEPARTMENT OF JUSTICE,
OFFICE OF THE ATTORNEY GENERAL,
Washington, D. C., January 10, 1918.

Hon. CHARLES A. CULBERSON,
Chairman Committee on the Judiciary,
United States Senate.

MY DEAR SENATOR: During the past six months the attention of this department has been called to many instances of the making of false reports or statements intended to interfere with the successful floating of the liberty loans. Whether these acts have been committed by those who are actively favoring the cause of the enemy or whether they are committed with other motives, they are equally disloyal and injurious to the interests of the United States.

There seems at present to be no law upon the statute books which makes such acts criminal. The Secretary of the Treasury and the Federal Reserve Board have been and are much concerned over this situation, and I transmit herewith a copy of a letter from the former, dated January 9, 1918. I desire to say that I earnestly concur in the views expressed as to the necessity of the legislation, and also in the request of the Secretary of the Treasury that an amendment of the espionage act covering this point be adopted at the earliest possible moment.

I transmit herewith for the assistance of your committee a draft of such an act as I think would be sufficient to meet the evil.

Respectfully,

T. W. GREGORY, *Attorney General.*

THE SECRETARY OF THE TREASURY,
Washington, January 9, 1918.

MY DEAR MR. ATTORNEY GENERAL: I have your letter of the 2d of January and am glad to note that you agree with me regarding the necessity for an amendment to the espionage act providing that it shall be a criminal offense to make or convey false reports or false statements with the intent to obstruct the sale of United States bonds or other securities of the Government. The phraseology of the proposed amendment as suggested by you is entirely acceptable to me, and I shall appreciate it if you will bring it to the attention of the Judiciary Committees of the two Houses of Congress, together with this letter.

I consider the adoption of such an amendment most important. Since the United States entered the war a number of instances have been brought to the attention of this department in which efforts have

been made to interfere with the successful financing of the war. No argument is needed to show the necessity for the amendment, and I think it highly important that it be enacted at the earliest possible moment.

Sincerely, yours, W. G. McADOO.

Hon. THOMAS W. GREGORY,
Attorney General.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

Mr. GALLINGER. Mr. President, I want to ask the Senator from Texas a question. I notice that the bill proposes to make it a crime for any man to make a suggestion that the bonds of the United States should not be purchased. The bonds of the United States which have already been issued are below par; and if one man should ask another if he thought it was a good investment to take the bonds of the third issue, and the one of whom the question was asked replied: "I am afraid not, because the others are below par," would that be a crime?

Mr. CULBERSON. It would not under the proposed statute.

Mr. GALLINGER. I want to know how far-reaching this proposed law is to be.

Mr. CULBERSON. Let the report on the bill be read, Mr. President.

Mr. BORAH. Mr. President, if this is going to lead to debate, some of us would like to get through with the morning business. If there is going to be debate on the bill, I am going to object to its consideration.

Mr. CULBERSON. The report is short, and I ask that it be read.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

Mr. FRANCE. Mr. President, this is a very important matter, and I believe it should be considered only when a quorum is present. Therefore I object to the present consideration of the bill.

The VICE PRESIDENT. Then the bill goes to the Calendar.

Mr. CULBERSON. Mr. President, I ask that the report accompanying the bill may be printed in the RECORD immediately following the bill.

The VICE PRESIDENT. Without objection, that action will be taken.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SMOOT:

A bill (S. 3661) authorizing the acquisition of certain lands in the District of Columbia for parkway purposes; to the Committee on the District of Columbia.

By Mr. JONES of Washington:

A bill (S. 3662) to establish the Mount Baker National Park in the State of Washington; to the Committee on Public Lands.

A bill (S. 3663) authorizing the Cowlitz Tribe of Indians, residing in the State of Washington, to submit claims to the Court of Claims; to the Committee on Indian Affairs.

By Mr. POINDEXTER:

A bill (S. 3664) prohibiting any person, lessor, or sublessor from making a larger charge for rooms, apartment houses, hotel rooms, etc., than the rate charged for such rooms, houses, or dwellings on the 1st day of December, 1917; to the Committee on the Judiciary.

By Mr. GORE:

A bill (S. 3665) to enable the Secretary of Agriculture to establish plants in connection with land-grant colleges for the drying or dehydration of fruits and vegetables, and for other purposes; to the Committee on Agriculture and Forestry.

By Mr. GALLINGER:

A bill (S. 3666) granting an increase of pension to Wesley J. Ladd (with accompanying papers); to the Committee on Pensions.

By Mr. FRANCE:

A bill (S. 3667) providing for the conservation of certain foodstuffs in the District of Columbia; to the Committee on the District of Columbia.

By Mr. SHAFROTH:

A bill (S. 3668) providing that the same war taxes on incomes and salaries shall apply to salaried officers of the United States, including Senators and Representatives in Congress, as upon all other persons subject to tax; to the Committee on Finance.

By Mr. HARDWICK:

A bill (S. 3669) to amend an act entitled "An act in reference to the expatriation of citizens and their protection abroad," approved March 2, 1907; to the Committee on Immigration.

By Mr. WARREN:

A bill (S. 3670) to promote the settlement and agricultural development of United States reclamation projects; to the Committee on Irrigation and Reclamation of Arid Lands.

By Mr. OWEN:

A bill (S. 3671) conferring jurisdiction on the Court of Claims for adjudging the rights of the Otoe and Missouria Tribes of Indians for compensation on a basis of guardian and ward, and conferring jurisdiction on the Court of Claims to adjust the claims between the Otoe and Missouria Tribes of Indians and the Omaha Indians, to certain moneys received by the Omaha Indians; to the Committee on Claims.

By Mr. SHERMAN:

A bill (S. 3672) granting an increase of pension to Christian Marxmiller; to the Committee on Pensions.

By Mr. NEW:

A bill (S. 3673) for the relief Francis J. Mattler; to the Committee on Military Affairs.

A bill (S. 3674) granting a pension to John D. Ball;

A bill (S. 3675) granting an increase of pension to Richard Hardesty;

A bill (S. 3676) granting a pension to Curtis Harlin Lewis, jr.;

A bill (S. 3677) granting an increase of pension to James M. Alloways (with accompanying papers); and

A bill (S. 3678) granting an increase of pension to Taylor Edwards (with accompanying papers); to the Committee on Pensions.

By Mr. BORAH:

A bill (S. 3679) granting a pension to Mary B. Hawkins (with accompanying papers); to the Committee on Pensions.

By Mr. SMITH of Michigan:

A bill (S. 3680) granting an increase of pension to Marion Davis;

A bill (S. 3681) granting an increase of pension to William H. Cliff;

A bill (S. 3682) granting an increase of pension to Robert R. Robinson;

A bill (S. 3683) granting an increase of pension to Martin V. B. Clark (with accompanying papers); and

A bill (S. 3684) granting an increase of pension to Elias B. Bell (with accompanying papers); to the Committee on Pensions.

By Mr. TOWNSEND:

A bill (S. 3685) granting a pension to Anthon O. Kruger (with accompanying papers); to the Committee on Pensions.

By Mr. WATSON:

A bill (S. 3686) granting an increase of pension to James Hood; to the Committee on Pensions.

By Mr. HALE:

A bill (S. 3687) granting an increase of pension to Ivory D. White; and

A bill (S. 3688) granting an increase of pension to Mary Howard (with accompanying papers); to the Committee on Pensions.

By Mr. REED:

A bill (S. 3689) authorizing the Postmaster General to cancel or readjust the screen-wagon contract of H. H. Hogan, at Kansas City, Mo.; and

A bill (S. 3690) authorizing the Postmaster General to cancel or readjust the terms of star-route and screen-wagon contracts; to the Committee on Post Offices and Post Roads.

By Mr. CHAMBERLAIN:

A bill (S. 3691) to provide for reimbursement of actual expenses or flat per diem for enlisted men of the Army traveling on duty under competent orders;

A bill (S. 3692) to amend section 1199, Revised Statutes of the United States; and

A bill (S. 3693) to prescribe the personnel of the Army Nurse Corps, the qualifications for appointment and the method of appointment therein, the pay, allowances, and leave of absence of members of said corps and the conditions under which they may be retired; to the Committee on Military Affairs.

A bill (S. 3694) for the relief of Amy E. Hall (with accompanying papers); to the Committee on Claims.

A bill (S. 3695) granting a pension to Murtha Doyle (with accompanying papers); to the Committee on Pensions.

By Mr. NELSON:

A bill (S. 3696) granting a pension to Anna Bryson; to the Committee on Pensions.

By Mr. RANSDELL:

A bill (S. 3697) for the relief of First Lieut. A. W. Jackman, retired; to the Committee on Military Affairs.

A bill (S. 3698) for the relief of J. L. Borroun and Francis P. Bishop; to the Committee on Agriculture and Forestry.

A bill (S. 3699) for the relief of Mattie R. Mayer;

A bill (S. 3700) for the relief of John McW. Ford; and

A bill (S. 3701) for the relief of Laura E. Graves; to the Committee on Public Lands.

By Mr. HARDING:

A bill (S. 3702) to reimburse the Navajo Timber Co., of Delaware, for a deposit made to cover the purchase of timber; to the Committee on Claims.

A bill (S. 3703) granting an increase of pension to William H. Phillips;

A bill (S. 3704) granting an increase of pension to Barton O'Neal;

A bill (S. 3705) granting an increase of pension to William H. Morgan;

A bill (S. 3706) granting a pension to Thomas J. Scanlon;

A bill (S. 3707) granting an increase of pension to Wesley Woodard (with accompanying papers);

A bill (S. 3708) granting an increase of pension to Robert D. Hunter (with accompanying papers);

A bill (S. 3709) granting an increase of pension to Zachariah R. Thornton (with accompanying papers);

A bill (S. 3710) granting an increase of pension to James Hickman (with accompanying papers);

A bill (S. 3711) granting an increase of pension to Berlie Cross (with accompanying papers); and

A bill (S. 3712) granting a pension to Mary Rumbold (with accompanying papers); to the Committee on Pensions.

By Mr. SHAFROTH:

A joint resolution (S. J. Res. 127) providing for printing the report of the Chief of the Children's Bureau, Department of Labor; to the Committee on Printing.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. SHEPPARD submitted an amendment proposing to appropriate $25,000 for the relief, civilization, and education of the Alabama and Coushatta Indians located in Polk County, Tex., etc., intended to be proposed by him to the Indian appropriation bill, which was referred to the Committee on Indian Affairs and ordered to be printed.

Mr. NELSON submitted an amendment proposing to appropriate not to exceed $50,000 of the funds derived from the sale of timber from the Red Lake Indian Forest, Minn., to be expended by the Secretary of the Interior in the logging, booming, towing, and manufacturing of timber at the Red Lake Agency sawmill, etc., intended to be proposed by him to the Indian appropriation bill, which was referred to the Committee on Indian Affairs and ordered to be printed.

He also submitted an amendment proposing to appropriate $4,000 for the improvement of the road between the Cass Lake Indian School and village, in the State of Minnesota, etc., intended to be proposed by him to the Indian appropriation bill, which was referred to the Committee on Indian Affairs and ordered to be printed.

Mr. WARREN submitted an amendment proposing to appropriate $750,000 for investigating the disease of tuberculosis in animals, etc., intended to be proposed by him to the Agricultural appropriation bill, which was referred to the Committee on Agriculture and Forestry and ordered to be printed.

Mr. JONES of Washington submitted an amendment proposing to appropriate $750,000 for the current and contingent expenses of the Bureau of Indian Affairs, intended to be proposed by him to the Indian appropriation bill, which was referred to the Committee on Indian Affairs and ordered to be printed.

WORLD PEACE.

Mr. NORRIS. I ask unanimous consent for a reprint of Senate Document 139, Sixty-third Congress, first session.

Mr. SMOOT. What is the document?

Mr. NORRIS. It is a sermon by T. M. C. Birmingham, and the title of it is "World Peace Under American Leadership." It has already been printed as a Senate document, but the copies are exhausted.

Mr. SMOOT. The Senator does not want a reprint, but a certain number of extra copies should be printed. Is that what the Senator desires?

Mr. NORRIS. Of course, that would satisfy me; but I propose a reprint, as it is now a document of the Sixty-third Congress.

Mr. SMOOT. No; it remains a public document forever. If the Senator wants a thousand extra copies printed, he can make that request.

Mr. NORRIS. I have no objection what the particular form is, so that there may be a reprint. I will make a request for the printing of 1,000 extra copies.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

The order was reduced to writing, as follows:

Ordered, That 1,000 additional copies of Senate Document 139, Sixty-third Congress, first session, entitled "World Peace Under American Leadership," be printed for the use of the Senate document room.

INTERNATIONAL POLICY.

Mr. BORAH submitted the following resolution (S. Res. 194), which was referred to the Committee on Foreign Relations:

Whereas most wars originate in the imperialistic designs of powerful nations to absorb and exploit smaller or weaker peoples; and

Whereas such designs, whenever successful, have always resulted in the political, economic, and moral degradation of the peoples whose rights were violated; and

Whereas the future progress and happiness of mankind depend upon the establishment of harmonious relations between the different peoples of the world, and such harmonious relations can only exist after each nation is made secure in the enjoyment of its political and economic freedom; and

Whereas all nationalities, constituting as they do the individuals of international law, have an inalienable right to the free disposition of themselves and to the international recognition of their separate political entity; and

Whereas history records that diplomatic congresses held upon the termination of wars have uniformly confined themselves to recognizing the advantages of the stronger powers regardless of the rights of other peoples affected thereby; and

Whereas such congresses have bartered away the interests of the weaker nations to promote the advantages and aggrandizement of the stronger powers; and

Whereas agreements resulting from such congresses create or perpetuate strained conditions, and, by countenancing injustice, sow the seed of later wars; and

Whereas the future peace conference is expected to decide the fate of humanity for generations; and

Whereas the readjustment to be brought about is therefore of vital importance to each nationality and people; and

Whereas peace conferences of the past have ignored the claims of small and subject nationalities by denying them representation at the conferences and by allowing their fate to be decided by indifferent, biased, or hostile parties; and

Whereas the declared purpose of the present war is to preserve and extend democracy among the nations of the world, most of the belligerents having repeatedly stated that this war is being fought in defense of the rights and integrity of small nations; and

Whereas the exclusion of any small or subject nation from participating in the conference held to establish world democracy and conclusive peace would be contrary to the import of the above declarations, and such exclusion is certain to result in the ignoring of their rights and interests, as has been the case in all past conferences; and

Whereas to deny any people admission into the commonwealth of nations would be an offense to the moral sense of mankind: Therefore be it

Resolved by the Senate of the United States:

1. That it is indispensable to the future permanent peace of the world that the national political and economic rights of small and subject nationalities be restored and conceded.

2. That if the coming peace is not to be illusory it must be inspired by justice alone and not by strategic consideration of the selfish, economic interests of the few strong powers; that the terms of peace should exclude all provisions which give any nation an advantage, privilege, or concession not equally shared in by other nations; and that hereafter when outside assistance is required by any country for the development of its potentialities the opportunity to share in this development shall be free and open to all other countries on equal terms.

3. That the right of each small and subject nationality to separate, deliberate representation at the peace conference be recognized, and that its case and interest be discussed and determined in open, public session.

4. That the nations that have declared themselves champions of world democracy and of the liberties of small and subject nations make their position clear to the world by pledging themselves to favor the admission of separate, deliberate representatives of all nationalities into the peace conference.

5. That in no case should anyone be disturbed because of race, language, or religion, nor on that account be subjected to intolerant treatment; that everyone has a right to civil equality, to liberty of conscience and religion, to the free use of his language, and the pursuit of happiness.

6. That the repatriation of all persons exiled or forcibly removed from their homes for whatever alleged reason is the first obligation of the power immediately responsible therefor.

7. That complete restitution should be made by such power for all private property destroyed and full reparation for all damage done, and that this should be guaranteed by the power immediately responsible therefor.

8. That secret diplomacy, one of the traditions of autocratic and personal governments, the chief weapon of despotism, and the most prolific source of the world's disturbance, is also the one indispensable instrument for the oppression of small nations; that it has, and can have, no place in a democratic world and should be rejected and discarded by all civilized nations.

THE COMMITTEE ON EDUCATION AND LABOR.

Mr. SMITH of Georgia submitted the following resolution (S. Res. 195), which was read and referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Committee on Education and Labor or any subcommittee thereof be, and hereby is, authorized, during the Sixty-fifth Congress, to send for persons, books, and papers; to administer oaths; and to employ a stenographer, at a cost not exceeding $1 per printed page, to report such hearings as may be had in connection with any subject which may be before said committee, the expenses thereof to be paid out of the contingent fund of the Senate, and that the committee or any subcommittee thereof may sit during the sessions or recesses of the Senate.

REHABILITATION OF CRIPPLED SOLDIERS AND SAILORS.

Mr. NORRIS. I submit a resolution asking for certain information from the Secretary of War, and I ask unanimous consent for its present consideration.

The VICE PRESIDENT. The resolution will be read.

The Secretary read the resolution (S. Res. 193), as follows:

Resolved, That the Secretary of War be directed to furnish to the Senate such information as the War Department has or can readily obtain on the rehabilitation and vocational reeducation of crippled soldiers and sailors.

The VICE PRESIDENT. Is there objection to the present consideration of the resolution?

The resolution was considered by unanimous consent and agreed to.

INCOME-TAX PRIMER.

The VICE PRESIDENT laid before the Senate the following concurrent resolution (No. 33) of the House of Representatives, which was referred to the Committee on Printing:

Resolved by the House of Representatives (the Senate concurring), That there shall be printed 500,000 extra copies of the Income Tax Primer, prepared by the Bureau of Internal Revenue for the information and assistance of taxpayers, 150,000 copies for the use of the Senate, 350,000 for the use of the House of Representatives, the same to be distributed through the folding rooms.

THE PRESIDENT'S PEACE POLICY.

Mr. LEWIS. Mr. President, on January 11 I submitted a resolution, being Senate resolution 181, having for its object the approval of the peace message of the President of the United States. I then asked that it lie upon the table. It was my intention to address myself to the resolution, but since then certain Senators have tendered certain forms of amendments or separate resolutions. In view of what has transpired from Europe, I think it would be now appropriate, as the Senator from Idaho [Mr. BORAH] has tendered a resolution and had it referred to the Committee on Foreign Relations, and the Senator from Oklahoma [Mr. OWEN] having done likewise, that I should move that my resolution now go to that committee in order that it may be treated at once in connection with other resolutions that may now be before the committee on the same subject.

The VICE PRESIDENT. The resolution will be referred to the Committee on Foreign Relations.

THE WHEAT SUPPLY.

Mr. FRANCE. Mr. President, I desire to state that on January 9 I submitted a resolution, which I considered to be of some importance, and at that time I gave notice that when the proper opportunity presented itself I should desire to speak briefly on the subject. Unless there is some other important matter to come up to-day at the close of morning business, I desire then to address the Senate briefly on the resolution.

WITHDRAWAL OF PAPERS.

On motion of Mr. BORAH, it was

Ordered, That the papers accompanying the bill (S. 1483, 65th Cong., 1st sess.) granting increase of pension to Emma E. Normoyle be withdrawn from the files of the Senate, no adverse report being made thereon.

On motion of Mr. NEW, it was

Ordered, That leave be granted to withdraw from the files of the Senate the papers accompanying S. 4009, Sixty-fourth Congress, first session, providing that Nathan Manzer be considered to have been honorably discharged from the military service of the United States, no adverse report having been made thereon.

THE GARABED INVENTION—CONFERENCE REPORT.

Mr. JAMES submitted the following conference report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the resolution (H. J. Res. 174) for the purpose of promoting efficiency, for the utilization of the resources and industries of the United States, for lessening the expenses of the war, and restoring the loss caused by the war by providing for the employment of a discovery or invention called the "Garabed," claiming to make possible the utilization of free energy, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment numbered 5.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 3, 4, 6, and 7, and agree to the same.

OLLIE M. JAMES,
T. P. GORE,
FRANK B. BRANDEGEE,
Managers on the part of the Senate.

CHARLES B. SMITH,
ROBERT CROSSER,
JOHN I. NOLAN,
Managers on the part of the House.

The conference report was agreed to.

WAR CABINET—DIRECTOR OF MUNITIONS.

Mr. HITCHCOCK. Mr. President, I desire to give notice that on Monday next, immediately after the close of the morning business, I shall ask the privilege to address the Senate on the subject of the creation of a war cabinet, and also in support of the bill on the calendar proposing to create the office of director of munitions.

Mr. WADSWORTH. Mr. President, I desire to give notice at this time that on Tuesday next, at the close of the morning business, I shall ask the privilege to address the Senate on the legislation first referred to by the Senator from Nebraska [Mr. HITCHCOCK].

INTERNATIONAL BIMETALLISM (S. DOC. NO. 168.)

Mr. THOMAS. Mr. President, in the Annalist of the 7th of January appears an article entitled "A move for international bimetallism," from the pen of my colleague [Mr. SHAFROTH]. It is a most valuable contribution upon a subject which will soon become one of the issues of the hour. I ask to have it printed as a Senate public document. It is very short, and will comprise only between four and six printed pages.

The VICE PRESIDENT. Is there any objection? The Chair hears none, and it is so ordered.

DEATH OF MAJ. A. P. GARDNER.

Mr. JAMES. Mr. President, I present resolutions adopted by the House of Representatives of the State of Kentucky upon the death of Maj. Augustus P. Gardner, paying high tribute to his distinguished service. I ask that they be printed in the RECORD.

There being no objection, the resolutions were ordered to be printed in the RECORD, as follows:

IN HOUSE OF REPRESENTATIVES,
January 16, 1918.

[Adopted.]

Whereas Augustus P. Gardner, soldier, statesman, and patriot, in all the acts of his splendid life an ideal American, on the afternoon of January 14 passed away while in the service of his country at Camp Wheeler, Macon, Ga.: Now

Be it resolved by the House of Representatives of the Commonwealth of Kentucky, That the membership of this body hereby expresses profound sorrow on learning of the loss of this great leader of opinion and of men, and unites with all true Americans in tribute to his gallantry, and to the inspiration afforded by his ideals to the young manhood of the country he so loved that in her defense he yielded up his life.

Resolved further, That expression of our sympathy and sorrow be, and the same is, hereby extended to the widow and family of Maj. Gardner, and that a copy of these resolutions, properly certified by the clerk of the house, be forwarded to his family at Hamilton, Mass.

A copy.

Attest:

ELI BERRY,
Chief Clerk, House of Representatives.

SERVICE UNDER DOMINICAN REPUBLIC.

The VICE PRESIDENT. Morning business is closed.

Mr. SWANSON. There is a bill on the calendar, which has been reported favorably by the Committee on Naval Affairs, which I desire to have disposed of this morning. I therefore ask unanimous consent for the immediate consideration of the bill (S. 3006) to authorize and empower officers and enlisted men of the Navy and Marine Corps to serve under the Government of the Dominican Republic, and for other purposes.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was read, as follows:

Be it enacted, etc., That the President of the United States be, and he is hereby, authorized, in his discretion, to detail to assist the Dominican Republic, officers and enlisted men of the United States Navy and the United States Marine Corps: *Provided*, That officers and enlisted men so detailed be, and they are hereby, authorized to accept from the Government of the Dominican Republic offices under said Government with compensation and emoluments from the said Dominican Republic, subject to the approval of the President of the United States: *Provided further*, That while so detailed such officers and enlisted men shall receive, in addition to the compensation and emoluments allowed them by the Dominican Republic, the pay and allowances of their rank or rating in the United States Navy or United States Marine Corps, as the case may be, and they shall be entitled to the same credit, while so serving, for longevity, retirement, foreign-service pay, and for all other purposes that they would receive if they were serving with the United States Navy or Marine Corps in said Dominican Republic.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

RETIRED OFFICERS OF THE NAVY AND MARINE CORPS.

Mr. SWANSON. I move that the Senate proceed to the consideration of the bill (S. 3126) to provide temporary promotion for retired officers of the Navy and Marine Corps performing active duty during the period of the present war.

The VICE PRESIDENT. The question is on the motion of the Senator from Virginia.

Mr. GALLINGER. Let the bill be read.

The VICE PRESIDENT. The Secretary will read the bill.

The Secretary read the bill, as follows:

Be it enacted, etc., That during the present emergency any commissioned or warrant officer of the Navy or Marine Corps of the United States on the retired list may, while performing active duty pursuant to law, be temporarily advanced to and commissioned in such higher grade or rank on the retired list not above that of lieutenant commander in the Navy or major in the Marine Corps as the President may determine, and any officer so advanced shall, while on active duty, be entitled to the same pay and allowances as officers of like grade or rank on the active list: *Provided*, That any such commissioned or warrant officer who has been so advanced in grade or rank by reason of this act shall, upon his relief from active duty or in any case not later than six months after the termination of the present war, revert to the grade or rank on the retired list and to the pay and allowance status, except as to longevity pay, which he would have held had he not been temporarily promoted as provided by this act: *Provided further*, That a retired officer, whether or not employed on active duty, shall receive longevity pay according to his total service on the active list plus his total period of active duty while on the retired list.

Mr. GALLINGER. Mr. President, I will ask the Senator from Virginia if there is any similar statute relating to officers of the Army?

Mr. SWANSON. The officers of the Army are treated more liberally than the officers of the Navy will be treated under this proposed law.

Mr. GALLINGER. Are they given increased pay when they are called from the retired list to the active list for temporary duty?

Mr. SWANSON. Under the law covering the Army a retired officer called to active service receives the pay for the grade in which he serves on active duty; in the Navy, under this proposed law, it is provided that the officer of the Navy or Marine Corps on the retired list—

may, while performing active duty pursuant to law, be temporarily advanced to and commissioned to such higher grade or rank on the retired list not above that of lieutenant commander of the Navy or major in the Marine Corps, as the President may determine.

Under the provision in respect to the Army, when a retired officer is put on active duty he is subject to promotion, and when he retires he retires at the increased rank obtained during his service. There is no such provision in this bill in regard to the Navy. In the Navy, when a retired officer is put on active duty, he will get such pay and emoluments as he is entitled to as an officer on active duty, and he may be promoted up to the rank provided in the bill; but when he is retired he is retired at the same rank he held when he originally retired.

Mr. GALLINGER. So that, if this bill should become a law, it would not fully equalize the pay as between the Army and the Navy?

Mr. SWANSON. It would not altogether do so.

Mr. GALLINGER. But it would tend to equalize it?

Mr. SWANSON. It does this: It gives longevity pay; and that longevity pay is computed in the case of the officer and the enlisted man according to the term of his active service, including both the active service before retirement and the active service when again called to active duty. The bill seems to me to be just.

It might also be proper, when officers and enlisted men of the Navy and Marine Corps are in active service, to give them the same advantages in proportion as are given to officers and enlisted men in the Army. The Navy Department, however, did not recommend that at this time, and the committee did not go any further than the department recommended.

Mr. GALLINGER. While this bill will doubtless cost a good deal of money—and I suppose we have an abundance of that in the Treasury—it does not seem to discriminate in favor of the Navy, and I do not object to it.

Mr. SMOOT. Mr. President, I notice that the bill which was just passed on the motion of the Senator from Virginia [Mr. SWANSON] had been favorably reported upon by the Secretary of the Navy. The report on this bill contains no recommendation from the Secretary of the Navy, but is accompanied by a letter of Leof M. Harding, captain, retired, United States Marine Corps.

Mr. SWANSON. Mr. President, if the Senator will read that letter he will see that the writer wanted this bill to be amended further than was desired by the department. He wanted the bill amended to permit a naval officer to be retired after he had been on active service with the rank to which he may have been promoted on account of his active service; but we did not include such an amendment. The writer of the letter, which the Senator from South Carolina [Mr. TILLMAN] included in the report, was anxious that the bill recommended by the Navy Department be amended so as to conform to the statute which relates to the Army under similar circumstances.

Mr. SMOOT. This is what the report states in connection with that matter:

2. Inclosure (a), which has the approval of the department, covers all that is requested, save that it does not give the officer promoted thereunder the relative rank to which his period of service entitles him.

Do I understand the Senator to say that this bill adheres to the position taken by the Navy Department?

Mr. SWANSON. I understand it does. The department recommended this bill, but the writer of the letter referred to wanted the bill amended in the respects suggested by him.

If the Senator will permit me and will listen to me a moment, I desire to call his attention to the fact that in the Army when a retired officer is called to active duty, though he may have been retired as a first lieutenant, in the course of his subsequent active duty he may be promoted to be a captain or a major, and when he retires he does not retire with the rank he held when originally retired, but he retires with the rank to which he has been promoted during his second period of active service. That is not true in the case of the Navy. When a naval officer is called to active duty he is paid the full pay of his grade, and under this bill he may be promoted up to the grade of lieutenant commander. The law which was passed last year continues in force, but when an officer is retired under this bill he retires with the rank at which he was retired originally. He is entitled, however, to additional longevity pay, which is not the case under the existing law. All that this bill does is to give him his longevity pay when he retires. It ought to go further.

Mr. SMOOT. I am perfectly willing to take the statement of the Senator. The object of the bill, then, is that where an officer has been retired and is called into active service, the length of service shall apply to his longevity pay?

Mr. SWANSON. Yes. That is, he gets longevity pay according to his active service before he was retired and his active service since he was retired. When he is retired again he goes back to the rank and pay at which he was originally retired, with longevity pay added to it.

Mr. SMOOT. I think he is entitled to that, and if that is all the bill does, I have no objection to it.

Mr. SWANSON. That is all the bill does. I should have no objection to the bill going further. It is limited to this emergency and six months thereafter. When these retired officers are put on active duty during the war and take all the risk and dangers of war, I should not object to letting them be retired with rank and pay proportionate to their active service; but this bill does not go that far, as the department did not recommend it.

Mr. SMOOT. I have no objection, then, Mr. President.

The PRESIDING OFFICER (Mr. OVERMAN in the chair). The Senator from Virginia moves that the Senate proceed to the consideration of the bill referred to by him.

The motion was agreed to; and the Senate, as in Committee of the Whole, proceeded to consider the bill (S. 3126) to provide temporary promotion for retired officers of the Navy and Marine Corps performing active duty during the period of the present war. It proposes that during the present emergency any commissioned or warrant officer of the Navy or Marine Corps of the United States on the retired list may, while performing active duty pursuant to law, be temporarily advanced to and commissioned in such higher grade or rank on the retired list not above that of lieutenant commander in the Navy or major in the Marine Corps as the President may determine, and any officer so advanced shall, while on active duty, be entitled to the same pay and allowances as officers of like grade or rank on the active list, provided that any such commissioned or warrant officer who has been so advanced in grade or rank by reason of this act shall, upon his relief from active duty or in any case not later than six months after the termination of the present war, revert to the grade or rank on the retired list and to the pay and allowance status, except as to longevity pay, which he would have held had he not been temporarily promoted as provided by this act, and provides further that a retired officer, whether or not employed on active duty, shall receive longevity pay according to his total service on the active list plus his total period of active duty while on the retired list.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

DISPOSITION OF EFFECTS OF DECEASED SAILORS.

Mr. SWANSON. I ask unanimous consent that the Senate proceed to the consideration of the bill (S. 3129), to provide for the disposition of the effects of deceased persons in the naval service.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Virginia?

Mr. GALLINGER. Mr. President, let the bill be read for information first.

The PRESIDING OFFICER. The bill will be read.

The Secretary read the bill; and, there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration. It proposes that hereafter all moneys, articles of value, papers, keepsakes, and other similar effects belonging to deceased persons in the naval service, not claimed by their legal heirs or next of kin, shall be deposited in safe custody, and if any such moneys, articles of value, papers, keepsakes, or other similar effects so deposited have been, or shall hereafter be, unclaimed for a period of two years from the date of the death of such person, such articles and effects shall be sold and the proceeds thereof, together with the moneys above mentioned, shall be deposited in the Treasury to the credit of the Navy pension fund, provided that the Secretary of the Navy is authorized and directed to make diligent inquiry in every instance after the death of such person to ascertain the whereabouts of his heirs or next of kin and to prescribe such regulations as may be necessary to carry out the foregoing provisions; provided, further, that claims under the provisions of the bill may be presented at any time within five years after such moneys or proceeds have been so deposited in the Treasury and, when supported by competent proof in any case after such deposit in the Treasury, shall be certified to Congress for consideration.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BRIG. GEN. LITTLETON W. T. WALLER.

Mr. SWANSON. I ask unanimous consent that the Senate proceed to the consideration of the bill (S. 3131) for the relief of Brig. Gen. Littleton W. T. Waller, United States Marine Corps.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It authorizes and directs the Secretary of the Treasury to pay, out of any money in the Treasury not otherwise appropriated, to Brig. Gen. Littleton W. T. Waller, United States Marine Corps, the sum of $318.90, this being the amount stolen from the public funds of the United States at the navy yard, Norfolk, Va., by a private in the Marine Corps, and which amount was reimbursed to the Government by the said Littleton W. T. Waller, he having been held only technically responsible for the loss.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

Mr. SMOOT obtained the floor.

Mr. SWANSON. Mr. President, I have not finished. I hope the Senator will let me finish with these naval bills.

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Virginia?

Mr. SMOOT. Yes; I yield to the Senator, but what we ought to do is to start at the beginning of the calendar and go through these bills.

Mr. SWANSON. These are war measures.

Mr. SMOOT. Very well; I yield.

COMPENSATION OF PERSONS ACTING AS FIREMEN.

Mr. SWANSON. I ask unanimous consent that the Senate proceed to the consideration of the bill (S. 3130) to amend section 1570 of the Revised Statutes of the United States.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to amend section 1570 of the Revised Statutes of the United States to read as follows:

SEC. 1570. Every seaman, landsman, or marine who performs the duty of a fireman on board any vessel of war shall be entitled to receive, in addition to his compensation as seaman, landsman, or marine, a compensation at the rate of 33 cents a day for the time he is employed as fireman.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

RETIREMENT OF CHIEF WARRANT OFFICERS.

Mr. SWANSON. I ask unanimous consent that the Senate proceed to the consideration of the bill (S. 3400) to regulate the pay of retired chief warrant officers on active duty.

The PRESIDING OFFICER. Is there objection?

Mr. GALLINGER. Let the bill be read for the information of the Senate.

The PRESIDING OFFICER. The Secretary will read the bill.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration. It proposes that any retired chief warrant officer who has been on active duty since August 29, 1916, or who may hereafter perform active duty, and whose record is creditable, shall, during such time as he has been or may hereafter be, on active duty, and from the time his service on the active list after date of commission, plus his service on active duty while on the retired list, is equal to six years, receive the pay and allowances that are now, or may hereafter be, allowed a lieutenant (junior grade), United States Navy; and shall, during such time as he has been, or may hereafter be, on active duty, and from the time such total service is equal to 12 years, receive the pay and allowances that are now, or may hereafter be, allowed a lieutenant, United States Navy.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

NAVAL OFFICERS ABSENT WITHOUT LEAVE.

Mr. SWANSON. I ask unanimous consent that the Senate proceed to the consideration of the bill (S. 3404) to authorize the President to drop from the rolls any Naval or Marine Corps officer absent without leave for three months, or who has been convicted of any offense by the civil authorities, and prohibiting such officer's reappointment.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It authorizes the President to drop from the rolls of the Navy or Marine Corps any officer thereof who is absent from duty without leave for a period of three months or more, or who, having been found guilty by the civil authorities of any offense, is finally sentenced to confinement in a State or Federal penitentiary, provided that no officer so dropped shall be eligible for reappointment.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

QUARTERS FOR OFFICERS OF NAVY AND MARINE CORPS.

Mr. SWANSON. I ask unanimous consent that the Senate proceed to the consideration of the bill (S. 3406) to authorize the Secretary of the Navy to determine where and when there are no public quarters available for officers of the Navy and Marine Corps.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Virginia?

Mr. GALLINGER. Let the bill be read first for the information of the Senate.

The PRESIDING OFFICER. The bill will be read.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration. It proposes that hereafter the Secretary of the Navy may determine where and when there are no public quarters available for persons in the Navy and Marine Corps, or serving therewith, within the meaning of any acts or parts of acts relating to the assignment of quarters or commutation therefor.

Mr. GALLINGER. Mr. President, I will ask the Senator from Virginia to tell us what that means. Surely the Secretary of the Navy, without legislation, can ascertain whether or not there are public quarters available for these persons.

Mr. SWANSON. Mr. President, under existing law no man can have commutation of quarters in the Marine Corps or the Navy as long as there are quarters at the barracks. There is no way under the law for the Secretary of the Navy, as there is for the Secretary of War, to determine when there are not quarters available there. Consequently, there is always trouble with the Comptroller of the Treasury as to whether or not this commutation should be paid, because there is no officer designated to determine whether or not there are quarters there, and thus to give the officers commutation.

As I understand, a different condition prevails in the War Department. The Secretary of War determines whether there are quarters at these barracks or posts for officers; and when it is determined that there are not, then it is definitely fixed that the officer is entitled to commutation of quarters. This bill simply gives authority for the Secretary of the Navy to fix it definitely, so that the Comptroller of the Treasury can determine whether or not commutation is payable.

Mr. GALLINGER. Is there a statute in this regard relating to Army officers?

Mr. SWANSON. As I understand, there is a statute that authorizes the Secretary of War to determine whether or not there are quarters for officers of the Army at these barracks. I can not say definitely, but I have that impression. The general law is that an officer can not have commutation unless it is shown that he can not have quarters in the barracks. There

is no specific method fixed by law at present to determine who shall decide that question. Consequently, the question is left open for the Comptroller of the Treasury to pass on.

Mr. LODGE. At present the commutation of quarters for the officers is held up on the ground that there is nobody to decide the question.

Mr. GALLINGER. If that is all there is to it, I have no objection.

Mr. LODGE. That is all there is to it. I think it is very desirable that the bill should be passed, in justice to the officers.

Mr. SWANSON. It does not change the law. It simply authorizes somebody to decide that question specifically.

The PRESIDING OFFICER. If there be no amendment to be proposed, the bill will be reported to the Senate.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

EX-PAYMASTERS' CLERKS.

Mr. SWANSON. I ask unanimous consent that the Senate proceed to the consideration of the bill (S. 3427) for the relief of certain ex-paymasters' clerks.

Mr. SMOOT and Mr. GALLINGER. Let it be read first.

The PRESIDING OFFICER. The bill will be read.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration. It proposes that any person who was serving as a paymaster's clerk in the United States Navy on March 2, 1915, and who rendered similar service after said date in compliance with orders from the Navy Department, shall be credited for such service as though the same was rendered as a paymaster's clerk, whether such service was in the office to which he had been originally appointed or otherwise, and for the period of such service shall be entitled to the pay and allowances as provided by law for a paymaster's clerk prior to March 3, 1915.

Mr. SMOOT. Mr. President, I will ask the Senator from Virginia to explain this bill.

Mr. SWANSON. Under the old law, Mr. President, when a paymaster was appointed he named his clerk, and that clerk was a paymaster's clerk until the paymaster was removed or went somewhere else. Then he went back to civil life and his appointment ceased. Subsequently we changed that law, and fixed by law the status of a paymaster's clerk. That having been fixed by law and a specific examination prescribed, the paymaster did not have to select his clerk. He had to stand an examination. In the meantime some paymasters' clerks were covered into the Paymaster's Clerks' Corps, before this Paymaster's Clerks' Corps was perfected.

The Comptroller of the Treasury held that the appointments of all paymasters' clerks appointed by the paymasters ceased, and that they could not get their pay. This new method was inaugurated in 1913 or 1914. At that time we made them pay clerks, not paymaster's clerks; so a parcel of clerks were designated to act in the meantime, because the work could not stop. The Comptroller of the Treasury held that they were not paymasters' clerks and not pay clerks. Consequently it has been impossible for those people to get their pay during the time when the change of the system from paymasters' clerks to pay clerks was going into effect. The department has asked to have this bill passed to take care of that class of people, who were left in that situation, though they were directed to do the work and did the work until the position of pay clerk could be established.

Mr. SMOOT. Do they have any rank at all in the Navy?

Mr. SWANSON. They are called pay clerks.

Mr. SMOOT. What is their rank, if they have one?

Mr. SWANSON. The rank is fixed. A pay clerk is a chief warrant officer, like a chief yoeman. A pay clerk is not a commissioned officer; he is a warrant officer.

Mr. SMOOT. Is he entitled to a pension?

Mr. SWANSON. He is entitled to a pension, like other people that serve in the Navy, after a certain length of service. The pay clerks go on battleships; they are here in Washington, and they are subject to the orders of the Navy Department.

Mr. SMOOT. Then this bill is for the purpose of allowing the auditor to pay the clerks during the time the change was being made from appointment by the paymaster himself to appointment by the Government in pursuance of examination?

Mr. SWANSON. During the time the change was being made from paymaster's clerk to pay clerk. The Comptroller of the Treasury has held that they were not paymaster's clerks, and they had not qualified for pay clerks, but they did the work. This bill is simply to authorize the payment of compensation to the people who served during this period of transition. It does not increase the pay of anybody. It simply gives pay to people who were denied pay by the Comptroller of the Treasury.

Mr. GALLINGER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Virginia yield to the Senator from New Hampshire?

Mr. SWANSON. I do.

Mr. GALLINGER. During that period these men discharged certain duties, I suppose, did they?

Mr SWANSON. They discharged the duties of the office. They were directed to discharge these duties as paymaster's clerks, but that office had been abolished.

Mr. GALLINGER. And they were not paid for the services?

Mr. SWANSON. And they were not paid. This is to get rid of that condition.

Mr. GALLINGER. Of course, the bill ought to pass, then.

Mr. LODGE. It covers only a very few men.

Mr. FLETCHER. Mr. President, I shall not object to taking up this bill, but I was wondering if we could not take up the calendar. If that were done, would not these bills be reached soon?

Mr. SWANSON. There are only three or four more. They are very important. These naval officers are leaving all the time.

Mr. FLETCHER. There are a number of us who are interested in bills on the calendar, and it seems to me that we ought to take up the bills in their order. I am not disposed to object, however.

Mr. LODGE. It will take us only a few minutes to complete these bills.

Mr. SWANSON. We have only three or four more, and these naval officers are leaving every day.

The PRESIDING OFFICER. If there be no amendment to be proposed, the bill will be reported to the Senate.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time and passed.

PAYMENT OF GUN POINTERS AND GUN CAPTAINS.

Mr. SWANSON. I ask unanimous consent that the Senate proceed to the consideration of the bill (S. 3445) to authorize the payment of gun pointers and gun captains while temporarily absent from their regular stations, and for other purposes.

Mr. GALLINGER. Mr. President, I will ask the Senator how many more of these bills he has?

Mr. SWANSON. There are only three more.

Mr. GALLINGER. The Senator will recall the fact that the Senator from Maryland [Mr. FRANCE], who some time ago gave notice that he desired to discuss briefly a certain matter, renewed that suggestion this morning, saying that he would ask permission to do so at the close of the morning business.

Mr. SWANSON. I was not aware of that.

Mr. GALLINGER. I think the wishes of the Senator from Maryland ought to be regarded. If it will not take much time to consider the three other bills I shall not object to the Senator proceeding with them.

Mr. SWANSON. It will take only a very little time. These bills are unanimously reported from the Naval Affairs Committee, and they are very necessary for these officers.

Mr. GALLINGER. I trust other Senators will not interpose any business that will prevent the Senator from Maryland making the brief address which he gave notice some time ago he desired to make.

The PRESIDING OFFICER. The Senator from Virginia asks unanimous consent for the consideration of the bill referred to by him. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes that during the period of the present war any enlisted man of the Navy or Marine Corps who has qualified, or who may hereafter qualify, as a gun pointer or gun captain, and who has been, or may hereafter be, detailed as gun pointer or gun captain for a gun of the class for which qualified, shall be entitled to the additional pay now or hereafter provided for such qualification and detail while temporarily absent by proper authority from the place where ordinarily required to perform duty under such detail, or while performing temporary duty which is not connected with such detail as gun pointer or gun captain.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

ADMISSION TO NAVAL ACADEMY.

Mr. SWANSON. I ask that the Senate proceed to the consideration of the bill (S. 3402) to fix the age limits for candidates for admission to the United States Naval Academy.

Mr. SMOOT. Let it be read.

The PRESIDING OFFICER. The bill will be read.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill had been reported from the Committee on Naval Affairs with an amendment to add the following proviso:

Provided, That the foregoing shall not apply to candidates for midshipmen designated for entrance to the academy in 1918.

So as to make the bill read:

Be it enacted, etc., That hereafter all candidates for admission to the Naval Academy must be between the ages of 16 and 20 years on July 1 of the calendar year in which they enter the academy: *Provided*, That the foregoing shall not apply to candidates for midshipmen designated for entrance to the academy in 1918.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

COURSE OF INSTRUCTION AT NAVAL ACADEMY.

Mr. SWANSON. I ask the Senate to proceed to the consideration of the bill (S. 3401) to authorize the President to reduce temporarily the course of instruction at the United States Naval Academy.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Naval Affairs with an amendment to strike out all after the enacting clause and insert:

That the President be, and he is hereby, authorized, during the continuance of the present war, to reduce temporarily, in his discretion, the course of instruction at the United States Naval Academy from four to three years and to graduate classes which have completed such reduced courses of instruction.

Mr. GALLINGER. The Senator from Virginia has suggested that all these bills are war measures. I suppose on that ground there is an emergency. If it were not for that reason I certainly would object to reducing the course of instruction in these academies any more than equally I should in our literary institutions. If it is absolutely necessary that these officers should be produced in larger numbers covering a given period of time, I shall not object; but I think it is a very dangerous principle if it is to be made permanent.

Mr. SWANSON. The department is very urgent about it.

Mr. GALLINGER. Is it designed that this shall be a permanent statute?

Mr. SWANSON. If the Senator will permit me, last year we permitted the course to be temporarily reduced from four years to three years during 1918. This bill extends it during the war.

Mr. GALLINGER. That is the very point I wished to be informed upon. I wanted to know if the bill is so drawn.

Mr. SWANSON. The amendment was put in by the committee so as to limit it during the war.

Mr. GALLINGER. I did not understand that, as it was read hurriedly; but if it is to extend during the period of the war, there is justification for it.

Mr. SWANSON. It is very urgent.

Mr. GALLINGER. I did not want it to be a permanent statute.

Mr. LODGE. It is limited to the war. The Senator will remember that in the Civil War this was done. We need them very much for watch officers.

The PRESIDING OFFICER. The question is on the amendment of the committee.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to authorize the President to reduce temporarily the course of instruction at the United States Naval Academy."

STANDARDIZATION OF WAGES.

The PRESIDING OFFICER. The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business, which will be stated.

The SECRETARY. Senate resolution 174 directing the Committee on Education and Labor to inquire into the subject of labor having to do directly or indirectly with Government work and report upon the advisability of establishing standard wages for laborers in such work.

Mr. KING. I ask that the resolution may go to the calendar.

The PRESIDING OFFICER. Without objection the resolution goes to the calendar.

ADJUDICATION OF PRIVATE CLAIMS.

Mr. SMITH of Georgia. I move that the Senate proceed to the consideration of the bill (S. 1795) to relieve Congress from the adjudication of private claims against the Government. If this motion is adopted I shall ask that the bill be temporarily laid aside so that the calendar or any other matter desired may be disposed of.

Mr. GALLINGER. I call the attention of the Senator from Georgia to the fact that the Senator from Maryland (Mr. FRANCE) some time ago gave notice that he desired briefly to address the Senate on an important matter, and he has renewed that suggestion this morning, saying that he would do so at the close of the morning business. I think the Senator from Maryland ought to be permitted to proceed.

Mr. SMITH of Georgia. So do I, but if this motion prevails I would lay the bill aside at once temporarily and it would not interfere with the speech of the Senator from Maryland.

Mr. GALLINGER. If I understand the bill the Senator is interested in it will not get my consent. There will have to be a vote to take it up if I understand the bill. I may be mistaken.

Mr. SMITH of Georgia. I will state to the Senator that the bill proposes to repeal what is known as the Crawford amendment.

Mr. GALLINGER. I shall resist the repeal in every proper way I can.

Mr. SMITH of Georgia. I want to get the bill up and let the Senate vote on it. I think there should be action on it.

The PRESIDING OFFICER. The question is on the motion of the Senator from Georgia.

Mr. GALLINGER. If the Senator insists on that I desire to debate it.

Mr. SMOOT. Does the Senator from Georgia insist on his motion?

Mr. SMITH of Georgia. I want the Senate to pass on the motion. If the motion is acted upon the pendency of the bill will not interfere at all with the Senator from Maryland.

Mr. SMOOT. But if the motion is put now and carried it makes it the unfinished business.

Mr. SMITH of Georgia. It need not be put at once. The motion can still be pending and the Senator from Maryland can proceed with his speech.

Mr. SMOOT. What I want to know is whether the Senator is going to insist on a vote?

Mr. SMITH of Georgia. Not until after the Senator from Maryland finishes his speech.

Mr. LODGE. The motion is debatable. The Senator from Maryland can speak upon it.

THE WHEAT SUPPLY.

Mr. FRANCE. Mr. President, I shall ask the indulgence of the Senate for only a few minutes. I desire to direct my discussion particularly to the subject of Senate resolution 190, submitted by me on the 28th instant, which reads as follows:

Resolved, That, in view of the serious shortage in the Nation's supply of wheat, the necessity for large exports of wheat, and the alarming report of the Department of Agriculture on December 19, 1917, upon the condition of the winter-wheat crop, that the Secretary of Agriculture and the Food Administrator be, and they are hereby, requested and directed to assemble and transmit to the Senate information as to the methods which are being employed for the conservation of an adequate supply of seed wheat for the sowing of the spring-wheat acreage and what methods are being used or are in contemplation to insure the sowing of such an extraordinarily increased acreage as is imperatively needed to meet the present grave emergency.

Mr. President, I shall speak as briefly as I may upon this general subject and subjects directly relating thereto.

Mr. President, it is now more than 10 months since the Congress declared war. We have not struck the enemy one effective blow nor have we suffered one from her mailed fist, and yet we face to-day the imminent peril of national humiliation and defeat. We have vast resources of man power, of money, and of raw materials. What, then, can be the explanation of this most unfortunate, even if temporary, situation? Our food supply is failing. Privations here already are breeding discontent. Hunger abroad, which should have been appeased with grain out of our own stores, is steadily undermining the strength and the morale of the allied powers. We face a famine of fuel. Transportation systems are choked. Productive industries are paralyzed. The imperative need for ships has not been met. Boys not equipped as soldiers have for weeks been suffering and dying in our home cantonments, while millions of men and women, eager for work and service, have huddled in heatless homes or walked the wintry streets in a wretchedness and idleness which have been forced upon them by a governmental decree. Thus in 10 months have we prepared for war. We have organized an Army, but we have to a dangerous degree disorganized a Nation.

I advert to these facts not for reprimand or for reproach, I speak with no unkindness. No partisan spirit animates me. There are no parties now. There must not be. In a fast comradeship of service and of sacrifice we must be one in the great common cause of preserving the very life of this Republic. By your votes and by mine we launched her forth upon the dangerous deeps amidst this furious, devastating storm of war, and there must be neither mutiny nor dissension until we have brought her back again safe and victorious into the port of peace. But, Mr. President, we must have courage to face realities. We must unflinchingly confront our failures. We must swiftly and scientifically search for their causes and remorselessly eradicate them. We can not fail. I have faith in our democracy and in that faith I trust implicitly the collective wisdom of the people. Therefore no vote of mine has been or ever will be cast to limit the freedom of the press or hush the voice of the masses of our people by which voice at last the truth must be expressed. I know that a just cause can not be permanently injured by unjust criticism.

I know that in war mistakes and failures in details are inevitable. They are deplorable but largely reparable. But failure to grasp the fundamental principle may well be fatal. I have already said on previous occasions that only that marvelous social integration which followed German unification made possible this monstrous creation of modern warfare. I said last April what I repeated in May and what I now reiterate:

"We must combat the wonderful organization of the German nation with an even more powerful organization of our own. We can conquer organization only with organization."

I have continually contended for such a systematic preparation as would enable us to break the iron resistance of our enemy and crush her to her knees. Our principal failure has not been a failure in the details but in the totality.

Do not misunderstand me. I am not unmindful of effective and unselfish service in every department of the Government. I do not forget the careworn Chief Executive, the men in France, those in our camps, and those in civil life who have given so nobly of their best. I would pay every tribute of honor to the heroism in the field and to the heroic devotion at countless department desks where lives are also being offered up. Each sovereign State has already tasted the cup of sorrow, bereaved of beloved sons. Maryland as well as Massachusetts mourns. Some of our brave sons have made the supreme sacrifice, and like Maj. Augustus P. Gardner, Maj. Theodore C. Janeway, professor of medicine at the Johns Hopkins University, preeminent man of science, loyal friend, a great, noble, and lovable man, gave his life gladly that his country's life might be preserved. But all this sacrifice must not be made in vain. Our officers and men have the right to be assured that they have back of them a Nation so organized as to give a support which shall not break when the utmost crushing weight of war is placed upon it. Not fully appreciative of its stupendous nature there has been a failure to scientifically apply the power of the whole Nation to our task. War is no longer a military but a national enterprise. We have been building the structure of our Nation's preparation without that comprehensive plan and coordination of action so absolutely indispensable for the utilization of every unit of power and the constant maintenance of balance and proportion. In modern warfare the military forces are but the plate and covering of the war edifice. We have reversed the rational processes of construction. We have been building our house downward from the roof and there has been an apparent inability to act upon the principle which makes it certain that the military superstructure can not be properly raised or securely upheld without the deep foundations and the immovable supporting walls of an ordinated and integrated Nation.

I urge again your attention to one pressing phase of this whole problem. In explaining my reasons for voting against the so-called "food and fuel control bill" I said:

"If we enact this bill into law we strike an all but mortal blow into the very vitals of this Nation as she is rising and slowly gathering strength to gird herself for what must be a dangerous if not a deadly combat."

To-day, Mr. President, our Nation is yet staggering from that blow. We live in a law-ordered universe. You can not cure consequences if you ignore causes, and hence the utter failure of our food legislation. The net result, so far as production is concerned, of all the ineffective agitation and unscientific legislation dealing with the inexcusable insufficiency of the food supply of the Nation is an inconsiderable increase in the acreage now seeded with winter wheat and the poorest average condition of winter wheat on December 1, 1917, ever reported in the history of the country. On December 1, 1917, the average condition of winter wheat was 79.3 per cent, as against 81.4 per cent in December, 1895, the lowest condition ever hitherto reported, and as against 85.7 per cent in December, 1916, when the crop of winter wheat at the following harvest was wholly inadequate to meet our needs. The food situation is far more alarming now than it was in May, when I urged it as an unanswerable argument for a better national organization. Mr. President, so far as I am concerned, I fail to see how the lines of the allied powers in Europe can be held through 1918 unless we can secure at least 500,000,000 bushels of wheat from our spring wheat acreage and at the same time enormously increase our next year's acreage of corn. This can not be done unless some system of industrial and agricultural organization is adopted for the effective application of adequate labor to this great task.

Where words have been so wholly futile, the remorseless logic of events and swift approaching national disaster must make it clear that not the Army only but the whole Nation must participate in the waging of this war if victory is to be ours; that war is no longer merely a series of military operations, but that it is rather a national undertaking embracing every form of productive activity, and more particularly all of those activities which are directly necessary to provide food, ships, and munitions. We must quickly solve the great and grave problems of production by the perfection of an organization for the utilization of every unit of man power and the adjustment and application of all of that power to the manifold activities which enter into the performance of our huge task of waging this war.

I hope in the near future to address the Senate upon the subject of legislation which I have again proposed, looking to such a complete organization as would meet each of our various national needs, particularly the pressing needs for food, ships, transportation, fuel, and munitions of war.

PERSONAL EXPLANATION.

Mr. THOMPSON. Mr. President, I rise to a question of personal privilege.

On January 25, 1918, there was introduced in the investigation of the packers before the Federal Trade Commission carbon copy of a letter or statement, dated April 15, 1916, purporting to have been written by L. A. Carton, treasurer of Swift & Co., to R. C. McManus, attorney of Swift & Co., concerning the alleged activity at Washington of W. H. Gates, of Denver, Colo., who at that time was chairman of the Democratic State central committee of Colorado. The President, Mr. Tumulty, several Senators, one Representative, and myself are mentioned.

I dislike to avail myself of this privilege, and would not if it were not that others are involved with me in this statement, and it places me, as doubtless it does all the persons mentioned, in an entirely false position. I desire to here read the statement as a part of my remarks:

APRIL 15, 1916.

Mr. R. C. McMANUS, *Office:*

Mr. W. H. Gates, chairman of the Democratic State committee of Colorado, whom you met in my office the first of this week, returned from Washington and New York to-day, and while in Washington met some of the President's advisers, who told him that the President was unwilling to do anything to disturb business, and that he did not approve the Borland resolution, and the advice that he had concerning it did not appeal to him, according to Mr. Tumulty.

While in Washington Mr. Gates had an interview in which the Borland bill and the causes leading up to it were discussed by Senator SHAFROTH, of Colorado; Senator THOMAS, of Colorado; Congressman TAYLOR of Colorado; Senator W. J. STONE, of Missouri; Senator REED, of Missouri; Senator Thornton, of Louisiana; and Senator HOKE SMITH, of Georgia, who are all unfavorable to the resolution and to the agitation now going on in Washington by the radicals in the cattle associations.

He also saw Senator THOMPSON, of Kansas, of the firm of Thompson & Robertson, lawyers, Wahlenmaier Building, Kansas City, Kans., who is a personal friend of Mr. Gates, and Mr. Gates laid a great deal of stress upon the Senator's friendship, and believed that we would make no mistake in keeping close to him, and that we could reciprocate by giving his firm some of the legal business we have to do in Kansas City; and I believe it would be in the interests of the situation to consider Mr. Gates's request. Mr. Gates says THOMPSON is a poor man, and for that reason should not be in Washington, but that he thought so much of him personally that he gave $1,000 against his campaign expenses.

Mr. A. D. White was with me during Mr. Gates's stay in the office, and was enabled to tell Mr. Gates a good many things that transpired at the hearing in Washington, and has now gone with Mr. Gates in a car, and will give him a ride around the parks and arrange to take him to lunch, if the opportunity offers.

Mr. Gates requested us to call on him whenever we think he can be of service. He says de Ricqles prides himself on the fact that he is a graduate of Yale and holds himself too important to have to do with the ordinary cattlemen, except as he may instruct them in what they should do and not do in prepared address, and hopes through his activities to be elected to public office.

L. A. CARTON.

This document is of a very questionable character, to say the least. It is entirely hearsay and could not be received as evidence in any court, being the alleged statement of a third party,

an entire stranger to me, made to a fourth party, another stranger, in attempting to detail an alleged conversation he is supposed to have had with W. H. Gates concerning the latter's visit to Washington and the results of conversations had with the President, Mr. Tumulty, other Congressmen, and myself relative to our attitude toward the Borland resolution for the investigation of the packers, which was at that time before the House of Representatives. This resolution never reached the Senate for consideration.

Briefly, I wish to say that the statement as to myself was never made, and was wholly false in all its material parts.

When this matter first came out and was submitted to Mr. Gates he emphatically denied that he had ever made the statements, or others of like import, to anyone at any time or place. Again, I am sure the President was favorable to the Borland resolution, because, as I am informed, when that failed to get through Congress the President ordered the present investigation before the Federal Trade Commission. I have also talked with some of the other Senators mentioned in the statement who are said to have been opposed to the Borland resolution, but who, in fact, were favorable to it. In justice to Senator Thornton, now deceased, I wish to say he was not in the Senate at all at that time, his term having expired March 3, 1915. As to myself, I was unqualifiedly favorable to the resolution and would have voted for it had it ever reached the Senate. I had also favored the Doolittle resolution, which was of similar import, and had talked with Congressman DOOLITTLE, who represents the fourth Kansas district, about his resolution several times, and had agreed to support it and help get it through the Senate when it reached this body. Neither resolution ever reached the Senate. However, I did vote for the $250,000 appropriation for this investigation by the Federal Trade Commission contained in the sundry civil bill, which passed the Senate April 11, 1917.

Concerning the inference that the law firm of which I am a member, doing business at Kansas City, Kans., was to receive or had received important and remunerative business from the packers, presumably as a result of my vote or influence as a Senator; also, the statement that Mr. Gates contributed $1,000 to my campaign expenses during my candidacy for Senator, which is supposed to be his source of influence with me, I wish to say that neither myself as an individual nor the law firm of which I am a member ever received or had any promise of receiving or any understanding that either myself or my firm in the future should receive any business or promise of any kind from the packers; nor have I ever been requested to use my position as Senator to aid in the project mentioned in the supposed letter, nor did Mr. Gates ever contribute $1,000 or any other sum to me for campaign expenses or any other political purpose.

Last Monday I voluntarily offered my testimony in the hearing before the Federal Trade Commission, and at its conclusion Mr. Francis J. Heney, who has charge of the investigation, acting for the Government and concerning my connection with the matter, voluntarily stated:

"Mr. HENEY. I think that in justice to Senator THOMPSON it is proper for me to state at this time that from my inquiries, outside of Senator THOMPSON'S statement, I am perfectly confident that Senator THOMPSON is entirely innocent, and never did anything that was not entirely proper and straight in this matter."

The PRESIDING OFFICER. The question is on the motion of the Senator from Georgia [Mr. SMITH].

THE WAR WITH GERMANY AND AUSTRIA.

Mr. OWEN. Mr. President, for some time I have had under consideration presenting to the Senate a concurrent resolution which I wish at the proper moment to introduce and to have referred to the Committee on Foreign Relations. It is a resolution which may have a far-reaching consequence in relation to this war if promptly acted on, as it should influence the morale both of the United States and the nations cooperating with the United States, and affecting the morale of those who are opposed to us. It is as follows:

Senate concurrent resolution 17.

Resolved by the Senate (the House of Representatives concurring), The United States declared a state of war existing between the Imperial Government of Germany and the Imperial and Royal Government of Austria and the United States because of their repeated willful violations of the rights of the people of the United States under the acknowledged principles of international law; the sinking of unarmed merchant vessels and of hospital and Red Cross ships; the destruction of the lives of unoffending American citizens on their lawful business on the high seas on many occasions; filling the United States with spies and secret agents; conspiring the wholesale destruction of American industries by arson, by explosions, and murder; systematically promoting sedition and treason among our citizens, and the criminal violation of our laws by the German and Austrian aliens residing in the United States; endeavoring to incite the hostility and aversion of other nations against the United States, and to pursuade Mexico and Japan to make war upon the United States, and many other wrongful acts contrary to the laws of nations and in violation of justice and of humanity; and for the further reason that it had finally become known to the United States from indisputable evidence that the military masters of Germany and Austria had deliberately and secretly conspired to bring about an elaborately prepared offensive war by which and through which they intended, first, to dominate Europe, nation by nation, and then to dominate the other unprepared nations of the earth and establish a military world dominion.

For many years past the governing powers of Germany and Austria have by world-wide intrigue carried on a systematic attempt to disorganize public opinion in the United States and in the other nations of the world for the purpose of breaking down the powers of resistance of other nations against this conspiracy for world dominion by exciting nation against nation and internal disorders among the nations that might oppose this sinister design.

The United States has not forgotten that the military rulers of Germany and Austria deliberately prevented international agreements at the various Hague conventions for arbitration of international differences, abatement of armaments, and world peace.

The United States recognizes this war as an offensive war of the completely prepared German and Austrian military autocracies against the unsuspecting and inadequately prepared democracies of the world in pursuance of the policy laid down in the first and second articles of the secret treaty of Verona of November 22, 1822, in which the autocratic rulers of Prussia and Austria solemnly pledged their powers to each other to overthrow all "representative" governments on earth, the consummation of which design the Prussian and Austrian autocratic group has steadily and secretly kept in view, and that this war had for its objects the premeditated slaughter and robbery of the innocent peoples of other nations for the sordid and base purposes of annexation, indemnity, robbery, and commercial profit by military force and terrorism and ultimate world dominion.

The United States finally recognized the unavoidable necessity of meeting the forces of this military conspiracy on the battle fields of Europe in order to prevent the military rulers of Germany and Austria succeeding in the first step of mastering Europe as a means to mastering and robbing America.

The United States can not be deceived by those military leaders of Germany and Austria who now, before their own people, pretend to be waging a war of defense and to desire an honorable peace, but whose every act has clearly demonstrated to the whole world that they deliberately planned and are still persisting in this unspeakably brutal war, with their sinister purposes unchanged, and which they are still attempting to carry out by terrorism, intrigue, and systematic falsehood and deceit at home and abroad.

The United States can not confide in any statement or promise emanating from such a perfidious source until the German and Austrian people in fact and in sober truth can control the conduct of their agents and compel them to observe the rules of morality and good faith.

The United States did not enter this war for material advantage or for any selfish purpose, or to gratify either malice or ambition.

The United States will not approve of forcible annexations or mere punitive indemnities, even on the misguided people of Austria or of Germany, but demands the complete evacuation of all territory invaded during the present war by the German and Austrian troops, and the restoration and indemnity of Belgium, Serbia, Roumania, and Montenegro.

The United States believes that righting the wrong done to the French people by the Prussian Government in 1871 in the matter of Alsace-Lorraine will remove long-pending grievances due to previous military aggression and will promote future world peace.

The United States believes that a readjustment of the frontiers of Italy should be effected along clearly recognized lines of nationality; that an independent Polish state should be established over territory indisputably occupied by Polish people; that the peoples of Austria-Hungary, of the Balkans, and of the Ottoman Empire should have the right of autonomous development.

The United States will favor recognizing and protecting by an international alliance the territorial integrity of all nations, great and small; the maintenance of the right of unembarrassed self-determination of all nations, and the right of such nations to manage their own affairs by internal self-government; and safeguarding the rights of backward peoples by international agreement.

The United States will favor extending international credits for the restoration of all places made waste by war.

The United States will insist that the oceans and high seas and international waterways and canals shall be open on equal terms to the citizens of all nations; that all nations shall have the untaxed right of access to the sea of their goods in bond, through any intervening territory to the seaports of other nations, with equal access to shipping facilities.

The United States will favor the removal, as far as possible, of all economic barriers and the establishment of equal trade conditions among all the nations of the world consenting to peace and associating themselves for its maintenance, without interfering with the right of any nation to govern its own imports and exports.

The United States will insist that adequate guaranties shall be given and taken to the end that national armaments on land and sea should be reduced to the lowest points consistent with domestic safety.

The unbounded ambition and deceit of the Prussian military autocrats are again exposed in shameless nakedness before the German and Austrian people, their allies, and the world at large in their present demands of annexation of adjacent Russian territory and other demands contemplating the domination of the Russian and Polish people in flat violation of their own Reichstag's recent pledges against annexation and indemnity.

The United States feels for the Russian people the liveliest sympathy in their great losses in life and property at the hands of the German and Austrian autocrats, as well as their magnificent and glorious struggles in behalf of freedom and democratic world peace.

Having passed through many severe tests and trials in establishing popular government in America, the people of the United States, through their own directly elected representatives, desire to extend to the Russian people the cordial hand of fellowship in their new-found freedom and to assure their democratic brothers in Russia that we earnestly desire to render them, so far as possible, every assistance they may need and which they themselves desire.

The United States will favor an open-minded and absolutely impartial adjustment of all colonial claims based upon a strict observance of the principle that in determining all such questions of sovereignty the interests of the population concerned must have equal weight with the claims of the Governments whose titles are to be determined.

The United States recognizes that a general association of civilized nations must be formed under specific covenants for the purpose of affording mutual guaranties of political independence and territorial integrity to nations, great and small alike, and of maintaining world peace, and believes that under such a system dissatisfied peoples now held under subjection to dominating nations for strategical purposes could be safely given their liberty and autonomy, as the rights of the dominant nation would be made safe by the general association of nations and the subject nation would cease to be a coveted asset against future war.

The United States believes that under such general association of nations it should be a violation of international law and the highest international crime for any nation, on any alleged ground, to invade by military power the territorial limits of another nation, and that the penalty for such invasions should be the immediate international blockade of the invading and offending nation, an embargo on all mail, express, and freight to and from such nation, and the suppression of such invasion by the combined forces of the general association of nations organized for the protection of world peace.

The United States believes that all future international treaties should be made in the open, where all the world may know of the proceedings in the framing of such treaties, and that secret diplomacy and international intrigue should end.

The United States desires to be on friendly terms, political, commercial, and social, with the people of every nation, including those now under the control of the German and Austrian military autocracies, and to restore as speedily as possible these friendly relations with the German and Austrian people as soon as they organize a Government responsible to the will of the people of Germany and Austria and whenever they shall themselves demonstrate a willingness to deal with the other nations of the world on a basis of equality, justice, and humanity and are willing to abandon the atrocious and detestable doctrine of making war for annexation, indemnity, and profit.

The United States entered this war to protect the rights of its own citizens to life and liberty, to protect its own future, to make the world safe from the future menace of military despotism, dynastic ambitions, or competing armaments, to establish permanent world peace on a basis of international justice, righteousness, and humanity, and, in cooperation with the self-governing belligerent nations, will maintain these principles, whatever the cost, with firmness and resolution until these ends are fully accomplished. "

Mr. President, this resolution is intended to be an expression of the opinion of the representatives of the United States, setting forth certain reasons which justify the United States in declaring a state of war existing between the governing powers of Germany and Austria and the United States, and the principles of a program by which world peace can be restored and maintained.

On January 8, in an address to the two Houses of Congress, the President of the United States set forth the principles for which the United States was contending in this war. The wide publicity given the views of the President has been of great service in cohering the opinions of the civilized peoples of the world as to the conditions upon which peace might be established with safety to the world.

The reasons justifying the passage of this resolution are as follows:

German intrigue and German propagandists, employed by thousands throughout Russia and throughout Europe, are representing the message of the President as emanating from the despotic head of a plutocratic autocracy; that the opinions expressed by the President are not the opinions of the people of the United States or of their representatives; that it is a mere piece of camouflage to cover the ulterior purposes of a commercial autocratic government in the United States; that our going into the war was merely intended to protect the loans which we had made the allies, and so forth, and so forth, ad nauseam.

Leon Trotzky, the present minister of foreign affairs of the bolsheviki government of Russia, spent a few months in New York City during 1917, and undertook to run a little Socialist newspaper there, the Novi Mir, which was vigorously suppressed by the New York police. Trotzky tried to make speeches in the public highways upon the Marxian philosophy of socialism, and the New York police somewhat harshly suppressed his efforts to thus spread his doctrines, with the result that he is of the opinion (very wrongfully though it be) that there is no liberty of speech in reality in the United States; that there is less liberty in the United States than there is in Russia. He has the opinion that might be entertained by some persons on the east side of New York City, where conditions of life are very hard and very drastic. Such foreign opinions are injurious to us and to our interests. They are utterly erroneous and ought to be adequately corrected by every means at our disposal.

It is of great importance to the peace of the world that American opinions should be so clearly and frankly stated that no man, whether friend or enemy, should doubt what American opinion is. It is, therefore, of great importance, in my judgment, that the representatives of the people of the United States, independently of the President, should confirm in their own way the declaration of principles made by the President of the United States on January the 8th, which did in fact represent the judgment of an overwhelming majority of the people of the United States. I think that the President's message ought to be ratified by mass meetings held by the people in every State in the Union, as well as confirmed by independent congressional action. I understand that on Lincoln's birthday there will be loyalty meetings throughout the United States called by the various labor unions, and at that time I think the people of the United States ought in mass meetings to ratify the declarations made by the President of the United States, and that the Congress of the United States should waste no time in declaring in its own way the opinions of the people of the United States, so as to strengthen and to give greater force to the message which the President delivered to Congress on the 8th of January.

Mr. President, the resolution which I have submitted represents, in my judgment, the substantial opinion of the American people. President Wilson spoke these opinions in his own masterful way on the 8th of January, and it is due to the people of the world that the Senate of the United States and the House of Representatives should declare in their own way the American opinion, so that the President of the United States will have behind his voice the legislative branch of the Government and the people of the United States, not only for the purpose of emphasizing these opinions, but for the purpose of making it impossible for German and Austrian intrigue to break the forces of the principles of liberty and world peace for which America stands.

Mr. President, I think, as a matter of public information, it is well to submit for the RECORD the facts which justify the declarations made in this proposed resolution. They have for the most part been gathered together in a very compact form by Prof. Samuel B. Harding, professor of European history in Indiana University, in his Topical Outline of the War, with the various authorities upon which the facts depend, to which I call the attention of the Senate and to which I call the attention of the people of the United States, because they ought to understand what the fundamental causes of the war are, the historical background of the war, the fact that Germany and Austria deliberately planned this war, and the other features which are essential to a complete comprehension of what this war means, what is necessary for the people of the United States to do to bring it to a successful conclusion. I ask, without reading, to place in the RECORD from the Topical Outline of the War sections 3, 4, 5, and 6, which give in a compact form the evidence that justifies the statements which have been made in the resolution itself.

The PRESIDING OFFICER. Without objection, leave is granted.

The matter referred to is as follows:

II. HISTORICAL BACKGROUND OF THE WAR (1870–1914).

I. FOUNDATION AND CHARACTER OF THE PRESENT GERMAN EMPIRE.

1. Franco-German War (1870–71) and the treaty of Frankfort. France to pay an indemnity of $1,000,000,000 and to cede Alsace-Lorraine.

2. Formation of the German Empire; its undemocratic character. (See C. D. Hazen, the Government of Germany; War Cyclopedia, under "Autocracy," "Bundesrat," "German Constitution," "Kaiserism," "Reichstag.")

(a) The number of States in the Empire is 25, with one imperial territory (Alsace-Lorraine). The list includes four kingdoms, six grand duchies, five duchies, seven principalities, and three free cities. Each of these States has its separate State government, subordinate to that of the Empire.

(b) The King of Prussia is hereditary "German Emperor," with full direction of military and foreign affairs.

(c) The Federal Council (Bundesrat) is a council of ambassadors appointed by the rulers of the separate States, and responsible to them. It oversees the administration and initiates most legislation, and is the most powerful body in the Empire. The States are represented unequally in it. Prussia, which contains two-thirds of the population of Germany, has 17 votes out of a total of 61. (If we include the 3 votes allotted to Alsace-Lorraine in 1911, which are "instructed" by the Emperor, Prussia has 20 votes in the Bundesrat.) Bavaria has 6 votes, Saxony and Wurttemberg 4 each, and the other States fewer.

(d) The Reichstag is the representative chamber of the legislature. It is composed of 397 members, of whom Prussia elects 236. Representative districts are very unequal in population. "A Berlin deputy represents, on the average, 125,000 votes; a deputy of East Prussia, home of the far-famed Junkers, an average of 24,000." The members are elected by manhood suffrage for a term of five years; but the Emperor may (with the consent of the Bundesrat) dissolve the Reichstag at any time and order new elections.

(e) The administration of the Empire is in the hands of a ministry, headed by the imperial chancellor. Unlike the ministers of true parliamentary governments, the German ministers are responsible to the Emperor and not to the legislative chamber. They do not need, therefore, to resign their offices when defeated in the Reichstag.

II. THE TRIPLE ALLIANCE AND THE TRIPLE ENTENTE.

1. The triple alliance formed by Germany, Austria, and Italy (1882). Germany's main object was to safeguard herself against an attempt by France to recover Alsace-Lorraine. As France recovered strength, Germany plotted new aggressive designs against her.

2. Germany attempted in 1904–5 to form a secret alliance with Russia and France against Great Britain. Failure of the attempt, owing to France's unwillingness to give up hope of recovering Alsace-Lorraine. The evidence of this attempt was published in 1917 in a series of letters signed "Willy" and "Nicky," which passed between the Kaiser

and the Czar, and which were discovered in the Czar's palace after his deposition. (See War Cyclopedia, under "Willy and Nicky correspondence.")

3. Formation of the triple entente.

(a) Dual alliance of France and Russia formed (1891–1894) as a counterpoise to the triple alliance.

(b) Settlement of England's disputes with France over certain African questions, etc. (1904), and with Russia over Persia, etc. (1907), established the triple entente (good understanding) between those powers.

"France and England were face to face like birds in a cockpit, while Europe under German leadership was fastening their spurs and impatient to see them fight to the death. Then suddenly they both raised their heads and moved back to the fence. They had decided not to fight, and the face of European things was changed." (Fullerton, Problems of Power, p. 57.)

III. THREE DIPLOMATIC CRISES: 1905, 1908, 1911.

1. First Morocco crisis, 1905–6. (See Conquest and Kultur, 120–126; War Cyclopedia, under "Morocco question," etc.)

(a) French interests in Morocco; slight interests of Germany.

(b) The Tangier incident. The Kaiser, landing from his yacht in Tangier, challenged France's policy in Morocco.

(c) Delcassé, French minister of foreign affairs, dismissed on Germany's demand. "We are not concerned with Mr Delcassé's person, but his policy is a menace to Germany, and you may rest assured we shall not wait for it to be realized." (German ambassador to France, in published interview.)

(d) France brought to the bar of Europe in an international conference at Algeciras, which, in the main, sanctioned her Moroccan policy.

(e) The purpose of Germany in this crisis, as in those which follow, was to humiliate France and to test the strength of the triple entente. These were struggles to increase German prestige.

2. Crisis over Austria's annexation of Bosnia and Herzegovina in 1908. (See War Cyclopedia, under "Bosnia-Herzegovina," "Congress of Berlin," "Pan-Slavism," "Slavs," etc.)

(a) These Provinces freed from direct rule of the Turks by Serbia and Russia, but handed over by the Congress of Berlin to Austria to administer (1878).

(b) Austria seized the occasion offered by the "Young Turk" revolution of 1908 to annex Bosnia and Herzegovina and refused to refer the question to a European congress for settlement.

(c) Russia (as yet unrecovered from the Russo-Japanese war) was forced to acquiesce when the Kaiser "took his stand in shining armor by the side of his ally." Humiliating submission imposed on Serbia. (See below, ch. iv, I 2 a.)

3. Second Morocco crisis, in 1911. (See Conquest and Kultur, 120–126; War Cyclopedia, under "Morocco question.")

(a) Agadir affair: German cruiser *Panther* sent to Agadir as a protest against alleged French infractions of the Algeciras agreement and "to show the world that Germany was firmly resolved not to be pushed to one side." (Speech of the German chancellor to the Reichstag.)

(b) Great Britain, in spite of political difficulties at home, warned Germany that in case of war she would help France.

(c) Adjustment of the Moroccan question. Germany accepted compensation from France elsewhere in return for recognition of French protectorate over Morocco. (Treaty of November 4, 1911.)

(d) Furious resentment of the German military party at this outcome. "The humiliation of the Empire is so much the greater since it is the Emperor himself who had engaged the honor of the German people in Morocco." (Rheinisch-Westfälische Zeitung.)

4. Hardening of the German resolve not to accept another diplomatic defeat. "It is not by concessions that we shall secure peace, but by the German sword." (Speech in Reichstag, applauded by the German Crown Prince.)

IV. BAGDAD RAILWAY AND THE "MIDDLE EUROPE" PROJECT CONSTITUTE OTHER GROUNDS OF CONFLICT.

1. Germany supplants England as the protector of Turkey against Russia. Speech of the Kaiser at Damascus, 1898: "The 300,000,000 Mohammedans who live scattered over the globe may be assured of this, that the German Emperor will be their friend at all times."

2. The Bagdad Railway. Designed to connect Bagdad with Constantinople and the central European railways. Germany obtains concession from Turkey for its construction in 1902–3. Political as well as economic motives involved. Threat to British rule in India by proposed extension to the Persian Gulf. (See the President's Flag Day address with evidence of Germany's plans, note 15; Conquest and Kultur, sec. 8; War Cyclopedia, under "Berlin to Bagdad," "Corridor," etc.)

3. The "Middle Europe" project: This may be defined briefly as a plan for "a loosely federal combination for purposes of offense and defense, military and economic, consisting primarily of the German Empire and the dual monarchy [Austria-Hungary], but also including the Balkan States and Turkey, together with all the neutral States—Roumania, Greece, the Scandinavian kingdoms, and Holland—that can be drawn within its embrace." (W. J. Ashley, in introduction to F. Naumann's Central Europe, translated by Christabel M. Meridith, 1916.)

The plan includes the domination of this group State by Germany through (a) its control of the common financial and economic policy and (b) its control of the military forces, based on universal military service. (Compare Prussia's control within the German Empire.) (See Conquest and Kultur, sec. 8; War Cyclopedia, under "Mittel-Europa," etc.; the President's Flag Day Address, notes 15–17.)

4. Union of the middle Europe project and the Bagdad Railway project in a Berlin-to-Bagdad plan.

"The plan was to throw a broad belt of German military power and political control across the very center of Europe and beyond the Mediterranean into the heart of Asia; and Austria-Hungary was to be as much their tool and pawn as Serbia or Bulgaria or Turkey or the ponderous States of the East. Austria-Hungary, indeed, was to become part of the central German Empire, absorbed and dominated by the same forces and influences that had originally cemented the German States themselves. The dream had its heart at Berlin. It could have had a heart nowhere else! It rejected the idea of solidarity of race entirely. The choice of peoples played no part in it at all. It contemplated binding together racial and political units which could be kept together only by force—Czechs, Magyars, Croats, Serbs, Roumanians, Turks, Armenians—the proud States of Bohemia and Hungary, the stout little Commonwealths of the Balkans, the indomitable Turks, the subtle peoples of the East. These peoples did not wish to be united. They ardently desired to direct their own affairs; would be satisfied only by undisputed independence. They could be kept quiet only by the presence or the constant threat of armed men. They would live under a common power only by sheer compulsion and await the day of revolution. But the German military statesmen had reckoned with all that and were ready to deal with it in their own way." (President Wilson, Flag Day Address, June 14, 1917.)

"Across the path of this railway to Bagdad lay Serbia, an independent country whose sovereign alone among those of southwestern Europe had no marriage connection with Berlin, a Serbia that looked toward Russia. That is why Europe was nearly driven into war in 1913; that is why Germany stood so determinedly behind Austria's demands in 1914 and forced war. She must have her 'corridor' to the southeast; she must have political domination all along the route of the great economic empire she planned. She was unwilling to await the process of 'peaceful penetration.'" (The President's Flag Day Address, with Evidence of Germany's Plans, note 15.)

V. TRIPOLITAN AND BALKAN WARS, 1911–1913.

(See War Cyclopedia, under "Balkan Wars," "Constantinople," "Drang nach Osten," "Young Turks.")

1. War of Italy with Turkey over Tripoli (1911–12). Claims of Italy on Tripoli; weakness of Turkey following Young Turk revolution of 1908; unfavorable attitude of Italy's allies (Germany and Austria) to the war as endangering their relations with Turkey. Treaty of Lausanne (Oct. 15, 1912) transfers Tripoli from Turkish to Italian rule.

2. War of Balkan allies against Turkey (1912–13).

(a) Secret league of Greece, Serbia, Bulgaria, and Montenegro to expel Turkey from Europe and liberate their fellow Christians from Turkish misrule. War declared October 16, 1912.

(b) Inability of the great powers, because of their own divergent aims, to restrain the Balkan allies.

(c) Success of the allies. By the treaty of London (May 30, 1913) Turkey was to surrender all territories in Europe except Constantinople and a small strip of adjacent territory (Enos-Midia line).

III. INDICATIONS THAT GERMANY AND AUSTRIA PLANNED AN AGGRESSIVE STROKE BEFORE JUNE 28, 1914.

I. AUSTRIA PROPOSED AN ATTACK ON SERBIA IN 1913.

(See War Cyclopedia, under "Austria and Serbia, 1913.")

1. Austria's proposal to Italy (Aug. 9, 1913, the day before the peace of Bucharest).

"Austria has communicated to us and to Germany her intention of taking action against Serbia, and defines such action as defensive, hoping to bring into operation the casus foederis of the triple alliance." * * * (Italian minister of foreign affairs in dispatch of Aug. 9, 1913. Revealed by Ex-Prime Minister Giolitti in speech of Dec. 5, 1914. See Collected Diplomatic Documents, p. 401.)

2. Italy declined the proposal, as (apparently) did Germany also. The declination of the latter was probably due to the fact that German military preparations were not yet completed. (See below, V 1.)

"If Austria intervenes against Serbia it is clear that a casus foederis can not be established. It is a step which she is taking on her own account, since there is no question of defense, inasmuch as no one is thinking of attacking her. It is necessary that a declaration to this effect should be made to Austria in the most formal manner, and we must hope for action on the part of Germany to dissuade from this most perilous adventure." (Reply of Prime Minister Giolitti to above dispatch, ibid.)

II. SECRET MILITARY REPORT ON STRENGTHENING THE GERMAN ARMY (MARCH 19, 1913).

This report came into the possession of the French minister of war in some unexplained way soon after it was drawn up; it was published in French Yellow Book No. 2; Collected Diplomatic Documents, pages 130–133.

The following extracts occur in the part headed "Aim and obligations of our national policy, of our army, and of the special organisations for army purposes":

1. Minds of the people must be prepared. (See Conquest and Kultur, secs. 15–16; War Cyclopedia, under "Pan-Germanism," "Pan-Germans urge war in 1913," etc.)

"We must allow the idea to sink into the minds of our people that our armaments are an answer to the armaments and policy of the French. We must accustom them to think that an offensive war on our part is a necessity in order to combat the provocations of our adversaries. * * * We must so manage matters that under the heavy weight of powerful armaments, considerable sacrifices, and strained political relations an outbreak [of war] should be considered as a relief, because after it would come decades of peace and prosperity, as after 1870. We must prepare for war from the financial point of view; there is much to be done in this direction." (Collected Diplomatic Documents, p. 131.)

2. "Stir up trouble in the north of Africa and in Russia."

"We must not be anxious about the fate of our colonies. The final result in Europe will settle their position. On the other hand, we must stir up trouble in the north of Africa and in Russia. It is a means of keeping the forces of the enemy engaged. It is, therefore, absolutely necessary that we should open up relations, by means of well-chosen agents, with influential people in Egypt, Tunis, Algeria, and Morocco in order to prepare the measures which would be necessary in the case of a European war. * * * The first attempt which was made some years ago opened up for us the desired relations. Unfortunately these relations were not sufficiently consolidated." (Ibid., p. 132.)

3. Small States to be coerced. (See War Cyclopedia, under "Neutralized State," "Netherlands, German view," etc.)

"In the next European war it will also be necessary that the small States should be forced to follow us or be subdued. In certain conditions their armies and their fortified places can be rapidly conquered or neutralized; this would probably be the case with Belgium and Holland, so as to prevent our enemy in the west from gaining territory which they could use as a base of operations against our flank. In the north we have nothing to fear from Denmark and Scandinavia. * * * In the south Switzerland forms an extremely solid bulwark, and we can rely on her energetically defending her neutrality against France and thus protecting our flank." (Ibid., p. 132.)

4. No guaranty to Belgium for security of her neutrality. (See Conquest and Kultur, sec. 11; War Cyclopedia, under "Belgium, Neutralization of.")

"Our aim must be to take the offensive with a large superiority from the first days. * * * If we could induce these States (on our northwestern frontier) to organize their system of fortification in such a manner as to constitute an effective protection for our flank, we could abandon the proposed invasion. * * * If, on the contrary, their defensive organization was established against us, thus giving definite

advantage to our adversary in the west, we could in no circumstances offer Belgium a guaranty for the security of her neutrality." (Ibid., p. 133.)

5. Short-term ultimatum to be issued. (See War Cyclopedia, under "Serbia, Austrian ultimatum.")

"The arrangements made with this end in view allow us to hope that it will be possible to take the offensive immediately after the complete concentration of the army of the Lower Rhine. An ultimatum with a short time limit, to be followed immediately by invasion, would allow a sufficient justification for our action in international law." (Ibid., p. 133.)

6. Prizes of the war. (See Conquest and Kultur, sec. 17.)

"We will * * * remember that the Provinces of the ancient German Empire, the county of Bergundy (Franche Comte, acquired by Louis XIV) and a large part of Lorraine, are still in the hands of the French; that thousands of brother Germans in the Baltic Provinces (of Russia) are groaning under the Slav yoke. It is a national question that Germany's former possessions should be restored to her." (Ibid., p. 133.)

III. CHANGED ATTITUDE OF THE KAISER—INTERVIEW WITH KING ALBERT OF BELGIUM (NOVEMBER, 1913).

1. Circumstances of the interview; held in the presence of Gen. von Moltke (chief of the German General Staff) and reported to Jules Cambon, the French Ambassador at Berlin, "from an absolutely reliable source." Published in French Yellow Book, No. 6; Collected Diplomatic Documents, pages 142–143. (See War Cyclopedia, under "Albert I," "William II," etc.)

2. War with France regarded by the Kaiser as inevitable. (See War Cyclopedia, under "William II, ambitions.")

"This conversation, it appears, has made a profound impression on King Albert. I [Cambon] am in no way surprised at the impression he gathered, which corresponds with what I have myself felt for some time. Enmity against us is increasing, and the Emperor has ceased to be the friend of peace.

"The person addressed by the Emperor had thought up till then, as did all the world, that William II, whose personal influence had been exerted on many critical occasions in support of peace, was still in the same state of mind. He found him this time completely changed. The German Emperor is no longer in his eyes the champion of peace against the warlike tendencies of certain parties in Germany. William II has come to think that war with France is inevitable, and that it must come sooner or later. * * *

"Gen. von Moltke spoke exactly in the same strain as his sovereign. He, too, declared war to be necessary and inevitable, but he showed himself still more assured of success, 'for,' he said to the King (Albert), 'this time the matter must be settled, and your Majesty can have no conception of the irresistible enthusiasm with which the whole German people will be carried away when that day comes.'" (Collected Diplomatic Documents, p. 142.)

3. Cambon's comment on the interview.

"As William II advances in years, family traditions, the reactionary tendencies of the court, and especially the impatience of the soldiers, obtain a greater empire over his mind. Perhaps he feels some slight jealousy of the popularity acquired by his son, who flatters the passions of the Pan-Germans, and who does not regard the position occupied by the Empire in the world as commensurate with its power. Perhaps the reply of France to the last increase of the German Army [German Army law of 1913, cited below; France met this by increasing her military service from two years to three years], the object of which was to establish the incontestable supremacy of Germany is, to a certain extent, responsible for his bitterness, for, whatever may be said, it is realized that Germany can not go much further.

"One may well ponder over the significance of this conversation. The Emperor and his chief of the general staff may have wished to impress the King of the Belgians and induce him not to make any opposition in the event of a conflict between us. * * *" (Ibid., p. 143.)

IV. GERMAN PUBLIC OPINION AS REPORTED BY FRENCH DIPLOMATIC AND CONSULAR AGENTS (JULY 30, 1913).

(In French Yellow Book, No. 5; Collected Diplomatic Documents, pp. 136–142.)

1. The Moroccan settlement considered a diplomatic defeat. (See Conquest and Kultur, sec. 16.)

"* * * Here is a synthesis of all these opinions: The treaty of the 4th November is a diplomatic defeat, a proof of the incapacity of German diplomacy and the carelessness of the Government (so often denounced), a proof that the future of the Empire is not safe without a new Bismarck; it is a national humiliation, a lowering in the eyes of Europe, a blow to German prestige, all the more serious because up to 1911 the military supremacy of Germany was unchallenged, and French anarchy and the powerlessness of the Republic were a sort of German dogma." (Collected Diplomatic Documents, p. 136.)

2. Forces making for peace.

"There are in the country forces making for peace, but they are unorganized and have no popular leaders. They consider that war would be a social misfortune for Germany, and that caste pride, Prussian domination, and the manufacturers of guns and armor plate would get the greatest benefit, but above all that war would profit Great Britain." Those favoring peace included "the bulk of the workmen, artisans, and peasants, who are peace-loving by instinct," etc. But the classes which prefer peace to war "are only a sort of make-weight in political matters, with limited influence on public opinion, or they are silent social forces, passive and defenseless against the infection of a wave of warlike feeling." (Ibid., p. 137–138.)

3. Forces making for war. (See War Cyclopedia, under "Arbitration, German Attitude," "Disarmament, German Attitude," "German Military Autocracy, Propaganda for War," "Militarism or Disarmament," "Pan-Germans Urge War in 1913," "War, German View," etc.)

"There is a war party, with leaders and followers, a press either convinced or subsidized for the purpose of creating public opinion; it has means both varied and formidable for the intimidation of the Government. It goes to work in the country with clear ideas, burning aspirations, a determination that is at once thrilling and fixed." (Collected Diplomatic Documents, p. 139.) It included the following:

(a) Those who regard war as inevitable, and hence "the sooner the better."

(b) Those influenced by economic reasons—"overpopulation, overproduction, the need for markets and outlets," etc.

(c) Those influenced by "Bismarckism." "They feel themselves humiliated at having to enter into discussions with France, at being obliged to talk in terms of law and right in negotiations and conferences where they have not always found it easy to get right on their side, even when they have a preponderating force."

(d) Those influenced by "a mystic hatred of revolutionary France," and others who acted from "a feeling of rancor."

4. Social classes included in the war party. (See Conquest and Kultur, sec. 16; War Cyclopedia, under "Coal and Iron as Cause of War," "German Diplomacy," "Junker," "Peace Terms, German Industrialists on," "Peace Terms, German Opinion as to," "Peace Terms, German Professors on," "Treitschke," etc.)

(a) The country squires (junkers), who wish to escape the imposition of inheritance taxes ("death duties") "which are bound to come if peace continues. * * * This aristocracy is military in character, and it is instructive to compare the Army List with the year book of the nobility. War alone can prolong its prestige and support its family interest. * * * This social class, which forms a hierarchy with the King of Prussia as its supreme head, realizes with dread the democratization of Germany and the increasing power of the Socialist Party, and considers its own days numbered." (Collected Diplomatic Documents, p. 140.)

(b) The capitalist class ("higher bourgeoisie") including the manufacturers of guns and armor plate, big merchants who demand bigger markets, and all who "regard war as good business." Among these are "doctrinaire manufacturers" who "declare that the difficulties between themselves and their workmen originate in France, the home of revolutionary ideas of freedom—without France industrial unrest would be unknown." (Ibid., p. 140.)

(c) University professors, etc. "The universities, if we except a few distinguished spirits, develop a warlike philosophy. Economists demonstrate by statistics Germany's need for a colonial and commercial empire commensurate with the industrial output of the Empire. There are sociological fanatics who go even further. * * * Historians, philosophers, political pamphleteers, and other apologists of German Kultur wish to impose upon the world a way of thinking and feeling specifically German. They wish to wrest from France that intellectual supremacy which, according to the clearest thinkers, is still her possession." (Ibid., p. 140–141.)

(d) Diplomatists and others "whose support of the war policy is inspired by rancor and resentment. * * * German diplomatists are now in very bad odor in public opinion. The most bitter are those who since 1905 have been engaged in the negotiations between France and Germany; they are heaping together and reckoning up their grievances against us, and one day they will present their accounts in the war press. It seems as if they were looking for grievances chiefly in Morocco, though an incident is always possible in any part of the globe where France and Germany are in contact." (Ibid., p. 141.)

5. Must war be considered inevitable?

"The opinion is fairly widely spread, even in pan-German circles, that Germany will not declare war in view of the system of defensive alliances and the tendencies of the Emperor. But when the moment comes, she will have to try in every possible way to force France to attack her. Offense will be given if necessary. That is the Prussian tradition.

"Must war then be considered as inevitable? It is hardly likely that Germany will take the risk, if France can make it clear to the world that the entente cordiale and the Russian alliance are not mere diplomatic fictions but realities which exist and will make themselves felt. The British fleet inspires a wholesome terror. It is well known, however, that victory on sea will leave everything in suspense. On land alone can a decisive issue be obtained." (Ibid., pp. 141–143.)

V. EXTRAORDINARY MILITARY MEASURES OF GERMANY TAKEN BEFORE JUNE 28, 1914.

(See Conquest and Kultur, sec. 16; War Cyclopedia, under "Egypt," "German Army act, 1913," "German intrigue against American peace," "Kiel Canal," "Sinn Fein," "South Africa," etc.)

1. Laws of 1911, 1912, and especially 1913 increased the German Army in time of peace from 515,000 to 866,000 men. Great increase of machine-gun corps, aviators, etc. Enormous stocks of munitions prepared. Exceptional war tax levied of $225,000,000. Special war fund (for expense of mobilization, etc.) increased from $30,000,000 to $90,000,000.

2. Reconstruction of Kiel Canal (connecting Baltic and North Sea) hastened so as to be ready in early summer of 1914. Fortifications of Helgoland, etc., improved.

3. Strategic railways constructed leading to Belgian, French, and Russian frontiers.

"Germany had made ready, at heavy outlay, to take the offensive at a moment's notice, and to throw enormous forces across the territories of two unoffending and pacific neighbors (Belgium and Luxemburg) in her fixed resolve to break through the northern defenses of France, and thus to turn the formidable fortifications of the Vosges. She has prepared for the day by bringing fully equipped and admirably constructed railways up to her neighbors' frontiers, and in some places across them. * * * An immense sum of money has been sunk in these railways, * * * and there is not the least prospect of an adequate return on them as commercial ventures. They are purely military and strategical preparations for war with France." (See Fortnightly Review for February, 1910, and February, 1914, and New York Times Current History, I, 1000–1004.)

4. Exportation of chemicals used in making explosives greatly reduced in 1913–14, and importation of horses, foodstuffs, and fats (used in nitroglycerin) greatly increased to provide war stocks. Great purchases of beds and hospital supplies in May, 1914; embargo on stocks of foreign pneumatic tires in Germany; hasty collection of accounts by German merchants; transfer of bank balances, etc., from beginning of July, etc. (See Le Mensonge du 3 Août, 1914, pp. 9–10.)

5. Recall of reservists from South America, etc., in May and June, 1914.

6. Exceptional grand maneuvers of 1914. Ordered in May, these massed "500,000 men in Cologne, the Grand Duchy of Baden, and Alsace-Lorraine for the month of August." (Le Mensonge du 3 Août, 1914, p. 9.)

7. Preparations for stirring up revolt in the British Empire:

(a) In South Africa. Reply of the Kaiser (in 1913) to a communication from the future rebel leader, Col. Maritz: "I will not only acknowledge the independence of South Africa but I will even guarantee it, provided the rebellion is started immediately." (Speech of Gen. Botha at Cape Town, July 25, 1915. See Rose, Development of the European Nations, 5th ed., II, p. 379.)

(b) In British India. On July 8, 1915, indictments were brought in the Federal court at San Francisco against 98 persons, including German consuls, at which time the Federal district attorney said: "For more than a year prior to the outbreak of the European war certain Hindus in San Francisco and certain Germans were preparing openly for war with England. At the outbreak of the war Hindu leaders, members of the German consulate here, and attachés of the German Government, began to form plans to foment revolution in India for the purpose of

freeing India and aiding Germans in their military operations." The leaders of these defendants plead guilty to the charges against them in December, 1917. (See War Cyclopedia, under "German intrigue against American peace.")

"Consideration of all testimony leads to the conviction that the India plot now before the Federal court here [in Chicago] is but a very small part of the whole conspiracy. * * * The defendants appear to have traveled far and wide in promotion of their alleged work. And always, testimony indicates, German consuls were aware of what was going on and ready to give things a push. Pro-Germanism all over the United States, Canada, Mexico, Brazil, Hawaii, Manila, China, Indo-China, Siam, Java, and various parts of Africa has been brought into the case. No part, according to the testimony, seems to have been detached. All blended into the whole scheme, which is alleged to have had its inspiration and propulsion in Berlin." (Christian Science Monitor, Oct. 19, 1917.)

8. Coaling arrangements made for German naval vessels (June 14, 1914):

"A German cruiser—the *Eber*—was in dock at Cape Town a few days before the outbreak of war, and got away just in time. An intercepted letter addressed to the commander contained certain instructions from Berlin which were dated June 14, 1914. These instructions revealed a complete system for coaling the German Navy on the outbreak of war through secret-service agents in Cape Town, New York, and Chicago.

"The commander of the *Eber* was given the names of shippers and bunkers with whom he could deal confidentially, the essence of the plan being that a collier would leave Table Bay [Cape Colony] ostensibly bound for England, but really to meet a German warship at an agreed rendezvous. Naturally, so far as Cape Town is concerned, the arrangements have been upset, owing to the discovery; and this, perhaps, explains why German cruisers have been more in evidence in North Atlantic waters than in the southern ocean." (Cape Town correspondent of London Times, issue of Oct. 6, 1914.)

VI. CONCLUSION.

Before June 28, 1914, Germany willed, if not war, at least another trial of diplomatic strength in which the threat of war should enter as a decisive factor.

"There is a whole category of facts to which we do not temporarily attach a decisive importance, for the spirit of mathematics can invoke in its favor the benefit of coincidence. * * * It is a question of various measures taken by Germany (the state or individuals) long before the menace of war was appreciable. * * * Certain persons would see in those measures, of which the war has demonstrated the utility, the proof that Germany had months before taken the resolve to launch the European war in 1914. When one has seen the German Government at work, this hypothesis is not extravagant." (Le Mensonge du 3 Août, 1914, pp. 9–10.)

"Not as weak-willed blunderers have we undertaken the fearful risk of this war. We wanted it. Because we had to wish it and could wish it. May the Teuton devil throttle those whiners whose pleas for excuses make us indicrous in these hours of lofty experience! We do not stand and shall not place ourselves before the court of Europe. Our power shall create new law in Europe. Germany strikes. If it conquers new realms for its genius, the priesthood of all the gods will sing songs of praise to the good war. * * * We are waging this war not in order to punish those who have sinned, not in order to free enslaved peoples and thereafter comfort ourselves with the unselfish and useless consciousness of our own righteousness. We wage it from the lofty point of view and with the conviction that Germany, as a result of her achievements and in proportion to them, is justified in asking, and must obtain, wider room on earth for development and for working out the possibilities that are in her. The powers from whom she forced her ascendancy in spite of themselves still live, and some of them have recovered from the weakening she gave them. * * * *Now strikes the hour for Germany's rising power.*" (Maximilian Harden, editor of Die Zukunft; see New York Times Current History, III, p. 130.)

"It now appears beyond the possibility of doubt that this war was made by Germany pursuing a long and settled purpose. For many years she had been preparing to do exactly what she has done with a thoroughness, a perfection of plans, and a vastness of provision in men, munitions, and supplies never before equaled or approached in human history. She brought the war on when she chose, because she chose, in the belief that she could conquer the earth, nation by nation." (Senator Elihu Root, speech in Chicago Sept. 14, 1917.)

IV. THE AUSTRO-SERBIAN CONTROVERSY.

I. INTRODUCTION: PRIOR RELATIONS OF SERBIA, AUSTRIA, AND RUSSIA.

1. Previous history of Serbia: Its fleeting greatness under Stephen Dushan (died 1355); conquered by Turks, 1458; self-governing principality from 1830; independent of Turkey, 1878; territory greatly increased through war with Turkey 1912–13. Revival in recent years of "Greater Serbia" movement, directed largely against Austria-Hungary, which held Croatia, Bosnia, and Herzegovina, lands which by nationality and speech were Serbian. Compare Piedmont's unification of Italy against Austrian resistance. (See War Cyclopedia, under "Kingdom of the Serbs, Croats, and Slovenes.")

2. Serbia's relations with Austria-Hungary:

(a) Political estrangement due to Austria's high-handed annexation of Bosnia in 1908, and the thwarting by Austria and Italy in 1913 of Serbia's desire for an outlet to the Adriatic. Declaration exacted of Serbia in 1909 (March 31):

"Serbia recognizes that the fait accompli regarding Bosnia has not affected her rights. * * * In deference to the advice of the great powers, Serbia undertakes to renounce from now onward the attitude of protest and opposition which she has adopted with regard to the annexation since last autumn. She undertakes, moreover, to modify the direction of her policy with regard to Austria-Hungary, and to live in future on good neighborly terms with the latter." (British Blue Book, No. 4; Collected Diplomatic Documents, p. 4.)

(b) Tariff disputes over importation of Serbian pigs into Austria-Hungary. A prohibitive tariff was imposed in 1906.

(c) Continued agitation of Serbian revolutionary societies (especially the Narodna Odbrana) against the "dangerous, heartless, grasping, odious, and greedy enemy in the north," who "robs millions of Serbian brothers of their liberty and rights and holds them in bondage and chains." (Austro-Hungarian Red Book, No. 19; Collected Diplomatic Documents, p. 465.)

(d) German plans for Berlin-Bagdad railway required that Serbia should be controlled by Austria. (See above, ch. II, IV 4.)

3. Russia's interest in Serbia—founded upon kinship in blood, language, and religion, and on Russian aid in the past against Turkey (in 1806–1812, 1829–30, 1877–78). This interest was well known, and Austria and Germany recognized that their policy toward Serbia might lead to war with Russia (See War Cyclopedia, under "Pan Slavism.")

"During the Balkan crisis he [the Russian minister for foreign affairs] had made it clear to the Austrian Government that war with Russia must inevitably follow an Austrian attack on Serbia." Report of British Ambassador to Russia. British Blue Book, No. 139; Collected Diplomatic Documents, p. 101.)

"We were perfectly aware that a possible warlike attitude of Austria-Hungary against Serbia might bring Russia upon the field, and that it might therefore involve us in a war, in accordance with our duty as allies." (German White Book; Collected Diplomatic Documents, p. 406.)

II. THE SERAJEVO ASSASSINATION (JUNE 28, 1914).

1. Assassination of the Austrian Crown Prince Franz Ferdinand and his wife, while on an official visit to Serajevo, the capital of the Austrian Province of Bosnia. Failure of first attempt at assassination by explosion of a bomb; success of second attempt some hours later by revolver shots. The assassins were Austrian subjects of Serbian nationality. (See War Cyclopedia, under "Seravejo.")

2. Opportuneness of the crime for Austria. (See Ramsay Muir, Britain's Case Against Germany, p. 152.)

III. AUSTRIAN NOTE TO SERBIA (JULY 23, 1914).

1. Preliminaries: Secret investigation of the crime by the Austrian court at Serajevo. (Reports of the alleged results in Collected Diplomatic Documents, pp. 490–494; Austrian Red Book, Appendix 8, and German White Book, Appendix; summary, pp. 416–417.) Quieting reports as to its intentions issued by Austrian Government, but preparations made in secret for rigorous measures against Serbia.

"A reckoning with Serbia, a war for the position of the Austro-Hungarian Monarchy as a great power, even for its existence as such, can not be permanently avoided." (Austrian minister at Belgrade to Austrian Government, July 21, 1914. In Austrian Red Book, No. 6; Collected Diplomatic Documents, p. 452.)

2. Conference at Potsdam (July 5, 1914) at which the terms of the note were practically settled. The holding of such a conference has been denied by German newspapers, but the denial is not convincing. (See War Cyclopedia, under "Potsdam conference"; New York Times, Current History, September, 1917, pp. 469–471.)

3. General character of the note. In effect an ultimatum to which unconditional acceptance must be given within 48 hours. Humiliating character of its demands. (See War Cyclopedia, under "Serbia, Austrian ultimatum.")

"I had never before seen one State address to another independent State a document of so formidable a character." (Sir Edward Grey, British Secretary for Foreign Affairs, in British Blue Book, No. 5; Collected Diplomatic Documents, p. 13.)

"The demands of that [the Austrian] Government are more brutal than any ever made upon any civilized State in the history of the world, and they can be regarded only as intended to provoke war." (German Socialist newspaper Vorwärts, July 25, 1914.)

4. Some specific demands. The numbers attached are those of the note itself. (See British Blue Book, No. 4; Collected Diplomatic Documents, pp. 3–12.)

"2. To dissolve immediately the society called Narodna Odbrana [the chief society for Serbian propaganda], to confiscate all its means of propaganda, and to proceed in the same manner against other societies and their branches in Serbia which engage in propaganda against the Austro-Hungarian Monarchy. The Royal [Serbian] Government shall take the necessary measures to prevent the societies dissolved from continuing their activity under another name and form."

"3. To eliminate without delay from public instruction in Serbia, both as regards the teaching body and also as regards the methods of instruction, everything that serves, or might serve, to foment the propaganda against Austria-Hungary."

"5. To accept the collaboration in Serbia of representatives of the Austro-Hungarian Government for the suppression of the subversive movement directed against the territorial integrity of the monarchy.

"6. To take judicial proceedings against accessories to the plot of June 28 who are on Serbian territory; delegates of the Austro-Hungarian Government will take part in the investigation relating thereto."

5. Denial by Germany that she was consulted by Austria before sending the note.

"We therefore permitted Austria a completely free hand in her action toward Serbia, but have not participated in her preparations." (German White Book; Collected Diplomatic Documents, p. 406.)

This denial was, and is, generally disbelieved. (See Ramsay Muir, Briton's Case against Germany, p. 8, and the evidence concerning the Potsdam conference.) Germany's claim that she was ignorant of the Austrian ultimatum was from the outset preposterous and against all reason. Intimately allied with Austria-Hungary and for a decade the dominating power in the diplomacy of the central powers in the Balkans and the Near East, is it possible to believe that she did not examine into and even give direction, in broad outline at least, to the policy of her ally at this critical stage in the development of her Pan-German program? The purpose of the denial, apparently, was to satisfy Italy (Austria's other ally), which certainly was not consulted.

6. Circumstances making a peaceful outcome more difficult: Absence of most of the foreign ambassadors from Vienna for their summer vacations; immediate withdrawal of Austrian minister of foreign affairs to a remote mountain resort, etc., etc.

7. Widespread anxiety over the situation, as threatening the peace of Europe. Russia, England, and France make urgent endeavors—

(a) To induce Serbia to go as far as possible in meeting the demands of Austria.

(b) To obtain an extension of the time limit in order (1) that the powers might be enabled to study the documentary material promised by Austria embodying the findings of the court at Serajevo; and (2) to permit them to exercise a moderating influence on Serbia. Sharp refusal of Austria to extend the time limit. (For later proposals see ch. 5.)

IV. SERBIAN REPLY TO THE AUSTRIAN NOTE (JULY 25, 1914).

(See British Blue Book, No. 39; Collected Diplomatic Correspondence, pp. 31–37.)

1. To the gratification of Europe, Serbia—

(a) Accepted 8 of the 10 Austrian demands.

(b) Returned a qualified refusal to the other two.

As to No. 5, the Serbian Government said that they "do not clearly grasp the meaning or the scope of the demand, * * * but they declare that they will admit such collaboration as agrees with the principle of international law, with criminal procedure, and with good neighborly relations."

As to No. 6, they returned a temperate refusal (founded, according to Austrian claim, upon a deliberate misunderstanding of the nature of the demand): "It goes without saying that the Royal [Serbian] Government consider it their duty to open an inquiry against all such persons as are, or eventually may be, implicated in the plot, * * * and who happen to be within the territory of the kingdom. As regards the participation in this inquiry of Austro-Hungarian agents or authorities appointed for this purpose by the Imperial and Royal [Austro-Hungarian] Government, the Royal [Serbian] Government can not accept such an arrangement, as it would be a violation of the constitution and of the law of criminal procedure; nevertheless, in concrete cases communications as to the results of the investigation in question might be given to the Austro-Hungarian agents."

(c) In conclusion, Serbia suggested reference to The Hague Tribunal or to the great powers, in case its reply was not considered satisfactory.

2. Austria, to Europe's amazement, found this reply dishonest and evasive. (See Austro-Hungarian Red Book, No. 34; Collected Diplomatic Documents, pp. 506–514.)

Two hours after receiving it the Austrian minister left Belgrade with all his staff. Grave apprehensions were felt that this break of diplomatic relations would be followed by European war.

The Austrian foreign minister declared to the Russian ambassador (July 28) that his Government could "no longer recede, nor enter into any discussion about the terms of the Austro-Hungarian note." (British Blue Book, No. 93; Collected Diplomatic Documents, p. 70.)

V. AUSTRIA DECLARES WAR ON SERBIA JULY 28, 1914.

1. In spite of the efforts at mediation of Great Britain, Russia, and France, Austria declared war on Serbia July 28, 1914.

2. Demand of Germany that the war be "localized"—i. e., that no other power interfere with Austria's chastisement of Serbia.

3. Belgrade bombarded July 29–30, and the war begun.

VI. CONCLUSIONS.

1. Austria and Germany wanted war with Serbia, and their chief fear was lest something might, against their wills, force them to a peaceful settlement; hence the haste and secrecy which attended their measures.

"The impression left on my mind is that the Austro-Hungarian note was so drawn up as to make war inevitable; that the Austro-Hungarian Government are fully resolved to have war with Serbia; that they consider their position as a great power to be at stake; and that until punishment has been administered to Serbia it is unlikely that they will listen to proposals of mediation. This country [Austria-Hungary] has gone wild with joy at the prospect of war with Serbia, and its postponement or prevention would undoubtedly be a great disappointment." (British ambassador at Vienna, July 27, 1914. In British Blue Book, No. 41; Collected Diplomatic Documents, p. 38.)

"He [the German secretary of state] admitted quite freely that Austro-Hungarian Government wished to give the Serbians a lesson, and that they meant to take military action. He also admitted that Serbian Government could not swallow certain of the Austro-Hungarian demands. * * * Secretary of state confessed privately that he thought the note left much to be desired as a diplomatic document." (British chargé at Berlin to Sir Edward Grey, July 25, 1914. British Blue Book, No. 18; Collected Diplomatic Documents, p. 22.)

"In the Viennese note to Serbia, whose brazen arrogance has no precedent in history, each phrase bears witness that Austria-Hungary desired the war. * * * Only a war, for which the best minds of the army were thirsting * * * could cure the fundamental ills of the two halves of the Austrian Empire and of the monarchy. Only the refusal, and not the acceptance, of the claims put forward in the note could have profited Vienna.

"The question has been asked, Where was the plan of campaign elaborated, in Vienna or Berlin? And some hasten to reply: In Vienna. Why do people tolerate the propagation of such dangerous fables? Why not say the thing that is (because it must be), namely, that a complete understanding in all matters existed between Berlin and Vienna." (Maximilian Harden, in Die Zukunft for Aug. 1, 1914; quoted in G. Alexinsky, Russia and the Great War, 129–130.)

2. Austria's object was to reduce Serbia to a state of vassalage as a step to Austrian hegemony in the Balkan Peninsula. Her promises not to destroy Serbia's sovereignty or to annex her territory, therefore, failed to satisfy Serbia's friends.

"Austria demanded conditions which would have placed Serbia under her permanent control." (Prof. Hans Delbrück, a noted professor and statesman of Germany, in Atlantic Monthly, for Feb., 1915, p. 234.)

3. Germany's objects were:

(a) To recover her prestige, lost in the Agadir affair (1911) and over the Balkan Wars (1912–13).

(b) To strengthen her ally Austria, and so increase her own power.

(c) To humiliate Russia and the triple entente, and to disrupt or render harmless the latter.

(d) To promote the central European—"Berlin to Bagdad"—project and open a trade route to Saloniki, the most favorably situated seaport for the commerce of central Europe with the East.

4. To advance these ends, Germany and Austria deliberately incurred the grave risk of a general European war.

For reading references on Chapter IV, see page 37.

V. FAILURE OF DIPLOMACY TO AVERT WAR—GERMANY AND AUSTRIA AT WAR WITH RUSSIA AND FRANCE.

I. OUTLINE OF EVENTS, JULY 21 TO AUGUST 6, 1914.

July 21. Secret orders preliminary to mobilization issued in Germany. These measures, including the movement of troops toward the French frontier, continued up to final mobilization. (See Le Mensonge du 3 Août, 1914, pp. 14–25; Nineteenth Century and After, issue for June, 1917.)

July 23. Austrian note sent to Serbia.

July 25. Reply of Serbia. Austrian minister quits Belgrade, severing diplomatic relations.

July 27. Sir Edward Grey proposed a conference at London on the Serbian question. France, Russia, and Italy accepted; Germany refused.

July 28. Austria declared war on Serbia.

July 29. Russian mobilization on the Austro-Hungarian frontier.

July 30. Bombardment of Belgrade. General mobilization in Russia begun.

July 31. "Threatening danger of war" proclaimed in Germany. Germany sent ultimatums to Russia and to France.

August 1. Orders for general mobilization in France and in Germany. Declaration of war by Germany against Russia. Italy declared that she would remain neutral since "the war undertaken by Austria and the consequences which might result, had, in the words of the German ambassador himself, an aggressive object." (British Blue Book, No. 152; Collected Diplomatic Documents, p. 107.)

August 2. Occupation of Luxemburg by Germany. Demand that Belgium also permit German troops to violate its neutrality.

August 3. Belgium refused the German demand. Germany declared war on France.

August 4. Germany invaded Belgium. Great Britain declared war on Germany.

August 6. Austria-Hungary declared war on Russia.

II. PROPOSALS FOR PRESERVING PEACE.

1. A conference at London proposed by Sir Edward Grey (July 27). To be composed of the German and Italian ambassadors to Great Britain, as friends of Austria, and the French ambassador and Grey himself, as friends of Russia. Its purpose: To discover "an issue which would prevent complications."

"If it is borne in mind how incomparably more difficult problems had been successfully solved by the conference of ambassadors at London during the Balkan crisis, it must be admitted that a settlement between the Austrian demands and the Serbian concessions in July, 1914, was child's play compared with the previous achievements of the London conference." (I Accuse, p. 155.)

The proposal was accepted by Russia, France, and Italy. It was declined by Germany (without consulting Austria) on the ground that she "could not call Austria in her dispute with Serbia before a European tribunal." (German White Book; Collected Diplomatic Documents, p. 409.) Grey explained that it "would not be an arbitration, but a private and informal discussion"; nevertheless, Austria and Germany continued to decline.

2. Germany proposed (July 26) that France "exercise a moderating influence at St. Petersburg." The French foreign minister in reply "pointed out that Germany on her part might well act on similar lines at Vienna, especially in view of the conciliatory spirit displayed by Serbia. The [German] ambassador replied that such a course was not possible, owing to the decision not to intervene in the Austro-Serbian dispute." (Russian Orange Book, No. 28; Collected Diplomatic Documents, p. 276.)

3. Germany proposed direct negotiations between Russia and Austria over the Serbian question (July 27). Austria declined these direct negotiations, even though proposed by her ally. (Was this due to collusion between the two Governments?)

4. The Kaiser (who unexpectedly returned to Berlin on July 26 from a yachting cruise) attempted to act as "mediator" between Russia and Austria; but apparently he confined himself to the effort to persuade Russia "to remain a spectator in the Austro-Serbian war without drawing Europe into the most terrible war it has ever seen." (Kaiser to Tsar, July 29, in German White Book, exhibit 22; Collected Diplomatic Documents, pp. 431–432.)

"Neither over the signature of the Kaiser nor over that of his foreign minister does the record show a single communication addressed to Vienna in the interests of peace." (J. M. Beck, The Evidence in the Case, p. 112.)

5. The Tsar proposed, in a personal telegram to the Kaiser (July 29), "to give over the Austro-Serbian problem to The Hague Tribunal." (Collected Diplomatic Documents, p. 542.) This telegram is omitted from the German White Book! "The acceptance of the Tsar's proposal would doubtless have led to peace, and for this reason it was declined." (I Accuse, p. 187, note.)

6. Proposal by Grey (July 29) that Austria should express herself as satisfied with the occupation of Belgrade and the neighboring Serbian territory as a pledge for a satisfactory settlement of her demands and should allow the other powers time and opportunity to mediate between Austria and Russia.

King George of England, in a personal telegram (July 30) to the Kaiser's brother, said: "I rely on William applying his great influence in order to induce Austria to accept this proposal. In this way he will prove that Germany and England are working together to prevent what would be an international catastrophe." (Collected Diplomatic Documents, p. 539.)

Grey's expressed opinion (July 29) was that "mediation was ready to come into operation by any method that Germany thought possible if only Germany would 'press the button' in the interests of peace." (British Blue Book, No. 84; Collected Diplomatic Documents, p. 64.)

7. Proposal of Russian foreign minister (July 30): "If Austria, recognizing that the Austro-Serbian question has assumed the character of a question of European interest, declares herself ready to eliminate from her ultimatum points which violate the sovereign rights of Serbia, Russia engages to stop her military preparations." (Russian Orange Book, No. 60; Collected Diplomatic Documents, p. 288.)

Reply of German Foreign Minister that "he considered it impossible for Austria to accept our proposal." (Russian Orange Book, No. 63; Collected Diplomatic Documents, p. 289.)

8. Second proposal of Russian foreign minister (July 31): "If Austria consents to stay the march of her troops on Serbian territory; and if, recognizing that the Austro-Serbian conflict has assumed the character of a question of European interest, she admits that the great powers may examine the satisfaction which Serbia can accord to the Austro-Hungarian Government without injury to her rights as a sovereign State or her independence, Russia undertakes to maintain her waiting attitude." (Russian Orange Book, No. 67; Collected Diplomatic Documents, p. 291.)

This proposal remained unanswered.

9. Austria declared (August 1) that she was then "ready to discuss the grounds of her grievances against Serbia with the other powers." (Russian Orange Book, No. 73; Collected Diplomatic Documents, p. 293.)

Sir Edward Grey comments: "Things ought not to be hopeless so long as Austria and Russia are ready to converse." (British Blue Book, No. 131; Collected Diplomatic Documents, p. 97.) From July 30 onward "the tension between Russia and Germany was much greater than between Russia and Austria. As between the latter an arrangement seemed almost in sight." (British ambassador at Vienna, in British Blue Book, No. 161; Collected Diplomatic Documents, p. 117.)

But it was then too late, as Germany had already resolved upon war, and was preparing her ultimatums which precipitated the conflict.

III. GERMAN ULTIMATUMS AND DECLARATIONS OF WAR AGAINST RUSSIA AND FRANCE.

1. A council of war, held at Potsdam on the evening of July 29, apparently decided definitely to make war on France and Russia.

"Our innermost conviction is that it was on this evening that the decision of war was reached. The 5th of July, before his departure for a cruise on the coasts of Norway, the Kaiser had given his consent to the launching of the Serbian venture. The 29th of July he decided for war." (Le Mensonge du 3 Août, 1914, p. 38.)

"People who are in a position to know say that those occupying the leading military positions, supported by the Crown Prince and his retainers, threatened the Emperor with their resignation en bloc if war were not resolved on." (I Accuse, p. 189.)

2. General mobilization of Russian army (July 30–31). This was grounded not merely on the measures of Austria, but also on "the measures for mobilization (against Russia) taken secretly, but continuously, by Germany for the last six days." (French Yellow Book, No. 118; Collected Diplomatic Documents, p. 223.)

The Tsar assured the Kaiser: "It is far from us to want war. As long as the negotiations between Austria and Serbia continue, my troops will undertake no provocative action. I give you my solemn word thereon." (German White Book; Collected Diplomatic Documents, p. 411.)

For evidence of German mobilization against France beginning as early as July 21, see Nineteenth Century and After, issue for June, 1917. Consult also I Accuse, pp. 194–201; War Cyclopedia, under "Mobilization Controversy."

3. German ultimatum to Russia (July 31, midnight) demanding that the Government "suspend their military measures by midday on August 1" (twelve hours).

Demand addressed to France (July 31, 7 p. m.) as to "what the attitude of France would be in case of war between Germany and Russia?" (French Yellow Book, No. 117; Collected Diplomatic Documents, p. 223). The French Prime Minister answered (August 1, 1.05 p. m.) that "France would do that which her interests dictated." (German White Book, Exhibit 27; Collected Diplomatic Documents, p. 434.)

4. Declaration of war against Russia at 7.10 p. m. on August 1, following Russia's failure to demobilize. (Russian Orange Book, No. 76; Collected Diplomatic Documents, p. 294.)

Orders for a general mobilization of the French army were signed at 3.40 p. m. the same day.

5. Declaration of war against France on August 3 (French Yellow Book, No. 147; Collected Diplomatic Documents, p. 240.)

This declaration contained charges that France had already violated German territory, e. g., by dropping bombs from aeroplanes on railway tracks near Nuremburg). These charges are now shown to be falsehoods. (Le Mensonge du 3 Août, 1914, pp. 130–230; pamphlet entitled, German Truth and a Matter of Fact, London, 1917.) To avoid possible clashes through hot-headedness of her troops and underofficers, France withdrew her troops 10 kilometers (about six miles) within her own frontiers. On the other hand German bands repeatedly crossed the French frontier, and even killed a French soldier on French soil before the declaration of war. (French Yellow Book, No. 106.)

Similar falsehoods were inserted in the Austrian declaration of war on Serbia, and in the German declaration of war on Russia. Falsehood and forgery were used with Machiavellian unscrupulousness by Germany in the conduct of her foreign affairs. (Compare Bismarck's changes in the "Ems dispatch" at beginning of Franco-German war and his diabolical pleasure that war with France thus became certain. Bismarck, Autobiography, II, p. 101. See War Cyclopedia, under "German Government, Moral Bankruptcy," etc.)

IV. GERMAN RESPONSIBILITY FOR THE WAR.

The testimony is overwhelming not only that Germany planned with Austria an aggresive stroke in 1914, but that in the end it was she who willed the war. (See War Cyclopedia, under "War, Responsibility for.")

"The constant attitude of Germany who, since the beginning of the conflict, while ceaselessly protesting to each power her peaceful intentions, has actually, by her dilatory or negative attitude, caused the failure of all attempts at agreement, and has not ceased to encourage through her ambassador the uncompromising attitude of Vienna; the German military preparations begun since the 25th of July and subsequently continued without cessation; the immediate opposition of Germany to the Russian formula (of July 29–31), declared at Berlin inacceptable for Austria before that power had ever been consulted; in conclusion, all the impressions derived from Berlin bring conviction that Germany has sought to humiliate Russia, to disintegrate the Triple Entente, and if these results could not be obtained, to make war." (Viviani, French Minister for Foreign Affairs, July 31, in French Yellow Book, No. 114; Collected Diplomatic Documents, p. 221.)

"Never in the history of the world has a greater crime than this been committed. Never has a crime after its commission been denied with greater effrontery and hypocrisy." (I Accuse, pp. 208–9.)

"The German Government contrived the war jointly in concert with the Austrian Government, and so burdened itself with the greatest responsibility for the immediate outbreak of the war. The German Government brought on the war under cover of deception practiced upon the common people and even upon the Reichstag (note the suppression of the ultimatum to Belgium, the promulgation of the German White Book, the elimination of the Tsar's dispatch of July 29, 1914, etc.)." (Dr. Karl Liebknecht, German Socialist, in leaflet dated May 3, 1916. See War Cyclopedia, under "Liebknecht on German War Policy.")

"The object of this war (on the part of the opponents of Germany) is to deliver the free peoples of the world from the menace and the actual power of a vast military establishment controlled by an irresponsible government which, having secretly planned to dominate the world, proceeded to carry the plan out without regard either to the sacred obligations of treaty or the long-established practices and long-cherished principles of international action and honor; which chose its own time for the war; delivered its blow fiercely and suddenly; stopped at no barrier either of law or mercy; swept a whole continent within the tide of blood—not the blood of soldiers only, but the blood of innocent women and children also and of the helpless poor; and now stands balked but not defeated, the enemy of four-fifths of the world. This power is not the German people. It is the ruthless master of the German people. It is no business of ours how that great people came under its control or submitted with temporary zest to the domination of its purpose; but it is our business to see to it that the history of the rest of the world is no longer left to its handling." (President Wilson's reply to the Pope's peace proposals, August 27, 1917.)

For reading references on Chapter V, see page 37.

VI. VIOLATION OF BELGIUM'S NEUTRALITY BRINGS IN GREAT BRITAIN.

I. WHY GREAT BRITAIN WAS EXPECTED TO STAY OUT.

1. Embittered state of party relations growing out of the budget struggle of 1909–11, the limitation of the veto of the House of Lords in 1911, violence of the suffragettes ("the wild women"), and the passage by the House of Commons of the Irish home-rule bill (May 25, 1914).

2. Serious threat of rebellion in northern Ireland (Ulster) against putting in force Irish home-rule act. Organization of armed forces under Sir Edward Carson; "gun running" from Germany.

3. Widespread labor troubles, especially among the railway workers.

4. Unrest in India, following administrative division of the Province of Bengal; boycott movement; revolutionary violence attending Nationalist (Hindu) agitations.

5. Unwarlike character of the British people; a "nation of shopkeepers" supposedly unready for the sacrifices of war. Progress of pacifist opinions ("Norman-Angellism").

6. Lack of an army adequate for use abroad. Composed of volunteers ("mercenaries") instead of being based on compulsory service, it was regarded (in the Kaiser's phrase) as "contemptible."

II. BRITISH DIPLOMACY AND THE WAR.

1. Sir Edward Grey, Secretary for Foreign Affairs, labored unremittingly for peace. (See War Cyclopedia, under "Grey and British Policy, 1914.")

"Sir Edward Grey deserves more than any other the name of the 'peacemaker of Europe.' * * * His efforts were in vain, but his merit in having served the cause of peace with indefatigable zeal, with skill and energy, will remain inextinguishable in history." (I Accuse, pp. 247–248.)

"No man in the history of the world has ever labored more strenuously or more successfully than my right honorable friend, Sir Edward Grey, for that which is the supreme interest of the modern world—a general and abiding peace. * * * We preserved by every expedient that diplomacy can suggest, straining to almost the breaking point our most cherished friendships and obligations, even to the last making effort upon effort and hoping against hope. Then, and only then, when we were at last compelled to realize that the choice lay between honor and dishonor, between treachery and good faith, and that we had at last reached the dividing line which makes or mars a nation worthy of the name, it was then, and only then, that we declared for war." (Prime Minister Asquith, at the Guildhall, London, Sept. 4, 1914.)

"Shoulder to shoulder with England we labored incessantly and supported every proposal," etc. (German White Book; in Collected Diplomatic Documents, p. 410.) Similar admissions that Great Britain strove sincerely and energetically for peace are found in other passages in the German White Book. Later the German Chancellor, von Bethmann Hollweg, declared: "The inner responsibility [for the war] lies on the Government of Great Britain. * * * England saw how things were moving, but did nothing to spoke the wheel." (Speech in Reichstag, Dec. 2, 1914.) This statement, however, is palpably false.

2. British fleet kept together after the summer maneuvers (July 27). Importance of this step.

"I pointed out [to the Austrian ambassador] that our fleet was to have dispersed to-day, but we had felt unable to let it disperse. We should not think of calling up reserves at this moment, and there was no menace in what we had done about our fleet; but, owing to the possibility of a European conflagration, it was impossible for us to disperse our forces at this moment. I gave this as an illustration of the anxiety that was felt [over the Serbian question]." (Sir Edward Grey, in British Blue Book, No. 48; Collected Diplomatic Documents, p. 43.)

3. Her liberty of action reserved; Great Britain was free from engagements (July 29).

"In the present case the dispute between Austria and Serbia was not one in which we felt called upon to take a hand. Even if the question became one between Austria and Russia we should not feel called upon to take a hand in it. It would then be a question of the supremacy of Teuton or Slav—a struggle for supremacy in the Balkans; and our idea had always been to avoid being drawn into a war over a Balkan question. If Germany became involved and France became involved, we had not made up our minds what we should do; it was a case that we should have to consider. * * * We were free from engagements, and we should have to decide what British interests required us to do. I thought it necessary to say that, because * * * we were taking all precautions with regard to our fleet, and I was about to warn [the German ambassador] not to count on our standing aside, but that it would not be fair that I should let [the French ambassador] be misled into supposing that this meant that we had decided what to do in a contingency that I still hoped might not arise." (Sir Edward Grey to the French ambassador, in British Blue Book, No. 87; Collected Diplomatic Documents, pp. 65–66.)

4. Germany's "infamous proposal" of July 29 (following the Potsdam council of that date, at which war apparently was resolved upon). In return for British neutrality in case of war between Germany and France, the German chancellor promised: (a) Not to aim at "territorial acquisitions at the expense of France" in Europe; (b) a similar undertaking with respect to the French colonies was refused; (c) the neutrality of Holland would be observed as long as it was respected by Germany's adversaries; (d) in case Germany was obliged to violate Belgium's neutrality, "when the war was over Belgian integrity would be respected if she had not sided against Germany."

"He [the German chancellor] said that should Austria be attacked by Russia a European conflagration might, he feared, become inevitable, owing to Germany's obligations as Austria's ally, in spite of his continued efforts to maintain peace. He then proceeded to make the following strong bid for British neutrality. He said that it was clear, so far as he was able to judge the main principle which governed British policy, that Great Britain would never stand by and allow France to be crushed in any conflict there might be. That, however, was not the object at which Germany aimed. Provided that neutrality of Great Britain were certain, every assurance would be given to the British Government that the Imperial Government aimed at no territorial acquisitions at the expense of France, should they prove victorious in any war that might ensue.

"I questioned his excellency about the French colonies, and he said that he was unable to give a similar undertaking in that respect. As regards Holland, however, his excellency said that so long as Germany's adversaries respected the integrity and neutrality of the Netherlands Germany was ready to give His Majesty's Government an assurance that she would do likewise. It depended upon the action of France what operations Germany might be forced to enter upon in Belgium, but when the war was over Belgian integrity would be respected if she had not sided against Germany." (British ambassador at Berlin, in British Blue Book, No. 85; Collected Diplomatic Documents, p. 64.)

5. This proposal was emphatically rejected by Great Britain. "What he asks us in effect is to engage to stand by while French colonies are taken and France is beaten, so long as Germany does not take French territory as distinct from the colonies." (Sir Edward Grey, in British Blue Book, No. 101; Collected Diplomatic Documents, p. 77. Compare Germany's attitude over Great Britain's proposal for a naval compact in 1912—see ch. I, IV 6 c.)

The proposals of July 29 may be regarded as "the first clear sign of a general conflict, for they presumed the probability of a war with France in which Belgium, and perhaps England, might be invovled, while Holland would be left alone." (J. H. Rose, Development of the European Nations, 5th ed., II, p. 387.)

6. Grey holds out the prospect of a league of peace (July 30). In his reply to the foregoing proposals, the British foreign secretary adds: "If the peace of Europe can be preserved, and the present crisis safely passed, my own endeavor will be to promote some arrangement to which Germany could be a party, by which she could be assured that no aggressive or hostile policy would be pursued against her or her allies by France, Russia, and ourselves, jointly or separately. I have desired this and worked for it, as far as I could, through the last Balkan crisis, and, Germany having a corresponding object, our relations sensibly improved. The idea has hitherto been too Utopian to form the subject of definite proposals, but if this present crisis, so much more acute than any that Europe has gone through for generations, be safely passed, I am hopeful that the relief and reaction which will follow may make possible some more definite rapprochement between the powers than has been possible hitherto." (British Blue Book, No. 101; Collected Diplomatic Documents, p. 78.)

Germany made no reply to the above suggestion.

7. Would Great Britain keep out if Germany respected Belgium's neutrality? (Aug. 1.)

"He [the German ambassador] asked me [Sir Edward Grey] whether, if Germany gave a promise not to violate Belgium's neutrality, we would engage to remain neutral.

"I replied that I could not say that; our hands were still free, and we were considering what our attitude should be. All I could say was that our attitude would be determined largely by public opinion here, and that the neutrality of Belgium would appeal very strongly to public opinion here. I did not think that we could give a promise of neutrality on that condition alone.

"The ambassador pressed me as to whether I could not formulate conditions on which we would remain neutral. He even suggested that the integrity of France and her colonies might be guaranteed.

"I said that I felt obliged to refuse definitely any promise to remain neutral on similar terms, and I could only say that we must keep our hands free." (British Blue Book, No. 123; Collected Diplomatic Documents, p. 93.)

8. Great Britain not to come in if Russia and France rejected reasonable peace proposals; otherwise she would aid France (July 31).

"I said to German ambassador this morning that if Germany could get any reasonable proposal put forward which made it clear that Germany and Austria were striving to preserve European peace, and that Russia and France would be unreasonable if they rejected it, I would support it at St. Petersburg and Paris, and go the length of saying that if Russia and France would not accept it His Majesty's Government would have nothing more to do with the consequences; but, otherwise, I told German ambassador that if France became involved we should be drawn in." (Sir Edward Grey, in British Blue Book, No. 111; Collected Diplomatic Documents, p. 86.)

9. Great Britain gives naval assurance to France (Aug. 2), following the German declaration of war on Russia (Aug. 1) and the invasion of Luxemburg.

"I am authorized [by the British Cabinet] to give an assurance that, if the German fleet comes into the Channel or through the North Sea to undertake hostile operations against French coasts or shipping, the British fleet will give all the protection in its power." (Sir Edward Grey to the French ambassador, in British Blue Book, No. 148; Collected Diplomatic Documents, p. 105.)

This assurance was given as the result of an arrangement of several years' standing whereby the French fleet was concentrated in the Mediterranean and the British by agreement in the North Sea. "It did not bind us to go to war with Germany unless the German fleet took the action indicated." (Sir Edward Grey to the British ambassador at Paris, in British Blue Book, No. 148; Collected Diplomatic Documents, p. 105.)

III. NEUTRALITY OF LUXEMBURG AND OF BELGIUM VIOLATED.

1. Luxemburg invaded by German troops (Aug. 2). This was in violation of the treaty of London (1867), as well as of her rights as a neutral State in general. (See Hague Convention of 1907, arts. 2–5; War Cyclopedia, under "Luxemburg," "Neutral Duties," "Neutrality," "Neutralized State.")

2. Special status of Belgium as a neutralized State. Based upon the treaty of London (1839), by which Belgium became "an independent and perpetually neutral State, * * * bound to observe such neutrality toward all other States," and Prussia, France, Great Britain, Austria, and Russia became the "guarantors" of her neutrality. The German Empire was the successor to Prussia in this guarantee. Confirmation of Belgium's neutrality in 1870, by treaties between Great Britain and Prussia and Great Britain and France. (See War Cyclopedia, under "Belgium, Neutralization.")

"Had Belgium been merely a small neutral nation, the crime [of her violation] would still have been one of the worst in the history of the modern world. The fact that Belgium was an internationalized State has made the invasion the master tragedy of the war. For Belgium represented what progress the world had made toward cooperation. If it could not survive, then no internationalism was possible. That is why, through these years of horror upon horror, the Belgian horror is the fiercest of all. The burning, the shooting, the starving, and the robbing of small and inoffensive nations is tragic enough. But the German crime in Belgium is greater than the sum of Belgium's misery. It is a crime against the basis of faith on which the world must build or perish." (Walter Lippman, in Annals of the American Academy of Political and Social Science, July, 1917.)

3. German reassurances to Belgium in 1911 and 1914.

"Germany will not lose sight of the fact that the neutrality of Belgium is guaranteed by international treaty." (German minister of war, in the Reichstag, Apr. 29, 1911. See Belgian Gray Book, No. 12; Collected Diplomatic Documents, p. 306.)

"The troops will not cross Belgian territory." (German minister to Belgium, early on Aug. 2, 1914, to Brussels journalists. In H. Davignon, Belgium and Germany, p. 7.)

"Up to the present he [the German minister to Belgium, on Aug. 2] had not been instructed to make us an official communication, but that we knew his personal opinion as to the feelings of security which we had the right to entertain toward our eastern neighbors." (Belgian minister for foreign affairs, in Belgian Gray Book, No. 19; Collected Diplomatic Documents, p. 309.)

4. France officially assured Great Britain and Belgium of her resolve to respect Belgium's neutrality (July 31 and Aug. 1), in response to an inquiry addressed by Great Britain to both France and Germany. (British Blue Book, Nos. 115 and 125; Belgian Gray Book, No. 15; Collected Diplomatic Documents, pp. 87, 94, 307.)

5. Germany declined to give such an official assurance (July 31)—apparently on the ground that "any reply they might give could not but disclose a certain amount of their plan of campaign in the event of war ensuing." (British Blue Book, No. 122; Collected Diplomatic Documents, p. 92.)

6. Germany demanded (Aug. 2 at 7 p. m.) permission to pass through Belgium on the way to France, alleging (falsely) that France intended to march into Belgium, and offering to restore Belgium and to pay an indemnity at the end of the war. Should Belgium oppose the German troops, she would be considered "as an enemy," and Germany would "undertake no obligations" toward her. (Belgian Gray Book, No. 20; Collected Diplomatic Documents, pp. 309–311.)

7. Belgium refused such permission (Aug. 3). "The Belgian Government, if they were to accept the proposals submitted to them, would sacrifice the honor of the nation and betray their duty toward Europe." (Belgian Gray Book, No. 22; Collected Diplomatic Documents, p. 312.)

8. German armed forces entered Belgium on the morning of August 4. Belgium thereupon appealed to Great Britain, France, and Russia, as guaranteeing powers, to come to her assistance in repelling the invasion.

9. Germany's justification of her action:

(a) Plea of necessity. "Gentlemen, we are now in a state of necessity, and necessity knows no law. Our troops have occupied Luxemburg and perhaps have already entered Belgian territory. Gentlemen, this is a breach of international law. * * * We know * * * that France stood ready for an invasion [this statement was false]. France could wait, we could not. * * * The wrong—I speak openly—the wrong we thereby commit we will try to make good as soon as our military aims have been attained. He who is menaced as we are and is fighting for his highest possession can only consider how he is to hack his way through." (Chancellor von Bethmann-Hollweg, in the Reichstag, Aug. 4, 1914. See War Cyclopedia, under "Bethmann-Hollweg," "Kriegs-Raison," "Notwendigkeit.")

(b) Charge that Belgium had violated her own neutrality by concluding military conventions with England in 1905 and 1912 directed against Germany. This claim is based on a willful misinterpretation of documents discovered by Germany in Brussels after the taking of that city. (Collected Diplomatic Documents, pp. 350–367.)

"That a wrong was done to Belgium was originally openly confessed by the perpetrator. As an afterthought, in order to appear whiter, Cain blackened Abel. In my opinion, it was a spiritual blunder to rummage for documents in the pockets of the quivering victim. * * * To calumniate her in addition is really too much. (Karl Spitteler, a Swiss, quoted in I Accuse, p. 234.)

(c) Military expediency was the real reason. This is shown, among other indications, by an interview (Aug. 3, 1914) between the German minister for foreign affairs and the Belgian minister to Germany.

German Minister: "It is a question of life or death for the Empire. If the German armies do not want to be caught between the hammer and the anvil they must strike a decisive blow at France in order then to turn back against Russia."

Belgian minister: "But the frontiers of France are sufficiently extended to make it possible to avoid passing through Belgium."

Foreign minister: "They are too strongly fortified." (H. Davignon, Belgium and Germany, p. 14.)

IV. GREAT BRITAIN ENTERS THE WAR.

1. Appeal of King Albert of Belgium to King George (Aug. 3.): "Remembering the numerous proofs of Your Majesty's friendship and that of your predecessor, and the friendly attitude of England in 1870 and the proof of friendship you have just given us again, I make a supreme appeal to the diplomatic intervention of Your Majesty's Government to safeguard the integrity of Belgium." (Belgian Gray Book, No. 25; Collected Diplomatic Documents, p. 313.)

2. Great Britain's ultimatum to Germany (August 4) asking assurance by midnight that "the demand made upon Belgium will not be proceeded with, and that her neutrality will be respected by Germany." (British Blue Book, No. 153, 159; Collected Diplomatic Documents, pp. 107–109.)

3. War declared by Great Britain (about midnight, August 4). The "scrap of paper" utterance.

The account of the last interview (about 7 p. m., August 4) of the British ambassador with the German Chancellor is instructive: "I found the Chancellor very agitated. His excellency at once began a harangue, which lasted for about 20 minutes. He said that the step taken by His Majesty's Government was terrible to a degree; just for a word—'neutrality'—a word which in war time had so often been disregarded, just for a scrap of paper Great Britain was going to make war on a kindred nation who desired nothing better than to be friends with her. All his efforts in that direction had been rendered useless by this last terrible step, and the policy to which, as I knew, he had devoted himself since his accession to office had tumbled down like a house of cards. What we had done was unthinkable; it was like striking a man from behind while he was fighting for his life against two assailants. He held Great Britain responsible for all the terrible events that might happen. I protested strongly against that statement, and said that in the same way as he and Herr von Jagow (German Foreign Minister) wished me to understand that for strategical reasons it was a matter of life and death to Germany to advance through Belgium and violate the latter's neutrality, so I would wish him to understand that it was, so to speak a matter of 'life and death' for the honor of Great Britain that she should keep her solemn engagement to do her utmost to defend Belgium's neutrality if attacked. That solemn compact simply had to be kept, or what confidence could anyone have in engagements given by Great Britain in the future? The Chancellor said: 'But at what price will that compact have been kept? Has the British Government thought of that?' I hinted to his excellency as plainly as I could that fear of consequences could hardly be regarded as an excuse for breaking solemn engagements, but his excellency was so excited, so evidently overcome by the news of our action, and so little disposed to hear reason that I refrained from adding fuel to the flame by further argument." (British Blue Book, No. 160; Collected Diplomatic Documents, p. 111. See War Cyclopedia, under "Scrap of Paper.")

4. Great Britain's reasons for entering the war:

(a) Her obligations to Belgium under the treaty of 1839.

(b) Her relations to France growing out of the entente cordiale (1904). These ties were strengthened in subsequent years by consultations of British and French naval experts, but no promise of anything more than diplomatic support was given until August 2, 1914.

"We have agreed that consultation between experts is not, and ought not, to be regarded as an engagement that commits either Government to action in any contingency that has not yet arisen and may never arise. The disposition, for instance, of the French and British fleets, respectively, at the present moment is not based upon an engagement to cooperate in war.

"You have, however, pointed out that if either Government had grave reason to expect an unprovoked attack by a third power it might become essential to know whether it could in that event depend upon the armed assistance of the other.

"I agree that if either Government had grave reason to expect an unprovoked attack by a third power, or something that threatened the general peace, it should immediately discuss with the other whether both Government's should act together to prevent aggression and to preserve peace; and if so, what measures they would be prepared to take in common." (Sir Edward Grey to the French ambassador, Nov. 22, 1912; see New York Times Current History, I, p. 283.)

"There is but one way in which the Government could make certain at the present moment of keeping outside this war, and that would be that it should immediately issue a proclamation of unconditional neutrality. We can not do that. We have made the commitment to France [of Aug. 2, 1914] that I have read to the House, which prevents us doing that." (Sir Edward Grey in the House of Commons, Aug. 3, 1914; New York Times Current History, I, p. 289.)

(c) Self-interest—the realization that Germany's hostility to her was implacable, and that if Great Britain was not to surrender her position as a great power in the world, and possibly a goodly portion of her colonial possessions, she must ultimately fight Germany; if so, better in alliance with France and Russia than alone at a later time.

5. Great Britain's declared war aims.

"We shall never sheathe the sword which we have not lightly drawn until Belgium recovers in full measure all and more than all that she has sacrificed, until France is adequately secured against the menace of aggression, until the rights of the smaller nationalities of Europe are placed upon an unassailable foundation, and until the military domination of Prussia is wholly and finally destroyed." (Prime Minister Asquith, Nov. 9, 1914.)

"I say nothing of what the actual conditions of peace will be, because those are things which we must discuss with our allies and settle in common with them. But the great object to be attained * * * is that there shall not again be this sort of militarism in Europe, which in time of peace causes the whole of the Continent discomfort by its continual menace, and then, when it thinks the moment has come that suits itself, plunges the Continent into war." (Sir Edward Grey, House of Commons, Jan. 26, 1916.)

"What we and our allies are fighting for is a free Europe. We want a Europe free not only from the domination of one nationality by another, but from hectoring diplomacy and the peril of war, free from the constant rattling of the sword in the scabbard, from perpetual talk of shining armor and war lords. In fact, we feel we are fighting for equal rights; for law, justice, peace; for civilization throughout the world as against brute force, which knows no restraint and no mercy.

"What Prussia proposes, as we understand her, is Prussian supremacy. She proposes a Europe modeled and ruled by Prussia. She is to dispose of the liberties of her neighbors and of us all. We say that life on these terms is intolerable. And this also is what France and Italy and Russia say. We are fighting the German idea of the wholesomeness, almost the desirability, of ever recurrent war. Germany's philosophy is that a settled peace spells degeneracy. Such a philosophy, if it is to survive as a practical force, means eternal apprehension and unrest. It means ever-increasing armaments. It means arresting the development of mankind along the lines of culture and humanity. * * *

"The allies can tolerate no peace that leaves the wrongs of this war unredressed. Peace counsels that are purely abstract and make no attempt to discriminate between the rights and the wrongs of this war are ineffective if not irrelevant.

"* * * The Prussian authorities have apparently but one idea of peace, an iron peace imposed on other nations by German supremacy. They do not understand that free men and free nations will rather die than submit to that ambition, and that there can be no end to war till it is defeated and renounced." (Sir Edward Grey to correspondent of Chicago Daily News, in June, 1916.)

Mr. OWEN. Now, Mr. President in support of that there is a tremendous amount of historical evidence. I want to call attention to certain volumes which have dealt with this matter particularly and which I wish to put in the RECORD in order that those who desire to know what the facts are may find the bibliography immediately at hand. So without reading I ask to print in the RECORD a list of these books which are of immediate present import.

The PRESIDING OFFICER. Without objection, leave is granted.

The matter referred to is as follows:

Germany's War Mania.
Gems of German Thought. (Archer.)
Hurrah and Hallelujah. (Bang.)
Pan Germanic Doctrine. (Harpers.)
Out of Their Own Mouths. (Appleton.)
Der Deutsche Chauvinismus. (Nippold.)
Das Annexionistische Deutschland. (Grumbach.)
My Four Years in Germany. (Gerard.)
Juge par Eux. (Themes.)
Obstacles to Peace. (McClure.)
Ten Pamphlets. (War information series, Committee on Public information.)
Germany and the Next War. (Von Bernhardi.)
I Accuse. (Doran & Co., N. Y.)
The Crime. (Doran & Co., N. Y.)
The Diplomatic Facts of the War. (Seymour.)
The Immediate Causes of the Great War. (Chipwood.)
Fallacies and Facts. (Lord Roberts.)
The Diplomacy of the Great War. (Ballard.)
Because I am a German. (Fernan.)
The Evidence in the Case. (Beck.)
Who Wanted the European War. (Guglielmo Ferrero—Clarendon Press.)
German Annexationist Aims. (Grumbach.)
How the Nations Waged War. (Kennedy.)
Topical Outline of the War. (Prof. Samuel B. Harding, Indiana University.)

Mr. OWEN. By the Committee on Public Information, comprising the Secretary of State, the Secretary of War, and the Secretary of the Navy, and under the immediate supervision of Mr. George Creel, there was printed not long since, on November 15, 1917, a volume called "Conquest and Kultur," which sets forth the philosophy of the Pan-German group or the Prussian military autocratic group, giving the opinions of the various leaders of the German Empire, beginning with the Kaiser himself, and including Von Bethmann-Hollweg, Von Heydebrand, and various other leaders—military, political, and educational. I want to call attention to this particular volume, and I want to call especial attention to certain declarations made in it, showing that this war was planned upon the neighboring nations of the German and Austrian Empires and that they contemplated making war upon the United States.

On page 11 of this document will be found a statement attributed to Maj. N. A. Bailey, and made to W. T. Hornaday, on August 11, 1915, a statement which was called to the attention of the Senate by the Senator from Illinois [Mr. LEWIS] some months ago, and which ought to be printed in full in the RECORD so that people who wish to know about it may see it. He says:

At the close of the Spanish-American War I was returning on the *Santee*, I think it was, from Santiago, Cuba, to Montauk Point. * * * On board there was a military attaché from Germany, Count von Goetzen, a personal friend of the Kaiser. There was also an attaché from some South American country, possibly Argentina.

Apropos of a discussion between Count von Goetzen and myself on the friction between Admiral Dewey and the German admiral at Manila, von Goetzen said to me: "I will tell you something which you better make note of. I am not afraid to tell you this because, if you do speak of it, no one would believe you and everybody will laugh at you.

"About 15 years from now my country will start her war. She will be in Paris in about two months after the commencement of hostilities. Her move on Paris will be but a step to her real object—the crushing of England. Everything will move like clockwork. We will be prepared and others will not be prepared. I speak of this because of the connection which it will have with your own country.

"Some months after we finish our work in Europe we will take New York and probably Washington and hold them for some time. We will put your country in its place with reference to Germany. We do not intend to take any of your territory, but we do intend to take a billion or more dollars from New York and other places. The Monroe doctrine will be taken charge of by us, as we will then have put you in your place, and we will take charge of South America, as far as we want to. I have no hostility toward your country. I like it, but we have to go our own way. Don't forget this, and about 15 years from now remember it and it will interest you."

Mr. President, this statement would have been utterly incredible except for the amount of evidence which has come from every direction, and from every quarter of the globe, which shows that this forecast was based upon known facts. The fact that America must stand the brunt of this German war, if William II can have his way, is shown by what the American Ambassador, James W. Gerard says in his book, "My Four Years in Germany." He refers to an interview which he obtained on October 22, 1915. He had tried from the preceding spring to have an interview with the Kaiser, who refused to see him, although we were at peace with Germany. Finally, Gerard wrote a note to the chancellor saying:

Some time since I requested an interview with the Kaiser. You need not give yourself any further trouble about the request.

JAMES W. GERARD.

Thereupon the interview was granted. It took an hour and a quarter, during which time the Emperor talked vehemently and angrily to Gerard. Referring to this interview, Mr. Gerard says:

The Emperor was standing, so, naturally, I stood also; and according to his habit, which is quite Rooseveltian, he stood very close to me and talked very earnestly. * * * He showed, however, great bitterness against the United States and repeatedly said, "America had better look out after this war," and "I shall stand no nonsense from America after the war. * * * I was so fearful in reporting the dangerous part of this interview, on account of the many spies, not only in my own embassy but also in the State Department, that I sent but a very few words in a roundabout way by courier direct to the President.

A. Curtis Roth, former American vice consul at Plauen gives evidence of this same condition, if any evidence were needed, as follows:

The Germans became imbued with the ideas that America must be made to suffer, that America must indemnify the German people, and behind these ideas were the German Army and Navy, the pan-Germans, the agrarians, conservatives of all hues, and the National Liberals, the national German committees * * * and the German Government. * * *

In April, 1915, I was with a party of German officers at Bad Elster in southeastern Saxony. Maj. Liebster, an acquaintance of mine * * * joined our party. * * * Maj. Liebster sought the occasion for a conversation with me and among other things said: "We are keeping books on you Americans. It's a long account and we haven't missed any details. Rest assured that that account will be presented to you some day for settlement. * * * We are keeping the account in black and white * * * with customary German thoroughness."

Mr. President, in Ambassador Gerard's book he makes a quotation from Von Tirpitz which, I think, it is worth while to

place in the RECORD, and which, without reading, I ask leave to insert, showing that Von Tirpitz intended to make war on the United States when Germany had succeeded in conquering Europe.

The PRESIDING OFFICER. Without objection, leave is granted.

The matter referred to is as follows:

[From page 249 of "My Four Years in Germany," by James W. Gerard.]

During this winter of submarine controversy an interview with Von Tirpitz, thinly veiled as an interview with a "high naval authority," was published in that usually most conservative of newspapers, the Frankfurter Zeitung. In this interview the "high naval authority" advocated ruthless submarine war with England and promised to bring about thereby the speedy surrender of that country. After the surrender, which was to include the whole British fleet, the German fleet, with the surrendered British fleet added to its force, was to sail for America and exact from that country indemnities enough to pay the whole cost of the war.

After his fall Von Tirpitz, in a letter to some admirers who had sent him verses and a wreath, advocated holding the coast of Flanders as a necessity for the war against England and America.

Mr. OWEN. Mr. President, one of the most striking recent evidences of this Hohenzollern conspiracy is an article by a German captain of industry named August Thyssen, to which I want to call the attention of the Senate. There is a very illuminating description of who August Thyssen is by the Marquise de Fontenoy, which I ask the Secretary to read.

The PRESIDING OFFICER. Without objection, the Secretary will read as requested.

The Secretary read as follows:

AUGUST THYSSEN ON KAISER.

That old August Thyssen should have made so vitriolic an attack upon the Kaiser and against his dynasty as that contained in his extraordinary pamphlet recently addressed to the business men of the Vaterland, and which has just reached the United States, may be regarded as a very significant and noteworthy sign of the times.

It is altogether amazing that the pamphlet should ever have been permitted to get into print and into circulation, that any copies thereof should have been allowed to get out of Germany into foreign countries, and also that the bold author should be still at liberty instead of confined in the deepest of dungeons, with all his possessions confiscated to the crown, for he makes no bones about charging the Kaiser in person with extortion and blackmail, with savage persecution of those who opposed his wishes and with willful deceit and fraud.

He likewise sets forth the promises of immense tracts of British and French territory made by Emperor William to German business men prior to the summer of 1914, in order to secure their support for the war which he had in view, Thyssen himself being offered a grant of 30,000 acres in the mining districts of Australia and the entire Dominion of Canada, for exploitation by means of a syndicate. Thyssen refused to take these pledges seriously and has been in the Emperor's black books ever since.

GERMANY'S INDUSTRIAL CHIEF.

Now, in order to appreciate the importance of the pamphlet it is necessary to explain just who August Thyssen is. If Albert Ballin, Emil von Rathenau, the members of the dynasty of Stumm, the Henckel-Donnersmarcks, etc., are the captains of finance and industry of Germany, then August Thyssen is the captain general. He may be compared to a sort of blend between Charles M. Schwab, of the Bethlehem Steel Works, and the late J. Pierpont Morgan, and has often been described as the king of the steel, iron, and coal industries of central Europe.

He was bitterly opposed to the present war, which he insists could have been avoided if England had been represented at the court of the Kaiser by the president of some great steamship company and Germany had been represented in the same way at the court of St. James by some great Rhenish or Westphalian ironmaster or manufacturer.

FOREIGN INVESTMENTS LOST.

An ardent advocate of the internationalism of commerce, Thyssen possessed until the beginning of the war huge mines, ironworks, docks, and even harbors, in British India, in other English colonial dependencies, as well as in France and in Russia, all of which have been sequestrated by the Governments of these three powers as property belonging to the German foe. If Holland gets dragged into the fray, in spite of her endeavors to preserve her neutrality, Thyssen's vast system of docks and shipbuilding works at Vlaardingen, near Rotterdam, will likewise be lost to him.

These he secured some seven or eight years ago in behalf of the Vulcan Iron & Steamship Building Co., of Germany, which he controls, and he had given a contract for the construction of an additional large, new harbor, with a depth of 30 feet, also a dry dock large enough to hold the biggest battleships, and huge wharves at Vlaardingen, when the war began. The entire property is surrounded by a lofty wall, so as to insure complete privacy. Thyssen's ironworks in France were situated at Montigny and at Maisieres, while his docks in France were at Caen. His principal base in Russia, until the summer of 1914, was at Nikolsieff, on the Black Sea, where he owned practically everything in sight.

August Thyssen is about 78, in every sense of the word a self-made man, having started some 50 years ago with a capital of $6,000.

Mr. OWEN. Mr. President, this article, which I desire to call to the attention of the country, is as follows:

I am writing this pamphlet—

Says August Thyssen—

because I want to open the eyes of Germans, especially of the business community, to facts. When the Hohenzollern wanted to get the support of the commercial class for their war plans, they put their ideas before us as a business proposition. A large number of business and commercial men were asked to support the Hohenzollern war policy on the ground that it would pay them to do so.

Let me frankly confess that I am one of those men who was led to agree to support the Hohenzollern war plan when this appeal was made to the leading business men of Germany in 1912–13. I was led to do so, however, against my better judgment.

In 1912 the Hohenzollerns saw that the war had become a necessity to the preservation of the military system, upon which their power depends. In that year the Hohenzollerns might have directed, if they had desired, the foreign affairs of our country so that peace would have been insured in Europe for at least 50 years. But prolonged peace would have resulted certainly in the break-up of our military system, and with the break-up of our military system the power of the Hohenzollerns would come to an end. The Emperor and his family, as I said, clearly understood this, and they therefore, in 1912, decided to embark on a great war of conquest.

But to do this they had to get the commercial community to support them in their aims. They did this by holding out to them hopes of great personal gain as a result of the war. In the light of events that have taken place since August, 1914, these promises now appear to have been supremely ridiculous, but most of us at the time were led to believe that they would probably be realized.

I was personally promised a free grant of 30,000 acres in Australia and a loan from the Deutsch Bank of £150,000, at 3 per cent, to enable me to develop my business in Australia. Several other firms were promised special trading facilities in India, which was to be conquered by Germany, be it noted, by the end of 1915. A syndicate was formed for the exploitation of Canada. This syndicate consisted of the heads of 12 great firms; the working capital was fixed at £20,000,000, half of which was to be found by the German Government.

There were, I have heard, promises made of a more personal character. For example, the "conquest of England" was to be made the occasion of bestowing upon certain favored and wealthy men some of the most desirable residences in England, but of this I have no actual proof.

Every trade and interest was appealed to. Huge indemnities were, of course, to be levied on the conquered nations, and the fortunate German manufacturers were, by this means, practically to be relieved of taxation for years after the war.

These promises were not vaguely given. They were made definitely by Bethmann-Hollweg on behalf of the Emperor to gatherings of business men, and in many cases to individuals. I have mentioned the promise of a grant of 30,000 acres in Australia that was made to me. Promises of a similar kind were made to at least 80 other persons at special interviews with the chancellor, and all particulars of these promises were entered in a book at the trades department.

But not only were these promises made by the chancellor; they were confirmed by the Emperor, who, on three occasions, addressed large private gatherings of business men in Berlin, Munich, and Cassel in 1912 and 1913. I was at one of these gatherings. The Emperor's speech was one of the most flowery orations I have listened to, and so profuse were the promises he made that were even half of what he promised to be fulfilled, most of the commercial men in Germany would become rich beyond the dreams of avarice.

The Emperor was particularly enthusiastic over the coming German conquest of India. "India," he said, "is occupied by the British. It is in a way governed by the British, but it is by no means completely governed by them. We shall not merely occupy India. We shall conquer it, and the vast revenues that the British allow to be taken by Indian princes will, after our conquest, flow in a golden stream into the Fatherland. In all the richest lands of the earth the German flag will fly over every other flag."

Finally the Emperor concluded:

"I am making you no promises that can not be redeemed, and they shall be redeemed if you are now prepared to make the sacrifices which are necessary to secure the position that our country must and shall occupy in the world. He who refuses to help is a traitor to the Fatherland; he who helps willingly and generously will have his rich reward."

All sounded, I admit, tempting and alluring, and though there were some who viewed rather dubiously the prospect of Germany being able to conquer the world in a year, the majority of business and commercial men agreed to support the Hohenzollern war plans. Most of them have since wished they had never paid any attention to them.

According to the promises of the Hohenzollern, victory was to have been achieved in December, 1915, and the promises made to myself and other commercial men in Germany when our money for the Kaiser's war chest was wanted were to have been then redeemed.

But this is what has happened in reality: In December of 1916 the chancellor, Bethmann-Hollweg, began to have interviews once more with business men. The purpose of these interviews again was to get more money from them. Guaranties were asked from 75 business men in Germany, including myself, that they would undertake to subscribe £200,000,000 to the next war loan. I was personally asked to guarantee a subscription of £200,000. I declined to give this guaranty; so did some others. I was then favored with a private interview with Bethmann-Hollweg's private secretary, who told me that if I declined to give the guaranty and subsequently the money I would lose a contract I had with the war office. But not only that—I was threatened with the practical ruin of my business if I did not give the guaranty.

I described this demand as blackmail of the worst sort and refused to guarantee a mark to the war loan. Two months later I lost my contract, and the greater part of my business has been taken over at a figure that means confiscation. Moreover, I am not to get paid until after the war, but am to receive 4 per cent on the purchase price. Every man who declined to promise a subscription to the amount he was asked has been treated in the same manner.

The majority of men, however, preferred to pay to being ruined, and so the Hohenzollerns in the main got their way. But, apart from the blackmailing of men who refused to pay any more money into the Hohenzollern war chest, let us see how the Hohenzollerns' promises are working out. A circular was sent out last March to a large number of business men by the foreign trade department which contained the following suggestion:

"It will be wise for employers who have foreign trade interests to employ agents in foreign countries who can pass themselves off as being of French or English birth. German agents and travelers will probably for some time after the war have difficulty in doing business not only in enemy countries but in neutral countries. There will undoubtedly be a personal prejudice against Germans that would probably make it difficult for representatives of German firms to do business. Although this prejudice will not interfere with German trade, as it will be merely of a personal character, it will facilitate trading transactions if employers will employ agents who can pass as French or English, preferably, or as Dutch, American, or Spanish."

So this is the prospect we are faced with after the war. The meaning of this circular in plain language is this. So loathed and hated have Germans become outside their own country that no one will want to have any personal dealings with them after the war.

A large number of businesses are, moreover, being secretly bolstered up with State aid. A condition of this aid is that the owners of the businesses receiving it shall agree to accept a considerable degree of State control over their business after the war.

This is part and parcel of a plan on the part of the Hohenzollerns to get the commercial classes thoroughly into their grip before the end of the war, and so minimize the chances of a revolution.

These men who have agreed to accept aid now for their businesses, and State control after the war, have received a notification from the foreign trade department to the effect that, with proper organization, Germany ought to recover her prewar trade three years after peace is declared. Here is the Hohenzollern method of redeeming promises. We are to get back our prewar trade three years after peace is declared, and to do this we must submit to have our trading transactions controlled and supervised by the State.

Can any German to whom such prospects are held out by the Emperor fail to see that he has been bamboozled and humbugged and fooled into supporting a war from which the utmost he can hope to gain is to come out of it without national bankruptcy?

This article is not needed to establish the fact that this world war was deliberately prepared by the German Government because that is otherwise overwhelmingly established. It is only of interest as one of innumerable circumstantial evidences which may be of interest at this time.

Mr. President, the manner in which German opinion has been influenced in supporting these plans is described in a very careful way by the introduction to the work called "Germany's War Mania," published by Dodd, Mead & Co. Without reading it, I ask permission to insert in the RECORD a part of that introduction describing the manner in which German opinion has been influenced by the Hohenzollern government.

The PRESIDING OFFICER (Mr. LEWIS in the chair). There being no objection, consent is granted.

The matter referred to is as follows:

INTRODUCTION.

The prevailing idea in Great Britain is that the sinister influence which brought on the present war has been the policy, secret and hidden, of a small group of militarists around the Kaiser, a policy to which the German people have been compelled to assent after its results were upon them.

Nothing can be more mistaken than this idea. Germany's plans for world conquest were not secretly conceived by a small clique. They were not concealed from the German people and were not without the sympathy of the German nation.

Never, even under the extremest form of democracy, has the ruling class so taken the people into its confidence, so openly sought and aroused a favorable public opinion, so continuously bid for general support, so thoroughly explained its intentions and plans as has Germany in developing her policy of Pan-Germanic conquest during the last quarter of a century. There has not been in the history of the world an educational campaign of such a size, of such thoroughness, and so completely organizing and utilizing all channels for arousing interest and gaining support.

German newspapers and periodicals, German Government and military officials, German educators and authors, German leagues and associations have been preaching these ideas and aims and policies far and wide to the German millions every hour of the day, both before and especially since William II came to the throne in 1888.

The purpose of this book is to give to English readers an authoritative account of this war mania, a veritable German gospel of blood and iron, which has been deliberately brought into being by the artificial stimulation of Teutonic sentiment for the last 43 years.

Out of the mouths of the German leaders themselves the chapters of this book lay bare precisely what German ideals and aims, policies and plans have been; from the Kaiser himself, from his highest governmental officials, from his military chiefs, from his foremost educators, from his leading molders of opinion—from their own words this picture of Germany's world policy has been created. This book is not a commentary on Germany's ideas, not an outsider's deductions from her policies, not a study of what she might be driving at, but actual statements from her own political, military, and intellectual leaders as to what she wants and how she expects to get it.

Among many other evidences that Berlin and Vienna conspired to start the war, I quote Baron Beyens, the Belgian minister at Berlin, and the American ambassador, Henry Morgenthau, at Constantinople, who quotes the Italian ambassador at Constantinople as having been given the same information by Baron Wangenheim, the German ambassador at Constantinople:

Berlin and Vienna were at one in their desire for immediate and inevitable hostilities. The paternity of the scheme, as well as of the procedure employed, which are, on account of their very cleverness, worthy of a Bismarck, is attributed here in the diplomatic world to a German rather than an Austrian brain. The secret had been well guarded, and the execution of the scheme followed with marvelous rapidity. (Baron Beyens, the Belgian minister at Berlin, to M. Davignon, Belgian minister for foreign affairs, Berlin, July 26, 1904. The Belgian Grey Book, No. 2.)

On August 18, 1914, as American ambassador at Constantinople, I called on the Marquis of Pallavicini, the Austro-Hungarian ambassador, to congratulate him on the Emperor's eighty-fourth birthday. * * * The conversation then turned to the war, which was in its third week, and his excellency told me that when he visited the Emperor in May His Imperial Majesty had said that war was inevitable because of conditions in the Balkans. * * *

A still more remarkable confirmation came to me from Baron Wangenheim, the German ambassador at Constantinople. In an outburst of enthusiasm after the arrival of the *Goeben* and the *Breslau* in the Dardanelles, * * * the German ambassador informed me that a conference had been held in Berlin in the early part of July [1914] at which the date of the war was fixed. This conference was presided over by the Kaiser; the Baron Wangenheim was present to report on conditions in Turkey. Moltke, the chief of staff, was there, and so was Grand Admiral von Tirpitz. With them were the leaders of German finance, the directors of the railroads, and the captains of industry. * * * Each was asked if he were ready for the war. All replied in the affirmative except the financiers, who insisted that they must have two weeks in which to sell foreign securities and arrange their loans. * * *

It was not to me alone that Baron Wangenheim told the story of this Berlin conference. Only recently the Marquis Garroni, the Italian ambassador at Constantinople, announced that Baron Wangenheim said the same thing to him, Italy at that time being a member of the triple alliance. My diary shows that the conversation with the German ambassador took place on August 26. This was about six weeks after the fateful council in Berlin. * * * and all the details of the meeting were still fresh in Baron Wangenheim's mind. (Henry Morgenthau, former American ambassador to Turkey, in New York World, Oct. 14, 1917.)

Mr. OWEN. Mr. President, I have placed in the RECORD some of the evidence justifying the statements of fact in the proposed concurrent resolution. I desire and request that the resolution be referred to the Committee on Foreign Relations in order that it may be considered.

The PRESIDING OFFICER. There being no objection, the concurrent resolution will be so referred.

ADJUDICATION OF PRIVATE CLAIMS.

Mr. MYERS. Mr. President, I think the calendar ought to be called. The session is well advanced, and the calendar has not been called for some time.

The PRESIDING OFFICER. There is a motion pending to that effect; and if the Senator will permit the Chair to do so, the Chair will submit the motion for disposition.

Mr. MYERS. Certainly.

The PRESIDING OFFICER. The pending motion is the motion of the Senator from Georgia [Mr. SMITH] that the Senate proceed to the consideration of the bill (S. 1795) to relieve Congress from the adjudication of private claims against the Government.

Mr. SHIELDS. I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum is suggested. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Hale	Myers	Smith, Ga.
Bankhead	Hardwick	New	Smith, Md.
Borah	Henderson	Norris	Smith, Mich.
Brandegee	Hollis	Nugent	Smoot
Calder	James	Overman	Stone
Chamberlain	Johnson, S. Dak.	Pittman	Sutherland
Colt	Kellogg	Poindexter	Swanson
Curtis	Kirby	Pomerene	Tillman
Fernald	Lewis	Saulsbury	Warren
Gallinger	McCumber	Sheppard	
Gore	McKellar	Shields	
Gronna	Martin	Smith, Ariz.	

Mr. McKELLAR. I desire to announce the unavoidable absence of the junior Senator from Delaware [Mr. WOLCOTT] on public business.

Mr. SHEPPARD. The senior Senator from Delaware [Mr. SAULSBURY] is absent on account of illness.

Mr. SMITH of Michigan. My colleague [Mr. TOWNSEND] is absent because of important committee work to which he is assigned.

Mr. GRONNA. I wish to announce that the Senator from Wisconsin [Mr. LA FOLLETTE] is absent on account of illness in his family.

Mr. SUTHERLAND. I desire to announce that my colleague, the senior Senator from West Virginia [Mr. GOFF], is absent on account of illness.

Mr. MYERS. My colleague [Mr. WALSH] is still detained by illness.

The PRESIDING OFFICER. The roll call discloses but 45 Senators, not a quorum, present. The Chair asks to have the absentees called.

The Secretary called the names of the absent Senators and Mr. TRAMMELL and Mr. WEEKS answered to their names when called.

Mr. KIRBY. I wish to state that my colleague [Mr. ROBINSON] is detained on public business.

Mr. FRELINGHUYSEN, Mr. JONES of Washington, Mr. HARDING, Mr. VARDAMAN, Mr. JOHNSON of California, Mr. MCNARY, Mr. WADSWORTH, Mr. JONES of New Mexico, and Mr. STERLING entered the Chamber and answered to their names.

The PRESIDING OFFICER. The call discloses the presence of 56 Senators. A quorum is present. The Senator from Georgia [Mr. SMITH] is recognized.

Mr. SMITH of Georgia. Mr. President, the bill which I have asked the Senate to consider is one by which it is proposed to repeal what is known as the Crawford amendment. It is practically the bill introduced by Mr. MANN in the last House of Representatives and which passed the House, but which did not reach a vote in the Senate. There were two bills——

Mr. GALLINGER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Georgia yield to the Senator from New Hampshire?

Mr. GALLINGER. For information, does the Senator say that Mr. MANN introduced a bill to repeal the Crawford amendment?

Mr. SMITH of Georgia. Yes.

Mr. GALLINGER. I do not remember it.

Mr. SMITH of Georgia. He did. He introduced a bill and passed it through the House.

Mr. GALLINGER. I do not think so.

Mr. SMITH of Georgia. I am sure this bill is practically the Mann bill. It came over to the Senate and was referred to the Judiciary Committee. I was chairman of a subcommittee to which the bill was referred. The Senator from Tennessee [Mr. SHIELDS] and the Senator from Utah [Mr. SUTHERLAND] were members of the subcommittee. We made a few amendments to the Mann bill. One, and the most important, was a provision that allowed by certiorari cases to be carried from the Court of Claims to the Supreme Court of the United States.

This is the bill which Mr. MANN passed through the House with a few minor amendments added. The Judiciary Committee made a few amendments and reported it favorably during the last Congress. There were pending in the Court of Claims a number of suits brought under what are known as the Bowman and the Tucker Acts and the judiciary act. Under those acts certain churches and schoolhouses and public institutions that were used and damaged during the Civil War were permitted to go into the Court of Claims and establish their damages, and certain persons, if they could show they were loyal to the Union during the war, were permitted to make somewhat similar claims.

There were pending in the Court of Claims several hundred of these suits. The parties had prepared their testimony and had gone to considerable expense under congressional authority allowing the suits. Under this authority given by the Government to sue no individual could recover without proof of loyalty to the Union during the war.

Now, on an appropriation bill, on the last day of the session of the Senate, as I recall it, in 1915 Senator Crawford offered an amendment withdrawing the jurisdiction from the Court of Claims as to all these suits brought under what are known as the Bowman and Tucker Acts and the judiciary act. A point of order would have thrown out the amendment, but was not made. It was not carefully considered. It went over to the House, and it was so late that, as I understand, they took the bill as it was, because they did not believe it was possible, if they objected to the Crawford amendment, to pass the legislation. We were about to adjourn, and any change of the bill in the House would have prevented action.

Mr. JAMES. Mr. President, the Senator ought to state there, because I recall it very clearly, that the reason why no point of order was made on the amendment offered by Senator Crawford was because it was understood over here that if a point of order was made they would take advantage of the parliamentary situation and prevent the passage of the bill.

Mr. GALLINGER. Mr. President, if the Senator from Georgia will permit me, it might illuminate the subject a little to say that there were 1,033 claims in that bill, and the friends of those 1,033 claimants were willing to take pretty much anything to let the bill go through.

Mr. SMITH of Georgia. Yes; the people who were provided for were forced to sacrifice the people whose cases were pending in the courts to make possible action on the bill.

Mr. GALLINGER. In other words, there were 1,033 claims trumped up 50 years after the war, and our friends who are so assiduous in getting this class of claims through were willing to take them with the Crawford amendment. That is all there was to it.

Mr. JAMES. The term "trumped up" is not true or fair. All these claims were passed on by the Court of Claims of the United States. I do not take it the Senator is quite willing to have that broad accusation stand against the courts of this country.

Mr. GALLINGER. I shall discuss that in my own time and in my own language.

Mr. JAMES. And I will reply to it in my own way.

Mr. GALLINGER. And I shall quote from a distinguished Democratic Senator who on this floor, in response to an inquiry from me, said there was not an honest claim in the list, and we ought to cut them out.

Mr. JAMES. I do not think the Senate wants to be bound by what any one Senator said. It takes a majority to bind the Senate. In regard to the claims from my own State, they were every one advocated by my late colleague, Senator Bradley, of Kentucky, and supported by myself, and I wholly resent the charge that there were "trumped up" claims, so far as Kentucky is concerned, in that bill.

Mr. GALLINGER. I will not interrupt the Senator from Georgia further.

Mr. SMITH of Georgia. I wish to say I do not know a claim that is pending for an individual person from my State. There are a few claims still pending for churches and other institutions. Since I have been in the Senate one was paid to the Episcopal Church in the city of Atlanta. The church was used for months by officers and troops. It was used, I think, as a hospital. The inside of the church was torn out; and since I have been in the Senate some money was appropriated to pay back the actual cost of fixing the interior of the church. I think it was right to pay for the injury to the church. I think the Government ought to have paid it. There were several small church claims, since I have been in the Senate, that we have paid. Perhaps they have amounted to $75,000 for church and school claims. Each one that I know anything about I am sure was just. I do not know an individual in Georgia who had a claim pending in the Court of Claims when the Crawford amendment passed. Most of these claimants are stanch Republicans. They were Union men during the war. We do not provide for the payment of anything in this bill except to men who were loyal to the Union during the war.

These parties have introduced their evidence. Most of the claims that are still pending, I think, are from Kentucky, east Tennessee, western North Carolina, and West Virginia; a few are for property taken and kept by the Government. As I said, I do not know a case that is pending for an individual in the Court of Claims from my State. There are a number of church claims and school claims still pending, where suits were brought so late that the death of witnesses has prevented them from furnishing any evidence.

Mr. SHIELDS. Mr. President, I know a very large number of these claimants who reside in Tennessee. They were on a different side in the Civil War from my people. They are as honorable men as there are in the world and would not trump up or present a false claim against the United States or any person. The Senator from New Hampshire does them gross injustice. Their claims are just. They have in many instances been proven. The evidence is on file, and in some cases there were favorable reports upon them in the Court of Claims when they were there awaiting trial when the Crawford amendment was adopted.

It is true that it has been a long time since this property was appropriated by the United States in conducting the great Civil War, but this delay has been caused by circumstances which the claimants could not control. There was a long delay in enacting the statutes giving the court jurisdiction of them, and then in defining the rights of claimants. These facts are fully set forth in a report made by the chairman of the Committee on Claims upon the bill which was passed some two years ago, and to which the Crawford amendment was made.

I have no personal knowledge of the claims. It was all before my day. But from the character of the people who have them, and knowing that they are honorable people and would present none but a just claim, I think the Crawford amendment ought to be repealed, and they ought to have a day in court and have their cases tried and, if sustained, paid.

There ought to be a limit upon the presentation of the claims. There was none in the former law, but this bill provides that they must be presented within two years from the passage of the act, and when that time has elapsed there will be no more claims of this kind presented against the United States. The suits on these claims were brought under a law passed by Congress, and upon the faith of which they incurred great expense in employing counsel, bringing suit, and preparing the evidence. It is not fair or just to deny them a hearing.

Mr. GALLINGER. Mr. President, I was about to ask the Senator what he thinks about the French spoliation claims. They are 100 years old and more, twice as old as these southern claims. Does the Senator think they ought to be paid?

Mr. SHIELDS. I do not know anything about those claims.

Mr. GALLINGER. Does not the Senator think, to bring it down a little further, that the longevity claims that have been passed upon by the Court of Claims in behalf of the soldiers ought to be paid? They have all been passed upon by the Court of Claims.

Mr. SHIELDS. I will say to the Senator I am not familiar with the facts in regard to those claims, but I will make this general statement, that the United States is able to pay and ought to pay every just debt it owes.

Mr. GALLINGER. To bring it down a little nearer to the present moment, does not the Senator think that the cases for overtime work in the navy yards of the United States and work

on the part of the letter carriers of the United States, all of which have been passed upon by the Court of Claims favorably, ought to be paid?

Mr. SHIELDS. I have just made a statement that will cover every just claim. I am not familiar with the claims the Senator refers to. I know nothing about the facts nor about the law upon which they are predicated, but I do know about these claims that we are considering now in the present bill.

Mr. GALLINGER. Mr. President, I shall take only a moment, because the Senator from Utah [Mr. SMOOT] desires to address the Senate. I merely wish to say that when the last omnibus claims bill passed this body the Committee on Claims reported favorably a bill for the payment of overtime in the navy yards and other claims of that kind, and the assurance was given that that bill would receive favorable consideration if the southern claims bill passed. The southern claims bill did pass, and the other bill did not receive favorable consideration. I have introduced it twice now, at the last session and the present session, and I have a copy on my desk. I sent it to the Committee on Claims and it received no consideration whatever. Now, I want reciprocity at least if these claims 50 years old are to be paid.

Mr. SMITH of Georgia. Send it to the Judiciary Committee and we will bring in a report upon it.

Mr. GALLINGER. I sent mine to the Committee on Claims where this bill ought to have gone and where such bills always did go until the last time, when it was sent to the Committee on the Judiciary without some of us noticing that that reference was made. I sent mine to the committe that has jurisdiction over claims, and these are claims pure and simple, and nothing else.

Mr. President, that is all I care to say now. I will call attention to a good many matters connected with the payment of claims by the Government involving this inundation of claims from the South for alleged offenses on the part of Union troops 52 years ago, or thereabouts. I think there ought to be a time when it should stop, and we thought we had stopped it when for the purpose of getting through a bill involving 1,033 of these claims an agreement was made that the Crawford amendment would not be resisted, and it became a law; and now it is undertaken to repeal it.

Mr. SMOOT obtained the floor.

Mr. STONE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Missouri?

Mr. SMOOT. I yield.

Mr. STONE. I wish to say that it is very important that an executive session should be held this afternoon. There are a large number of ensigns who are awaiting assignment to service and other matters of almost equal importance that ought to be disposed of in some way in executive session. There are other things that I think it is important should be disposed of. I do not wish to interfere with what is going on now, but I hope that the debate about taking up this measure will not occupy the whole afternoon.

Mr. SMOOT. In answer to the Senator from Missouri, I will state that it is now 4 o'clock, and I am perfectly willing that the Senate shall go into executive session, if the Senator from Georgia is willing.

Mr. SMITH of Georgia. I do not object to going into executive session if we are to adjourn until to-morrow; but I am opposed to adjourning for two or three days while there are measures on the calendar that I consider should receive the attention of the Senate.

Mr. SMOOT. The Senator does not understand that I object to adjourning until to-morrow.

Mr. SMITH of Georgia. No; I do not understand that you are seeking to adjourn until Monday.

Mr. STONE. Of course that is a matter no one Senator can determine. If it is agreeable to the Senator from Georgia, I will move an executive session.

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Missouri?

Mr. SMOOT. Yes; I yield.

Mr. SMITH of Georgia. I will yield for that purpose.

EXECUTIVE SESSION.

Mr. STONE. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 10 minutes spent in executive session the doors were reopened.

ADJOURNMENT TO MONDAY.

Mr. SMITH of Georgia. At the next session of the Senate I will again move the consideration of the bill to repeal the Crawford amendment. I learn that with the understanding we would adjourn until Monday many Senators have arranged to give their entire time to committee work. For that reason I move that the Senate adjourn until Monday next at 12 o'clock noon.

The motion was agreed to; and (at 4 o'clock and 5 minutes p. m.) the Senate adjourned until Monday, February 4, 1918, at 12 o'clock meridian.

NOMINATIONS.

Executive nominations received by the Senate January 31, 1918.

RECEIVERS OF PUBLIC MONEYS.

Burre H. Lien, of California, to be receiver of public moneys at El Centro, Cal., vice Philip W. Brooks, resigned.

George Weaver, of Colorado, to be receiver of public moneys at Durango, Colo., his present term expiring February 17, 1918. (Reappointment.)

John W. Cloyd, of Colorado, to be receiver of public moneys at Sterling, Colo., his present term expiring March 15, 1918. (Reappointment.)

Juan N. Vigil, of New Mexico, to be receiver of public moneys at Santa Fe, N. Mex., his present term expiring February 5, 1918. (Reappointment.)

Alexander X. Campbell, of Oklahoma, to be receiver of public moneys at Guthrie, Okla., his present term expiring February 17, 1918. (Reappointment.)

REGISTER OF THE LAND OFFICE.

Robert R. Wilson, of Kansas, to be register of the land office at Dodge City, Kans., his present term expiring February 24, 1918. (Reappointment.)

APPOINTMENT IN THE ARMY.

CHAPLAIN.

Rev. James Thomas Moore, of Virginia, to be chaplain with rank from January 19, 1918, vice Chaplain Halsey C. Gavitt, retired from active service August 1, 1917.

PROMOTIONS IN THE ARMY.

COAST ARTILLERY CORPS.

To be captains with rank from October 12, 1917.

First Lieut. Martin J. O'Brien, Coast Artillery Corps, vice Capt. Charles R. Alley, placed on the detached officers' list.

First Lieut. Joseph C. Haw, Coast Artillery Corps, vice Capt. Robert C. Eddy, placed on the detached officers' list.

First Lieut. Iverson B. Summers, jr., Coast Artillery Corps, vice Capt. George F. Humbert, placed on the detached officers' list.

First Lieut. Clifford R. Jones, Coast Artillery Corps, vice Capt. Marcellus H. Thompson, placed on the detached officers' list.

First Lieut. John B. Wogan, Coast Artillery Corps, vice Capt. Geoffrey Bartlett, placed on the detached officers' list.

First Lieut. Clesen H. Tenney, Coast Artillery Corps, vice Capt. Eugene B. Walker, placed on the detached officers' list.

First Lieut. Frank E. Emery, jr., Coast Artillery Corps, vice Capt. Robert O. Edwards, placed on the detached officers' list.

First Lieut. Edward C. Wallington, Coast Artillery Corps, vice Capt. Lincoln B. Chambers, placed on the detached officers' list.

First Lieut. Carl E. Hocker, Coast Artillery Corps, vice Capt. Rufus F. Maddux, placed on the detached officers' list.

First Lieut. Richmond T. Gibson, Coast Artillery Corps, vice Capt. John R. Ellis, placed on the detached officers' list.

First Lieut. Edward B. Hyde, jr., Coast Artillery Corps, vice Capt. John B. Maynard, placed on the detached officers' list.

First Lieut. Herbert R. Corbin, Coast Artillery Corps, vice Capt. Warren R. Bell, placed on the detached officers' list.

First Lieut. Charles H. Chapin, Coast Artillery Corps, vice Capt. Lawrence T. Walker, placed on the detached officers' list.

First Lieut. William P. Cherrington, Coast Artillery Corps, vice Capt. Otto H. Schrader, placed on the detached officers' list.

First Lieut. Charles R. Finley, Coast Artillery Corps, vice Capt. Robert E. Guthrie, placed on the detached officers' list.

First Lieut. Albert W. Draves, Coast Artillery Corps, vice Capt. Norton M. Beardslee, placed on the detached officers' list.

First Lieut. Benjamin S. Beverley, Coast Artillery Corps, vice Capt. Theodore M. Chase, placed on the detached officers' list.

First Lieut. Carl L. Marriott, Coast Artillery Corps, vice Capt. Frederick A. Mountford, placed on the detached officers' list.

First Lieut. Hugh A. Ramsey, Coast Artillery Corps, vice Capt. Frederick Hanna.

First Lieut. Willis McD. Chapin, Coast Artillery Corps, subject to examination required by law, vice Capt. William C. Koenig, placed on the detached officers' list.

First Lieut. Carl S. Doney, Coast Artillery Corps, vice Capt. Frank A. Buel, placed on the detached officers' list.

First Lieut. James de B. Walbach, Coast Artillery Corps, vice Capt. Furman E. McCammon, placed on the detached officers' list.

First Lieut. Richard M. Levy, Coast Artillery Corps, vice Capt. Francis P. Hardaway, placed on the detached officers' list.

First Lieut. Ellicott H. Freeland, Coast Artillery Corps, vice Capt. Charles E. Ide, placed on the detached officers' list.

First Lieut. James C. Ruddell, Coast Artillery Corps, vice Capt. Edward L. Dyer, placed on the detached officers' list.

First Lieut. Joseph J. O'Hare, Coast Artillery Corps, vice Capt. Harry T. Pillans, placed on the detached officers' list.

First Lieut. William G. Patterson, Coast Artillery Corps, vice Capt. Willard K. Richards, placed on the detached officers' list.

First Lieut. Frank C. Scofield, Coast Artillery Corps, vice Capt. Edgar B. Colladay, placed on the detached officers' list.

First Lieut. Ferdinand F. Gallagher, Coast Artillery Corps, vice Capt. Harold F. Nichols, placed on the detached officers' list.

First Lieut. Barrington L. Flanigen, Coast Artillery Corps, vice Capt. Robert W. Clark, jr., placed on the detached officers' list.

CAVALRY ARM.

To be captains.

First Lieut. Clarence S. Maulsby, Cavalry, subject to examination required by law, from July 28, 1917, vice Capt. E. R. Warner McCabe, transferred to the Field Artillery.

First Lieut. George S. Andrew, Cavalry, from July 28, 1917, vice Capt. Wilson G. Heaton, promoted.

First Lieut. Spencer A. Townsend, Cavalry, from July 28, 1917, vice Capt. William R. Kendrick, promoted.

First Lieut. Arthur M. Jones, Cavalry, from July 28, 1917, vice Capt. Robert S. Donaldson, transferred to the Field Artillery.

First Lieut. Thomas G. Peyton, Cavalry, from July 29, 1917, vice Capt. Elkin S. Franklin, transferred to the Infantry.

First Lieut. Junius H. Houghton, Cavalry, subject to examination required by law, from July 30, 1917, vice Capt. Horace H. Fuller, transferred to the Field Artillery.

First Lieut. Douglas J. Page, Cavalry, from July 31, 1917, vice Capt. Ronald D. Johnson, transferred to the Field Artillery.

First Lieut. James N. Caperton, Cavalry, from August 2, 1917, vice Capt. Creed F. Cox, transferred to the Field Artillery.

First Lieut. Charles C. Smith, Cavalry, from August 14, 1917, vice Capt. David L. Roscoe, detailed in the Aviation Section.

First Lieut. Harrison Herman, Cavalry, from August 15, 1917, vice Capt. Joseph A. Baer, promoted.

First Lieut. William W. Dempsey, Cavalry, from August 22, 1917, vice Capt. Philip H. Sheridan, detailed in General Staff.

First Lieut. Robert R. D. McCullough, Cavalry, from August 24, 1917, vice Capt. Willis V. Morris, promoted.

First Lieut. Chapman Grant, Cavalry, from August 27, 1917, vice Capt. Alexander M. Milton, detailed in the Quartermaster Corps.

First Lieut. Duncan G. Richart, Cavalry, from September 11, 1917, vice Capt. Robert C. Brady, detailed in the Quartermaster Corps.

First Lieut. Daniel A. Conner, Cavalry, from October 2, 1917, vice Capt. Richard B. Barnitz, transferred to the Field Artillery.

To be captains with rank from July 25, 1917.

First Lieut. William E. Shipp, Cavalry, vice Capt. John Alden Degen (Quartermaster Corps).

First Lieut. Calvin De Witt, jr., Cavalry, vice Capt. Stephen M. Walmsley, transferred to Field Artillery.

First Lieut. James M. Crane, Cavalry, vice Capt. Philip W. Corbusier, detailed in the Quartermaster Corps.

Capt. Donald J. MacLachlan, Infantry, vice Maj. James G. Boswell, detailed in the Signal Corps.

HOUSE OF REPRESENTATIVES.

THURSDAY, *January 31, 1918.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Oh Lord, our Lord, incline Thine ear and hear our prayer. Help us to guide our frail bark along the turbulent and stormy sea of this life and bring us in Thine own good time to that haven of rest where all is peace and tranquillity.

The sands of life run swiftly, and no man knoweth when the call shall come. May we be ready to meet the summons with perfect faith and confidence in Thee our Father.

Comfort, we beseech Thee, the admirers, friends, colleagues, and the stricken family of the Senator who has passed on, under the dispensation of Thy providence, to the larger life in Christ Jesus our Lord. Amen.

The Journal of the proceedings of yesterday was read and approved.

LEAVES OF ABSENCE.

The SPEAKER laid before the House the following requests for leave of absence.

The Clerk read as follows:

Mr. MOORES of Indiana requests leave of absence until February 5 for the purpose of responding to a subpœna to testify in the United States District Court for the District of Indiana on February 1.

TOM D. MCKEOWN asks leave of absence, on account of illness.

The SPEAKER. Without objection, the requests will be granted.

There was no objection.

ENROLLED BILL SIGNED.

Mr. LAZARO, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bill of the following title, when the Speaker signed the same:

H. R. 3135. An act to amend section 4 of the act entitled "An act to provide for an auxiliary reclamation project in connection with the Yuma project, Arizona."

ENROLLED BILL PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. LAZARO, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States for his approval, the following bill:

H. R. 195. Providing for the sale of the coal and asphalt deposits in the segregated mineral land in the Choctaw and Chickasaw Nations.

CIVIL-SERVICE EXAMINATIONS.

Mr. GODWIN of North Carolina. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. GODWIN of North Carolina. Mr. Speaker, I ask unanimous consent for the present consideration of Senate joint resolution 117, which I send to the Clerk's desk.

The SPEAKER. The Clerk will report it by title.

The Clerk read as follows:

S. J. Res. 117. Joint resolution amending the act of July 2, 1909, governing the holding of civil service examinations.

The SPEAKER. Is there objection?

Mr. GILLETT. Mr. Speaker, the title does not give any information as to what the resolution is.

The SPEAKER. The Clerk will read the resolution.

The Clerk read as follows:

Resolved, etc., That the act of July 2, 1909 (36 Stats. L., No. 1), is hereby amended so as to permit the United States Civil Service Commission, during the period of the war, to hold examinations of applicants for positions in the Government service in the District of Columbia, and to permit applicants from the several States and Territories of the United States to take said examinations in the said District of Columbia. Said examinations shall be permitted in addition to those required to be held by said act of July 2, 1909 (36 Stats. L., No. 1).

The committee amendments were read, as follows:

Page 1, line 6, insert after the word "the" and before the word "war" the word "present," and on page 1, line 10, after the word "Columbia," insert the words "and elsewhere in the United States where examinations are usually held," and at the end of the resolution insert the following proviso: "*Provided*, That nothing herein shall be so construed as to abridge the existing law of apportionment."

The SPEAKER. Is there objection?

Mr. LEVER. Mr. Speaker, reserving the right to object, I would like to ask the gentleman if this is an unanimous report.

Mr. GODWIN of North Carolina. Yes, sir; it is the unanimous report of the committee.

Mr. LEVER. Does the gentleman think this will take a great length of time?

Mr. GODWIN of North Carolina. No, sir; I do not think it will; it should not.

The SPEAKER. Is there objection?

Mr. STAFFORD. Mr. Speaker, reserving the right to object, the report is very illuminating. It gives no reasons whatever for the enactment of this legislation. It simply states that the committee make certain amendments to the resolution as it passed the Senate. Will the gentleman inform the House, which might have been done in the report, as to what is really accomplished by this resolution?

Mr. GODWIN of North Carolina. This is in response to a unanimous request from practically all the departments of the Government and the Civil Service Commission, and it does not do away with the law of apportionment, but simply for the period of the war permits examinations to be taken in the District of Columbia and elsewhere where civil-service examinations are usually held.

Mr. STAFFORD. Has not the Civil Service Commission that authority to-day?

Mr. GODWIN of North Carolina. Yes, sir; they have the authority and they are holding examinations throughout the United States every 10 days, but under some misunderstanding hundreds of people qualified to enter the service came to the District of Columbia, and they are to-day ready to serve the Government, but can not take the examination without being required to go back to their respective States, and it is considered by the department a hardship under present circumstances. This permits examinations to be taken here in the District of Columbia. That is all there is to it.

Mr. STAFFORD. Is not the gentleman in error when he says the present law forbids any person who is a resident of another State, and who is temporarily domiciled in the District, from taking an examination for the civil service here in the District?

Mr. GODWIN of North Carolina. I did not catch the question. What is the question?

Mr. STAFFORD. Is not the gentleman in error when he says that the present law forbids any person who is a resident of another State, and who is temporarily domiciled in the District, from taking an examination for the civil service here in the District?

Mr. GODWIN of North Carolina. No, sir.

Mr. STAFFORD. And is not the purpose of this resolution only to do away with the limitation that was passed some years ago as to apportionment?

Mr. GODWIN of North Carolina. No, sir; this resolution does not affect or abridge the law of apportionment.

Mr. CANDLER of Mississippi. If the gentleman will permit, I will give a concrete illustration of this.

Mr. GODWIN of North Carolina. I can give the information. The law of apportionment holds as under the present law, but under the present law any citizen abiding or domiciled here could not take examination in the District, but he is required to go back to his State and this resolution saves that extra time and expense. This is for the period of the present war.

Mr. KITCHIN. Do I understand also that the examinations will be held in the States?

Mr. GODWIN of North Carolina. They will be held in the States simultaneously.

Mr. KITCHIN. At the same time they are held in the District?

Mr. GODWIN of North Carolina. Yes; at the same time.

Mr. KITCHIN. The result is that a man who is here domiciled, say from Texas, will not be required, as he would be under the law, to go back to Texas to take this examination, nor if this passes will the man in Texas be required to come here. The Texas man who is domiciled here can take it here and also the man in Texas can take the examination there?

Mr. STAFFORD. I will say to the gentleman—and it was the basis of my question—that I know of instances where persons in departmental service here, whose homes are in Wisconsin, have taken examinations for positions in the classified service here in the District.

Mr. GODWIN of North Carolina. They took them contrary to the present law. If they were bona fide citizens of the State of Wisconsin, they should have gone back there, under the present law, to take the examination. But now if you have citizens of Wisconsin living here temporarily during the period of the present war, they may take the examination here but they will be charged to the State of Wisconsin, and the law of apportionment will not be abridged.

Mr. STAFFORD. That is the only purpose of this resolution.

The SPEAKER. Is there objection?

Mr. STAFFORD. Mr. Speaker, I withdraw my reservation.

Mr. McLAUGHLIN of Michigan. Is not this the situation, too? There are many men, a large number of them, in the classified service who come from several States of the Union and have lived here a long time, but still claiming residence in the State from which they came. They have families—young men and young women who have grown up—and it seems to be the desire of almost every one of them to get into the public service. In those cases, where the father continues to claim his residence in the State from which he came, his children are held to be residents of that State and must return to that State if they wish to take the civil-service examination.

Now, there are thousands of those, whole families, just falling over themselves trying to get into the public service, and this would remove the restriction. Thousands of them are waiting anxiously to get the opportunity to take this civil-service examination here, all cocked and primed and ready for it, and they will get into the public service if this restriction is removed.

The SPEAKER. Is there objection?

Mr. McLAUGHLIN of Michigan. I object.

"GARABED" PATENT—CONFERENCE REPORT (NO. 274).

Mr. CROSSER. Mr. Speaker, I wish to call up the conference report on House joint resolution 174.

The SPEAKER. The Clerk will report it.

The Clerk read the title of the resolution, as follows:

Joint resolution (H. J. Res. 174) for the purpose of promoting efficiency, for the utilization of the resources and industries of the United States, for lessening the expenses of the war, and restoring the loss caused by the war by providing for the employment of a discovery or invention called the "Garabed," claiming to make possible the utilization of free energy.

Mr. CROSSER. Mr. Speaker, I ask unanimous consent that the statement be read in lieu of the report.

The SPEAKER. The gentleman from Ohio asks unanimous consent that the statement be read in lieu of the report. Is there objection?

There was no objection.

The statement was read.

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to House joint resolution 174, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment numbered 5.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 3, 4, 6, and 7, and agree to the same.

CHARLES B. SMITH,
ROBERT CROSSER,
JOHN I. NOLAN,
Managers on the part of the House.

OLLIE M. JAMES,
T. P. GORE,
FRANK B. BRANDEGEE,
Managers on the part of the Senate.

STATEMENT.

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the resolution (H. J. Res. 174) for the purpose of promoting efficiency, for the utilization of the resources and industries of the United States, for lessening the expenses of the war, and restoring the loss caused by the war by providing for the employment of a discovery or invention called the "Garabed," claiming to make possible the utilization of free energy, submit the following written statement explaining the effect of the action agreed on:

The House receded from its disagreement to the Senate amendment No. 1, striking out "a" and inserting "his." This makes the resolution more definite as to the discovery or invention to which the proposed assignment relates.

The House receded from its disagreement to the Senate amendment No. 2, inserting the words "and that it can substantially effect the purposes set out in section 1 of this resolution."

This language simply makes more certain, if possible, that Mr. Giragossian will be required to substantially prove his claim. The House likewise receded from its disagreement to the Senate amendment No. 3. This amendment is exactly the same as No. 2, and was inserted in order to carry out the purpose of the amendment throughout the section.

The House receded from its disagreement to the Senate amendment No. 4. This simply inserts the words "first and" before the words "original discoverer." The object of the amendment can only be to emphasize the necessity of Mr. Giragossian's being found to be the original discoverer.

The House receded from its disagreement to the Senate amendment No. 6. It simply inserts the words "as aforesaid" for the purpose of referring more definitely to the preceding language.

The House also receded from its disagreement to the Senate amendment No. 7. This amendment inserts the words "and ownership." Since the preceding language provided for the "right and title" to the "exclusive use," the words "and ownership" simply carry out the apparent intention of the language of the resolution as it passed the House.

The amendment from which the Senate receded is No. 5. The language of this amendment is as follows: "And if the Secretary of the Interior accepts the assignment of the use of said invention as provided in the first section hereof."

The House believes that this amendment would create an inconsistency in the resolution. The resolution, and particularly section 3 thereof, provided for the demonstration of said discovery or invention to a commission of five eminent scientists, who must be approved by the Secretary of the Interior. These scientists are required to certify that the discovery or invention is practicable, that it can substantially effect the purposes set out in section 1, and that Mr. Giragossian is the first and original discoverer. Then, and only then, does Mr. Giragossian receive protection against infringers. If, however, in addition to the finding and certification of the commission of eminent scientists in regard to the originality and practicability of the discovery or invention, it were made a condition precedent to Mr. Giragossian's receiving protection that the Secretary of the Interior should accept an assignment of said discovery or invention for the Government's own use free of charge, then the finding of the commission of eminent scientists, if favorable to Mr. Giragossian, would not make certain the protection he seeks.

CHARLES B. SMITH.
ROBERT CROSSER.
JOHN I. NOLAN.

Mr. CROSSER. Mr. Speaker, the resolution, as it has been changed by the agreement between the conferees of the two Houses, is in practically the same form as when it passed the House. These six amendments which have been added by the Senate and to which the House has agreed really do not change the meaning at all, and inasmuch as they make no substantial change we saw no reason for disputing about them indefinitely.

The Senate did, however, incorporate an amendment, No. 5, which, while it may seem unobjectionable, would nevertheless create an inconsistency in the resolution itself if it were permitted to remain.

The House will remember that the chief purpose of the resolution as the House passed it was the creation of a commission composed of scientists satisfactory to the Secretary of the Interior and Mr. Giragossian, and these scientists were to determine the validity of Mr. Giragossian's claim. If it should be found by them that his discovery or invention is practical and can substantially accomplish the purpose recited in the preamble, and if he should be found to be the original inventor thereof, then their certificate to that effect would give Mr. Giragossian the protection that he desires. But the Senate, apparently unmindful of the provision in regard to the certificate of the commission of scientists, incorporated in the resolution this language:

And if the Secretary of the Interior accepts the assignment of the use of said invention as provided in section 1 of this resolution.

Then Mr. Giragossian is to receive protection. That would nullify the effect of the finding of the commission of scientists and create an inconsistency in the resolution itself. The Senate, therefore, properly receded from its amendment in order to make the resolution accomplish its original purpose.

Mr. TOWNER. Mr. Speaker, will the gentleman yield?

Mr. CROSSER. Yes.

Mr. TOWNER. I am told that Mr. Giragossian has made application and received a patent.

Mr. CROSSER. No; he has not.

Mr. TOWNER. That statement is not true?

Mr. CROSSER. It is not true.

Mr. NORTON. Mr. Speaker, will the gentleman yield?

Mr. CROSSER. Yes.

Mr. NORTON. The Senate amendment No. 2 reads as follows:

And that it can substantially effect the purposes set out in section 1 of the resolution.

Mr. CROSSER. Yes.

Mr. NORTON. Now, what are "the purposes set out in section 1"?

Mr. CROSSER. For my own part I think it is absolutely useless language. It was provided originally in the resolution that he should make a demonstration, and if it should be proven that the discovery or invention is practicable and that he is the original discoverer or inventor, then Mr. Giragossian would receive the desired protection.

Mr. NORTON. As a matter of fact, is not that wording of that amendment nonsensical?

Mr. CROSSER. It does no harm, and we did not like to quarrel with the Senate about it. It simply emphasizes the meaning of the resolution, and to that I do not object.

Mr. NORTON. It is not set out in the resolution.

Mr. CROSSER. It is in the preamble.

Mr. NORTON. The preamble is not of itself a part of the resolution.

Mr. DICKINSON. Mr. Speaker, may I ask the gentleman a question?

Mr. CROSSER. Yes.

Mr. DICKINSON. In the original resolution when first presented was an appropriation asked for?

Mr. CROSSER. No; not a cent, and not a cent is asked now.

Mr. DICKINSON. When this resolution was first before the House, did it not contain an appropriation?

Mr. CROSSER. No; never a cent has been asked in the resolution. There has never been any appropriation asked.

Mr. STAFFORD. Mr. Speaker, will the gentleman yield me some time?

Mr. CROSSER. How much time does the gentleman desire? This is a matter which has been debated two or three times before the House. I want to be courteous and fair to the gentleman, but I do not think the House wants to hear a repetition of our views on this matter, important as are the views of the eminent scientist from Wisconsin and delightful as it might be to listen to him. But what can it add? I will give the gentleman five minutes.

Mr. STAFFORD. I should like to have 10 minutes.

Mr. CROSSER. I yield 10 minutes to the gentleman.

Mr. STAFFORD. Mr. Speaker, when this resolution passed the House it was expected by its opponents, especially in view of the fact that it had been virtually vetoed by the President of the United States, that before it was returned to this body it would be in a better form in protecting the interests of the Government than in the form it was passed in the last session of Congress, when it was pocket vetoed by the President. I will not say that the other body did not attempt to improve this bill. A study of the record shows that perhaps that was their intention; but, whatever their purposes may have been, the amendment of the Senate to which attention has been called by the gentleman from North Dakota [Mr. NORTON] accomplishes no purpose. It says:

And that it can substantially effect the purposes set out in section 1 of this resolution.

There are no purposes set out in section 1. Now, if it were the purpose of the other body to have this patent granted by congressional action only in case this discovery would substantially accomplish the purposes set out in the title, which is not a part of section 1, then I take it that the conferees should have attempted at least to modify the language so as really to strengthen the resolution rather than to leave it in the air, without any protection whatsoever to the Government. I heartily agree with the gentleman having the bill in charge [Mr. CROSSER] that the bill in its present form, even though there is some change in phraseology, is practically the same as it left the House; but I am also certain that the bill in no wise protects the interests of the Government any more than the bill that was originally sent to the President in the closing days of the last session. In view of this precedent that we are establishing, and not safeguarding the interests of the Government, I have good reason to believe that the President of the United States will return this bill with a veto, so that more than one-third of the membership of this House may register disapproval of it in its present form.

The only change which strengthens this bill over that which passed the House in the prior session is that it must be satisfactorily shown to this committee of experts that Mr. Giragossian is the original, the first discoverer of this invention. There is this other change which weakens the protection of the Government, and that is that if the Government of the United States wishes to purchase this patent it must exercise that privilege while the Congress is in session, and at a price to be determined, not by a committee of six, of whom three shall be appointed by the Secretary of the Interior and three appointed by the claimant, as originally provided, but that the award of that committee must meet the approval of this inventor; and if the award does not meet the approval of this inventor he can hold up the patent and not permit it to be purchased by the Government of the United States for the benefit of all the people of the country.

I rise at this time merely to call attention to the fact that this bill substantially is in no wise different from the bill that was vetoed by the President of the United States except in one particular, that this committee of scientists must determine that Mr. Giragossian is the first and original inventor. Other than that the protection to the Government provided in the original bill is weakened. I hope the conference report will be rejected, and if not, that the President will do as he did before, that he will veto this resolution and send his reasons to the Congress, so that we may know what the real reasons of the President were in refusing to affix his signature to the resolution presented to him two days before the adjournment of the last session of Congress.

Mr. WALSH. Will the gentleman yield?

Mr. STAFFORD. I yield to the gentleman from Massachusetts.

Mr. WALSH. The gentleman from Ohio [Mr. CROSSER] in reply to the question of the gentleman from North Dakota [Mr. NORTON] stated that amendments No. 2 and No. 3 referred to something set out in the preamble. I want to inquire of the gentleman where the preamble is.

Mr. STAFFORD. There is no preamble. Not only that, but the title, which does set out some purposes, is not a part of section 1. The title, it is true, does set forth some purposes, and if these amendments inserted by the Senate and agreed to by the conferees had referred to the title, they might have some meaning and effect; but when we read section 1 we find there is nothing in it that refers to the attainment of the purposes of this invention. The title says it is—

For the purpose of promoting efficiency, for the utilization of the resources and industries of the United States, for lessening the expenses of the war, and restoring the loss caused by the war by providing for the employment of a discovery or invention called the "Garabed," claiming to make possible the utilization of free energy.

But that is not section 1. Section 1, after the enacting clause, says:

That the Secretary of the Interior is hereby authorized to accept, as trustee for the United States Government, from Garabed T. K. Giragossian an assignment of the right to utilize for the Government's own use his discovery or invention, to be known as the "Garabed." Said assignment to and utilization of said discovery or invention by the United States Government shall be free of charge or expense.

Not a word that can in anywise be construed as setting forth the purposes of this resolution. Why, it is ridiculous. This whole resolution seems to have been framed at the dictation of the inventor.

Mr. NORTON. Will the gentleman yield?

Mr. STAFFORD. I yield to the gentleman from North Dakota.

Mr. NORTON. I want to get a couple of minutes in my own time.

Mr. STAFFORD. Then I yield to the gentleman from Illinois [Mr. KING].

Mr. KING. Has the gentleman any inside information or otherwise as to whether this free energy is going to be untaxed?

Mr. STAFFORD. I have this information, that only a few days ago, before the Committee on Appropriations, I inquired of a distinguished scientist, Dr. Stratton, head of the Bureau of Standards, and he called my attention to the fake Keeley motor and told how the head of the physical science department of Johns Hopkins University ridiculed that invention, and asked, upon a demonstration by the inventor, whether he could cut the wire which carried the electricity that started the motor; and when Dr. Rowan was refused that privilege of course the Keeley motor went up in the air; and after hearing the statement of Dr. Stratton before our committee my opinion is that this is nothing more than a fake to exploit the public to the extent of millions and perhaps hundreds of millions of dollars.

Mr. WALSH. Since there is no purpose set out in section 1 of this resolution, and the second amendment says that it shall substantially effect the purposes set out in section 1, that means that even though it accomplishes no purpose, even if he demonstrates that it accomplishes nothing, the Government can take it over.

Mr. STAFFORD. He gets his patent if it accomplishes nothing. That is the effect of it.

Mr. MOORE of Pennsylvania. Does not the gentleman understand that the purpose of this is to bring the war to a speedy conclusion, and that as soon as the bill is passed the war will close?

Mr. STAFFORD. That is the claim of the promoter, but I have heard such claims not only in war times but in peace times; and, being of a skeptical mind, I have not given serious consideration to them.

Mr. MOORE of Pennsylvania. Will the gentleman kindly make a note of the date that this bill passes? And one month thereafter the war will close.

Mr. STAFFORD. It has to have the approval of the President, and I have every expectation that he will veto it again, especially as it is in the same form as when it was presented to him, without any safeguards to the public or the Government.

Mr. CROSSER. Mr. Speaker, I yield five minutes to the gentleman from Alabama [Mr. HEFLIN].

Mr. HEFLIN. Mr. Speaker and gentlemen of the House, I do not agree with the gentleman from Wisconsin [Mr. STAFFORD] that this conference report should be defeated. I can not understand to save my life why any Member of this body will now seek to postpone favorable action upon a measure like this. The inventor of this wonderful machine is an Armenian, now an American citizen. His people have long

been persecuted by the Turks, and he believes that he has an invention that will help us to speedily win the war against the Turks and their brutal allies, and, gentlemen, I believe that he has exactly what he claims to have. He wants protection in this matter from the Government, and he is entitled to it. The gentleman from Wisconsin [Mr. STAFFORD] says it is a fake proposition. How does he know? Some people once said that the operation of the telephone was a fake and that the electric telegraph was a fake, that the flying of aeroplanes heavier than air was a fake. All these things have proven to be realities and wonderful agencies of man. Here is a machine, it is said, that will fly an aeroplane indefinitely, and that is what we want above the trenches of the German Army. [Applause.]

The American people are growing impatient with gentlemen who want to halt legislative action looking to the inauguration of machinery that will conquer the German Army. The Government wants to hurry the war through, and this man's proposition will speed it to a victorious end. As amended it will meet the approval of the President.

Why, gentlemen, you remember our experience with the Lewis machine gun. I understand that it was submitted to our Government, but it was not accepted, and the inventor sold it to England. This man will go to some other country with his invention if it is not accepted here. Will gentlemen force him to do that and take the responsibility of losing to our country the possibilities of this very remarkable invention? Let us adopt the conference report and give to our Government the use and benefit of this invention. [Applause.]

Mr. CROSSER. Mr. Speaker, I yield three minutes to the gentleman from Wisconsin [Mr. LENROOT].

Mr. LENROOT. Mr. Speaker, I rise to defend the President of the United States from the unwarranted attack which has been made on him by the gentleman from Alabama. He says he can not understand how anyone can postpone for a single minute this great discovery, and yet the President of the United States, by a pocket veto of this bill, postponed it for several months. If the President of the United States can postpone the operation of this great invention for months this House can postpone it for two or three days in order to get the bill in such shape that it will not make Congress ridiculous. That is exactly what it does in accepting the amendment—"and that it can substantially effect the purposes set out in section 1 of this resolution." There is not a line or a word in section 1 that discloses any purpose of any kind. The conference committee has seen fit to accept this absurdity, and they have rejected one amendment made by the Senate that certainly should be incorporated in the bill, namely, "and if the Secretary of the Interior accepts the assignment of said invention as provided in the first section hereof."

Have you not confidence enough in the Secretary of the Interior to believe that if here is a practical discovery—something that will be of benefit to the Government or the people—that he will accept the assignment, and if he refuses to accept it that there will be good ground for such refusal. If he refuses, then should Congress give this man this exclusive right? I say, no, Mr. Speaker, this conference report should be rejected. It will only mean deferring it for two or three days so that the bill can be put in proper shape where we all can vote for it.

Mr. CROSSER. Mr. Speaker, I yield five minutes to the gentleman from Virginia [Mr. SAUNDERS].

Mr. SAUNDERS of Virginia. Mr. Speaker: The gentleman from Wisconsin [Mr. LENROOT] throws a bouquet to Secretary Lane. I wish to call the attention of the House to the fact that the only two amendments that were suggested by Secretary of the Interior Lane, were accepted by the committee and written into this bill by the action of this body. When that was done, the resolution was put into the form which the Secretary of the Interior had stated would be acceptable to him. It is well to have in mind this fact in view of the strictures that have been passed upon this measure.

The gentleman from Wisconsin [Mr. STAFFORD], who has been associated with a good deal of the opposition to this resolution, has illustrated again to-day, as he has done heretofore, that he will not read the resolution. How does the gentleman propose to discuss intelligently a resolution or its effect, if he will not acquaint himself with its contents and purposes? [Applause.]

The gentleman from Wisconsin [Mr. STAFFORD] stated that one-third of this House heretofore registered its opposition to the resolution in the form in which it passed this body. That is only one of the numerous mistakes made by the gentleman from Wisconsin. So far from one-third of the House having registered its opposition to this resolution I call the attention of Members to the fact that when this body passed this resolution, the gentleman demanded a roll call, and precisely 14 of his colleagues registered themselves in the negative. A few days ago when we passed this resolution for the second time, after the amendments were inserted that were suggested by the Secretary of the Interior, the gentleman did not dare to call for the yeas and nays, so decided was the sentiment of the House in favor of the passage of the resolution. [Applause.]

What the gentleman had in mind was the vote on ordering the previous question, and not the vote on the passage of the resolution. The friends of the measure would have welcomed a call for a record vote, but the gentleman was too prudent to ask for that action, having in mind the vote of the last session.

I desire to repeat the statement heretofore made, that if there is anything of value in this alleged discovery the United States Government is given full opportunity to purchase the same and put it on the market for general use. If the committee of scientists provided for in this bill, should report that this discovery is all the inventor claims it to be, everyone will agree that the Government should take advantage of its option of purchase. The resolution provides that the Government of the United States may acquire this discovery upon the terms which it affords. Should this committee of scientists report that this alleged discovery is a fake, a Keeley fake, if you choose, then the United States will not be in any wise bound to take over the invention, or remunerate the inventor. We simply will not buy it, that will be all. The gentleman from Wisconsin [Mr. STAFFORD] referred to his conversation with some scientists who bracketed Mr. Giragossian with Mr. Keeley, of Keeley motor fame. Did that distinguished scientist in the course of a conversation intended to deride this inventor, refer in any wise to the Langley aerodrome, the prototype of the aeroplane of to-day, and the recipient of much scientific derision in its time?

Mr. STAFFORD. Mr. Speaker, will the gentleman yield?

Mr. SAUNDERS of Virginia. Yes.

Mr. STAFFORD. He did say specifically that he had no faith whatsoever in this Giragossian device.

Mr. SAUNDERS of Virginia. I ask the gentleman whether that scientist referred to the Langley aerodrome, the forerunner of the modern successful flying machine? Prof. Langley died almost of a broken heart in consequence of the ridicule heaped on him by the writers and scientists of his day, who undertook to demonstrate with the precision of a mathematical demonstration that aerial flight by a machine heavier than the air was physically impossible. To-day thousands of these machines are flying in every quarter of the world.

Mr. STAFFORD. The head of the Bureau of Standards, Dr. Stratton, was asked as to what his view was as to this invention and he said he had no faith whatsoever in it, and that it was allied to the Keeley fake motor.

Mr. SAUNDERS of Virginia. Yes, the gentleman has put that statement into the RECORD three times, but I am trying to test out the value of criticism of this character, recalling the numerous mistakes that these scientific gentlemen have made in the past. I ask the gentleman again, whether Dr Stratton said anything about the fake Langley aerodrome, for that in its day, particularly after it fell in the river, was regarded as a sort of scientific monstrosity.

Mr. STAFFORD. No; we were not talking about that.

Mr. SAUNDERS of Virginia. There are many other scientific discoveries which in their struggling infancy, were the subject of much scientific ridicule, but which in the result made good.

Mr. STAFFORD. He was confining his attention to this matter, which it is claimed develops energy without any outside power.

The SPEAKER. The time of the gentleman from Virginia has expired.

Mr. SAUNDERS of Virginia. I ask the gentleman from Ohio to yield me one minute more.

Mr. CROSSER. I yield the gentleman one minute.

Mr. SAUNDERS of Virginia. Of course the distinguished gentleman referred to by the gentleman from Wisconsin, was trying to ridicule this invention out of court, so to say. He did not take up the general subject of scientific mistakes. Harvey's claims with respect to the circulation of the blood, were vehemently derided when first mentioned.

Mr. MILLER of Minnesota. Mr. Speaker, will the gentleman yield?

Mr. SAUNDERS of Virginia. Yes.

Mr. MILLER of Minnesota. I notice that this continually refers to the purposes set out in section 1 of the resolution. I have read section 1 and I do not find that it sets out any purpose.

Mr. SAUNDERS of Virginia. Oh, that point has been discussed heretofore.

Mr. MILLER of Minnesota. I am making my inquiry in good faith. I would like to have the gentleman's view on that.

Mr. SAUNDERS of Virginia. I can not discuss in half a minute a proposition that has already been debated. My time is too short for that. These gentlemen seem disposed to heap abundant ridicule upon an amendment which was added in the Senate. Would they have us believe that the great body at the other end of the Capitol would propose an utterly ridiculous and absurd amendment? Why, I reject the suggestion! It is lese majesty.

Mr. CROSSER. Mr. Speaker, I yield four minutes to the gentleman from Texas [Mr. SLAYDEN].

Mr. SLAYDEN. Mr. Speaker, I frankly confess that I do not know a blessed thing about Garabed, but that apparently does not disqualify one from discussing it. I hope, at least, I would like to hope, that such an invention is possible, because I have firm faith that whatever enables us to send these scores of thousands of aeroplanes that my eloquent friend HEFLIN tells us about over the German trenches will be of value and hasten the settlement of the war. I sincerely trust that it will all fall out as he predicts. I may have doubts, but I shall smother those doubts for the time being.

Mr. Speaker, this thing, I understand, exists in the air, but I want to get down to the earth for a moment or two and say something with reference to the military camps in Texas, where we are training young men for service in the air over those same German trenches that have been referred to. In view of some things that have recently been said about conditions in certain camps in Texas, I take this occasion to read to the House, with a view of putting it into the RECORD, a letter which I think is an adequate defense of those camps against some of the slanders that have been heaped upon them. This is a letter from a reputable merchant in my State and district. He writes:

LAMPASAS, TEX., *January 26, 1918.*

Hon. JAMES L. SLAYDEN,
Washington, D. C.

MY DEAR SIR: I notice in the Houston Chronicle an address to Congress by Senator CHAMBERLAIN, wherein he is reporting a deplorable condition in the various Army camps.

This letter is prompted in part to do the officers in charge a justice and prompted still more by a desire to reach the parents of the young men now in the training camp. There is no doubt in my mind but what the conditions have been materially improved over what they were.

It just happened so that my son Albert, who has just been appointed to a position at the officers' training camp, Camp Bowie, wrote me the letter which I herewith inclose you. This young man has never had any hardships in his life. On the other hand, he has not been pampered, and I will quote you his exact words, which are as follows:

"I like the camp fine. We work from 5.45 a. m. until 10 p. m. Every minute is taken. I never worked so hard in my life, but it is fine. It is as cold as can be, but we are so busy we can't get cold, and we have good, warm clothes. I sleep on a cot on a sack full of straw, then I have two pair of Army blankets and five big Army comforts. I also have a raincoat, an overcoat, two suits of woolen O. D.'s and all the underclothes and socks I need. We also have all the grub we need; not fancy, but substantial. It sticks to the ribs. We have Army grits, bacon, light bread, beans, beans, and beans. When I get out of here I am going to be strong enough to go lion hunting with my fist. I like it fine."

I feel sure no special favors have been shown my son, and I want the parents of all these young men to feel as I do, that their sons are not in training for a picnic, but for the most serious duty that has ever confronted our people as a Nation, and that their boys are receiving the exact consideration, training, and treatment as accorded my son.

Most respectfully,

D. CULVER, Jr.

I hope the sarcastic reference in the boy's letter to his father to the diet of Boston will not cause any hostility in the breast of any of the gentlemen from that celebrated city.

Mr. GILLETT. Is the boy who writes the letter an officer?

Mr. SLAYDEN. No; he is not.

The SPEAKER. The time of the gentleman from Texas has expired.

Mr. CROSSER. Mr. Speaker, I yield two minutes to the gentleman from North Dakota [Mr. NORTON].

Mr. NORTON. Mr. Speaker, the fact that the gentleman who proposes this invention is an Armenian or Italian or belongs to any other race does not excuse the House of Representatives from passing legislation, a part of which must appear ridiculous and without meaning to any intelligent person who may read it carefully in an effort to understand it. When the resolution was before the House I proposed that an amendment be added after the word "invention," in line 7, section 1, that amendment to read:

To make possible the storage and utilization of free energy.

That describes, as nearly as I have been able to ascertain, what this invention is claimed to be. Nowhere in the resolution, excepting in the title, is it stated what the invention is or what its purpose is.

The amendment No. 2, proposed by the Senate and agreed to by the conferees, composed of Members of the House and Senate, reads:

And tha it can substantially effect the purposes set out in section 1 of this resolution.

As no purpose of the invention is set out in section 1, this amendment absolutely means nothing and is, as a matter of fact, nonsensical. It is a kind and character of legislation which this Congress should not disgrace the statutes with. We are under no obligation to enact a resolution of this kind in a few minutes which will go out to the world and remain upon the statute books for all time where part of the wording is absolutely without meaning. I hope that this invention, which the inventor, Mr. Giragossian, has told me personally is a new kind of an engine for concentrating and storing a cosmic energy which has not been harnessed up for use by anyone up to the present time, and for using this energy as a motive power in much the same way that steam and electricity are used, will be a success. I have talked to the gentleman, and I may say I have a great deal of faith in his claims of a new discovery in science, and of an invention of wonderful value and importance to mankind. While I fully favor the passage of this bill, I contend, as one who has a decent respect for the intelligence and carefulness of this great legislative body, that the bill when it is passed and enacted into law should be in such form and wording that when it is carefully read by even the ordinary layman it will not bring ridicule upon Congress.

The SPEAKER. The time of the gentleman has expired.

Mr. CROSSER. Mr. Speaker, I yield three minutes to the gentleman from California [Mr. CHURCH], and after Mr. CHURCH has finished I am going to move the previous question.

Mr. MOORE of Pennsylvania. Mr. Speaker, before the gentleman from California starts I want to ask the gentleman from Ohio, the last speech having been in his favor, whether he intends to close all discussion?

The SPEAKER. The gentleman has just announced that when the gentleman from California concludes he is going to move the previous question.

Mr. CHURCH. Mr. Speaker and gentlemen, I have been keenly interested in the claims made for Mr. Giragossian's free-energy generator, and I therefore introduced House joint resolution 116, which was passed by the Congress at the last session. I also introduced the present resolution 174.

In doing so, I was profoundly convinced that I was performing a most valuable service to my country and mankind as well, if one fraction of Mr. Giragossian's claims should be practical. I do not know anything about his discovery, but I believe he will verify all that he claims.

During the recent consideration by the Congress of resolution 116 the gentleman from Ohio questioned the gentleman from Wisconsin in the following words, as we read in the CONGRESSIONAL RECORD:

If this man has an invention for the free and unlimited coinage of energy, does not the gentleman believe we would be justified in passing this bill?

The gentleman from Wisconsin answered in the negative.

Such a negative attitude plainly indicates that there is a certain class of people who will, under any circumstances, oppose the passage of this resolution. They will try in some way to mutilate the resolution so that it may not be acceptable to one of the two parties, namely, the Government and the inventor. They know plainly that this resolution is a contract, and is and should be drawn by mutual agreement between the two parties and that any omission from or addition to the resolution will nullify it. That is their aim—that is to say, to deprive our Government and people of the benefit of this great discovery. If we should all be of the same mind as the opponents of this resolution, the possible loss to our country would be beyond conception.

This man offers the Government the free use of his work, which will mean a saving to it of hundreds of millions of dollars yearly. Furthermore, the Government will most probably buy the exclusive right to the invention, and we can then sell the right of utilization to foreign countries and thereby get more than we would pay him and thus be able to give the free use of the discovery to our people.

Or the Government could raise an ample revenue through a system of royalties—a revenue which would be calculated by hundreds of millions of dollars yearly. For example, there are probably 7,000,000 farmers in this country who, on an average, would each utilize 150 horsepower for various purposes. The total would amount to upward of 1,000,000,000 horsepower, resulting in such incalculable benefit to every branch of farming industry in our country that such energy would be used

lavishly. Ten million horses of the 20,000,000 in this country may be rendered useless on account of the Garabed. Then we will have, for other uses, 50,000,000 acres of tilled land, as it is necessary to cultivate about five acres in order to feed one horse.

It will be unnecessary and tedious to go into details of all the benefits that free energy can bring. A very slight consideration of its possibilities will stagger the imagination of the most powerful mind.

Is there any sensible and righteous reason to disregard and not to give due consideration to such a work? What is this man asking in return for his magnificent offer? He is asking, as his compensation, protection for his rights only—simply a patent that shall be in conformity with the spirit and letter of our Constitution. I do believe he has just cause to ask it.

In the case of our refusal, with the resultant loss of this great discovery, what are the opponents of the resolution going to give instead to our country and mankind? Nothing.

In my opinion we should give the greatest incentive and encouragement to our inventive geniuses. They should know that we will afford every possible consideration and protection to any great epoch-making invention or discovery.

It is regrettable that, whether we like it or not, we are in the war. I am positively convinced we will be victorious, but it is our duty to make this ruinous and bloody conflict as short as possible. We should utilize every available instrument or invention that American toil or ingenuity can produce so as to lessen the horror of this war. If the Garabed can shorten this great struggle only one day, it is worth while to give every possible consideration to the matter, and pass this resolution, and pass it by unanimous vote. There are various and strong reasons for believing that this invention will play, in an unbelievably brief time, the greatest rôle in shortening this war.

Mr. Speaker, this inventor claims to have discovered the key that unlocks an unlimited ocean of energy. He says there is energy enough there to propel all of the flying machines in existence; enough to drive all the men-of-war, merchant ships, and other ocean crafts; enough to run all railroad trains, combined harvesters, traction engines, and thrashing machines; enough to draw every harrow, cultivator, and plow; enough energy to run all nitrate plants and cause them to toil ceaselessly at the will of man; enough to run all pumping plants and to draw, from unknown depths, water enough to irrigate every acre of land on earth; enough energy to make the deserts blossom as the rose, and to pump inland lakes on bad and barren lands; enough to turn all of the wheels of industry of the world; enough to lift every hammer and turn every drill; enough to run every sewing machine, washing machine, and churn; and enough to supply a little power plant in every home.

One of the strange things about these monstrous claims is, the inventor has the power to convince nearly everyone with whom he comes in contact that there is about a 50 per cent chance that he has exactly what he pretends to have. It is true there are some self-centered men who reject every new claim, however promising, unless it comes through themselves or some other favored source.

Naturally a person making such far-reaching assertions as does the party in this case, must undergo a test as to his intelligence and sincerity. Mr. Giragossian has made my office his headquarters for the last four or five months and I have had many opportunities to observe him. He is a man of rare intelligence and great sincerity of purpose. He is a deep thinker and one of the most remarkable philosophers I have ever met, and I say to you frankly, he has convinced me almost beyond the question of a doubt that he has exactly what he claims. In making this statement I am remindful of the fact that if he is correct he will become the great benefactor of the human race.

I submit to you, gentlemen, that his requests, as set forth in this resolution, are reasonable; that if he is mistaken in his claims the Government loses nothing, but if he is correct his invention will bring us untold wealth. He is not asking for an appropriation with which to develop some untried feature of his claims; he has worked it all out through years of toil by the use of his own money, time, energy, and skill. He simply asks for protection, provided he makes good, and requests that five eminent scientists be chosen who shall be approved by the Secretary of the Interior; that he shall be commissioned to make know to them his secret; to show them the working-sized engine which he has made and now has in his possession; that when this is done, if they say, "Giragossian, you have proven your claims," then the Government will protect him for the period of 17 years against patent sharks and infringers. In turn for this protection he is to give to the Government the use of his invention free of charge, to be used as the Government sees fit on all its flying ships, ocean ships, and wherever it is desirable to use it, either on land or sea. If he has what he claims, the Government will save each year hundreds of millions of dollars in the price of gasoline, coal, and other fuel. If he does not make good, the Government does not lose a cent as it assumes no financial obligation in reference to the proposition.

If this man has not what he claims, will any man here tell me why he is here in Washington spending his time, energy, and money? Does he want this resolution to pass and this committee appointed simply to provide him an opportunity to make a failure and thus disgrace himself in the eyes of his fellowmen?

Gentlemen, I submit that if this man has what he claims we need its benefits now more than any other moment in all the history of the world because it will, in a very marked degree, assist us in ending this heartless war. We need this engine on a thousand ships that we are now constructing; we need it on our almost countless airships that are now being made. If this invention is what it is claimed to be, from the green hills of Virginia fleets and flocks of flying machines can arise, defy, and cross the ocean and hover indefinitely above the intrenched enemy and rain explosives upon them until, in despair and fright, they stack their guns and quit.

Gentlemen, I submit on the part of wisdom it is well for us to give this man an opportunity to make his demonstration at the earliest possible moment for if he fails we lose nothing, but if he makes good his discovery means an epoch in the human race so far-reaching that no one can foretell its good result. It will shorten the hours of toil for every laboring man, it will increase the pleasures of life tenfold, it will make the deserts of this old world blossom as the rose, and as the first great unspeakable blessing it will end this heartless, cruel war.

The SPEAKER. The gentleman from Ohio moves the previous question.

Mr. MOORE of Pennsylvania. I make the point of order that there is no quorum present.

Mr. MILLER of Minnesota. Mr. Speaker, there is no quorum present.

Mr. MOORE of Pennsylvania. The gentleman can not browbeat the House that way——

The SPEAKER. It is not debatable. The gentleman from Pennsylvania makes the point of order there is no quorum present. He has a perfect right to make it, and the gentleman had a perfect right to move the previous question. The Chair will count. [After counting.] A hundred and forty-one gentlemen are present, not a quorum.

Mr. CRISP. Mr. Speaker, I move a call of the House.

Mr. CAMPBELL of Kansas. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman from Kansas rise?

Mr. CAMPBELL of Kansas. To make a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. CAMPBELL of Kansas. Is not there an automatic call of the House? Is not the question on the previous question?

The SPEAKER. There is no automatic call about it.

Mr. CAMPBELL of Kansas. Was not the question stated?

The SPEAKER. The gentleman raised the point of order that there was no quorum present before the Chair even asked anybody to vote. The gentleman from Georgia [Mr. CRISP] moves a call of the House.

The question was taken, and the Speaker announced the noes seemed to have it.

On a division (demanded by Mr. CRISP) there were—ayes 97, noes 2.

So the motion was agreed to.

The SPEAKER. The Doorkeeper will lock the door, the Sergeant at Arms will notify absentees, and the Clerk will call the roll.

The roll was called, and the following Members failed to answer to their names:

Anthony	Davis	Greene, Vt.	McKeown
Bowers	Dent	Hamill	McLaughlin, Pa.
Brodbeck	Dooling	Hamilton, N. Y.	McLemore
Brumbaugh	Doremus	Haskell	Maher
Caldwell	Drukker	Heintz	Mann
Campbell, Pa.	Eagle	Helvering	Martin
Cannon	Elston	Hollingsworth	Meeker
Capstick	Estopinal	Hull, Iowa	Moores, Ind.
Caraway	Fairchild, B. L.	Husted	Morin
Carew	Fairchild, G. W.	Johnson, S. D.	Mott
Chandler, N. Y.	Ferris	Kahn	Nelson
Clark, Fla.	Flynn	LaGuardia	Nicholls, S. C.
Clark, Pa.	Focht	Lobeck	O'Shaunessy
Costello	Frear	Lonergan	Parker, N. J.
Cramton	Goodwin, Ariz.	McClintic	Parker, N. Y.
Curry, Cal.	Gordon	McCulloch	Peters
Davidson	Graham, Pa.	McKenzie	Rayburn

Rowland	Sterling, Pa.	Tillman	Wilson, La.
Sabath	Sullivan	Treadway	Wingo
Scott, Pa.	Swift	Van Dyke	Winslow
Scully	Talbott	Vare	Wise
Sherley	Taylor, Colo.	Ward	
Smith, T. F.	Templeton	Watson, Va.	

The SPEAKER. A quorum is present.

Mr. CRISP. Mr. Speaker, I move to suspend with further proceedings under the call.

The motion was agreed to.

The SPEAKER. The Doorkeeper will open the doors. The question is on agreeing to the previous question.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the conference report.

The conference report was agreed to.

On motion of Mr. CROSSER, a motion to reconsider the vote by which the conference report was agreed to was laid on the table.

LEAVE OF ABSENCE.

Mr. MCLEMORE, by unanimous consent, was granted leave of absence for three days, on account of illness in his family.

AGRICULTURE.

Mr. LEE of Georgia. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 9054.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 9054, the Agricultural appropriation bill.

The CHAIRMAN. The House is in the Committee of the Whole House on the state of the Union for the further consideration of the bill, of which the Clerk will report the title.

The Clerk read as follows:

A bill (H. R. 9054) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1919.

The Clerk read as follows:

General expenses, States Relations Service: To carry into effect the provisions of an act approved March 2, 1887, entitled "An act to establish agricultural experiment stations in connection with the colleges established in the several States under the provisions of an act approved July 2, 1862, and of the acts supplementary thereto," the sums apportioned to the several States and Territories, to be paid quarterly in advance, $720,000.

Mr. CAMPBELL of Kansas. Mr. Chairman, I move to strike out the last word.

My purpose in taking the floor at this time is to call the attention of the House to the serious condition that confronts the farmers of the country with respect to farm labor. Much is said by the Food Administrator and in the press throughout the country about the necessity for conserving food and economizing in its use. Conservation of food products and economy in the household will serve a great purpose, but the essential thing, a matter of the very greatest importance to the people of this country and to our allies, is the production of food in America in the coming year. This can not be done without farm labor. How is it to be secured? Service with the colors is taking men from the farms in every school district throughout the farming sections of the United States. Men who can not be spared from the farms are taken where they are essential with the colors. Something must be done to supply this labor, and I wish to call the attention of the chairman of the committee to the matter. How can it be done? We are appropriating in this bill something like $27,000,000. Properly utilized it would serve a good purpose, but it will not produce a crop in 1918 that will be available in a year from now to feed America and to aid in feeding our allies in Europe.

This is a serious thing to the farmers of the country, and even more serious to the people of the country who are not farmers, but must have food. I think we should make provision in this bill for labor to replace the farm labor that has been taken into the war from the farms. I make this suggestion: There are boys ranging from 15 to 21 years of age in every city and town in the country who are attending school. They ought to go to school, of course, but I believe that in this coming vacation these boys could acquire a knowledge and experience on farms as farm laborers that would be of value to them throughout their lives, and by enlisting for farm labor or taking employment upon the farms of the country and aiding in the production of crops they would render a great service at this time. They would be especially valuable in producing corn, in harvesting wheat and oats, in planting and taking care of and digging potatoes and all root crops. They would be especially valuable in producing sugar beets in the sugar-beet sections of the country. And without their labor, without some such labor as that, there will be a shortage of every crop that is essential and for which we have so much need. What we need above everything is production sufficient for all our needs. The farmers will have enough to eat, and have less cause for worry about the shortage of farm labor than those who do not live upon the farms.

Mr. BORLAND. Mr. Chairman, will the gentleman yield?

Mr. CAMPBELL of Kansas. Yes.

Mr. BORLAND. I am in thorough sympathy with what the gentleman says about the shortage of farm labor and the disastrous effects of it. Would it not be a good idea to make the Government clerks work eight hours a day and stop bringing so much farm labor here to the Capital?

Mr. CAMPBELL of Kansas. I will tell the gentleman from Missouri what I think would be a better idea than that, and that would be to send one-third of the clerks home and let the other two-thirds do all the work, whether it takes them 8 hours or 10 hours. [Applause.]

Mr. LITTLE. Mr. Chairman, will the gentleman yield?

Mr. CAMPBELL of Kansas. Yes.

Mr. LITTLE. May I suggest that Carpenters' Union No. 61, of Kansas City, has sent me a resolution offering to send all its members, 1,400, into the harvest field next summer if needed?

Mr. CAMPBELL of Kansas. That is a good suggestion. I think that the young men from 15 to 21 years old might well take employment on the farms of the country, beginning on the 1st of April and ending, say, the middle of November, and get a certificate of service to their country as having done their bit at this time.

The CHAIRMAN. The time of the gentleman from Kansas has expired.

Mr. CAMPBELL of Kansas. Mr. Chairman, may I have five minutes more?

The CHAIRMAN. The gentleman from Kansas asks unanimous consent to proceed for five minutes more. Is there objection?

Mr. LEVER. Mr. Chairman, pending that, I ask unanimous consent that all debate on this paragraph close in five minutes.

Mr. CAMPBELL of Kansas. I do not believe that the gentleman from South Carolina is sufficiently impressed with the importance of farm labor in food-crop production. We are providing here $27,000,000 for a lot of clerks in these departments and for a lot of scientists who will not produce an ounce of anything to eat in 1918 unless there is farm labor.

The CHAIRMAN. The gentleman from Kansas asks unanimous consent to proceed for five minutes. Is there objection?

Mr. LEVER. The gentleman from Kansas has made a very wise statement. I hope we can take it into consideration.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. QUIN. Mr. Chairman, will the gentleman yield right there?

Mr. CAMPBELL of Kansas. Yes.

Mr. QUIN. I thoroughly agree with the gentleman that we ought to have much more labor on the farm, but I think it is imaginary and impossible to get these fellows out of the cities. They have not any sense about farming to start with, and you can not get those young fellows out from under the electric lights in the cities.

Mr. CAMPBELL of Kansas. The gentleman may be correct to a certain extent, but I believe that if these young men are appealed to from a patriotic standpoint, and their parents are appealed to, they will perform this important labor on the farm.

Mr. COX. Mr. Chairman, will the gentleman yield?

Mr. CAMPBELL of Kansas. Yes.

Mr. COX. I know the gentleman is thoroughly conversant with the situation in Kansas, as I am to the situation in Indiana. Why would not this be a solution of the problem—to require young men from the age of 15 to 19, possibly 20, to be actually enrolled, so that the President could send them to the farms in the country to help the farmers out? They are not worth a rap if you send them out from school. You could beg them until you were black in the face, and you could not get them to work. You must have power behind you.

Mr. CAMPBELL of Kansas. I am asking the chairman of the Committee on Agriculture to take an interest in this subject and to do something at an early date that will provide farm labor. I know, as the gentleman from Indiana [Mr. Cox] knows, that many farmers will let lay fallow much of their farm land in the coming year for want of farm labor.

Mr. COX. They are doing it now in the State of Indiana. They are sowing their fields in grass.

Mr. CAMPBELL of Kansas. They will have to do the same thing in Kansas and in every part of the country, because they can not get the labor to cultivate the land if something practical is not done to meet the situation.

Mr. SLOAN. Mr. Chairman, will the gentleman yield?

Mr. CAMPBELL of Kansas. Yes.

Mr. SLOAN. Would it not be a good suggestion that we take this advice to ourselves and speed up our own work, and then the young men of this House can go home and do some farming work during the summer? [Laughter.]

Mr. CAMPBELL of Kansas. I am anxious to do that. I will say further to the gentleman from Nebraska that I am getting ready to put in a little crop this spring myself.

Mr. JOHNSON of Washington. Mr. Chairman, will the gentleman yield?

Mr. CAMPBELL of Kansas. Yes.

Mr. JOHNSON of Washington. I may say that while I was in the West recently I learned that in Beaverhead, Mont., the schools in the county seat, Dillon, and elsewhere in the county had agreed to run six days a week. That is, they agreed to have school on Saturday, so that the boys might work later on the farms last fall and start earlier in the spring. That is the only place where I found that idea adopted.

Mr. CAMPBELL of Kansas. I feel sure that if it is brought properly to the attention of the young men of the country and their parents farm laborers could be secured in very large numbers to raise a crop in the coming season.

Mr. LINTHICUM. Mr. Chairman, will the gentleman yield?

Mr. CAMPBELL of Kansas. Yes.

Mr. LINTHICUM. I would like to say that I had a delegation before me this morning from the fertilizer people, claiming that they can not get cars to ship fertilizer or coal to manufacture it. Is not that an important proposition?

Mr. CAMPBELL of Kansas. Yes; that is important. The reason why they can not get cars is that the railroads in recent years have not been keeping up their equipment, and the reason fertilizer may be short of the requirements is because of labor conditions. The productive labor of the country is short. And there are many young men in school who will remain in school until the middle of June or the 1st of July who might well spare two months or two months and a half out of school in the spring and the same time in the fall, and put the time in planting a crop and remaining upon the farm until the crop is gathered in November.

Mr. QUIN. Where are these schoolboys coming from?

Mr. CAMPBELL of Kansas. From the cities and towns.

Mr. QUIN. O, my God, do not you know they can not farm? [Laughter.] It will take a year to teach one of them.

Mr. CAMPBELL of Kansas. They can learn. They are generally pretty husky fellows, most of them. They stand work in trenches; they stand the hard work in the Army.

Mr. QUIN. They can not plow. They can not dig.

Mr. CAMPBELL of Kansas. There is much work they can do. They can do a great deal of work on the farm. We have provided in this bill for many instructors in farm labor. What do they do? Why, they do very little for the average farmer who knows his business. They come around and occasionally say something to a farmer that is a good suggestion. But they could materially aid in getting these boys to come from the schools into the work on the farm and help them get started in farm labor. Something of this kind must be done. Labor must be provided for the farms or we will not have food enough for all our needs in the coming year.

The CHAIRMAN. The time of the gentleman from Kansas has again expired.

Mr. SNYDER. I move to strike out the last word.

The CHAIRMAN. The gentleman from New York is recognized for five minutes.

Mr. CAMPBELL of Kansas. I have made this suggestion because I think it is important. Much of the money appropriated by this bill will avail nothing unless there is farm labor.

Mr. LINTHICUM. I ask unanimous consent that the time of the gentleman from Kansas be extended five minutes.

The CHAIRMAN. The Chair has recognized the gentleman from New York [Mr. SNYDER].

Mr. SNYDER. Mr. Chairman, I do not claim to be a farmer, but I do come from a great agricultural district, that is also as well a great manufacturing district. There is great disturbance in the minds of the farmers of our part of the country at the present time, because they fear they are not going to get sufficient help to put in their crops this year and that they will not be able to get their crops off the fields if they do put them in, having gone through that experience last year, very much to their disadvantage.

I believe the farmers in my district are patriotic, as they are all over this country. They have worked hard and long hours, and are willing to continue to do that, but they believe that something definite should be done for them now before the time for putting in crops is past. With that in view, I understand that a measure has already been considered by the Military Affairs Committee, that gives the Secretary of War the right to furlough men back into various industries, and it is my understanding that it is the purport of that bill to take care to some extent of this particular thing that we are discussing here this morning. I myself early in the session introduced a bill to exempt farmers and farmer boys and other men under similar conditions. My measure would simply cover farms of from 50 to 100 acres. In my part of the country we have more farms of that size than larger ones. These men are terribly handicapped, and made great losses last year by not being able to harvest their crops. While they are patriotic, you can hardly expect a farmer to put in more stuff than he believes he can get out. That is what we are laboring under to-day. I certainly hope that whether some action is taken in this bill or not something will be done between now and the 1st day of March to assure the farmers of this country that they are going to have some definite assistance and an understanding with reference to getting off the crops that they put in.

Now, if I have just a minute, I should like to say a word or two about boys and girls going on the farms. In the State of New York last year we adopted that policy, and we already have a law up there for universal military training, and last year we sent thousands of boys from school and thousands of girls onto the farms, and they did good work, and many farmers certified to the benefit that they got from these boys out of the schools last year. That work will be multiplied tenfold this year.

Mr. BANKHEAD. Was that compulsory service?

Mr. SNYDER. No; it is not compulsory, but it is carried on by a system of enrollment, as the gentleman from Indiana has suggested, and the school-teachers and school superintendents throughout the State took charge of that work, listing up the boys and placing them and the girls on the farms. I want to say just this in response to my friend from the South, Mr. QUIN, that up in our country we do have in the towns and cities boys who can work on the farms; and many farmers who have got a little on the better side of farming, who have made some money, have moved into the towns. Their children have had eight or nine years on the farm, as I had when I was a boy, and they do not forget all they learned about farming. When summer comes they are only too glad to go back on the farm and give somebody the benefit of their assistance.

Mr. FESS. Had these boys who were sent out from the schools had any training on farms before?

Mr. SNYDER. Some of them had and some of them had not, and the same thing might be said about the girls who went onto the farms.

Mr. FESS. At Dayton, Ohio, there were several boys sent from the city out to the farms, but they were not adapted to the work, and the men who employed them said they could not endure them, that they did not know how to handle horses, and they really were of more loss to them than they were advantage.

Mr. SNYDER. Up in our section we did not have that condition. Many times when I was going through the country last summer I saw boys running hay rakes, running mowing machines, loading hay, on the top of the hay, and I have been in barns where they were mowing it back, and the farmers told me they were getting a good deal of help in that way. They simply had to have this help. There was no other way they could get it.

Mr. FESS. They must have exercised some discretion in their selection, did they not?

Mr. SNYDER. Very likely they did. The farmers had the right to say whether they would take a boy 15 years old or a boy 10 years old. I have seen 10-year-old boys working on the farm.

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. IGOE having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. Young, one of its clerks, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the joint resolution (H. J. Res. 174) for the purpose of promoting efficiency, for the utilization of the resources and industries of the United States, for lessening the expenses of the war, and restoring the loss caused by the war by providing for the employment of a discovery or invention called the "Garabed," claiming to make possible the utilization of free energy.

AGRICULTURAL APPROPRIATION BILL.

The committee resumed its session.

Mr. LEVER. Mr. Chairman, all this discussion is aside from this paragraph. This paragraph has to do with the appropriations for the Hatch Act. I must insist that we confine ourselves to the proper discussion of the item under consideration.

Mr. LINTHICUM. I hope the gentleman will give me five minutes along this line.

Mr. LEVER. We are expected to get this bill through this afternoon; and if every gentleman takes the floor for five minutes, we might as well close up shop, because we can not pass it to-day. Several Members around me have asked me to give them a little time, failing to realize that the Committee on Agriculture is a very busy committee. Gentlemen come in here once a day and make speeches. We have to sit here all day, and, in addition to that, we have things ahead of us that we ought to be doing. I trust gentlemen will not press this discussion, which is not germane at this point. There is a place in the bill where it will be germane, and I will be very glad to be liberal when we reach that point. It is absolutely out of place here.

Mr. LINTHICUM. It does not encourage us very much to stay here when you will not let us say anything when we do come.

Mr. LEVER. Mr. Chairman, I ask unanimous consent that all debate on this paragraph and all amendments thereto close in 10 minutes, the gentleman from Iowa [Mr. GREEN] to have five and the gentleman from Maryland [Mr. LINTHICUM] to have five.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that all debate on this paragraph and amendments thereto close in 10 minutes, the gentleman from Iowa [Mr. GREEN] and the gentleman from Maryland [Mr. LINTHICUM] each to have five minutes. Is there objection?

There was no objection.

Mr. LINTHICUM. Mr. Chairman, I merely want to say, in reference to what the gentleman from Mississippi [Mr. QUIN] has said about the boys from the city being unwilling and unable to do farm work, the district wherein I live and represent is a large city district and I farm in a country district. I know that many city boys went from Baltimore into the country and did splendid work. The work that they do depends very much on the farmer who employs them. If the farmer who employs them puts them down to hard work at the beginning, without training, it is impossible for them to do good work. He must give them a little chance to get down to hard work and teach them the work at hand as they proceed. If he does this and takes an interest in them, they will surely give him great satisfaction.

I know of a young man farming next to me who had a number of young men under contract from the Johns Hopkins University, of Baltimore—city boys. I have seen those boys in his fields from early morning until sundown, doing work and doing good work. They not only did good work, but they were fine associates as well. I know there are plenty of boys in the city of Baltimore and other large cities who can and want to go and do farm work if they can get the chance. They must be taught and trained and they will be found intelligent, hard workers.

Now, I want to say a word about the fertilizer question. I had a delegation of fertilizer men before me this morning from my district, who say that it is absolutely necessary if we want big crops this year to get the fertilizer to the farmer. So far they say it has been next to impossible for the manufacturers to get fuel to run the plants, and some can not get it. Then it is absolutely impossible to get enough cars to send the fertilizer to the sections where it will soon be needed. They suggest that cars ought to be furnished for those sections where planting will soon be in operation, and then other cars for sections farther north. In this way, they tell me, the fertilizer can be supplied gradually from South to North without any great drain on the railroads.

The question of fertilizer is a serious one. If you can not get as much farm labor as desired, we will have to do more intensive farming. If we have to pay $12 a bushel for peas instead of $6 a bushel, we will have to put more fertilizer back of them to produce a crop proportioned to the cost of the seed and labor. We know that it takes just as much labor to work over a field producing 50 bushels per bushel planted as it does to work over a field well fertilized which produces 100 bushels. It does not take any more labor to produce 100 bushels with intensified farming than to produce 50 bushels on a poorly fertilized farm. I merely state this so that Members interested in this matter who want to see a big crop and the people well fed may get after the fertilizer and see that it is manufactured and gets to their farms. I believe if you do that and get the boys from the city you will produce all the crops that you need this year.

I am not a novice as to farming and farm work. I was raised on a farm and taught by a father who was a progressive farmer. He knew above all things that unless you fertilized and otherwise improved your land, you were not a farmer but a miner, taking all from the land and putting nothing back. He also knew the value of farm machinery and put this knowledge into practice. He realized that with proper farm machinery half the force on a farm could do the work, and do it with less labor. Many farmers are terribly handicapped in the early spring, when planting season arrives, by not being ready to take advantage of the weather at once. If the farmer will have his machinery, plows, and so forth, all placed in readiness for springtime and planting, he will be saved much worry and time.

I would not be adverse to helping farmers buy machinery. It saves so much labor and enables one to produce in greater abundance. You men from the farming sections impress upon your people the necessity of intensive, up-to-date farming. The farmers are awake, I am sure, but we all like a little boosting at times. It is the little fellow, the timid farmer, the one who fears debt as he fears fire—these are the men who need encouragement.

It has been said that the farmer must win the war, that it is a question of food endurance. Plenty of fertilizer and other land improvement, proper farm machinery, intensive farming, aided by the farmer boy and the trained city boy will save the day, I am sure.

Mr. ALEXANDER. Will the gentleman yield?

Mr. LINTHICUM. I would be glad to.

Mr. ALEXANDER. Does not the gentleman think that one boy raised on a farm and actively employed is worth more than two city boys?

Mr. LINTHICUM. Of course he is worth more.

Mr. ALEXANDER. Why should not the Government in the administration of the law with reference to the selective draft exhibit a little more liberal spirit and leave the boys on the farm?

Mr. LINTHICUM. I have given the gentleman's question a good deal of thought. It has occurred to me that boys taken from the farm under the new draft ought to be furloughed to produce a crop, and when the crop is produced we can consider whether they shall go back or whether we need them worse on the farm. It is a very serious question.

Mr. LEVER. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and Mr. GARNER having taken the chair as Speaker pro tempore, Mr. CRISP, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 9054, the Agricultural appropriation bill, and had come to no resolution thereon.

INCOME-TAX PRIMER.

Mr. BARNHART. Mr. Speaker, I ask unanimous consent for the immediate consideration of House concurrent resolution 33, which I ask the Clerk to read.

The Clerk read as follows:

House concurrent resolution 33.

Resolved by the House of Representatives (the Senate concurring), That there shall be printed 500,000 extra copies of the Income-Tax Primer, prepared by the Bureau of Internal Revenue for the information and assistance of taxpayers, 150,000 copies for the use of the Senate and 350,000 copies for the use of the House of Representatives, the same to be distributed through the folding room.

The SPEAKER pro tempore. The question is on agreeing to the resolution.

The resolution was agreed to.

AGRICULTURE.

Mr. LEVER. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the agricultural appropriation bill.

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. CRISP in the chair.

Mr. GREEN of Iowa. Mr. Chairman, I do not believe the importance of the matter which has been the subject of discussion before the committee is fully understood. It has been treated largely as if it was a matter of worry on the part of the farmers. As a matter of fact, the country at large needs to worry over the subject more than the farmers. The farmers are going to have enough to eat, as far as they are concerned. There is some question whether this country will have enough

to eat, and a still more serious question whether our allies will have enough to eat. What action ought the House to take at this time? It can take no action on this bill, but it ought to be considering measures which may be adopted to relieve the situation, and one of the first is that which has already been spoken of. I entirely concur with the suggestion that a bill ought to be passed to furlough soldiers now in these camps in time to help raise the spring crops, where crops are dependent on their labor. There has been a singular strictness, if I may so term it, in reference to exemption rules. I can not understand where a man is running a 160-acre farm, producing, as we do in Iowa on our productive soil, crops of immense value to the country, with no one to help him, no way to obtain labor, why these young men should not be exempt, and I know of hundreds of cases where they are not exempt. I do not know how the crops in my State are going to be planted this spring if no provision is made for help at that critical time. Spring work on the farm can not be postponed. It can not wait. It must be done at the right time or the crop will be a failure. Moreover, as a rule, the spring work must be done by a skilled workman. The preparing of the soil and planting of the crops must be done by one who not only knows how to handle horses but also complicated machinery. He must know, too, just when each part should be done and the proper manner of doing it.

So that I say some action ought to be taken with a view of furloughing soldiers in such cases, in order that these crops may be gotten in in the spring. Then there is another matter, which, while it is not a matter for the consideration of this committee, is a matter for consideration of my own community, if I could make my voice heard that far, and for a good portion of the West. In every community out that way there is a large number of farmers who are retired. They are men who have had experience in farming, but who, of course, are no longer able to do the heavy physical work. They are able, however, to sit on a riding plow or a riding cultivator. They know how to handle horses. They know how the work ought to be done and how to give directions to persons ignorant of the work, and I hope that their patriotic impulses will be stirred so that every one of them will be out on the farm doing what he can in order to get these crops in and produce the food so necessary for the country at this time. Every State should do something in the line of what has been done in the State of New York. The gentleman from New York [Mr. SNYDER] told you something with reference to what is being done there, but his remarks were not, I think, entirely complete. As I understand it, the State of New York has opened a school for the training of boys and girls—boys not old enough to go into the Army and girls of the age from 18 to 25 who are willing to work on the farm. These boys and girls are given preliminary training, and something of that kind ought to be done in every State. I understand this work has been very successful and large numbers of boys and girls have been gotten out to do the work on the farm, and they have given considerable help. Am I correct in that?

Mr. SNYDER. The gentleman is correct, and if the gentleman will permit, I would state that the greatest number has come from around the suburbs of New York, the largest city we have.

Mr. GREEN of Iowa. There is another little trouble with the farmers themselves. They take these boys that come out from the city and then have no patience with them. As the gentleman from Mississippi [Mr. QUIN] said, they do not know how to handle horses, they do not know anything about farm work. All they have is the spirit of willingness and the desire to do something, which they do not understand. Unless our farmers themselves are going to exercise some patience in this matter the results of trying to get these boys and girls out on the farms will entirely fail. It is a time when the patriotic impulses of every person—retired farmers, boys who are in the ranks, boys and girls who are in the towns not fully employed but who might be on the farm—ought to be exercised, and I commend these questions to the House for its careful consideration, for I believe that nothing can be of more importance at this time. [Applause.]

The Clerk read as follows:

For farmers' cooperative demonstration work outside of the cotton belt, including the employment of labor in the city of Washington and elsewhere, supplies, and all other necessary expenses, $554,800.

Mr. FOSTER. Mr. Chairman, I move to strike out the last word. What I am going to say should probably have been said at an earlier portion of the bill, when the seed item was under consideration, but I want to say this, that owing to weather conditions the last season, so far as the corn crop throughout the Middle West—Illinois, Iowa, and other States—was concerned, the corn was not matured as it ordinarily is. I have had considerable correspondence from citizens in Illinois in reference to seed corn for the coming year. It is a very serious question with the corn-growing States. I desire to ask the chairman of the committee if the Agricultural Department is taking any steps looking to the proper distribution—not free—of seed corn, so that farmers may be able to secure it in those sections of the country where corn is an important crop.

Mr. LEVER. I will say to the gentleman from Illinois that the food-production bill which we passed last year carried an appropriation of two and a half million dollars for furnishing field seed in emergencies such as the gentleman describes. There is pending before the Committee on Appropriations, I understand, a deficiency item of $6,000,000 to further supplement the funds the department now has. I am not sure that the department will recommend any additional funds for this purpose in its emergency bill which it will present to the committee later in the season. The department is purchasing seed of all descriptions to distribute to farmers for cash at cost in those localities where the seed situation is critical.

Mr. FOSTER. They are asking enormous prices for seed corn, so much so that it seems to me that it does seriously affect the corn crop for the coming year. I do not know how it is all over the West, but I know that in some portions of Illinois there is a great deal of corn, probably a majority of it, that is unfit for seed purposes this year, and that something must be done in order to secure corn from localities where the corn is suitable for planting.

Mr. BORLAND. Mr. Chairman, will the gentleman yield?

Mr. FOSTER. Yes.

Mr. BORLAND. I do not know what the situation in regard to seed corn is, but I have recently had information that in the sorghum seed market there were indications of a corner. Does the gentleman have information or indications of a monopoly or corner in seeds for agricultural purposes at the present time?

Mr. FOSTER. I have not. The only thing I have is a letter in which they say they are asked to pay as high as $6 a bushel for ordinary seed corn.

Mr. McKENZIE. Mr. Chairman, will the gentleman yield?

Mr. FOSTER. Yes.

Mr. McKENZIE. Right in that connection I would like to state that at a public farm sale in my district a few days ago a farmer paid $32 for a bushel of seed corn.

Mr. FOSTER. That might be an exceptional case, but that is not generally the price.

Mr. McKENZIE. Of course, that was up in my district, and not down in the gentleman's district.

Mr. FOSTER. Of course, they may have money to throw away up in the gentleman's district, but I doubt if they are well enough posted in that district to know really what they ought to pay. [Laughter.] In my district the farmers are too smart to be guiled into paying $32 a bushel for ordinary seed corn.

Mr. McKENZIE. I will simply say, in my district they usually know a good thing when they see it.

Mr. FOSTER. They certainly do in their Representative, but in the purchase of seed corn I do not think they have been very wise.

Mr. BOOHER. I would like to say to the gentleman that I read a statement in one of the county papers published in my district that a certain farmer has put up 400 bushels of corn, selected corn, for seed, and was offering it to his neighbors for $2.50 a bushel.

Mr. FOSTER. That is probably not an excessive price this year.

Mr. BOOHER. That is cheap for a man to separate his corn and sell it.

The CHAIRMAN. The time of the gentleman has expired.

Mr. FOSTER. I would ask for one minute more.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. FOSTER. I want to say in my judgment this is an important matter for consideration, and if the Agricultural Department is looking out for seeds to be planted for spring it is important to get the right kind of corn for planting. Everybody who lives in a corn country knows that corn must be matured to preserve it so as to grow in the spring, and I hope that the Department of Agriculture will, in their supply of seeds to sell to farmers for cash, not overlook this fact, and I take it they will not because the corn crop in the Middle West is an immense crop and needs proper care taken to see that the seed will be supplied when the time comes.

The Clerk read as follows:

For farmers' cooperative demonstrations and for the study and demonstration of the best methods of meeting the ravages of the cotton-boll weevil, including the employment of labor in the city of Washington

and elsewhere, supplies, and all other necessary expenses, $650,140: *Provided*, That the expense of such service shall be defrayed from this appropriation and such cooperative funds as may be voluntarily contributed by State, county, and municipal agencies, associations of farmers, and individual farmers, universities, colleges, boards of trade, chambers of commerce, other local associations of business men, business organizations, and individuals within the State.

Mr. MONDELL. Mr. Chairman, I move to strike out the last word. Mr. Chairman, the observations which I have to make will relate to the paragraph just before the one last read, although this refers to the same class of work. I did not want the reading of this paragraph to pass without taking the opportunity to express an appreciation of the splendid work of the county agricultural agents. In the country in which I live, a mixed farm and stock-growing country, more particularly a stock-growing country, our people were a little slow to realize the importance and the value of the work that might be done by the county agent, and it required some years and some considerable agitation to bring our people, particularly where the counties were rather limited as to funds with which to cooperate, to a point where they were willing to accept the responsibility and the cost of this cooperation. But in every case so far as I know in my State, where the county agent has been employed it is the well-nigh universal testimony that the aid rendered and the work performed by the county agent has been of very great value. It is a real pleasure, in view of the character of some Federal appointees, in view of the lack of real valuable work performed by some who get on the Federal pay roll, to find a certain class and individuals of a class of appointees who are really adapted to and prepared for their work and who do enter upon it with enthusiasm and intelligence; with an appreciation of the people among whom they labor, the problems they are called upon to solve, and of the proper diplomatic effort by which and through which they can make themselves really useful and effective, on behalf of the people they serve. The agents in my State have not, so far as I have come in contact with them, been taking on airs of superior knowledge, as some have feared they would, or minimized the value of their work by failing to come into hearty sympathy and cooperation with the men among whom they work. I have observed that they have endeavored to learn the best practices of the section and of the region as practically demonstrated, and to bring the general practice up to the best practice, and aiding in the accomplishment of that end by their scientific and practical knowledge and information. They have performed a great work. So far as I know, in my State they are men of the right stamp, kind, and character. If the character of the men, and of their work everywhere, is as it is in my section, a splendid work, highly beneficial to agriculture in its broadest sense, is being performed by these men. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. MOORE of Pennsylvania. Mr. Chairman, I move to strike out the last word. Mr. Chairman, the matter of labor——

Mr. LEVER. If the gentleman will pardon me a moment. I ask unanimous consent, Mr. Chairman, that debate on this paragraph and all amendments thereto close in 10 minutes.

Mr. MOORE of Pennsylvania. Will not the gentleman waive that? I desire to have about seven or eight minutes.

Mr. LEVER. Mr. Chairman, gentlemen say, "let it run along," but the chairman of the committee is a busy man, and so are all the members of his committee, and I would like to get through with this bill this afternoon and we are not going to do it unless gentlemen limit their time. I ask unanimous consent that debate on this paragraph and all amendments thereto close in 15 minutes. The gentleman from Michigan desires five minutes, the gentleman from Pennsylvania and the gentleman from Mississippi will take three.

Mr. MOORE of Pennsylvania. Will not the gentleman raise that a little?

Mr. BARNHART. I would like two minutes.

Mr. LEVER. The gentleman from Indiana wants two minutes. I will make it 15 minutes.

Mr. MOORE of Pennsylvania. I do not expect to speak much more on this bill and I would like to have seven or eight minutes.

Mr. LEVER. I will make it 15 minutes, the gentleman to have seven.

Mr. MOORE of Pennsylvania. I want to say something that I think the committee ought to know.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that debate on the paragraph and all amendments thereto close in 15 minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. MOORE of Pennsylvania. Mr. Chairman, everyone, whether from a farm or an industrial center, will agree that there ought to be ample labor for farm production. I was impressed by the remarks of the gentleman from Kansas [Mr. CAMPBELL] on that subject this morning and thoroughly agree with him that some arrangement should be made by which we can get more labor on the farm, because we need farm products, and we will continue to need them in larger degree than heretofore. But there are other things besides labor needed on the farm—fertilizer, for instance, which every Member of this House who has a farming constituency will understand. As to this phase of the question I was informed this morning that two large establishments manufacturing fertilizer, one at Baltimore and the other at Philadelphia, may be compelled to close within a very few days, throwing eight hundred or a thousand hands out of work and depriving the farmer of this essential commodity, for the want of coal to continue operations.

The other day, in making a few remarks with regard to the distribution of coal and the desirability of having some other port of exit and entry besides the port of New York to which we might ship our supplies and more equitably and speedily distribute the products of the country, including coal, I made reference to the fact that certain coal barges, then laden, were standing idle in the Delaware River because the propelling power for those barges had been taken away for war purposes. I referred to the fact that the Menhaden fishery boats had not been taken and were still plying their trade, capturing fish in the open sea and turning them in for oil.

I did not go so far as to say that they were grinding them up for fertilizer, but that is also true, and, of course, is of interest to the farmer. Since making that talk the Navy Department advises me that they had not taken the menhaden fishing boats—and there are certainly a hundred or so around the Delaware and Chesapeake Bays capable of doing sea service—because the Food Administrator had requested that those boats be let alone.

Now, the people want food fish and the Food Administrator is supposed to help the people get food fish, but the issuance of an order or request equivalent thereto by the Food Administrator indicating that the continuance of the menhaden fisheries as heretofore conducted would increase the food supply is, to those who know the situation, next to absurd. These menhaden fisheries are after oil and the residuum that goes into fertilizer. The food fish they get, as a rule, are ground up and the public obtains no food advantage therefrom. If it be claimed they produce fertilizer which facilitates the food supply we are now confronted with the fuel shortage, which threatens even the fertilizer.

It seems to me there is a hitch somewhere, due possibly to the overlapping of these myriads of new officials and clerks in Washington, to whom the gentleman from Kansas [Mr. CAMPBELL] referred. We seem not to be getting the best results as to food and fuel—certainly not at the present time.

The farmer and the industrialist are interdependent, as I have contended a hundred times upon this floor. If the industries can not get their coal the farmer may not get his fertilizer.

Close up these two establishments, one in Baltimore and the other in Philadelphia, and I warrant you that the farmer of Maine, who is a very important factor in the cultivation of the potato, even to the extent of sending his spuds down to Florida for early crops, will be unable to render the best service. Close up these industries for want of coal, and these establishments in Philadelphia and Baltimore may not be able to serve the States of Maryland or of Virginia. The difficulties confronting these two industrial plants affect New England, New York, Pennsylvania, and New Jersey, in addition to the others I have mentioned. No one can tell how far these influences extend.

I do not know how it is with the more southern fertilizer establishments. They have them—very large ones—down at Richmond, over at Charleston, at Savannah, and at Jacksonville, and I assume they are subject to the same conditions with regard to fuel that other fertilizer establishments are.

I understand this matter has been brought to the attention of the Secretary of Agriculture and that he has evinced some interest in it. I have brought it to the attention of the Fuel Administrator, but I want Congress to know how vital this matter of the holding up of the coal supply is to all the essential factors in production.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. McLAUGHLIN of Michigan. Mr. Chairman, I am pleased to hear the gentleman from Wyoming [Mr. MONDELL] speak so favorably of the work being done in his State under this and similar appropriations, because this is an appropriation supplementing the appropriations now being made under what is known as the Lever law, a law for which the gentleman from South Carolina [Mr. LEVER] deserves the whole credit, not-

withstanding the fact that a distinguished gentleman in another body is claiming credit for it and in some way has been able to have his name attached to the law.

I feel that this work would be as successful in other parts of the country, in the entire country, as in Wyoming if it were carried on in all places as it has been there. And it can very easily be carried on in that very proper way. If it is not, the fault lies with the State and largely with the local community because of the plan of selection of the county agent. The Department of Agriculture cooperates with the agricultural college in this matter. The State agent is selected as the joint appointee of the Department of Agriculture and the State agricultural college. No appointment of county agent is made without the approval of the State agent. He knows the men, their names and residences, who are suited for the work, and when a county makes appropriation and provides money to put itself in line to take up this work the State agent suggests the names of men suitable for the work and who are open to employment. The men are sent, one by one, if required, to the county to undergo examination by those who are locally interested, usually a farm bureau composed of local farmers. In the first place, the State agent does not suggest the employment of any man who is not known or thought to be suitable for the work and the local people are not required to accept any man or to let their money go to pay him, even in part, unless after this investigation they are satisfied he understands their problems and is so well informed and is such character of man as to be suitable for work in the county.

If this plan of selecting county agents were known to those who have so bitterly opposed this item, I think objection would be overcome. They would see that the fault, if fault there be, lies with them or with the people of their locality and that the difficulty can be overcome.

I think this is very important work. Its value has been shown all over this country where it has been carried out properly. It can be made good work everywhere. The local authorities should pay attention to the manner in which these men are secured. No man is forced upon them. Their money goes to pay no man who is not acceptable to them, and if at any time the work of a county agent is not satisfactory communication with the State agent will result in his removal and the appointment of a capable man satisfactory to local interests.

I am glad, as I say, to hear the words of approval by the gentleman from Wyoming [Mr. MONDELL], and I believe that others who know this work and have seen enough of it to appreciate what it is will vouch for the value of it and from time to time approve the appropriations recommended by the Committee on Agriculture to carry it on.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

To enable the Secretary of Agriculture to investigate and report upon the organization and progress of farmers' institutes and agricultural schools in the several States and Territories, and upon similar organizations in foreign countries, with special suggestions of plans and methods for making such organizations more effective for the dissemination of the results of the work of the Department of Agriculture and the agricultural experiment stations, and of improved methods of agricultural practice, including the employment of labor in the city of Washington and elsewhere, and all other necessary expenses, $20,600.

Mr. MONDELL. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Wyoming moves to strike out the last word.

Mr. LEVER. Mr. Chairman, I ask unanimous consent that the debate on this paragraph and all amendments thereto close in five minutes.

Mr. MONDELL. Will the gentleman make that seven minutes? I think it will take me about that length of time to say what I desire, and then he had better reserve for himself about three minutes.

Mr. LEVER. I infer from that that the gentleman is about to make an attack on this item. I ask that the debate close in 10 minutes, Mr. Chairman.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. MONDELL. Mr. Chairman, this item authorizes the Secretary to investigate and report upon the organization and progress of farmers' institutes and agricultural schools in the several States and Territories. The item is a good one. The investigation proposed, I have no doubt, is carried out in a way to be helpful. The institutions to be investigated and encouraged do a great deal of good. But if we are to have organizations of farmers' institutes and agricultural schools we must have farmers; and if the farmers, and particularly the best farmers—the young and virile, the vigorous and the successful farmers—are all to be drawn from the communities, there will not be a great many left to aid in the active work of these valuable institutes and schools.

Those who approved and urged the conscript law, the draft law, to which we are all loyal, now that it is upon the statute books, urged it principally upon the ground that it was to be a selective draft, and they pictured in their minds and illustrated to us in their speeches the very great advantage and benefits there would be to the country through a selection by Federal agents and local organizations of those who were to go and bear the country's burdens and fight its battles and those who were to remain behind to keep in motion the wheels of industry, the fields green and well cultivated, and to continue the great output of the product of industry and agriculture, so absolutely essential to the success of our arms.

The plan proposed and thus outlined and defended was fine. It was this idea and thought and purpose that made the draft popular. But, unfortunately—and I am blaming no one in particular; I do not know that anyone in particular should be blamed—there has been very little selection. In my State many of the counties in the State until very recently were not subject to the draft because of the fact more than the quota of men had volunteered. But where the draft was applied there was practically no selection. The young fellows in charge of ranches, with hundreds of acres under cultivation, with large herds and flocks, supervising business, and farming enterprises requiring knowledge, training, and experience, vigor, and energy, possessing every quality necessary to the successful operation of these enterprises so valuable and necessary to continue and increase the food supply of the country, were not selected to stay at home in charge of such work.

Mr. McLAUGHLIN of Michigan. Mr. Chairman, will the gentleman yield?

Mr. MONDELL. In the main they did not ask for exemption. The very man that should be exempted under the plan and purpose proclaimed as that of the selective law is ordinarily the last man who will ask for exemption.

Now, I yield to the gentleman.

Mr. McLAUGHLIN of Michigan. A few days ago, in answer to my request of The Adjutant General of the Army to advise me if there was not some way by which the circumstances surrounding the young men who were taken from the farm might not be looked into, or looked over again, he replied that no exemptions were being made of men on account of their employment on the farm. Now, the law provides that exemption may be given, but evidently the law is being disregarded. If another law is framed along that line, it must be made in such language as that even the officers of the Regular Army will not dare to disregard it.

Mr. MONDELL. I hope that will be done. In some cases, I think, if there is any blame—and I am placing no blame anywhere—it rests with the district boards rather than upon anyone here. The idea of the selective draft was that it would catch the slacker; that it would take by the scruff of the neck the indifferent, the indolent, the shrinking—not to use the word "cowardly"—and put him on the firing line and reserve in the interest and for the benefit of his country some, at least, of the men essential to its agriculture and its industry. What I have said of our young farmers and ranchmen was true also of the men in the mines, and to some extent, at least, of those on the railroads—there was no real effort at the selection which the law contemplated and which was claimed to be its chief virtue.

The CHAIRMAN. The time of the gentleman from Wyoming has expired.

Mr. MONDELL. Will the gentleman give me the other three minutes?

Mr. LEVER. I feel that I ought to reply to the gentleman.

Mr. MONDELL. Will the gentleman extend the time?

Mr. LEVER. I will yield to the gentleman two minutes of my time.

The CHAIRMAN. The gentleman is recognized for two minutes more.

Mr. MONDELL. At the time the draft law was under consideration I expressed the opinion that under the draft, as under volunteering in the main, the men who would go would be the men who wanted to go, the men who were willing to go. And that has been the case. The very men needed to maintain industries and sustain them and to keep the agricultural and stock-growing production of the country up to the maximum, the men that the country needs at home, are the kind of men, of course, that most want to go: young, vigorous, virile, courageous, enthusiastic, loyal, patriotic; and there was no sort of effort made, so far as I know, to select to stay at home those most needed at home, though that is the very essence and basis

of a selective draft. If the conscription law is to be valuable in the way of its selection, it is and must continue to be the duty of the men who enforce and administer it to select men under it as they are needed to go or to stay at home, and not to send every man who is willing to go and keep at home the man who outrages high Heaven with affidavits that he ought not to go. We should retain at home the man needed at home, whether he himself makes any effort to come within the exemption. I hope in the future we will have an enforcement and an administration of the selective draft in keeping with its purposes, as stated by those who most strongly indorsed and approved it.

The CHAIRMAN. The time of the gentleman from Wyoming has expired. Without objection, the pro forma amendment will be withdrawn. The Clerk will read.

The Clerk read as follows:

Total for States Relations Service, $3,150,820.

Mr. JOHNSON of Washington. I desire to ask the chairman of the Committee on Agriculture [Mr. LEVER] if he is willing at this point to return to page 45 for the consideration of the aeroplane-stock amendment which I offered on Tuesday.

The CHAIRMAN (Mr. BYRNES of South Carolina). Does the gentleman make a request for unanimous consent?

Mr. JOHNSON of Washington. I ask unanimous consent, if the chairman of the committee is willing.

Mr. LEVER. I have no objection.

The CHAIRMAN. The gentleman from Washington asks unanimous consent to return to page 45 for the purpose of offering an amendment which the Clerk will report. Is there objection?

There was no objection.

The Clerk read as follows:

Amendment offered by Mr. JOHNSON of Washington:

"And hereafter, during the existing state of war, the Secretary of Agriculture is authorized to sell without advertisement to any individual, firm, association, or corporation, at a fair value to be determined by him, national-forest timber which he shall find is to be used for war purposes; and he is also authorized, under regulations to be prescribed by him, to permit the War Department to take from the national forests such timber as may be needed in the prosecution of the war. The Secretary of War, under regulations to be prescribed by him, is hereby authorized to sell or otherwise dispose of any of the material manufactured from such timber which is not suitable for war purposes. Any moneys received on account of such material shall be deposited in the Treasury as provided by existing law."

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on the amendment just offered.

Mr. LEVER. I wonder if we may not have an understanding as to whether or not the gentleman from Wisconsin thinks he is going to press the point of order, as he has looked into this matter, I suppose.

Mr. STAFFORD. I have given some consideration to this amendment since it was submitted day before yesterday, having called up the Forestry Service to ascertain the exact operation of the cuttings on the various forest reserves, both for spruce and other timber. I may say that the form in which the amendment was presented by the gentleman before it was modified, so as to have the funds derived from these sales go into the Treasury as miscellaneous receipts, is more acceptable to my view than the modified form providing that the funds received shall be deposited in the Treasury in accordance with existing law. Where the War Department obtains permission from the Forest Service to take such timber as it sees fit, culls out what is needed for its purposes, and then manufactures the balance in the way of lumber to be sold to the public, out of appropriations for the War Department, in my opinion the receipts should be turned back into the Treasury and not, as provided in this amendment, be turned back into the Forest Service fund for the benefit of the local district.

Mr. JOHNSON of Washington. Will the gentleman yield?

Mr. STAFFORD. I yield to the gentleman from Washington.

Mr. JOHNSON of Washington. My colleague from Michigan [Mr. FORDNEY] has an amendment to the amendment as finally presented by me which he thinks will solve that problem, and with the gentleman's permission I think he can make a statement in two or three minutes that will clarify the situation.

Mr. STAFFORD. With the reservation of the point of order pending, of course, I shall have no objection to the gentleman from Michigan or any other gentleman going ahead and explaining the proposition.

Mr. FORDNEY. Mr. Chairman, I would substitute the word "cut" for the word "manufactured" in the third line from the bottom of the amendment as printed in the CONGRESSIONAL RECORD. At the present time the Government has issued orders which have been placed in the hands of the chief of the Signal Corps on the Pacific Coast, Col. Disque, who is stationed at Portland, Oreg., which orders permit the Government to commandeer timber, no matter by whom owned, for the purpose of making rived spruce, which means split timber. The Government is commandeering timber from anybody's land and paying a certain price per thousand feet on the estimated amount of timber in the tree in such trees as are selected. Then the Government lets contracts to individuals to get out this timber and put it on cars for the Government, taking only such portion of the tree as can be worked into rived spruce, which is a very small percentage of the total product of the tree.

Mr. JOHNSON of Washington. About 10 per cent.

Mr. FORDNEY. Not to exceed 10 per cent, I would say, out of the very choicest trees that may be selected. For the trees selected the Government proposes to pay a given price per thousand feet, board measure, for all the product of the tree. Now, nine-tenths of the tree, after the portion suitable for making rived timber has been taken from it, must lie there in the woods, unless the Government may be permitted to dispose of the remainder of the tree where it lies. It will not pay the Government to take out of the woods timber which can not be worked into such lumber as the Government wants for aeroplane stock; but the balance of the timber ought to be disposed of to the contractor getting out the rived spruce or to some one, at such price as the Government may be able to obtain for it, in order to save it from loss, instead of leaving it there and letting it rot in the woods or be burned. The gentleman's amendment says "the material manufactured from such timber." Saw logs are not "manufactured" products of wood, and therefore if you substitute the word "cut" for "manufactured" it permits the Secretary of War or the Secretary of Agriculture to sell the remainder of the product of that tree where cut into logs and left in the woods.

Mr. STAFFORD. Carrying the process one step further, when the Government has carried this culled-out timber down to the factory, what would be left that might be disposed of by the War Department?

Mr. FORDNEY. I have a copy of the specifications, which call for rived spruce measured at the smallest end of the stick of timber, say 6 by 8 inches and up to from 14 inches thick to 36 inches wide, and not less than from 18 to 26 feet long.

Mr. MADDEN. What does "rived" mean?

Mr. FORDNEY. Rived means split.

Mr. MADDEN. Why does it not say so?

Mr. FORDNEY. The specifications say "rived"—to rive is to split.

Mr. JOHNSON of Washington. Let me read the specifications, to show what a tremendous proposition this is. The War Department solicits farmers, lumbermen, contractors, and everybody who can go into the work to engage seriously and earnestly in the business of spruce production. These specifications provide:

All spruce purchased must be split by wedging. The use of explosives in any manner whatever is prohibited. Cants must be 18 to 26 feet full in length; four sides clear, not more than 14 inches thick nor more than 3 feet wide on the bark surface. Annular rings must not be less than six to the inch. Grain must be straight throughout the entire length of the timber, without waves, knots, or rot. Timbers should not be hewn or squared. The heart will always be removed. In selecting trees for this purpose only the finest specimens of live trees should be fallen, and no attempt should be made to utilize dead or down trees lying on the ground or which appear to have shaky or spiral growth or have been burned. No piece with pitch-pocket evidence will be accepted. Any abuse of these conditions will result in a rejection of the material and consequent loss to the producer. The opposite page contains scaling data which will govern inspectors and control the price paid for products.

Mr. FORDNEY. Will the gentleman permit me to state, further, I am familiar with this kind of timber—spruce—and it is not generally a straight-grained wood. There are only certain kinds of timber that grow that will split straight as if sawed, and spruce is not that kind of timber. Very likely one will find it twisted in grain or growth. When split it must be perfectly straight and square or the Government will not accept it according to specifications. No expert in the world can tell whether it is straight grained or cross-grained until the tree is felled and split. Then if it is found the least bit twisted, all of the tree is rejected. Unless you permit the Government to sell the tree where it lies after it is found that it is not suitable for riving you will destroy the timber, for if the Government can not dispose of the tree where felled, then the tree is abandoned to decay or to be destroyed by fire. Why not save it?

Mr. STAFFORD. Assuming the case that the log has reached the lumber mill for some special use, and the War Department finds that it is not suitable for that special purpose, the Government might be able to use it for some other purpose.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. STAFFORD. I ask unanimous consent that the gentleman's time be extended five minutes.

The CHAIRMAN. The gentleman from Wisconsin asks that the time of the gentleman from Michigan be extended five minutes. Is there objection?

There was no objection.

Mr. FORDNEY. The timber must, before it has been accepted by the Government from the contractor, follow all of these specifications. Therefore it must be not more than 14 inches thick and 36 inches wide and not less than 18 or 26 feet long, and be absolutely straight grained, or it will not be accepted by the Government.

Mr. STAFFORD. Assuming that they do accept it and find some interior defect, what will the War Department do with the log when it gets to the lumber mill?

Mr. FORDNEY. There are some defects that are not visible before it is split. All the defects are exposed when it is split into a stick 6 by 8 inches square and from that up in size. Every defect is then visible and it must be perfcet. The defects are visible after it is rived, and the rived timber will not be accepted unless perfect, which means it must be sound and straight grained.

Mr. STAFFORD. The log is going to be rived in the forest?

Mr. FORDNEY. Right in the forest where the tree is felled.

Mr. McLAUGHLIN of Michigan. Will the gentleman yield?

Mr. FORDNEY. Yes.

Mr. McLAUGHLIN of Michigan. The gentleman suggests the use of the word "cut" instead of "manufactured." Why not use the words "cut or manufactured"?

Mr. FORDNEY. Then you are going to put the Government into the manufacturing business. What I want is to protect the Government in the sale of timber in the woods after they discover that it is not suitable for Government use. If it is suitable it will be taken out and manufactured by the Government and be used for making aeroplanes. If it is not suitable it is left in the woods and ought to be disposed of by the Government and allow it to obtain a reasonable price for that portion of the timber unfit for Government use.

Mr. ROBBINS. Will the gentleman yield?

Mr. FORDNEY. Yes.

Mr. ROBBINS. The gentleman's amendment only contemplates certain timber being left in the forest. Is there no timber that will be left at the mill?

Mr. FORDNEY. No, sir; the specifications call for a stick of timber squared a certain number of inches in thickness and width, when measured at the top end, not less than 6 by 8 inches and 18 to 26 feet long, absolutely straight grained when rived, not hewed or sawed, not prepared in any other way except split. Rived means split. Therefore, it must be perfectly straight, not twisty; no large knots; no defects of any kind.

Mr. JOHNSON of Washington. If the gentleman will allow me, I will read paragraph 6 of the specifications.

Mr. FORDNEY. I yield.

Mr. JOHNSON of Washington. It is as follows:

6. This method of securing spruce for airplane construction necessarily will result in leaving considerable portions of each tree in the forest. It is directed that all limbs be cut from the main trunk of that portion of the tree left on the ground, and every other possible precaution taken to prevent possibility of fire. It is by this method that the Government hopes to double the production of spruce for airplane stock so urgently required at this time.

Mr. FORDNEY. Let me say that the Government has already selected trees in forests on the Pacific coast in the county where the gentleman from Washington [Mr. JOHNSON] lives. They have marked particuiar trees. They have measured the diameters of the trees, estimated the length and amount of timber that the tree will cut in feet board measure, and have notified the owners that the Government "will take those trees that have been marked," and that it will pay a certain amount per thousand feet for the timber. When they sell the timber they are going to abandon all except the portion that will make rived spruce, and this provision will allow them to sell the rest of the tree at some price. The Government ought to get some money for the balance of the trees which it will abandon in the woods. If you adopt this amendment, it can do it and will not have to manufacture it and sell it as a manufactured product.

Mr. WINGO. Will the gentleman yield?

Mr. FORDNEY. Yes.

Mr. WINGO. May I understand the exact status of the amendment offered by the gentleman from Michigan? Does he propose to cut out the word "manufacture" and substitute the word "cut"?

Mr. FORDNEY. Yes; so that when the tree has been felled from the stump, is lying in the woods, after a portion is taken by the Government, it can sell the balance when cut into logs, and so forth.

Mr. WINGO. I am in sympathy with the gentleman's amendment, but I would like to offer an amendment to it.

Mr. STAFFORD. Mr. Chairman, after the explanations made by the gentleman from Michigan [Mr. FORDNEY], and the gentleman from Washington [Mr. JOHNSON], I withdraw the reservation of the point of order.

Mr. LEVER. Mr. Chairman, I still have a point of order reserved against the amendment. Let me ask the gentleman from Michigan if his amendment goes in the Government can not manufacture the timber, but the Government would have the right to sell the trees now under existing law?

Mr. FORDNEY. With this amendment the Government would have the right to take the whole tree out and manufacture and dispose of it, but if thought desirable can sell the timber on the ground where it is cut instead of manufacturing; my amendment would permit this to be done.

Mr. WINGO. I think that amendment is a good one, but let me suggest that after the word "timber" you put in this language: "or such portion thereafter as may be suitable for war purposes."

Mr. FORDNEY. Yes; that is all right.

Mr. WINGO. That would clarify it.

Mr. FORDNEY. I am in sympathy with the amendment.

The CHAIRMAN. The Chair understands, then, that the gentleman from Michigan withdraws his amendment?

Mr. FORDNEY. Yes; I accept the amendment of the gentleman from Arkansas.

The CHAIRMAN. The Clerk will report the amendment proposed to the amendment of the gentleman from Washington by the gentleman from Arkansas.

Mr. LEVER. Which is to be read for information.

Mr. McLAUGHLIN of Michigan. I did not formally offer the amendment putting in the word "cut."

Mr. JOHNSON of Washington. I shall offer that. Make it read "cut or manufactured."

The CHAIRMAN. Without objection, the amendment of the gentleman from Washington will be modified as indicated by him, to which amendment the gentleman from Arkansas offers an amendment, which the Clerk will report, and the gentleman from South Carolina is reserving a point of order against all amendments.

The Clerk read as follows:

Amendment modifying the amendment offered by Mr. JOHNSON of Washington: Insert before the word "manufactured" and after the word "material,' the words "cut or."

Amendment offered by Mr. WINGO to the Johnson amendment: After the word "timber," insert "or such portions of such timber."

Mr. WINGO. Mr. Chairman, I ask unanimous consent that the language may read as it would be if these amendments were agreed to

The CHAIRMAN. Without objection, the Clerk will read the amendment of the gentleman from Washington as it would read if the modifications of the gentleman from Michigan and the amendment offered by the gentleman from Arkansas were incorporated in it.

The Clerk read as follows:

And hereafter, during the existing state of war, the Secretary of Agriculture is authorized to sell without advertisement to any individual, firm, association, or corporation, at a fair value to be determined by him, national-forest timber which he shall find is to be used for war purposes; and he is also authorized under regulations to be prescribed by him, to permit the War Department to take from the national forests such timber as may be needed in the prosecution of the war. The Secretary of War, under regulations to be prescribed by him, is hereby authorized to sell or otherwise dispose of any of the material cut or manufactured from such timber or such portions of such timber which is not suitable for war purposes. Any moneys received on account of such material shall be deposited in the Treasury as provided by existing law.

Mr. HAUGEN. Mr. Chairman, I would like to ask the gentleman a question. The timber or lumber described by the gentleman from Michigan is timber or lumber purchased for war purposes?

Mr. FORDNEY. Yes. The Government is going into the forests with experts, marking such trees as the experts may designate, and selecting them, such as are suitable for aeroplane stock; and upon marking those trees and estimating them—estimating the amount of lumber in the tree where it stands—they pay to the owner of the timber $7.50 per thousand feet for the timber in the tree. Then they take such portion only out of the woods as will make rive spruce.

Mr. HAUGEN. But the amendment provides that the Secretary of Agriculture is authorized to sell without advertisement to any individual, firm, or association.

Mr. FORDNEY. Yes; because the party who takes out this rived spruce while on the ground with his machinery, for that must all be taken out by machinery—lumbering is done on the Pacific coast with steam engines and cables and not with horses or cattle—the party who takes out the rived spruce while his machinery is on the ground will take out the balance of that tree and obtain such price as he can.

Mr. HAUGEN. But this amendment permits the sale of all timber that may be used for war purposes.

Mr. JOHNSON of Washington. I shall explain that as being in accordance with the desires of the War Department. The War Department, through the aeroplane-production section, is letting two kinds of contracts. Some of these are cost-plus contracts, and those contracts are being let to contractors—big loggers. The War Department is begging them to take the contracts.

Mr. MADDEN. What contracts—to get out the wood or to build aeroplanes?

Mr. JOHNSON of Washington. To get out the wood. In those cases the logger is invited to run his logging railroad in and take all the timber——

Mr. HAUGEN. But I understand the amendment here applies to all lumber which is used for war purposes, which might be taken for the building of ships.

Mr. WALSH. What is there in this amendment to restrict that to aeroplane timber?

Mr. JOHNSON of Washington. Nothing whatever. If the necessity arises when they need this timber to build ships, let them have it.

Mr. HAUGEN. Then what is the use of talking about aeroplanes if it applies to all timber?

Mr. JOHNSON of Washington. Because the War Department is working day and night to get aeroplane stock. The other portion of the amendment I have offered provides, if a section is being logged and a logging railroad run to it, that men then—small crews of men, farmers and contractors—will go on farther into the woods and find an individual tree in the forest reserve which has been marked for them by the forester, cut that down, rive it, and cut it into bolts small enough to get it out, and sell it to the Government, without the Forest Service being required to advertise that tree for sale.

Mr. HAUGEN. After all, it resolves itself into this, that we are to sell the lumber without advertising for 30 days?

Mr. JOHNSON of Washington. No; one phase of this amendment lets the War Department take whatever timber it wants—spruce, fir, hemlock, or any other kind—and the other phase of the amendment authorizes the War Department, in connection with the Forest Service, to go in away beyond the railroad or the wagon road and get out individual trees without advertising. The forestry people claim that they are embarrassed by the fact that they can not get the men to follow the advertising process and thus can not help the War Department in its great need.

Mr. HAUGEN. I have no quarrel with the War Department, but I have some question in my mind as to whether we should open the gates to the sale of timber without advertisement. We have found it necessary in the past to guard against that very thing.

Mr. JOHNSON of Washington. I have brought, anticipating that, samples of the forest reserves' advertisements. I can tell him how the contracts run and how minimum prices are fixed. They have never had the trouble the gentleman anticipates, and in this war emergency we have got to trust the war chiefs.

Mr. SMITH of Michigan. Will the gentleman yield?

Mr. JOHNSON of Washington. I will.

Mr. SMITH of Michigan. I wish to inquire where these square timbers which are split or rived are to be manufactured?

Mr. JOHNSON of Washington. They are in the woods.

Mr. SMITH of Michigan. They split them into narrow or thin enough planks——

Mr. JOHNSON of Washington. They are reduced to long blocks.

Mr. SMITH of Michigan. Where are the blocks manufactured after that?

Mr. JOHNSON of Washington. Demand is made that they be delivered at the nearest road or logging railroad.

Mr. SMITH of Michigan. What becomes of them then?

Mr. JOHNSON of Washington. They are taken from there by the War Department probably to Rochester, N. Y.

The CHAIRMAN. The time of the gentleman has expired. The gentleman from South Carolina——

Mr. MONDELL. Mr. Chairman, I ask unanimous consent that the gentleman's time be extended one minute.

The CHAIRMAN. The Chair recognized the gentleman from South Carolina [Mr. LEVER].

Mr. LEVER. I would like to sound out gentlemen as to whether a point of order is going to be made on this proposition. If so, we are losing time. How does my colleague on the committee feel about this?

Mr. HAUGEN. I did not raise the point of order.

Mr. LEVER. Before anyone makes the point of order I would like——

Mr. McLAUGHLIN. I think no one is going to make the point of order.

Mr. MONDELL. I think I shall make the point of order——

Mr. HOWARD. I reserve the point of order.

Mr. MONDELL. Has the gentleman from South Carolina the floor?

Mr. LEVER. I will take the floor.

The CHAIRMAN. The Chair recognized the gentleman from South Carolina.

Mr. MONDELL. Will the gentleman yield to me for a moment?

Mr. LEVER. I yield.

Mr. MONDELL. As I understand it, the gentleman from Washington desires this provision solely as it relates to material needed for aeroplanes, but his amendment is of the broadest kind and character, and would embrace anything and everything that by any possibility could be held or believed or conceived or be suggested by anyone in any way as directly or indirectly to be used for war purposes. That is a rather dangerous provision to put into a bill like this without careful consideration and consultation.

Mr. JOHNSON of Washington. It gives the Secretary of War the right to say.

Mr. MONDELL. It gives the Forest Bureau the right to sell practically everything in the way of forest material without advertisement—that is what it amounts to—in time of war. If the gentleman has no thought in mind except aeroplane material, why does he not confine the amendment to aeroplane material?

Mr. JOHNSON of Washington. For the reason, if the gentleman will do me the honor to listen, the gentleman has been in Congress long enough in recent years to know that in order to get an amendment considered on this floor it has, almost in every case, to have the approval of the department behind it, and this amendment is from the Department of Agriculture.

Mr. MONDELL. Do I understand the Department of Agriculture does not want to do this with regard to aeroplane material unless they may have the bridle thrown off entirely?

Mr. JOHNSON of Washington. The gentleman misunderstands entirely, and I hope that during this war emergency he will not do any department an injustice. The Forestry Service sets timber values. No contract has ever been made so low for timber out there that there has ever been any occasion for criticism. They want to make contracts that will lead to other contracts, so as to induce a man to build a logging railroad up, say, a stream to get all spruce within reach, while other individual contractors can go on far into the woods, rive and drag our spruce blocks from localities that will not be reached by a road in the next 50 years.

Mr. MONDELL. The gentleman's iden is that the Forest Service should be relieved of the necessity of advertising in the matter of most of its sales?

Mr. JOHNSON of Washington. As a war emergency only, as the resolution says.

Mr. FORDNEY. Will the gentleman yield?

Mr. MONDELL. Yes.

Mr. FORDNEY. Let me say, in answer to the gentleman from Wyoming, that no man on God's green earth can tell what the balance of the tree that is not made into aeroplane stock is going to be manufactured into. If he does know, he knows more than any man that God Almighty has made who is in the lumber business. The balance of that tree might be manufactured into material to make dry-goods boxes or could be used for building ships or for railroad ties or for the construction of any kind of building that could be constructed out of wood, and if he can describe what that timber is to go into and what it shall be manufactured into, let him name it now.

Mr. MONDELL. Will the gentleman yield?

Mr. FORDNEY. I will yield, although I think the gentleman's proposition is without merit.

Mr. MONDELL. The gentleman talks about boxes and other kind of material for which these trees or parts of trees may be used. If that is the case the amendment would be of no value or use whatever. Boxes are not war material.

Mr. FORDNEY. We can not both talk at once. I want to say to the gentleman there is not more than 10 per cent of the product of any spruce tree that will make rived spruce, out of which to make aeroplanes. What are you going to do with the other 90 per cent, can you tell?

If you can, you can do more than I can. It may be worked into bridge timber, it may be put into railroad ties, it may be put into inch lumber, it may be put into dimension stuff, 2 by 6, 2 by 8, 2 by 10, square timber. Anything outside of lumber can be made. Can you tell? Of course you can not. Therefore, 90 per cent of that tree must be put into something or it

must be wasted, and unless you provide some way for the Government to dispose of 90 per cent of the tree, you are going to pass a law that will compel the wasting in the woods of 90 per cent of the tree. Ship timber is not made in this way. On Gray's Harbor, Wash., where those contracts are now being put into effect, they manufacture 700,000,000 feet of lumber a year. Not one-tenth of that timber will be called for shipbuilding timber. Any quantity of timber may be called for by the Government for all other purposes for which the Government is using timber, except rived spruce for the manufacture of aeroplanes.

Mr. LEVER. Mr. Chairman, we could talk here almost indefinitely on this. I think members of the committee know whether or not they wish to press the point of order. I will say to my colleagues on the committee that I talked with a member of the Forestry Service this morning, and he told me that the amendment as originally proposed by the gentleman from Washington [Mr. JOHNSON] was prepared by the legal department of the Department of Agriculture, and the Forestry Service feels there is a very great need for legislation. Why they did not submit it to the committee in the regular way I do not know.

Mr. JOHNSON of Washington. They thought the specified plan of advertising would be sufficient, and I did not appear before the committee on that account. The matter of advertising for this spruce has been given six months' trial in this emergency, and has not brought in enough. Now the War Department has taken hold, and put an agent out there. When it was thought that the bringing in of spruce by the method of advertising would be sufficient, there was no occasion to call for an amendment.

Mr. LEVER. I made my statement and said it was my intention to withdraw the reservation of the point of order, but if any Member desires to renew the reservation he may do so.

Mr. MONDELL. I desire to renew the point of order, Mr. Chairman.

Mr. HOWARD. I wanted to ask the Chair if he observed the point of order I made. I thought it had been reserved. Now, to save time, I am going to make the point of order, and if this thing is right it can go on in the Senate.

The CHAIRMAN. The Chair is ready to rule. In the opinion of the Chair this amendment is clearly subject to the point of order, and therefore the Chair sustains the point of order.

Mr. JOHNSON of Washington. I move to strike out the last word. I suspected that an uninformed somebody on the floor of this House might make a point of order against this urgent and necessary war legislation, and I presume that the Member who did it will be the first to go out into the country and cry "Let us cut red tape."

Here is a proposition that is hard to handle. Both the War Department and the Department of Agriculture have complained that they are embarrassed by their inability to make the pending laws fit the necessity for getting out their spruce. It is not an easy matter to coordinate the governmental departments, even on a matter as important as this.

Mr. HAUGEN. Will the gentleman yield?

Mr. JOHNSON of Washington. I yield.

Mr. HAUGEN. The amendment does not limit the sale of the lumber for the purposes the gentleman has discussed. Now, then——

Mr. JOHNSON of Washington. I think it does. It says "for war purposes."

Mr. HAUGEN. "War purposes" takes in the building of ships and everything that might come in the prosecution of the war.

Mr. JOHNSON of Washington. If it comes to that, why should not the Government use timber in the Government's own forest?

Mr. HAUGEN. The gentleman knows that it is customary in any department, with any contract, even of small amount, to advertise for bids.

Mr. JOHNSON of Washington. Now, then, Mr. Chairman, right when this point of order is being made, I have received this telegram:

> Legislation permitting prompt action in securing timber from Federal reservations, and authority to dispose of that portion of timber not required for aircraft purposes, will be of great assistance to this office in supplying emergency requirements in connection with our air program——

And so on. It says further:

> It is not practicable to have the desired timber logged. The operation becomes entirely too expensive to attract any commercial concern. Any assistance in this matter, I can assure you, will be of great value to this office.

Col. B. P. Disque, of the United States Army, was sent out there by this Government to urge our people to work day and night to get the spruce with which to make these thousands of aeroplanes you are bragging about, and that are going to fly into Germany. He has been placed in entire charge of the timber situation in the Northwest. He is crippled by red tape.

Mr. HAUGEN. I understood the language to be "to sell or otherwise dispose."

Mr. JOHNSON of Washington. That phrase has just been inserted by amendment of the gentleman from Arkansas [Mr. WINGO]. I do not know just what its effect will be.

Mr. HAUGEN. In what way do you propose to dispose of this lumber than by sale?

Mr. JOHNSON of Washington. I do not know. I believe the passage of this amendment will result in putting into the hands of the War Department a sufficient quantity of spruce, even if it is necessary to continue the sending in of regiments of forestry soldiers, as is now being done.

Mr. ROBBINS. If it were limited to aeroplanes, would that meet the objection?

Mr. JOHNSON of Washington. I do not know. I have tried every way I could to meet various objections. The main object is to cut the red tape that is delaying the aeroplane program.

The CHAIRMAN. The time of the gentleman from Washington has expired.

Mr. HOWARD. Mr. Chairman, I just wanted to say a word in explanation of my making a point under the circumstances, as the gentleman from Washington has in part explained. This amendment, even if it was drawn by the legal department of the Department of Agriculture, was very loosely thrown together. I went up and took care to read it. Now, under this amendment, if they want this spruce for aeroplanes and nothing else, they can get it, but I do not propose under a loose-jointed amendment like this to see the great masses of the forests of this country absolutely depleted.

Mr. JOHNSON of Washington. This is the only Federal forest of spruce suitable for aeroplane stock in the United States.

Mr. HOWARD. It does not make any difference where it is. I would say the same thing if it were in Georgia, or in Alabama, or in any other State. I am talking about a business-like administration of the forestry affairs of this Nation by those people who pretend to speak for them.

Mr. JOHNSON of Washington. When the gentleman is dead and gone, probably the spruce will still be there.

Mr. HOWARD. I am like the gentleman from Michigan; I think two gentlemen can not talk at the same time. The gentleman is very enthusiastically supporting his amendment. But here is what could be done with respect to those contracts made out there on the Pacific coast by these big lumbermen for those tremendous spruce trees. They could go there and take one log out of each tree and use it, and absolutely devastate that forest, and use the balance of it for their commercial purposes under this amendment.

Mr. JOHNSON of Washington. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. I can not yield.

Mr. JOHNSON of Washington. Will not the gentleman yield in the interest of fairness? The gentleman wants to be fair?

Mr. HOWARD. Of course I mean to be fair, and I think I am fair.

Mr. JOHNSON of Washington. How could they do as the gentleman suggested and follow the War Department's specifications about getting out the spruce?

Mr. HOWARD. It is not a question of how they would do it. It is a question of what they would do. They are getting here under a private contract, without advertisement and without competition, the right to go into a national forest and cut any number of trees they want, and use any amount of that timber; an infinitesimal amount of it, or a third of it, or a half of it, or any other part of it, and use it for commercial purposes. Then these gentlemen can come in and take advantage of their patriotic offer to cut timber for the construction of aeroplanes, and take 99 per cent of the timber which they get for commercial purposes and use it. It is not for the Government of the United States.

If you want this particular thing to be done, perfect an amendment that will protect these great forests of trees out on the Pacific coast, and not let those men go in there and take advantage of the situation to wring profits out of it.

Mr. TILSON. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. Yes.

Mr. TILSON. Has not the Government the right to go in there now and use 10 per cent of that timber, and waste the remainder of it?

The CHAIRMAN. The time of the gentleman from Georgia has expired.

Mr. MONDELL. Mr. Chairman——

Mr. LEVER. Mr. Chairman, I must insist that we move along here a little bit. This matter has been passed over. We have had two amendments offered.

The CHAIRMAN. The Chair will state the situation. This part of the bill was passed over when it was reached in its regular order, and unanimous consent was granted to the gentleman from Washington [Mr. JOHNSON] to return to it to offer an amendment. The gentleman from Washington has called that amendment up. A point of order was made to it, and the point of order has been sustained against it, and the proper thing for the committee to do is to proceed to read the part of the bill where we stopped.

Mr. MONDELL. Mr. Chairman, was a point of order made, or was it simply withheld?

The CHAIRMAN. It was made by the gentleman from Georgia [Mr. HOWARD].

Mr. LEVER. It was made and sustained.

The CHAIRMAN. The Chair is sure that the members of the committee will all agree that the Chair did not try to cut off legitimate discussion.

Mr. MONDELL. I understood the gentleman from Georgia withheld the point of order.

Mr. LEVER. The gentleman from Georgia made the point of order, and the Chair correctly sustained the point of order.

Mr. MONDELL. Mr. Chairman, I believe I am recognized.

The CHAIRMAN. The Chair is of opinion that the amendment is not in order until we reach that part of the bill where we left off.

Mr. MONDELL. I understood the Chair recognized me.

Mr. HAUGEN. Mr. Chairman, I ask unanimous consent that the gentleman from Wyoming may have five minutes.

Mr. JOHNSON of Washington. Mr. Chairman, the gentleman from Wyoming will admit, I think, that——

Mr. MONDELL. The gentleman from Wyoming can get five minutes by moving to strike out the last word. Five minutes is not any longer now than it will be hereafter.

Mr. JOHNSON of Washington. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. JOHNSON of Washington. Mr. Chairman, I would like to know if I can ask unanimous consent to withdraw these amendments and return again to this section of the bill for the purpose of offering a perfected amendment?

The CHAIRMAN. The Chair thinks the amendment was withdrawn by the making and sustaining of the point of order against it.

Mr. JOHNSON of Washington. Then I ask leave to offer the amendment again before the bill is disposed of—to offer an amendment relative to this use of spruce in national forests for war purposes.

The CHAIRMAN. The gentleman from Washington asks unanimous consent to offer, before the bill is disposed of, an amendment relative to the supply of spruce in national forests for war purposes. Is there objection?

Mr. LEVER. Reserving the right to object, Mr. Chairman, I will state to the gentleman from Washington that I shall not object, but I do not want him to ask leave to go back until we have completed the bill.

Mr. JOHNSON of Washington. I will try to perfect the amendment in the meantime.

Mr. HAUGEN. If the gentleman prepares an amendment, let him submit it to the chairman of the committee; and if it is thought to be wise, without thrashing the matter out again, to accept the amendment, that can be done.

The CHAIRMAN. The gentleman from Washington asks unanimous consent that after the bill has been read through he will be permitted to return to this section and offer an amendment pertaining to the obtaining of stock from national forests, with all rights to make points of order against the amendment reserved. Is there objection?

Mr. BORLAND. Reserving the right to object, Mr. Chairman, the suggestion is made here that when the gentleman gets his amendment prepared, if the bill is not then completed, he can ask unanimous consent to recur to the proper place to offer his amendment. There is no necessity for asking unanimous consent now to offer an amendment that is not yet prepared. I think the gentleman can get unanimous consent to offer it when he has prepared it.

Mr. JOHNSON of Washington. There can not be any valid objection to getting unanimous consent now. I will prepare an amendment; I will have it rewritten.

Mr. BORLAND. I object.

The CHAIRMAN. The gentleman from Missouri objects.

Mr. MONDELL. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Wyoming moves to strike out the last word.

Mr. MONDELL. Mr. Chairman, I do not believe there is a gentleman in the floor or a member of the committee who is not favorable to such action as may be necessary to expedite the taking and securing and manufacturing of material needed for aeroplanes. None of us, until this matter was presented to-day, was aware of the fact that there was any difficulty in the procurement of this material. This is the first we have heard of it. For my part, I should be delighted to support an amendment, properly guarded, that would serve the purpose of aiding and expediting the securing of this class of material.

But, Mr. Chairman, we have had some rather unhappy experiences so far in this war in the matter of contracts and agreements under wide authorizations. We have not been saying much about them. It is not proper that we should; but we do not want to have that kind of thing increase and multiply as it undoubtedly would under this provision. As the gentleman has drawn his amendment it is as wide as the heavens. It reaches from horizon to horizon, and it would practically authorize the Forest Service to sell any and all material from the forests without advertisement. The gentleman does not want that.

Mr. JOHNSON of Washington. For war purposes.

Mr. MONDELL. "War purposes" is an all-embracing term in time of war. There is very little material used that in one way or another, under some form of construction, could not be held to be intended, directly or indirectly, for war purposes—ships, cantonments, and all of the buildings which the Government might need here, there, or elsewhere, or material which any contractor under the Government might claim to use for war purposes.

Mr. CALDWELL. Does not the gentleman realize that the reason a man throws off his coat when he goes to fight is because he wants to be unfettered? Then why would the gentleman fetter the Government, that is fighting for its very existence?

Mr. MONDELL. That all sounds very well, but it does not get anywhere or mean anything. A cavalryman going into battle would not throw the bridle off of his horse, if he had any sense. Of course, there might be spectacular gentlemen who would want to do that in order to cut a flurry and a figure, but sensible men want to guide things, even in time of war. The gentleman can very easily, by a slight modification of this amendment, confine it to timber needed in whole or in part for the manufacture of aeroplanes, and if he will do that I do not think anyone will have any objection. I can understand how the Forestry Bureau would be very glad to have the opportunity to sell as they see fit.

Mr. JOHNSON of Washington. Do they not sell it as they see fit now? Do they not specify the price in every advertisement?

Mr. MONDELL. If there are no regulations in any way hampering them in their sales, what necessity is there for any further amendment?

Mr. JOHNSON of Washington. Except time. Now, here is a contract let for 5,000,000 feet of spruce a month. That means the slaughtering and cutting down of 50,000,000 feet a month, of which 45,000,000 feet will lie unused in the woods. Is that conservation in any form? That is why this amendment is offered.

Mr. MONDELL. We do not aid the war in any way.

Mr. JOHNSON of Washington. The gentleman may think he does not.

Mr. MONDELL. And we do open wide the door and the opportunity for scandal if we relieve the bureau, as we would under this amendment, of obligation to advertise sales.

Mr. JOHNSON of Washington. Would the gentleman rather this spruce would stay in the forests for the next 50 years, or would he rather have it put to some use?

Mr. MONDELL. Oh, no; and the gentleman knows that it is not necessary that it should. It is not necessary to set fire to all the woods in the Northwest because somebody wants to burn a strip somewhere to stop forest fires. It is not necessary to invite all sorts of scandals in the sale of material in order to allow aeroplane material to be sold without advertisement. It has not been generally necessary to do that even during the war in the other and wider activities of the Government.

The CHAIRMAN. The time of the gentleman has expired. The Clerk will read.

The Clerk read as follows:

For inquiries in regard to systems of road management throughout the United States and for giving expert advice on this subject, $40,040.

Mr. WALSH. Mr. Chairman, I move to strike out the last word for the purpose of asking the chairman of the committee with reference to this item and the following item. What is the difference between giving expert advice in regard to sys-

tems of road management and giving expert advice with regard to road building and road maintenance? Are there two different bureaus or officials? What is the difference?

Mr. LEVER. In a general way, the character of the work done under this item is in the laboratory. It is their research work and not their field work. The only field work they do here is in giving advice to States as to the best method of organizing for road purposes.

The next item which the gentleman refers to, investigating the best methods of road making, is really their field work.

Mr. TAGUE. Mr. Chairman, I am going to ask the indulgence of the House for just a moment to make a statement out of order and not on this bill now before the House. This morning our good friend from Michigan [Mr. FORDNEY], for whom every Member of this House has the greatest respect and admiration, made a statement in relation to the collector of internal revenue in the city of Boston. I was not present on the floor of the House at the time. If I had been I would have made a reply at that time, and would not take the time of the House now, but for the fact that I shall be called out of town to-morrow and therefore will be unable to be present to do so. I have talked with our good friend [Mr. FORDNEY] and have told him I wanted to make a statement. He has consented that I should do so. In the gentleman's statement this morning he read an advertisement in the Boston Herald, which advertised that the collector of internal revenue in the city of Boston was to give lectures on the income tax, and for these lectures they were to charge a fee of $4.

Naturally the gentleman from Michigan [Mr. FORDNEY] objected to that, as any Member of this House would feel like doing, and he gave vent to his feelings on the subject of any member of the Government doing so.

I want to say to this House—and I will ask any of the Members to verify what I have to say by calling up the collector of internal revenue, Mr. Roper, of whom Mr. FORDNEY spoke so highly, and I repeat what Mr. Roper has said to me—that the collector of internal revenue in Boston is one of the most efficient, trustworthy, painstaking officials in this Government. He has worked untiringly to build up his department to a high state of efficiency, and he has done everything in his power, not only himself but with his entire office force, to give to the public every bit of information and the best service possible. For that he has been commended by the officials here at Washington.

Now, as to this advertisement, Mr. Malley himself has given notice in the newspapers of our city that he and his assistants are willing to go to any chamber of commerce, any board of trade, any business organization and explain to the men of his district the income tax, and tell them what the law is and what it contains. He has been doing this and has been paying his expenses out of his own pocket. His men have been doing the same. The Bentley School of Accounting and Finance, taking advantage of the opportunity of having some one lecture upon this question, asked Mr. Malley if he would give a course of four lectures to the pupils of the Bentley School in the city of Boston, and he agreed to do so. He was surprised to learn that this organization had advertised these lectures, for which they were going to charge a fee. As soon as he found it out, and before the lectures were given, he sent for Mr. Bentley, compelled Mr. Bentley to withdraw the advertisement, and in the Boston Press the following Saturday compelled him to print a further advertisement, saying that Mr. Malley would not charge any fee and would not give the lectures if any fee was to be charged.

I want to say in fairness to Mr. Malley that he has won the respect of every business man in his district. I can not speak too highly of him as an official, and I know that his superiors will say, as I say, that he has given untiring of his own time to any business organization or any organization in the entire district, and also the time of any of his corps of assistants to go out and explain the income tax free gratis and at his own expense, outside of business hours. To show how he is doing this I will place in the record a news article from the Boston Globe, Friday, January 25, 1918, and another from the Boston Herald, of Wednesday, January 30, 1918, which printed the Bentley advertisement:

[From the Boston Globe, Jan. 25, 1918.]

MALLEY TO EXPOUND INCOME-TAX PUZZLE—ANNOUNCES FREE LECTURES AT CITY CLUB NEXT WEEK—COLLECTOR TO HELP PUBLIC MASTER FEDERAL REQUIREMENTS.

A course of six free public lectures on the Federal income tax will be given from 10 to 12 each morning next week by Collector John F. Malley at the Boston City Club. He will give the official information needed by individuals in meeting the Government's requirements.

Everybody is invited by the Boston City Club and by Collector Malley to come and get information directly from the internal-revenue collector. In addition to his personal services each morning Collector Malley will have present a corps of deputies to assist in the preparation of Federal returns. All you need to bring is a memorandum of your 1917 income and expenditures.

"The people are now awake to the requirements placed upon them by the new war revenue law," said Collector Malley in announcing the lecture course. "They are realizing that the filing of the returns is a purely personal duty explicitly imposed by Congress on individuals and corporations.

"The Boston City Club has generously tendered me the use of its big banquet hall. I have accepted this public-spirited offer and will personally deliver the talks and answer all questions between the hours of 10 and 12 each morning.

"This is the only course of lectures I have arranged to deliver personally. Any published announcements of private courses to be delivered by me or under my supervision or auspices are not authentic.

"There are severe penalties for failure to meet income-tax requirements. With the opportunities I am offering for information and assistance there will be slim excuse for the man or woman who after March 1 is found to be a delinquent."

[From the Boston Herald, Jan. 30, 1918.]

WILL LECTURE ON INCOME-TAX LAW—COLLECTOR MALLEY TO SPEAK AT CITY CLUB TO-DAY.

Collector of Internal Revenue John F. Malley will talk on the income-tax law requirements relating to executors, administrators, trustees, and other fiduciaries at to-day's free public lecture at the City Club at 10 o'clock. The hour between 11 and 12 o'clock will be given up to quizzes by those who desire further information relative to a particular requirement, and the collector, who has become a regular encyclopedia on income-tax law, will answer all queries.

The series of free public lectures is given by the collector in order that everyone may realize what responsibilities the Government will exact from those who come within the income-tax law. Everyone who earned a good salary or was successful in his business or profession will be compelled to make a return to the Government and pay a tax.

Collector Malley told his hearers yesterday that he and his deputies will inform the people of Massachusetts regarding the law, but that it is the duty of the individual to attend to it. If he waits until the last week he may have to take his own chances.

Yesterday Collector Malley had a big class of lawyers, trustees, bookkeepers, and others who will be called upon to make up the income-tax returns, and they volleyed him with questions. He told them that the Government would play entirely fair but would expect fair play in exchange, and any attempt to "hold out" would be discovered and the punishment fitted to the case.

Chief points about the income-tax law are that every person who earned $1,000 last year and had no wife or husband to support will have to file a statement. Any person with a wife or any woman with a husband who earned $2,000 or more will have to file a return, and any person who does not live with wife or husband is classed as single and comes within the $1,000 class.

There are several perplexing angles to the law, but the collector is holding a free lecture course to explain away the perplexities.

I feel, in fairness to Mr. Malley, that I should make this statement, as I know my good friend from Michigan is ready to accept what I say to him, because I have gone to the pains of calling Mr. Malley up by long-distance telephone, and I am stating the facts as he stated them to me.

I know that Mr. Malley has been giving these lectures. I heard him before an organization in my district where he lectured on the subject. He is going to-night to Springfield to speak before the chamber of commerce of that city on the question. I want the House and the country to know that this man is a patriotic citizen of this country and is doing his duty faithfully by his country. [Applause.]

Mr. FORDNEY. Mr. Chairman, I ask unanimous consent for one minute.

The CHAIRMAN. The gentlemen from Michigan asks unanimous consent to address the committee for one minute. Is there objection?

There was no objection.

Mr. FORDNEY. Gentlemen of the House, I made the statement this morning from a public ad which had been sent to me by a friend from Boston. After the gentleman from Massachusetts [Mr. TAGUE] communicated by telephone with Mr. Malley he made the statement to me that he has made here in the House. I do not want to do Mr. Malley an injustice. If it is true that he declined to lecture before that school, where an admission fee was charged, I do not want to do him the injustice that my statement would do him, and therefore I ask unanimous consent that I be permitted not to print in the RECORD my remarks of this morning. [Applause.]

The CHAIRMAN. The gentleman from Michigan asks unanimous consent to withhold from the RECORD his remarks of this morning. Is there objection?

There was no objection.

The Clerk read as follows:

For investigations of the chemical and physical character of road materials, $51,220.

Mr. ROBBINS. Mr. Chairman, I move to strike out the last word, for the purpose of asking the chairman of the Committee on Agriculture a question rather than to impart any special knowledge about this section of the bill. In Pennsylvania we have a well-organized highway department headed by a commissioner. The entire State is districted; over each district there is a local superintendent. The information has

reached us in my State that the Government is frowning upon all manner of new work, and especially on public roads, and of the character of works such as new structures is not to be carried forward during the coming season, and that the building and construction of highways further than the maintenance of those now built and required to keep up intercourse between the people. If that is true, why make these enormous appropriations? I know it is also asserted that the commissioner of banking is frowning upon any loans that are made to contractors that are undertaking new buildings the purpose being to discourage any new enterprises so that the entire energy of our people and capital of the country may be devoted to the prosecution of the war and its successful conclusion.

I understand that highways are among the first public improvements to be cut off, frowned down, and construction thereof prevented as far as possible during the coming season. If that is true, what is the necessity for these large appropriations to the highway department? I do not mean by this to say that I believe it is right, for I think that highway building should go on as much as possible. I know that in Pennsylvania, where we have embarked on a great scheme of highway improvement throughout the Commonweaith, a part of the roads are under the State supervision, laid out by State engineers, and the whole work under the protection of the State, and are to be built and maintained as State roads, and we are anxious to go on with the work, but if the General Government is going to take the position that enterprises of this kind will not be carried forward, I should like to know it, and why it is necessary, if that is so, to appropriate these large sums of money. I do not approve of it, but I would like the information. The very last work that should be curtailed and stopped is the building and improving of our public roads. Let us, by all means, continue most vigorously the improvement of our public highways.

Mr. LEVER. Mr. Chairman, as far as I know there is none, and no testimony before the committee shows that there is any purpose on the part of anybody to discourage road building in the United States. If there is such a purpose, I wish to put myself in hearty agreement with the suggestions of the gentleman from Pennsylvania, who has just taken his seat. If we are going to distribute our farm products economically and quickly during the war or after it, we must have a better system of rural roads. But even if the statement were true, the item which is immediately under consideration is an item for testing road material that may be sent into the laboratory in Washington, and the item immediately following is for the purpose of testing road materials in the field. Of course, the small sums of money that are carried in this bill for road purposes could not build many roads, and they are not for that purpose.

Mr. LONGWORTH. Mr. Chairman, I rise to oppose the amendment, and I want to ask the gentleman from Pennsylvania what the ruling is as to discouraging loans by the Federal Reserve System for the purpose of erecting new buildings?

Mr. ROBBINS. I can only say, like information that reaches most Members of Congress, I have not read the ruling, but I heard that such a ruling had been made.

Mr. LONGWORTH. I have heard so vaguely, but I have not been able to find it.

Mr. ROBBINS. I have not been able to find it in print, but I understood from a banker in Greensboro, my native place, that that was a fact.

Mr. BORLAND. I think, if the gentleman will yield to me, that I can throw some light on it. I think the whole impression has arisen from the fact that a short time ago when the coal shortage began to be felt there was an order made by the War Industry Board or priority committee that open cars should not be used for sand, brick, cement, and other material until the coal shortage was at an end. But there was no discouragement of the general contract business; it was a priority order that cars adapted for coal should be used for coal and nothing diverted for sand, cement, and brick.

Mr. ROBBINS. That is not the ruling to which I refer.

Mr. LONGWORTH. That is not the ruling the gentleman from Pennsylvania has in mind.

Mr. BORLAND. What other ruling is there that the gentleman can point out?

Mr. ROBBINS. The ruling that I refer to is the ruling that discourages banks from making loans to contractors who contemplate using the money to embark upon new constructions that are not regarded as necessary.

Mr. BORLAND. If there is any such ruling, I hope the gentleman will put it in the RECORD.

Mr. LONGWORTH. There has been a rumor of such a ruling.

Mr. SHALLENBERGER. It has also been in the public press.

Mr. LONGWORTH. But it has been in a very vague form. The purpose of my inquiry is to ascertain whether there has been a ruling which prevents Federal reserve banks from loaning money to contractors, and I would be very glad if any gentleman here could give me some information on the subject.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn, and the Clerk will read.

The Clerk read as follows:

For investigating and reporting upon the utilization of water in farm irrigation, including the best methods to apply in practice; the different kinds of power and appliances, and the development of equipment for farm irrigation; the flow of water in ditches, pipes, and other conduits; the duty, apportionment, and measurement of irrigation water; the customs, regulations, and laws affecting irrigation; for the purchase and installation of equipment for experimental purposes; for the giving of expert advice and assistance; for the preparation and illustration of reports and bulletins on irrigation; for the employment of assistants and labor in the city of Washington and elsewhere; for rent outside of the District of Columbia; and for supplies and all necessary expenses, $82,440.

Mr. ROSE. Mr. Chairman, I move to strike out the last word. The discussion of the question of appropriations for the building of roads by the gentleman from Pennsylvania [Mr. ROBBINS] brings to my mind a meeting with the committee on roads representing the Chamber of Commerce of Johnstown. We have a live chamber of commerce in our city, and its members are very enthusiastic in the construction of good roads. Many of you know that there is located in that city one of the largest industrial plants of the country, and that it is now largely engaged in the manufacture of munitions for the Government. Owing to the present congestion in railroad traffic, the management of the plant is at times seriously handicapped in procuring the necessary materials for the conduct of the works. At the meeting referred to the question was asked whether or not the Government would assist in the construction of a road leading from Johnstown to Jenners in Somerset County, a distance of about 18 miles, so as to connect with the Lincoln Highway. The statement was made by the superintendent of the Midvale Steel Co. that if such a road was constructed the steel company would operate a line of trucks between Pittsburgh and Johnstown so as to facilitate the movement of materials required for the making of munitions and other things. I have undertaken to ascertain upon what basis the Government would render assistance, and find that the Post Office Department, the War Department, and the Agricultural Department are permitted to build roads under certain conditions. The Post Office Department may use money to establish postal express or motor routes; the War Department can appropriate money to improve roads adjacent or leading to military reservations, so that it is necessary for us to look to the Agricultural Department for present aid. Our people should have the road mentioned and they are willing to do their share in its construction.

Mr. CANDLER of Mississippi. Mr. Chairman, of course the method pursued in matters of that kind is that you have to start with your highway commissioner in your State. If the highway commissioner in the State will adopt a certain road and approve it and send that recommendation in to the Secretary of Agriculture and he approves, then the State, county, or municipality, or whatever it may be, furnishes 50 per cent of the money and the Government furnishes 50 per cent of the money under the general road act.

Mr. ROSE. Will the gentleman say that the consent of the highway commissioner of the State of Pennsylvania will bring about the construction of that road?

Mr. CANDLER of Mississippi. It will contribute to it. It has to be first approved by the State Highway Commission.

Mr. ROSE. Well, my information is that the matter is now in his hands.

Mr. CANDLER of Mississippi. When he approves it he sends the recommendation to the Secretary of Agriculture, and if the Secretary of Agriculture approves it the Government contributes 50 per cent and the State 50 per cent.

Mr. SNYDER. Does the gentleman from Mississippi know of any particular instance where the whole modus operandi has been carried out and a single road built since we passed the Federal road act?

Mr. CANDLER of Mississippi. I know some in course of construction in my own district.

Mr. SNYDER. I have not heard of any before, and I am glad that it is in the gentleman's own district.

Mr. ROSE. We have the largest city in the nineteenth congressional district of Pennsylvania, and Cambria County, where it is located, has the poorest roads in the State. I understand that the proposition mentioned by the gentleman from Mississippi has already been complied with; that it has been presented to the highway commissioner of the State. If the application be approved, then, am I to understand that the Agricultural Department will fall in line and make its proper contribution?

Mr. CANDLER of Mississippi. As I stated a moment ago, if the State highway commissioner adopts it as one of the projects in that State and sends it up to the Agricultural Department and the Secretary agrees to it, approves it, then the Government contributes 50 per cent of the cost.

Mr. ROSE. Now, I think I can see some daylight for us.

Mr. FARR. What are the county officials doing with the roads in Cambria County?

Mr. ROSE. For answer to the gentleman from Pennsylvania [Mr. FARR], let me say that the officials of Cambria County will gladly do their part, and the townships affected will do their part, and I believe that the highway commissioner will approve the plan.

Mr. CANDLER of Mississippi. That is not sufficient. You have to get the approval of the State highway commissioner in Pennsylvania.

Mr. KREIDER. Mr. Chairman, I move to strike out the last word.

Mr. LEVER. Mr. Chairman, I ask unanimous consent that all debate on this paragraph and all amendments thereto close in five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. KREIDER. Mr. Chairman, I rise to ask a question of the gentleman from Mississippi. I would like to know the cost of that road being built, where the Government pays 50 per cent.

Mr. CANDLER of Mississippi. I am not advised as to the full cost of it. I do not know what it is to cost a mile. It was adopted as a project.

Mr. KREIDER. If the contract is let, there must be a fixed price.

Mr. CANDLER of Mississippi. I am not advised as to the details in reference to contracts or in reference to what work is being done. All I know is this: The State Highway Commission of Mississippi adopted this, which is project No. 1 in the State, and it goes across from Tupelo, Miss., across part of Lee County, across Itawamba County into Alabama. The State highway commission adopted it and then put it up to the Secretary of Agriculture and he approved it.

Mr. KREIDER. What I am interested in is to know the cost of that road.

Mr. CANDLER of Mississippi. That I could not state, because I am not advised.

Mr. KREIDER. I want to answer the gentleman from Pennsylvania and possibly those who do not understand how this law operates. The Federal Government will contribute toward the building of a road in Pennsylvania or any other State. The Federal Government divides the appropriation made by Congress to the several States. However, first, I might say each State is entitled to that allotment. Pennsylvania has its share. That money can be used for the building of what is known as a Federal-aided road. First, the route and method of construction have to be approved by the State highway department, then by the Federal authorities. If the cost of the road does not exceed $20,000 a mile the Federal Government will pay 50 per cent, the State pays 25 per cent, and the county 25 per cent. If that road, however, costs over $20,000 a mile the Federal Government will not pay to exceed $10,000 a mile for their share.

If the road costs $35,000 a mile, as it is estimated the road will cost which is under consideration through Lebanon County, Pa., then the Federal Government will not pay over $10,000 a mile, and the $25,000, which is the excess estimated cost, will have to be divided between the State of Pennsylvania and the county of Lebanon. There are 20 miles under consideration now, at an estimated cost of $35,000 per mile, or a total of $700,000. Of this the Federal Government would pay $200,000, the State of Pennsylvania $250,000, and Lebanon County $250,000. Now, my objection to this whole proposition is this, that I understand that the Government will not approve of any road that will cost what I consider a reasonable amount. That road through Lebanon County, 20 miles, is the old Reading and Dauphin Turnpike. It should not cost over $10,000 to $15,000 per mile to construct a substantial road on that macadam roadbed; but the Government will not, it seems, approve of a road constructed at a cost of less than $35,000 per mile, which places a burden of $250,000 on little Lebanon County for 20 miles of road. In effect, the proposition to Lebanon County is, "You must pay $250,000 toward the building of this road and take the $35,000 per mile road or nothing."

Mr. BYRNES of South Carolina. If the gentleman will permit, what material is it that costs $35,000 a mile?

Mr. KREIDER. I asked the State highway commissioner, and he told me it would be constructed of limestone and cement.

Mr. BYRNES of South Carolina. Does the gentleman consider that a reasonable cost?

Mr. KREIDER. I say unreasonable at $35,000 a mile.

Mr. BYRNES of South Carolina. I think so.

Mr. KREIDER. My objection is that we must either take that or nothing.

Mr. ROSE. Of course, since the building of highways several years ago material has advanced in price, but a great many counties in Pennsylvania, it seems to me, have so much better roads than we have in our county. We have none worth speaking of.

Mr. BELL. The gentleman's county has not been on the job.

Mr. ROSE. On the job all the time.

The Clerk read as follows:

BUREAU OF MARKETS.

Salaries, Bureau of Markets: One chief of bureau, $4,500; 1 chief clerk, $2,000; 1 administrative assistant, $2,500; 1 clerk in charge of supplies and accounts, $2,250; 1 administrative assistant, $1,980; 7 clerks, class 4; 10 clerks, class 3; 1 clerk, $1,440; 26 clerks, class 2; 1 clerk, $1,380; 1 clerk, $1,320; 1 clerk, $1,300; 91 clerks, class 1; 1 clerk, $1,140; 3 clerks, at $1,100 each; 75 clerks, at $1,000 each; 5 clerks, at $1,080 each; 7 clerks, at $1,020 each; 1 clerk, $960; 24 clerks, at $900 each; 3 clerks, at $840 each; 2 clerks, at $720 each; 1 mechanical assistant, $1,380; 1 laboratory helper, $900; 1 laboratory aid, $960; 3 laboratory aids, at $900 each; 1 laboratory aid, $840; 7 laboratory aids, at $720 each; 1 photographer, $1,400; 1 photographer, $1,200; 1 supervising telegrapher, $1,620; 1 telegraph operator, $1,400; 6 telegraph operators, at $1,200 each; 7 telegraph operators, at $1,080 each; 1 telegraph operator, $1,020; 1 telephone operator, $600; 2 draftsmen, at $1,200 each; 1 draftsman, $900; 1 map tracer, $900; 1 map tracer, $720; 1 map tracer, $600; 1 map tracer, $480; 2 skilled laborers, at $900 each; 1 laborer, $840; 2 laborers, at $720 each; 4 laborers, at $660 each; 7 messenger boys or laborers, at $600 each; 7 messenger boys or laborers, at $540 each; 20 messenger boys or laborers, at $480 each; 14 messenger boys, at $420 each; 2 messenger boys, at $360 each; 1 messenger boy, $300; 1 charwoman, $540; 5 charwomen, at $480 each; 2 charwomen, at $300 each; 8 charwomen, at $240 each; in all, $387,850.

Mr. LEVER. Mr. Chairman, I offer the following committee amendment.

Mr. STAFFORD. Mr. Chairman, I reserve the point of order on the paragraph.

The CHAIRMAN. The gentleman from Wisconsin reserves the point of order.

Mr. STAFFORD. Mr. Chairman, in no paragraph of the bill is there such an inordinate increase of appropriation as in this salary list of the Bureau of Markets. We rarely find, not even in bureaus connected with the Agricultural Department, an appropriation doubled over last year's appropriation bill. Although the Congress authorized for clerical force an appropriation last year of $197,820, we find at one fell swoop this year it is being doubled, and more, to the extent of $387,850. Now, that is "going some," to use a slang expression, even for a bureau of the Agricultural Department, and particularly it is going some in these times when directions have been given to economize, so as to utilize appropriations for war purposes. Certainly some explanation should be given as to this inordinate increase in clerical-force activities of this bureau. I understand from members of the committee that there is a very energetic head of this bureau—in the phrase of the speech, a "live wire"—who is looking around for every activity in which to employ the clerical force in the department and out in the field. Why, in some of these items we find the clerical force being more than doubled. Will the chairman of the committee give some reason why this force should be doubled in the course of one year in appropriation—I will not say doubled in the extent of the personnel, but certainly doubled in the amount appropriated for this service—and, also, why you are paying the clerk in charge of supplies and accounts, a new item, $2,250, which is more than the chief clerk of the bureau receives? Rarely do we find any subordinate clerk receiving more than the chief clerk. Perhaps he was heretofore employed at this high salary under the lump-sum appropriation which allowed the head of the bureau to give him any salary that he saw fit. He is now being transferred to the statutory roll. If that is the case, the committee is rather helpless, after the abuse of the lump-sum appropriation, to correct it by reducing the salary; but there should be some harmony in salaries where you pay a clerk in charge more salary than you do a chief clerk.

Mr. LEVER. Mr. Chairman, that is the longest question I have been asked to answer in a good long time.

Mr. STAFFORD. I have been rather easy on you in the consideration of this bill.

Mr. LEVER. The general explanation of this situation is this: The Bureau of Markets is a comparatively new organization in the Department of Agriculture. It is an organization that has made rapid strides. I confess that.

Mr. GARNER. But is doing work in proportion to the funds appropriated for it.

Mr. LEVER. But, as suggested by my friend from Texas [Mr. GARNER], I believe that this bureau is doing work in proportion to the funds appropriated for it. Last year we in-

creased the amount for the Bureau of Markets very considerably, probably doubling the appropriation, although I am not sure of the exact figures. And a great many clerks were employed under the lump-fund appropriation, and these clerks are now being transferred to the statutory roll in accordance with the law.

In reference to this clerk to which the gentleman from Wisconsin calls particular attention, my information is that he was carried on the lump-fund roll last year and is transferred to the statutory roll under the law at precisely the same salary which he received under the lump fund. And that is true in all these cases here.

Mr. STAFFORD. What additional activities have been undertaken by this bureau that have occasioned this tremendous increase in clerical force?

Mr. LEVER. I could very easily explain those as we come to them in the bill, item by item.

Mr. STAFFORD. I do not wish to take the time of the committee, inasmuch as the gentleman wishes to finish to-night. Here we have an appropriation for clerical force in this bill which is double the amount of last year, and some of the items for the clerical force have more than trebled.

Mr. LEVER. For instance, I will say to the gentleman from Washington that in the marketing and distributing work of the bureau there has been an actual increase of $12,580. In market reports on fruits and vegetables there is an actual increase of $50,000. In market reports on live stock and meats there has been an actual increase of $10,000. In food-supply investigations there is no change. In the item for food-products inspection there is no change. In cotton standardization there is an apparent decrease in the item, but actually no change. In rural cooperation and organization there is no change. In State cooperation and marketing work there is an actual increase of $22,000. In the grain standardization work there is actually no change. In the enforcement of the standard-container act, which is an activity that was given to the Department of Agriculture, there is a salary increase of $1,000. In general administrative expenses there is an increase of $6,000. In the enforcement of the cotton futures there is an actual increase of $25,000. In the enforcement of the grain-standard act there is no change. In the general administrative work there is no change.

So that, even this year we are recommending for this bureau a larger increase than we have recommended for any other bureau of the Department of Agriculture. In fact, it is about the only one where we did make any substantial increases. Last year we did the same thing, for the reason, as the gentleman knows, that some years ago there was a tremendous propaganda here around the Capitol to organize a bureau of markets, as they called it, with enormous appropriations, I think running as high as $50,000,000, to build terminals and warehouses, and everything on top of the earth.

This bill has been built up out of that propaganda, as it were, but we have tried to build it up along sane and conservative lines. And I may say this to the gentleman, and I would like the members of my own committee to bear witness to the fact, that while the committee has in many cases allowed increases, we have cut their estimates in practically every one of these items here; and the committee has repeatedly warned the Bureau of Markets that the great danger ahead of it was that it would run so fast it would get tangled with its own legs and come down with a crash. The committee has been trying to hold its hands both on the bureau itself and on the demand on the outside for increased appropriations for this service.

Mr. GARNER. I would like to ask the gentleman if he knows of a bureau in the entire Agricultural Department that is doing any more good than the Bureau of Markets?

Mr. LEVER. I believe it is not only doing a good work now, but I believe it is destined to be the great bureau in the Agricultural Department.

Mr. GARNER. That is exactly what I think about it—that it is destined to be the most important bureau of the Agricultural Department.

Mr. ROBBINS. You have mentioned here the increased benefits in giving market reports to the growers of fruits and vegetables. Who gets the benefit of that knowledge?

Mr. LEVER. Any association of fruit growers or vegetable growers at their own expense, or any individual may get it at his own expense.

Mr. ROBBINS. And it is sent broadcast over the country to those who apply and who are engaged in that line of enterprise?

Mr. LEVER. That is true. And I may say to the gentleman from Pennsylvania that I believe no line of activity in the Department of Agriculture is bringing back more in money than the information that is being given by the bureau to truckers throughout the country. My colleague here, who is always interested in this particular subject, knows something about the organizations that have received the benefit of the service in his own district. So while the increases are comparatively large compared with the increases in the other bureaus of the Department of Agriculture, it must be borne in mind that this is a new service and has not settled down to a fixed appropriation.

Mr. ROBBINS. You hope now that you have gotten to a place where we can call a halt?

Mr. LEVER. I think we have reached a point now, I will say to the gentleman candidly, where we can begin to have some more definite idea of the value of the work that is being done by that bureau. Heretofore the work has been more or less experimental in its nature, because it has been an entirely new service, and a new field of operation in economics in this country.

Mr. BYRNES of South Carolina. Mr. Chairman, in reference to this item I wish to say this, that I most heartily concur in the statement made by the chairman of the committee and by the gentleman from Texas [Mr. GARNER], to the effect that no more practical work is being done by the Department of Agriculture than that which is being done by this particular bureau.

Some reference is made to the telegraphic and mail service furnished to the growers of fruits and vegetables. In two or three counties in the district that I have the honor to represent, the farmers are engaged in the growing of truck—asparagus, cantaloupes, cucumbers, beans, lettuce, potatoes, and all other kinds of vegetables and fruits.

Any grower can make an arrangement with the Office of Markets to have sent to him every morning a telegram which will give him full information as to the market price of asparagus, cucumbers, cantaloupes, etc., in every important market of the East, and in addition to that, the number of cars loaded with those products en route to the markets of the East—the number of cars being ascertained at the Potomac yards and other junction points. Any fruit growers' organization or truck growers' organization, by making that arrangement with the department, can for 25 or 50 cents receive a detailed statement every morning as to the market conditions in the East. That information also is furnished to consumers. The Office of Markets endeavors to have it published in the newspapers.

And now they have installed a new service. The representatives of the Office of Markets in Philadelphia, New York, Boston, and Chicago, and other points will serve the fruit grower or the vegetable grower and the commission house in the way I shall undertake in a moment to describe. Heretofore the common experience has been, if a grower consigns a car of cantaloupes to Boston, for example, he might receive next morning, or two days thereafter, a wire to the effect that the cantaloupes had arrived in bad condition. He would be absolutely at the mercy of the commission merchant who sends him that telegram. He had no way of ascertaining the truth of the condition as to the cantaloupes.

Now, the Office of Markets, when called upon by the grower, will inspect that car, and wire him whether or not the cantaloupes are in bad condition; and the very presence of that inspector of the Office of Markets on the ground is going to assure the fruit grower and the vegetable grower of the United States that no longer will he be defrauded by some dishonest commission merchant, who, by his dishonesty, has created a great distrust of the commission merchants among farmers. For that inspection a charge is made by the Office of Markets, but the charge is infinitesimal in comparison with the advantage and the security that the fruit or vegetable shipper has in having on hand a man who, as his representative for all purposes, can ascertain the truth of the statement made by the commission merchant.

The result is that this feature is going to encourage men to produce more truck in this country, and to produce more vegetables in this country, and more fruit. There is no service being rendered in the whole Department of Agriculture that is so practical as this service, which has been referred to by the gentleman from Pennsylvania [Mr. ROBBINS].

Mr. KREIDER. Mr. Chairman, will the gentleman yield?

Mr. BYRNES of South Carolina. Yes.

Mr. KREIDER. Does the Markets Bureau undertake to dispose of produce for the benefit of the shipper, or for the shipper?

Mr. BYRNES of South Carolina. No. I am satisfied they do not. This service is to advise the shipper of the price of

vegetables or the price of fruit on particular days. Heretofore from Florida to Virginia the growers were in the dark. They shipped at times, car after car, of canteloupes or cucumbers into the city of New York when the market was flooded, and at the same time the market in Philadelphia might have been without any canteloupes or cucumbers on that day. There was no intelligent diffusion of information. But once you give the farmers a true statement of the facts, you may rely upon a better distribution of truck and vegetables, so that there will be no dumping in one city, as, for instance, in New York, while in Boston or Cleveland or Buffalo there is a great demand for the article.

Mr. FAIRFIELD. Mr. Chairman, will the gentleman yield?

Mr. LEVER. Yes.

Mr. FAIRFIELD. I would like to ask the gentleman whether the Department of Agriculture in the matter of onion seed has made any investment? I received a letter the other day from a man who grows onions, and he says that he understood that the whole crop of onion seed from a certain island had been taken over by the Department of Agriculture. I refer to Bermuda onions.

Mr. LEVER. I have no definite information about that, but my recollection is that seeds such as onion seeds would be distributed through the regular distribution.

Mr. FAIRFIELD. I refer to the market for the buying of onion seed at this department. Suppose a man writes in and wants to know where he can buy onion seed. Does this department take care of that?

Mr. LEVER. A person can get that information from the Department of Agriculture easily enough. The department will put him in touch with such firms or individuals from which he can obtain the seed.

Mr. FAIRFIELD. And for the sale in the fall, of onions, potatoes, and so on, do they keep abreast of the situation, so that when a man writes in at any time he can get the information he desires as to that?

Mr. LEVER. Yes. The first service which the department did was in respect to onions in the State of Texas, and I think they have worked out a very good plan of getting to the people the information they desire.

Mr. STAFFORD. Mr. Chairman, I withdraw the reservation of the point of order.

The CHAIRMAN. The gentleman from Wisconsin withdraws the reservation of the point of order. The Clerk will report the amendment proposed by the gentleman from South Carolina [Mr. LEVER].

The Clerk read as follows:

Amendment offered by Mr. LEVER: Page 75, line 23, after the word "two," in the word "laborers," insert a hyphen (-).

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For acquiring and diffusing among the people of the United States useful information on subjects connected with the marketing and distributing of farm and nonmanufactured food products and the purchasing of farm supplies, independently and in cooperation with other branches of the department, State agencies, purchasing and consuming organizations, and persons engaged in the transportation, marketing, and distributing of farm and food products, $292,240;

Mr. DALLINGER. Mr. Chairman, I move to strike out the last word. I had intended to offer an amendment at this point, but I am satisfied that it is subject to a point of order. I do, however, wish to call the attention of the Committee on Agriculture and also the attention of the House to what appears to be an unfair discrimination against the agriculturalists residing near the large centers of population. The county which I have the honor to represent in part—Middlesex County, Mass.—while it is rather densely peopled and contains many large manufacturing establishments, at the same time is one of the leading counties in the United States in the value of its agricultural products. These agricultural products are principally the result of intensive cultivation of the soil by market gardeners, a class of skilled agriculturalists.

On December 13 of last year I received a letter from one of my constituents, who is the president of the Boston Market Gardeners' Association, inclosing some resolutions adopted by that association. These resolutions are as follows:

Whereas the Boston Market Gardeners' Association, in common with similar associations in other cities, is contributing to the support of the Market News as edited and issued by the Bureau of Markets of the United States Department of Agriculture; and

Whereas all similar service is maintained for other industries without charge: Therefore be it

Resolved, That this association protest the payment of such money by private associations, especially where such Market News is given to the public indiscriminately, and petition the Department of Agriculture to assume the entire cost of this service henceforth.

J. WINTHROP STONE,
President Boston Market Gardeners' Association.

Mr. Chairman, I took this matter up personally with the Secretary of Agriculture, who is a personal friend of mine, and he promised me that he would look into the matter very carefully. On December 27 I received from him a letter, which reads as follows:

DECEMBER 27, 1917.

Hon. FREDERICK W. DALLINGER.

DEAR MR. DALLINGER: You called at the office a short time ago and left with me a letter to you from Mr. J. W. Stone, president of the Boston Market Gardeners' Association. Mr. Stone incloses a copy of the resolutions adopted by the association petitioning the Department of Agriculture to assume the entire cost of the Market News service conducted at Boston.

The local market reporting service, such as that carried on in Boston, has been conducted during the past season in eight of the large cities of the country. In each case approximately one-half the expense involved has been assumed by the local truck growers' association, some other local organization, or by the city itself. When the strictly local nature of the work is considered, the justification for dividing the expense in this way is clearly apparent. The market gardeners around these cities have been receiving a very specialized service, which has consisted of tabulating accurately the quantities of various commodities brought in by each wagon sufficiently early to enable our representative to post the totals of the main commodities on bulletin boards in time to guide the truck growers in their selling operations. Later the agent gathers accurate price information and then prepares a popularly written article covering the morning's business on the market for the information of the housewife. So far each agent has acted independently in this work, and there has been no attempt to exchange information by wire, except in the case of Boston and Providence, where our representatives have kept in touch with each other daily by telephone.

You will see, therefore, that the benefits of this work are largely restricted to the communities in which the service operates. Although other market gardeners' associations have expended greater sums for the work than the Boston Market Gardeners' Association, they have not asked that the Department of Agriculture assume the entire financial burden. In fact, they seem to be very anxious to receive the service under the financial conditions outlined. It is of interest, also, in this connection, that while the Boston Market Gardeners' Association obligated itself to pay from $75 to $100 per month, commencing last August, it has not been called upon to do so until recently, because of the fact that the local committee on public safety assured practically all the financial burden which belonged to the association. To date the Bureau of Markets has expended approximately $1,100 in the work and the committee on public safety about $800.

It is clear, therefore, no discrimination whatever has been or is being practiced against the Boston Gardeners' Association. In view of the strictly local nature of the service, I do not think it would be proper for the Department of Agriculture to assume the entire expense of the work. It may be that the city authorities or some other appropriate local organization would be willing to continue to pay a portion of the expenses. It is immaterial, of course, to the department whether they are paid by the association or by the city authorities or by other proper organizations.

I imagine that Mr. Stone has in mind the general market news service which the Bureau of Markets has been conducting for the past two or three years. This service is for the benefit of entire regions, or for the country as a whole. While the department bears all expenses connected with the collection of the information, those who desire to receive the data by telegraph are required to pay the toll charges. As indicated, the work at Boston and other cities is strictly local in character and is not in the same category as the national or regional service.

Mr. Stone's letter and its inclosures are returned herewith.

Very truly, yours,

D. F. HOUSTON.

You will notice that in this letter the Secretary makes the point that this service is local. Now, Mr. Chairman, it has been the policy—and the Secretary is carrying out this policy—to conduct the Department of Agriculture according to area and not according to population. For instance, the State of Nevada, according to the estimates of 1915, has about 100,000 people, but it has a vast area. All the publications issued by this Bureau of Markets in the State of Nevada are published without any expense to the people of Nevada and sent to anybody who pays the usual fee; but the Boston Market Gardeners' Association, which is operating in a district having a population of between one and one-half and two million people, and the other market gardeners' associations in the large centers of population have to pay one-half of the expense of getting out this publication. It seems to me that this is a wrong policy. Here are these big centers of population that are bearing the great burden of Federal taxation, and yet in order for the Government to publish this information, which is public information of great importance to the food commission and to the people generally, particularly in this time of emergency, they are asked to bear one-half of the expense. It is a small matter, but it is an unfair discrimination, and ought not to continue. [Applause.]

Mr. LEVER. I ask unanimous consent that the debate on this paragraph and all amendments thereto close in five minutes.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that debate on this paragraph and all amendments thereto close in five minutes. Is there objection?

There was no objection.

Mr. MONDELL. Mr Chairman, the discussion of this item for acquiring and diffusing useful information on subjects connected with the marketing and distributing of farm and nonmanufactured food products calls to my mind a very interesting suggestion made by the Wyoming wool growers in annual convention at Douglas, in my State, a few days ago. The wool growers suggest that as the wool clip is gathered it be assembled at central points in the country, the National Wool Growers' Association acting as the agent of the Government in that behalf, and that thereafter, to quote the words of the resolution of the association—

After wools have been concentrated and worked into commercial grades the Government representative take over, for account of the Government, such grades and amounts as are suitable for military requirements, the remaining wool to be sold either by public auction or by allotments to manufacturers for their actual milling requirements, in proportion to the available supply, and in charge of the aforesaid authorized committee.

Whether or not a procedure of this sort is practical there will be a difference of opinion, but it certainly is entitled to very careful consideration. The methods and procedure for the sale of wool in this country have never been satisfactory. They have left altogether too great a gap between the price the producer received and that which the cloth manufacturer paid for the finished wool. In Great Britain they have a system of auction sales which works very well, I am told, and the meat of the suggestion which I have just read, contained in the resolution, is in line and in harmony with the practice in Great Britain.

I am quite certain that if a plan of this sort had been followed last year, when it was presented in my presence by representatives of the National Wool Growers' Association to the Council of National Defense, it would have resulted in a very great saving to the Government—a saving of possibly 20 or 30 per cent of the price finally paid for wool by the Government. It would have given the grower as good a price as he did receive, and it would have furnished the Government with all the wool needed in the uniforms of our soldiers, so that it would not have been necessary, as it was claimed to be, to introduce shoddy in these garments. It would have equalized the distribution of the wool for use in the country generally. I think the suggestion then made was a most excellent one. It should, I think, have been adopted. But it was not. The Wool Growers' Association again suggest it to the Government, and I think it would be very well indeed if it was given careful consideration.

The wool could be gathered without difficulty at central points, the Government could take the wool it needed at a fair price easily ascertained and determined, and the balance sold, as it is in Great Britain, at auction. That would give the grower a fair price, it would protect the Government and lead to a general and equitable distribution of the wool products of the country.

The CHAIRMAN. All time has expired, the pro forma amendment is withdrawn, and the Clerk will read.

The Clerk read as follows:

To make investigation relating to the production, transportation, storage, preparation, marketing, manufacture and distribution of agricultural food products, including the extent, manner, and methods of any manipulation of the markets or control of the visible supply of such food products, or any of them, by any individuals, groups, associations, combinations, or corporations, $48,800.

Mr. LEVER. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Committee amendment: Page 77, line 20, after the word "manufacture," insert a comma.

The amendment was agreed to.

The Clerk read as follows:

To enable the Secretary of Agriculture to investigate and certify to shippers and other interested parties the quality and condition of fruits, vegetables, and other food products when received at such important central markets as the Secretary of Agriculture may from time to time designate, subject to the payment of such fees as will cover the cost of service rendered and to such rules and regulations as he may prescribe, $113,000: *Provided*, That the certificates issued by the authorized agents of the department shall be received in the courts of the United States as prima facie evidence of the quality and condition of the products so certified.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on the entire paragraph.

Mr. McLAUGHLIN of Michigan. Mr. Chairman, I took some exceptions to a portion of this paragraph when it was before the committee—the employment of inspectors by the Bureau of Markets to investigate and certify to shippers and other interested parties the quality and condition of various kinds of farm products when received at the market to which they are sent. I did so because, it seemed to me, that in this form it does not properly describe or prescribe the duty and authority of the bureau or rights of private parties. If it is a proper function of the Bureau of Markets or any branch or department of the Federal Government to enter into the business of determining between the shipper and the consignee the question of whether or not the contract between them has been complied with, to furnish evidence as the basis of a claim for a reduction of the price, or for damages, as the case may be, then the duty and authority to be performed and exercised should be given careful thought and a full and complete measure adopted in which this duty and authority shall be clearly defined and the rights and obligations of shippers and consignees clearly established.

This bureau, as has been said, is a very important branch of the department. It is doing splendid work. The chief of the bureau is one of the most intelligent, active, progressive men I know in the department. He is enthusiastic; in fact, if he has a fault it is that he is too enthusiastic—trying to do too much. The danger is, as the chairman of this committee a moment ago very well said, that he is trying to do too much and trying to go too fast. He is also in danger, in his enthusiasm, of going outside of the proper line of marketing and taking up other work, as can be pointed out in other paragraphs as well as in this, without supplementary legislation.

Mr. LEVER. Will the gentleman yield?

Mr. McLAUGHLIN of Michigan. Yes.

Mr. LEVER. I think the gentleman ought to say in fairness that this proposition was put on the food-production bill in the Senate, and not at the suggestion of the chief of the bureau.

Mr. McLAUGHLIN of Michigan. I believe it was started or provided for in the food-production bill during the last session of Congress, finding its way through an amendment adopted by the Senate, and I approved it as a part of that emergency legislation. In my judgment it is not a market work at all, as this bureau in this section is directed to pursue it, and the Government ought not so to undertake it.

Mr. MONDELL. Will the gentleman yield?

Mr. McLAUGHLIN of Michigan. Yes.

Mr. MONDELL. Does the gentleman think it is a proper work for any bureau of the Government to undertake?

Mr. McLAUGHLIN of Michigan. I have said that it was not proper for this bureau as here directed, and I question if it is a proper activity for the Government of the United States at all.

Mr. MONDELL. These gentlemen serve as referees, do they not?

Mr. McLAUGHLIN of Michigan. Yes; they do just what this language authorizes them to do. A large number are employed and stationed in the large markets in the country. In case of a complaint they investigate the condition of the shipment and make a certificate as to the condition in which the goods were received, and it is the basis of a claim or of settlement or evidence used in disposing of the controversy between the shipper and the consigneee.

Mr. MONDELL. Is the Government reimbursed in any way?

Mr. McLAUGHLIN of Michigan. Up to this time the Government has not been reimbursed. The men have been paid entirely out of the Treasury of the United States for such services as they performed. At my suggestion the words "subject to the payment of such fees as will cover the cost of service rendered" were incorporated in this paragraph. So far as improvement is made in the methods of the department. Those who are interested in this inspection, those who profit by it, will be required to pay for it. But my contention is that it is improper—work outside of the duties and functions of the Bureau of Markets, as now provided by law. In my judgment this paragraph as it stands ought not to be incorporated.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. McLAUGHLIN of Michigan. Mr. Chairman, I ask unanimous consent that I may proceed for five minutes more.

Mr. LEVER. Mr. Chairman, reserving the right to object, will the gentleman waive that for a suggestion? If the gentleman from Wisconsin [Mr. STAFFORD] is going to make a point of order on this I think we better have that done, so I can offer an amendment on this proposition which I think will not be subject to the point of order. Does the gentleman feel that he ought to press his point of order?

Mr. STAFFORD. The more the gentleman from Michigan [Mr. McLAUGHLIN] speaks the more I am inclined to press the point of order. Perhaps he may say something that will change my position.

Mr. McLAUGHLIN of Michigan. I am not particularly interested in the point of order. I am speaking with the idea that I may possibly influence the committee in its opinion of this item.

Mr. LEVER. There are just two ways of getting at this proposition to determine what the will of the House is on the

proposition. One is to have a vote on an amendment which is not subject to a point of order, and which carries out the general idea of this work. The other is for some gentleman to make the point of order against this, and if it be subject to the point of order, then to have it go out, and then we can discuss the proposition on its merits.

Mr. McLAUGHLIN. I shall give way and permit the Chair to pass upon the point of order raised by the gentleman from Wisconsin.

The CHAIRMAN. Does the gentleman from Wisconsin insist on the point of order?

Mr. STAFFORD. Mr. Chairman, at the invitation of the Chairman of the Committee, I make the point of order.

Mr. LEVER. Oh, I would not have the gentleman put me in that attitude. I am not suggesting an invitation at all. I am not sure that this language is subject to the point of order, and I shall argue the point of order if it is made. But I think that would clarify the situation.

Mr. STAFFORD. Then to accommodate the gentleman, and not at his suggestion, I make the point of order.

Mr. SUMNERS. Mr. Chairman, will the gentleman withhold his point of order for a few minutes?

Mr. STAFFORD. I shall be glad to.

The CHAIRMAN. Then the Chair will submit the request of the gentleman from Michigan that he be permitted to continue the discussion for five minutes. Is there objection?

Mr. LEVER. I hope the gentleman will let the point of order be decided. I shall offer another amendment which I think is clearly in order, but I think this one is.

Mr. SUMNERS. Mr. Chairman, I would like to be heard on this item before it is materially changed. I regard it as one of the most important items in this whole proposition.

Mr. LEVER. If the gentleman from Texas has any idea that he can persuade the gentleman from Wisconsin to withdraw his point of order, I shall be delighted to have him use his persuasive powers upon him.

Mr. STAFFORD. He has already had that wonderful persuasive power satisfied by my withdrawing the point of order and reserving it for the accommodation of the gentleman.

Mr. LEVER. I think we will not accomplish anything unless we get the gentleman to withdraw it absolutely.

Mr. STAFFORD. He has not asked me to withdraw it entirely. He has only asked me to reserve it, and I am accommodating him in order that he may exercise his persuasive powers to influence me further.

Mr. SUMNERS. I do not know who has the floor.

The CHAIRMAN. The gentleman from Michigan [Mr. McLAUGHLIN] had the floor, and he was temporarily deprived of it by a colloquy between the chairman of the committee and several other gentlemen. The Chair will submit the request of the gentleman from Michigan that he be permitted to address the committee. Is there objection?

Mr. LEVER. I shall not, but I shall at the end of his time object until we clear up the point of order.

Mr. McLAUGHLIN of Michigan. Mr. Chairman, if the Chair is going to pass on the point of order and the chairman of the committee is to submit another proposition, I may want to speak on the new proposition; and as time is limited and as the chairman is disposed to refuse very much time, perhaps I had better wait until the new proposition comes up.

The CHAIRMAN. The Chair will recognize the gentleman from Texas.

Mr. LEVER. Mr. Chairman, I think we will make time in getting rid of the point of order on this proposition.

Mr. McLAUGHLIN of Michigan. I feel that way about it.

Mr. LEVER. And as I find I can not finish the bill this afternoon, I think it will be better to argue the point of order if the gentleman from Wisconsin is going to make it.

Mr. SUMNERS. The gentleman from Wisconsin has been kind enough to withhold the point of order, and I would like to be heard on the general proposition.

The CHAIRMAN. The gentleman is recognized for five minutes.

Mr. SUMNERS. I hope that the gentleman from Wisconsin [Mr. STAFFORD] may not insist upon his point of order. Gentlemen, it is a fact that in the sale of agricultural products the same difficulties are met with which are met in the sale of rural credits. In the sale of rural credits we standardize rural credits, concentrate them, and establish a system of inspection, which inspires the necessary confidence which makes it practicable for people in New England, for instance, to purchase loans on farms in the gentleman's own State—on farms which they have never seen. They do not know who owns them. They make their purchases not upon their confidence in the owners nor in the land, but upon their confidence in the system of inspection. Now, in the sale of agricultural products which move from the point of production to far-away points of consumption, it is absolutely essential for systematic and economic distribution that there be this system of inspection, whether commodities are shipped for sale or move under prior sale. Without such inspection the man who purchases what he has not seen or the man who ships without prior sale are largely gambling. The only way to avoid that is for the purchaser to go to the point of production and personally inspect or the seller to accompany his commodity to the market, and of course consumers must pay for the trip in the price they pay. Now, you gentlemen know that as a matter of fact that farmers living far from the markets do not know to whom to ship their products; they do not know whether they will get a square deal if they send to these great distributing centers or not. It is imperatively necessary to any plan to reduce cost of distribution and enlarge our possibilities for production that there be somebody there who represents neither party but who serves both, performing a service to commerce similar to that of a public weigher. For these reasons I hope that the gentleman from Wisconsin will not insist upon his point of order, but permit this service to be developed in this country, so that the man who has something to sell will have confidence to send it into a far-off market, if necessary, and know that no dishonest commission man is going to defraud him out of his product and send him back this sort of statement, "Your stuff got here in bad shape. Send us $13 to pay freight."

You gentlemen who represent agricultural districts know that thing has happened, and that very thing has done more to destroy the truck-producing industry in diversified farming sections than any other one thing. Producers are not in organizations sufficiently large to bridge the full distance between production and consumption except in territories where production is specialized and highly concentrated. You all know that as a matter of fact common sense——

Mr. HAUGEN. Will the gentleman yield?

Mr. SUMNERS. I will.

Mr. HAUGEN. I am very much interested in what the gentleman says. I think he is mainly correct, but does not the gentleman think before this system can be carried out it will be necessary to pass a national law authorizing the incorporation of societies among the farmers——

Mr. SUMNERS. I do not think so. I hope to see the Government do the common-sense and necessary things and thereby insure justice without the necessity for such an organization. It would have a power which I hope may never find its way into the hands of any class of people. I am regarded here as a sort of farmers' champion, but I know they are made of the same clay as other people. They are no safer custodians of great power than any other class would be. I warn the country that we are driving them into these great organizations, and some day the country will pay for it. Say what you please, the wisest public policy is to insure class justice without the necessity for class organization to get it. This is merely an experiment—it is not an experiment, either. We all know that the man who lives out in the West, for instance, and would ship his commodities to Chicago, the ordinary, every-day farmer, he can not hire somebody to go there and see whether he is getting a square deal or not. He has nobody to watch his interests and the result is he does not take the chance; with the result that much of the productive energy of this country is not utilized. I sincerely hope that the gentleman from Wisconsin——

Mr. HAUGEN. Will the gentleman yield?

Mr. SUMNERS. I will.

Mr. HAUGEN. This is in line with the standardization act. The purpose is that somebody may determine the value of the products shipped to the market.

Mr. SUMNERS. Yes, sir.

Mr. HAUGEN. Its condition and also its value in fixing the standard, the value of the product as it is shipped.

The CHAIRMAN. The time of the gentleman has expired.

Mr. STAFFORD. Mr. Chairman, we are departing entirely from the old-time established policy of the individual looking after his own trade affairs and allowing Government agents to do the work for him. It is a system of paternalism that, if once inaugurated, will extend not only to the principal trade centers, as herein provided, but will extend to other localities throughout the country.

True, as stated by the gentleman from Texas [Mr. SUMNERS], it will develop in such extraordinary fashion that the amount appropriated will run into millions, if not tens of millions, of dollars. I make the point of order, Mr. Chairman, that it is legislation on the appropriation bill.

The CHAIRMAN. The Chair will hear the gentleman from South Carolina [Mr. LEVER].

Mr. LEVER. Mr. Chairman, I concede the point of order.

The CHAIRMAN. The Chair sustains the point of order.

Mr. LEVER. I offer the following amendment as a new paragraph.

The CHAIRMAN. The gentleman from South Carolina offers an amendment which the Clerk will report.

The Clerk read as follows:

Insert as a new paragraph, in lieu of the paragraph stricken out, the following:

"For enabling the Secretary of Agriculture to investigate and certify to shippers the condition as to soundness of fruit, vegetables, and other food products, when received at such important central markets as the Secretary of Agriculture may from time to time designate and under such rules and regulations as he may prescribe: *Provided*, That certificates issued by authorized agents of the department shall be received in all courts as prima facie evidence of the truth of the statements therein contained."

Mr. STAFFORD. Mr. Chairman, I either make or reserve the point of order.

Mr. LEVER. I will ask the gentleman to make the point of order.

Mr. STAFFORD. I make the point of order.

The CHAIRMAN. The gentleman will state the point of order.

Mr. STAFFORD. The point of order is that it is legislation on an appropriation bill not authorized by existing law.

Mr. LEVER. Mr. Chairman, in answer to the suggestion of the gentleman that this is not authorized by existing law, I desire to call the Chair's attention to the act of Congress known as the food-survey law and food-control law, on page 2, and I quote to the Chair the following language.

The CHAIRMAN. Will the gentleman kindly indicate what section he is reading?

Mr. LEVER. I am reading from section 8, near the middle of page 2. It says:

For enabling the Secretary of Agriculture to investigate and certify to shippers the condition as to soundness of fruits, vegetables, and other food products, when received at such important central markets as the Secretary of Agriculture may from time to time designate and under such rules and regulations as he may prescribe:

Provided, That certificates issued by the authorized agents of the department shall be received in all courts as prima facie evidence of the truth of the statements therein contained.

And then the amount of money is stated. In the amendment I have offered we put in the amount. The Chair will recognize in the language, just read, I think, that it is the law and will continue to be the law so long as this war lasts, the identical langauge of the amendment which I have sent to the desk.

The CHAIRMAN. Will the gentleman from South Carolina let the Chair see that?

Mr. LEVER. Yes. And I would say to the Chair that this act is to remain in force, if he will notice the last section of it, during the war. While the Chair is looking at the act, I would like to modify my amendment——

The CHAIRMAN. Without objection it may be done.

Mr. LEVER (continuing). By inserting the amount, namely, "$113,000."

There was no objection.

Mr. McLAUGHLIN of Michigan. Will you amend it also by including the words I suggested in the committee, that the cost of it be paid?

Mr. LEVER. I think that would make it subject to a point of order. I am offering the exact language of the current law.

Mr. STAFFORD. Mr. Chairman, the chairman of the committee admits that the authority on which he bases this amendment is limited to the contingency as found in the enabling act, the food-survey law and the food-control law, to the duration of the war. The duration of the war is a contingency that may end at any moment.

The amendment that is offered by the chairman of the committee is not limited, as the original act is, to the duration of the war. The war may end during this present fiscal year, and if this bill was presented to the House after the war is concluded, under the rules now existing it would be subject to a point of order. Allow this amendment to be held in order in its present phraseology, and if the war comes to an end prior to the consideration of the Agricultural appropriation bill at the next session of Congress, the fact that we have undertaken this work without any such limitation as the existing law provides would make a similar provision in order. But if this authorization is limited to the existence of the war, that would present a different question. The law as it stands today only authorizes the Secretary of Agriculture to undertake this work during the existence of the war. As soon as the war terminates the authority lapses. But if this amendment is agreed to and the war terminates, he would have authority to still continue it, and under what authorization?

Under an authorization of law carried in an appropriation bill, that is contrary to the rules of the House of carrying legislation on appropriation bills. In its present form, undoubtedly, Mr. Chairman, I contend that the Chair should rule that the amendment is out of order.

Mr. Chairman, one thought further, in amplification of the idea presented just now. All this legislation of a war emergency character which was passed at the last session of Congress and which is contained in this act is limited to war emergency and war exigency, and it could be used as a vehicle to make permanent enactments in this appropriation bill for all time——

Mr. ROBBINS. And in other appropriation bills.

Mr. STAFFORD. Yes; and other appropriation bills where the appropriation would be germane. It is the vice from which the rules of the House seek to protect its legislation against having it incorporated in appropriation bills. Certainly Congress would never have authorized much of this legislation that is limited to war exigency by making it permanent for all time. Now, the gentleman from South Carolina is attempting to utilize an emergency legislative matter to make it permanent law.

Mr. ROBBINS. And it would apply to every one of the 10 bills yet to come.

Mr. LEVER. Mr. Chairman, if the Chair will indulge me for a moment, I wish to suggest to the Chair that the rule requiries that legislation on an appropriation bill can not be had; a change of existing legislation can not be had. This is neither legislation nor a change of law.

It is true that we frequently refer to the fact that some amendment is a change of permanent law. But no law is permanent. Congress can amend any act or repeal it when it sees fit to do so.

It is true that the life of this act is limited by the act itself; but until the time comes when the conditions are fulfilled it is the law of the land. I submit that the point of order can not lie.

The CHAIRMAN. The Chair is ready to rule. The gentleman from South Carolina [Mr. LEVER] offers an amendment against which the gentleman from Wisconsin [Mr. STAFFORD] lodges a point of order, claiming that it is new legislation, and that therefore it is not in order on a general appropriation bill.

Under clause 2 of Rule XXI, no amendment changing existing law shall be in order upon an appropriation bill. Therefore the question presents itself to the Chair as to whether or not the proposed amendment is new legislation. Under the act "To provide further for the national security and defense by stimulating agriculture and facilitating the distribution of agricultural products," approved August 10, 1917, there is a provision of law identical with the amendment proposed by the gentleman from South Carolina.

The gentleman from Wisconsin contends that the act of Congress that the Chair has just cited lasts only during the continuance of the war, which is an uncertain contingency, and that the Chair would not be authorized to hold the amendment is in accordance with existing law. The Chair is of the opinion that the only matter for the Chair to decide is whether the law is in existence at the time the Chair is to pass upon the amendment authorizing it, for any law may be subsequently repealed.

Mr. STAFFORD. Will the Chair permit a question in that particular?

The CHAIRMAN. The Chair would prefer not to. Section 3814 of Hinds' Precedents, volume 4, provides:

A paragraph in an appropriation bill reenacting verbatim an existing law is not subject to a point of order. On February 5, 1904, the Agricultural appropriation bill was under consideration in Committee of the Whole House on the state of the Union, when Mr. MORRIS SHEPPARD, of Texas, proposed the following amendment:

"*Provided*, That the purchase and distribution of seeds and plants by the Department of Agriculture shall be confined to such seeds as are rare, untried, and uncommon to the country, or such as can be or have been made more useful and more profitable by special breeding, or such seeds and plants as may be improved by transplantation from one part of the country to another."

Mr. Sydney J. Bowie, of Alabama, made a point of order that the proposed amendment involved legislation.

After debate, the Chairman said:

The Chair is ready to rule upon this amendment. If the Chair has made no mistake, it is a verbatim copy of the law as it now exists. That being the case, it has been held that while it is unnecessary and perhaps almost not good form, yet is not strictly subject to a point of order. It is simply reenacting a portion of the United States statutes.

The Chair is of the opinion that there is law authorizing the legislation proposed in the amendment and that the amendment simply proposes an appropriation to carry out existing law, and therefore the Chair overrules the point of order.

Mr. LEVER. Mr. Chairman, I do not recall whether or not I got the consent of the committee to modify my amendment.

The CHAIRMAN. The Chair understood the gentleman did.

Mr. STAFFORD. Mr. Chairman, I wish to inquire how long the gentleman from South Carolina intends to run to-night?

Mr. LEVER. I hope to run until half-past 5.

Mr. STAFFORD. This is an important amendment—one of the most important amendments included in the bill—and I hope the gentleman can see his way clear to move to rise and discuss it to-morrow, when we shall have a larger audience.

Mr. LEVER. Let us see, then, how much time is desired. I wish very much to dispose of this item to-night. Does the gentleman from Michigan [Mr. McLAUGHLIN] desire some time?

Mr. McLAUGHLIN of Michigan. Yes. I have an amendment on which I would like to have five minutes.

Mr. YOUNG of North Dakota. I would like to have 10 minutes before we adjourn to-night.

Mr. LEVER. On this amendment?

Mr. YOUNG of North Dakota. Yes; I would like to have 10 minutes.

Mr. GILLETT. Why not let the gentleman from North Dakota use his 10 minutes to-night, and then rise?

Mr. LEVER. I am willing to do that. But in doing so let us see if we can not reach an agreement as to this matter. I ask unanimous consent, Mr. Chairman, that the debate on this amendment and all amendments thereto may close—in how many minutes?

Mr. STAFFORD. I do not think the gentleman should try to close the debate on this amendment to-night. We can finish the bill certainly to-morrow, when we will have a larger attendance.

Mr. McLAUGHLIN of Michigan. I will say to the chairman that there will be a larger attendance to-morrow, and when this matter is read, and the Members attending know what it is, there will be requests for time.

Mr. LEVER. I know, but the gentleman from Michigan will recognize the fact that it is not up to the committee, who have to sit here all day long, to take care of those who are not here; and while this is an important amendment, if gentlemen desired to discuss it they knew it was in this bill and could have been here and protected themselves. I think the gentleman will agree that I have been pretty liberal in trying to protect everybody; but we must finish the bill to-morrow, and I am not so sure that we can do it in a couple of hours.

Mr. McLAUGHLIN of Michigan. Is not the gentleman willing to give two hours to this, an hour on a side?

Mr. LEVER. Oh, no. I ask unanimous consent that debate on this amendment and all amendments thereto may close in 30 minutes, one half to be controlled by the gentleman from Michigan [Mr. McLAUGHLIN] and the other half by myself.

Mr. STAFFORD. That would not even accommodate the gentlemen who are now here present on this side waiting to speak. There are requests for 30 minutes on this side right now.

Mr. LEVER. The gentleman from North Dakota [Mr. YOUNG] does not want to speak on this. There are 20 minutes asked for on that side and 5 minutes on this side. I ask unanimous consent that the debate on this amendment and all amendments thereto may close in 50 minutes, one half to be controlled by myself and the other half by the gentleman from Michigan.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that all debate on this amendment and proposed amendments thereto close in 50 minutes, the gentleman from Michigan [Mr. McLAUGHLIN] to control 25 minutes and the gentleman from South Carolina [Mr. LEVER] to control 25 minutes. Is there objection?

There was no objection.

Mr. LEVER. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. CRISP, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 9054, the Agricultural appropriation bill, and had come to no resolution thereon.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted to Mr. FOCHT for one week, on account of illness.

INCREASED COMPENSATION TO POSTAL EMPLOYEES.

Mr. MOON. Mr. Speaker, by direction of the Committee on the Post Office and Post Roads, I report herewith the bill (H. R. 9114), granting increased compensation to certain officials, employees, and laborers in the Post Office Department and Postal Service, and for other purposes; and I ask unanimous consent that the bill be printed with the report (H. Rept. No. 279) and be referred to the Union Calendar.

The SPEAKER. The gentleman from Tennessee presents a bill, which the Clerk will report by title.

The Clerk reported the title of the bill.

The SPEAKER. The gentleman asks unanimous consent that the bill be put on the Union Calendar. Is there objection?

There was no objection.

Mr. STAFFORD. Mr. Speaker, I reserve all points of order on the bill.

The SPEAKER. The gentleman from Wisconsin reserves all points of order on the bill, and the bill is referred to the Committee of the Whole House on the state of the Union and ordered printed.

Mr. BLACK. Mr. Speaker, I ask unanimous consent that any members of the Committee on the Post Office and Post Roads who desire to do so may have five legislative days within which to file minority views.

The SPEAKER. Is there objection?

There was no objection.

EXTENSION OF REMARKS.

Mr. CHURCH. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD in regard to the Garabed free-energy proposition.

The SPEAKER. Is there objection?

There was no objection.

ENROLLED JOINT RESOLUTION SIGNED.

Mr. LAZARO, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled joint resolution of the following title, when the Speaker signed the same:

H. J. Res. 174. Joint resolution for the purpose of promoting efficiency for the utilization of the resources and industries of the United States, for lessening the expenses of the war, and restoring the loss caused by the war by providing for the employment of a discovery or invention called the "Garabed," claiming to make possible the utilization of free energy.

WIDOWS' PENSION BILL.

Mr. ASHBROOK. Mr. Speaker, the bill (H. R. 9093) to amend the act approved September 8, 1916, chapter 470, Statutes at Large, Sixty-fourth Congress, relating to pensions, was reported in the regular way through the basket. I have since learned that it is a privileged bill and that the report should be made to the House. I therefore wish to make that report on the bill to the House and not through the basket.

The SPEAKER. Is it a general pension bill?

Mr. ASHBROOK. Yes.

The SPEAKER. The gentleman takes the bill from the basket and reports it in the usual way of a privileged bill. The bill is ordered printed and is referred to the Committee of the Whole House on the state of the Union.

Mr. STAFFORD. Mr. Speaker, I reserve all points of order on the bill.

PAIRS.

Mr. WILSON of Texas. Mr. Speaker, some weeks ago the gentleman from Texas [Mr. BLANTON] and the gentleman from Oklahoma [Mr. CHANDLER] placed a statement in the RECORD undertaking to show that I had violated a pair agreement. I do not know that I would have cared to make any reply if it had not been that I now hear——

Mr. GILLETT. Mr. Speaker, I rise to a point of order. I would like to know by what right the gentleman is undertaking to make this statement?

Mr. WILSON of Texas. Then I shall not state the reason, but I ask unanimous consent to extend my remarks in the RECORD in order to make a reply to those statements, for the purpose of stating the facts with reference to this entire matter.

The SPEAKER. The gentleman from Texas asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

The SPEAKER. The Chair desires to state once more, and hopes that the Members present will convey the statement to others, that the House has nothing on earth to do with pairs.

ADJOURNMENT.

Mr. LEVER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 37 minutes p. m.) the House adjourned until to-morrow, Friday, February 1, 1918, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Comptroller of the Currency, transmitting the annual report of the Comptroller of the Currency for the 12 months ending October 31, 1917 (H. Doc. No. 602); to the Committee on Banking and Currency and ordered to be printed.

2. A letter from the president of Chesapeake & Potomac Telephone Co., transmitting a report of the Chesapeake & Potomac Telephone Co. to the Congress of the United States for the year 1917 (H. Doc. No. 888); to the Committee on the District of Columbia and ordered to be printed.

3. A letter from the president of Capital Traction Co., transmitting report of the Capital Traction Co. for the year ending December 31, 1917 (H. Doc. No. 889); to the Committee on the District of Columbia and ordered to be printed.

4. A letter from the United States Food Administrator, transmitting itemized statements of purchases and disbursements made by the United States Food Administration and by the United States Fuel Administration for the period from December 1 to December 31, 1917, inclusive (H. Doc. No. 890); to the Committee on Expenditures in the Department of Agriculture and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. HAYDEN, from the Committee on the Public Lands, to which was referred the bill (H. R. 273) to extend the time for cutting timber on the Coconino and Tusayan National Forests, Ariz., reported the same without amendment, accompanied by a report (No. 277), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. SULZER, from the Committee on the Public Lands, to which was referred the bill (H. R. 8563) to amend the homestead law in its application to Alaska, and for other purposes, reported the same without amendment, accompanied by a report (No. 278), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. STEENERSON, from the Committee on the Post Office and Post Roads, to which was referred the bill (H. R. 1607) for the relief of David E. Gray, reported the same without amendment, accompanied by a report (No. 275), which said bill and report were referred to the Private Calendar.

Mr. WALTERS, from the Committee on the Public Lands, to which was referred the bill (H. R. 2635) to authorize the issue of a patent to certain land in Alabama to William M. Wilson, reported the same without amendment, accompanied by a report (No. 276), which said bill and report were referred to the Private Calendar.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

The bill (H. R. 7721) granting an increase of pension to Robert S. Parker; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

The bill (H. R. 9138) granting an increase of pension to Daniel Lawlor; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

The bill (H. R. 9142) granting a pension to William E. Martin; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

The bill (H. R. 9358) granting a pension to Elmer Wagar; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. WALSH: A bill (H. R. 9402) to authorize credits for enlistments in the naval service of the United States in the operation of an act entitled "An act to authorize the President to increase temporarily the Military Establishment of the United States," approved May 18, 1917; to the Committee on Military Affairs.

By Mr. CARY: A bill (H. R. 9403) to provide for the condemnation, acquisition, and construction by the United States of America of telegraph and telephone lines, properties, and holdings in the several States and Territories of the United States and the District of Columbia, and to provide for the operation of said telegraph and telephone lines and properties by the United States; to the Committee on the Post Office and Post Roads.

Also, a bill (H. R. 9404) to fix the requirements governing the receipt, transmission, delivery, and preservation of messages of interstate telegraph and telephone companies; to the Committee on Interstate and Foreign Commerce.

Also, a bill (H. R. 9405) fixing the price for use of telephones at private residences within the District of Columbia, and for other purposes; to the Committee on the District of Columbia.

By Mr. BLANTON: A bill (H. R. 9406) to increase the productive agricultural area of the United States by the reclamation of arid swamp lands therein; to the Committee on Irrigation of Arid Lands.

By Mr. GALLAGHER: A bill (H. R. 9407) to provide for the preservation of and compensation for diminishing levels of Lakes Michigan, Huron, Erie, and Ontario due to diversion or withdrawal of water from Lake Michigan at Chicago, Ill., and fixing the maximum amount of such diversion and conditions under which same is authorized; to the Committee on Rivers and Harbors.

By Mr. HICKS: A bill (H. R. 9408) to authorize additional pay for enlisted men of the Navy, and Marine Corps, and Coast Guard detained beyond the expiration of their terms of enlistment; to the Committee on Naval Affairs.

By Mr. BUTLER: A bill (H. R. 9409) to provide for the authorization of money to be used in the grading and terracing of the grounds around and adjacent to the memorial arch at Valley Forge; to the Committee on the Library.

Also, a bill (H. R. 9410) to provide for a site and public building at Lansdowne, Pa.; to the Committee on Public Buildings and Grounds.

By Mr. BURNETT: A bill (H. R. 9411) to amend an act entitled "An act in reference to expatriation of citizens and their protection abroad," approved March 2, 1907; to the Committee on Immigration and Naturalization.

By Mr. RIORDAN: A bill (H. R. 9412) authorizing a survey of Bay Ridge and Red Hook Channels, N. Y.; to the Committee on Rivers and Harbors.

By Mr. HAYDEN: A bill (H. R. 9413) to authorize coal-mining leases in the Navajo country; to the Committee on Indian Affairs.

By Mr. MOON: A bill (H. R. 9414) granting increased compensation to certain officials, employees, and laborers in the Post Office Department and Postal Service, and for other purposes; to the Committee of the Whole House on the state of the Union.

By Mr. PARK; Resolution (H. Res. 240) authorizing the Postmaster of the House to employ an additional messenger; to the Committee on Accounts.

By Mr. BRITTEN: Resolution (H. Res. 241) authorizing the Committee on the Post Office and Post Roads to investigate the present system of mail censorship; to the Committee on Rules.

By Mr. RIORDAN: Joint resolution (H. J. Res. 234) directing the Secretary of the Treasury to permit the entry under bond of certain shipments of distilled spirits; to the Committee on Ways and Means.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ASHBROOK: A bill (H. R. 9415) granting an increase of pension to Joseph S. Hall; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9416) granting an increase of pension to Benjamin F. Carpenter; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9417) granting an increase of pension to Mathias Keller; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9418) granting an increase of pension to David Bowman; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9419) granting a pension to Margaret Berry; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9420) granting a pension to William McCommon; to the Committee on Invalid Pensions.

By Mr. BLACK: A bill (H. R. 9421) granting a pension to Julian A. Wiggins; to the Committee on Pensions.

By Mr. BLAND: A bill (H. R. 9422) granting a pension to James M. Snoddy; to the Committee on Invalid Pensions.

By Mr. BROWNE: A bill (H. R. 9423) granting an increase of pension to Lester N. Porter; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9424) granting an increase of pension to Charley S. Lunn; to the Committee on Invalid Pensions.

By Mr. BROWNING: A bill (H. R. 9425) granting an increase of pension to Matthew McGoldrick; to the Committee on Invalid Pensions.

By Mr. CARY: A bill (H. R. 9426) granting a pension to George S. Zimmerman; to the Committee on Pensions.

Also, a bill (H. R. 9427) granting an increase of pension to Charles J. Lane; to the Committee on Pensions.

By Mr. CONNELLY of Kansas: A bill (H. R. 9428) granting an increase of pension to George J. Wright; to the Committee on Invalid Pensions.

By Mr. CURRIE of Michigan: A bill (H. R. 9429) to amend an act entitled "An act for the relief of the Saginaw, Swan Creek, and Black River Band of Chippewa Indians in the State of Michigan, and for other purposes," approved June 25, 1910; to the Committee on Indian Affairs.

By Mr. DILL: A bill (H. R. 9430) authorizing the issuance of patent to the Pioneer Educational Society and its successors for certain lands in the diminished Colville Indian Reservation, State of Washington; to the Committee on Indian Affairs.

By Mr. FOSTER: A bill (H. R. 9431) granting an increase of pension to Samuel Worley; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9432) granting an increase of pension to William H. Freeman; to the Committee on Invalid Pensions.

By Mr. HASKELL: A bill (H. R. 9433) granting an increase of pension to Isaac L. Prescott; to the Committee on Invalid Pensions.

By Mr. HAYES: A bill (H. R. 9434) for the relief of Harlan W. Jenks; to the Committee on Claims.

By Mr. KEY of Ohio: A bill (H. R. 9435) granting an increase of pension to George W. Smith; to the Committee on Invalid Pensions.

By Mr. KINKAID: A bill (H. R. 9436) granting an increase of pension to Joseph S. Wiley; to the Committee on Invalid Pensions.

By Mr. MANN: A bill (H. R. 9437) granting a pension to Minnie S. Muir; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9438) granting a pension to Richard R. French; to the Committee on Invalid Pensions.

By Mr. MORGAN: A bill (H. R. 9439) granting an increase of pension to Charles H. McCully; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9440) granting an increase of pension to Henry H. Brunsteter; to the Committee on Invalid Pensions.

By Mr. PHELAN: A bill (H. R. 9441) granting an increase of pension to James M. Dixon; to the Committee on Invalid Pensions.

By Mr. PURNELL: A bill (H. R. 9442) granting a pension to Rose A. Doyle; to the Committee on Pensions.

By Mr. ROWE: A bill (H. R. 9443) granting an increase of pension to Joseph Buckle; to the Committee an Invalid Pensions.

Also, a bill (H. R. 9444) granting an increase of pension to Augustus B. Tickner; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9445) to correct the military record of Oliver A. Campbell; to the Committee on Military Affairs.

Also, a bill (H. R. 9446) granting an honorable discharge to Edward S. Conkling; to the Committee on Military Affairs.

By Mr. SANDERS of New York: A bill (H. R. 9447) granting an increase of pension to William Newton; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9448) granting an increase of pension to William H. Kendall; to the Committee on Invalid Pensions.

By Mr. STEENERSON: A bill (H. R. 9449) granting an increase of pension to Thomas J. Holman; to the Committee on Invalid Pensions.

By Mr. VESTAL: A bill (H. R. 9450) granting an increase of pension to Jacob W. Cline; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9451) granting an increase of pension to George H. King; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9452) granting an increase of pension to Thomas J. Cartwright; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9453) granting a pension to John D. Andrews; to the Committee on Pensions.

By Mr. WASON: A bill (H. R. 9454) granting an increase of pension to John M. Fox; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. BLAND: Evidence in the case of James M. Snoddy, special pension bill (H. R. 9422); to the Committee on Invalid Pensions.

By Mr. CALDWELL: Petitions of Elmhurst Baptist Church, the Bible class of the First Methodist Episcopal Church, both of Elmhurst, N. Y., and of the Rosedale Presbyterian Church, Borough of Queens, New York City, urging the passage of a war-emergency prohibition law; to the Committee on the Judiciary.

By Mr. CARY: Resolution of the Union Label Trades Department of the American Federation of Labor, asking the repeal of the zone system for second-class mail; to the Committee on Ways and Means.

By Mr. CLARK of Pennsylvania: Petition of F. C. Schutte (treasurer), F. E. Mosher, Hon. F. E. Detzell, and 12 employees of the Erie Trust Co., praying for the passage of H. R. 7995, for the preservation of the *Niagara*, Commodore Perry's flagship in the Battle of Lake Erie; to the Committee on Naval Affairs.

By Mr. DALE of New York: Resolutions of the Merchants' Association of New York, advocating a board of war control subordinate only to the President, and a director of munitions, subject to the board of war; to the Committee on Military Affairs.

Also, resolutions of the convention of short-line railroads, held in Washington, D. C., expressing approval of the taking over of the railroads of the country and suggesting amendments to Senate bill 3385; to the Committee on Interstate and Foreign Commerce.

By Mr. FOSTER: Petition of 15 veterans of the Civil War of Iuka, Ill., urging increase of pension for Civil War soldiers; to the Committee on Invalid Pensions.

By Mr. FULLER of Illinois: Memorial of the Asbury Park (N. J.) Chamber of Commerce, for the repeal of the zone system for second-class mail; to the Committee on Ways and Means.

By Mr. GRIEST: Petition of a committee of the George H. Thomas Post, No. 84, Grand Army of the Republic, Lancaster, Pa., urging the enactment of legislation to increase the pension of veterans of the Civil War to $50 per month; to the Committee on Invalid Pensions.

By Mr. HAMLIN: Papers to accompanying House bill 9332, a bill to increase the pension of George W. Griffin; to the Committee on Invalid Pensions.

By Mr. RAKER: Resolution adopted by the board of directors of Chamber of Commerce of San Francisco, Cal., concerning the proper punishment to be given those found guilty of attempt to destroy property in the United States, etc.; also, a petition of D. M. Gandier, Los Angeles, Cal., favoring the enactment of legislation preventing the manufacture and sale of all alcoholic liquors during the period of the war; to the Committee on the Judiciary.

Also, petition of John A. O'Connell, secretary Labor Temple, San Francisco, Cal., indorsing an increase in the pay of all civilian employees of the United States and of the District of Columbia; to the Committee on Appropriations.

By Mr. RANDALL: Memorial of Headquarters Committee of the Anti-Saloon League of California, requesting the Congress of the United States immediately to prohibit the manufacture and sale of all alcoholic liquors, including wines and beers, for the period of the war; to the Committee on the Judiciary.

By Mr. SANDERS of New York: Petition of 150 members of the Wyoming County Woman's Christian Temperance Union, urging the adoption of war prohibition; to the Committee on Military Affairs.

Also, petition of the congregation of the First Presbyterian Church of Medina, N. Y., urging the adoption of immediate war prohibition; to the Committee on Military Affairs.

Also, petition of J. Harte Sawens and 50 other residents of Albion, N. Y., urging war prohibition; to the Committee on Military Affairs.

Also, petition of I. A. Arnold and 42 other residents of Spencerport, N. Y., urging immediate prohibition as a war measure; to the Committee on Military Affairs.

Also, petition of William A. Day and 26 other residents of Livonia, N. Y., urging the adoption of immediate emergency war prohibition; to the Committee on Military Affairs.

By Mr. SNELL: Petition of citizens of Winthrop, N. Y., favoring the emergency war prohibition bill; to the Committee on the Judiciary.

Also, petition of citizens of Madrid, N. Y., favoring the emergency war prohibition bill; to the Committee on the Judiciary.

Also, petition of citizens of Keeseville, N. Y., favoring the emergency war prohibition bill; to the Committee on the Judiciary.

Also, resolution of Woman's Christian Temperance Union, Winthrop, N. Y., indorsing the emergency war prohibition bill; to the Committee on the Judiciary.

By Mr. STEENERSON: Petition of ex-officers of the Civil War at the Veterans' Home, Napa County, Cal., favoring bills for the relief of Volunteer officers of the Civil War; to the Committee on Military Affairs.

Also, petition of Minneapolis (Minn.) Civic and Commerce Association, favoring passage of House bill 8172, relative to traffic on our inland waterways; to the Committee on Interstate and Foreign Commerce.

Also, petitions of Clay County (Minn.) Farm Bureau and pastor and members of First Methodist Church of Fosston, Minn., favoring legislation prohibiting manufacturing and sale of alcoholic liquor; to the Committee on the Judiciary.

By Mr. TAGUE: Petition of Massachusetts Dental Society on Senate bill 3386; to the Committee on Naval Affairs.

Also, petition of New York Publishers' Association (Inc.) on postal law; to the Committee on the Post Office and Post Roads.

Also, petition of Massachusetts Audubon Society on Senate bill 1553; to the Committee on Agriculture.

Also, petition of T. L. Lewis, Charleston, W. Va., on present coal situation; to the Committee on Agriculture.

HOUSE OF REPRESENTATIVES.

FRIDAY, *February 1, 1918.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

O Lord God of Hosts, lest we forget, impress us with the truth that if ever a permanent world-wide peace obtains, it must be based upon the eternal principles of true religious convictions.

Thou has revealed Thyself as the universal Father, and therefore its corollary, the universal brotherhood of mankind.

Thou openest Thine hand and satisfiest the desire of every living thing.

The world is large enough, productive enough for all Thy children.

War is destructive. Religion is constructive. War is hate, revenge. Religion is love, peace, good will. War is contrary to reason and common sense. Religion has its source in the largest conception of life, reason, justice, mercy. War is hell. Religion is heaven.

Inspire us and all the world with these fundamentals, that a world-wide peace may come, a blessing to mankind. For Thine is the Kingdom, and the Power, and the Glory, forever. Amen.

The Journal of the proceedings of yesterday was read.

Mr. STAFFORD. Mr. Speaker, I would like to make one suggestion, as far as the Journal is concerned, before it is approved. The Journal states that the gentleman from Tennessee [Mr. MOON] offered a privileged report on a certain bill. The gentleman from Tennessee, as I understand it, did not seek to offer the bill and report as privileged, but merely asked unanimous consent to present the bill and the report and have it submitted as if it were placed in the basket. He did not claim it was privileged.

The SPEAKER. No; what the gentleman asked was to have it put on the Union Calendar.

Mr. STAFFORD. He did not claim it was privileged, as the Journal states.

The SPEAKER. The Chair knows he did not state it was privileged, but he asked unanimous consent to put it on the Union Calendar.

Mr. STAFFORD. The Journal states that the gentleman from Tennessee presented a privileged report. He did not present a privileged report, and I ask that the Journal be corrected in that particular.

The SPEAKER. Without objection, the Journal will be corrected in that respect.

There was no objection.

The Journal as corrected was approved.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Waldorf, its enrolling clerk, announced that the Senate had passed bills of the following titles, in which the concurrence of the House of Representatives was requested:

S. 3006. An act to authorize and empower officers and enlisted men of the Navy and Marine Corps to serve under the Government of the Dominican Republic, and for other purposes;

S. 3126. An act to provide temporary promotion for retired officers of the Navy and Marine Corps performing active duty during the period of the present war;

S. 3427. An act for the relief of certain ex-paymasters' clerks;

S. 3445. An act to authorize the payment of gun pointers and gun captains while temporarily absent from their regular stations, and for other purposes;

S. 3402. An act to fix the age limit for candidates for admission to the United States Naval Academy;

S. 3131. An act for the relief of Col. Littleton W. T. Waller, United States Marine Corps;

S. 3401. An act to authorize the President to reduce temporarily the course of instruction at the United States Naval Academy;

S. 3129. An act to provide for the disposition of the effects of deceased persons in the naval service;

S. 3130. An act to amend section 1570 of the Revised Statutes of the United States;

S. 3400. An act to regulate the pay of retired chief warrant officers on active duty;

S. 3404. An act to authorize the President to drop from the rolls any Navy or Marine Corps officer absent without leave for three months, or who has been convicted of any offense by the civil authorities, and prohibiting such officer's reappointment; and

S. 3406. An act to authorize the Secretary of the Navy to determine where and when there are no public quarters available for officers of the Navy and Marine Corps.

EXTENSION OF REMARKS.

Mr. RUBEY. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting therein the message or address delivered by the President of the United States to the farmers of America.

The SPEAKER. The gentleman from Missouri asks unanimous consent to extend his remarks by printing the address of the President of the United States to the farmers of America. Is there objection? [After a pause.] The Chair hears none.

CIVIL-SERVICE EXAMINATIONS.

Mr. GODWIN of North Carolina. Mr. Speaker, I ask unanimous consent for the present consideration of Senate joint resolution 117.

The SPEAKER. The gentleman asks unanimous consent for the present consideration of the joint resolution, which the Clerk will report by title.

The Clerk read as follows:

S. J. Res. 117 Joint resolution amending the act of July 2, 1909, governing the holding of civil-service examinations.

The SPEAKER. Is there objection?

Mr. MONDELL. Mr. Speaker, reserving the right to object, I would like to have the resolution reported.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

Resolved, etc., That the act of July 2, 1909 (36 Stats. L., 1), is hereby amended so as to permit the United States Civil Service Commission, during the period of the war, to hold examinations of applicants for positions in the Government service in the District of Columbia, and to permit applicants from the several States and Territories of the United States to take said examinations in the said District of Columbia. Said examinations shall be permitted in addition to those required to be held by said act of July 2, 1909 (36 Stats. L., 1).

The SPEAKER. Is there objection?

Mr. MONDELL. Mr. Speaker, for the present I shall have to object.

The SPEAKER. The gentleman from Wyoming objects.

NOTIFICATION OF ILLNESS OF SOLDIERS.

Mr. REAVIS. Mr. Speaker, I ask unanimous consent for the present consideration of the House joint resolution 228, now on the Speaker's table, which I ask to have reported.

The SPEAKER. The gentleman from Nebraska asks unanimous consent for the present consideration of the joint resolution which the Clerk will report.

The Clerk read as follows.

Joint resolution (H. J. Res. 228) to provide notification of illness of soldier.

Resolved, etc., That the Secretary of War is hereby directed, immediately upon the admission of an enlisted man or officer of the United States Army to an Army hospital in continental America, to notify by telegraph the nearest relative of such enlisted man or officer of such admission, stating the disease from which such soldier suffers and the condition of his illness, as to whether slight, serious, or critical.

The SPEAKER. Is there objection?

Mr. GARNER. Mr. Speaker, reserving the right to object, has this resolution been reported by the committee?

Mr. REAVIS. It has not.

Mr. GARNER. Does not the gentleman think the Committee on Military Affairs ought to consider this resolution?

Mr. REAVIS. Will the gentleman reserve the right to object?

Mr. GARNER. Surely.

Mr. REAVIS. Mr. Speaker and gentlemen of the House, this resolution is not directed in criticism of any custom of the War Department, for the custom now obtaining in the War Department is the custom that has always obtained in that department with reference to the notification of the nearest relative of the soldier who is ill. I am speaking largely from personal experience, but from what I have learned in the short time since this resolution was introduced I am convinced that a great many parents in America are feeling exactly as I do about it. I have received a great many letters, especially from the eastern part of the continent, asking that this resolution be urged to an immediate passage. It is the prevailing custom of the War Department not to notify the parents of their son's illness. The first notification sent by the department is the notification of death.

There is no word sent to the home regarding the illness of the soldier. I know from personal experience that sometimes lads are thoughtless, and sometimes, probably, because they are very busy, 10 days or two weeks will go by without their writing home. And the parents, knowing the custom of the War Department is not to notify in case of illness, immediately infer that the lad is in the hospital, or, at any rate, is sick. If this Nation could be assured that notification would be given the nearest relative immediately upon the admission of a soldier to the hospital, it would relieve a great deal of anxiety, because in such event, if the boy does not write home, the assurance prevails in that home that no news is good news and that his failure to write is not occasioned by reason of illness.

Then there is another consideration that inspired me to introduce this resolution. There are many parents in this Nation who, if their sons are in the hospital, if they are ill, would like to be at their side. They would like the lad to know that somebody is there who is concerned and who understands, who would like to cheer him by the realization that his father or mother or both are at hand and watching over him. And there are many parents, gentlemen, if disaster should come to the boy, who would like to sit at his bedside and hold his hand as he gropes through the shadows of the approaching night in his journey to the dark river where the ferryman is waiting to bear him across.

This sending of your sons to war is serious business. The fortitude and the courage that has been shown by the homes of this Nation in offering their sons as a sacrifice upon the altar of the Nation's ideals is the strongest assurance we have that, in spite of difficulties and obstacles, we are going through. There is not a man in this Chamber who has not witnessed scenes that demonstrated courage of this kind, which, while sad and depressing, gave assurance that the Nation is behind this conflict even to the sacrifice supreme. [Applause.]

The SPEAKER. The time of the gentleman has expired.

Mr. REAVIS. Mr. Speaker, I ask unanimous consent to continue for three minutes longer.

The SPEAKER. The gentleman from Nebraska asks unanimous consent to continue for three minutes longer. Is there objection?

There was no objection.

Mr. REAVIS. I remember a little incident of this kind which it was my sad privilege to see. I saw a mother standing by the doorway of her home, with a smile on her face, waving good-bye to her first born, as, brave and handsome in his new uniform, he started down the sad and solemn road that leads to war. I saw her smilingly wave good-bye to him until he turned the corner and was lost in the crowd. And then I saw the smile die away and her face twist, as she went wearily to the lonely solitude of his room and knelt by the pillow where her laddie was used to lie and sob her heart out in an agony of grief and fear as she prayed that he might come home again.

We have given to our brave women the assurance that this Nation will care for their sons. Let us give them the further assurance that we will give them immediate notification if things have not gone well with them. For that reason I have not waited for a report of the Military Committee, knowing how busy it was and how anxious the Nation is that this resolution shall be enacted. It is for that reason I have asked unanimous consent for its present consideration, that we may give the assurance to the homes of this Nation that we will advise them if anything goes wrong. [Applause.]

I hope the gentleman will not object.

The SPEAKER. Is there objection?

Mr. GARNER. Mr. Speaker, I want to suggest to the gentleman from Nebraska that he withhold his request until he can consult with the gentleman from California [Mr. KAHN] and the gentleman from Alabama [Mr. DENT]. They do not happen to be in the Chamber at this moment. The matter can be called up later in the day. I do not like to be put in the attitude of objecting to the present consideration of the resolution, but I will be compelled to do so if the gentleman insists. For that reason I ask him to withdraw it for the present, so that he may consult with these gentlemen.

Mr. REAVIS. The Military Committee is so busy with other matters that I very much fear that if we wait on the Military Committee this will be indefinitely postponed, and the time is here when the home ought to be informed that their lads are taken to the hospital ill.

Mr. COOPER of Wisconsin. Will the gentleman permit an interruption?

Mr. GARNER. Yes.

Mr. COOPER of Wisconsin. This is confined to soldiers and to sailors who may be taken to hospitals in continental America.

Mr. GARNER. And the report of any kind of disease they may have can be telegraphed to their parents immediately.

Mr. REAVIS. And who should know it if not their parents?

Mr. GARNER. I think it should go over until the gentleman can see the gentleman from Alabama [Mr. DENT], or the gentleman from California [Mr. KAHN], anyway.

The SPEAKER. Is there objection?

Mr. GARNER. Mr. Speaker, I object.

CIVIL-SERVICE EXAMINATION.

Mr. GODWIN of North Carolina. Mr. Speaker, I understand that the gentleman from Michigan is willing to withdraw his objection to Senate joint resolution 117, and I ask unanimous consent for its present consideration.

The SPEAKER. The gentleman from North Carolina asks unanimous consent for the present consideration of the resolution of which the Clerk will report the title.

The Clerk read as follows:

Joint resolution (S. J. Res. 117) amending the act of July 2, 1909, governing the holding of civil-service examinations.

The SPEAKER. Is there objection?

Mr. FOSTER. Mr. Speaker, I want to reserve the right to object, and say that I think before this resolution should pass the chairman ought to agree to an amendment providing for those who have come to the District of Columbia within the last 12 months. And Members will call to mind the fact that when this matter was up in the Senate Senator OVERMAN took a position there and was instrumental in putting on the civil-service law a provision which tried to do away with all these employees going into the departments from the District of Columbia. Now, it means that if the bars are thrown down all these employees are likely again to come from the District of Columbia.

Mr. DOWELL. Mr. Speaker, will the gentleman yield to a question?

Mr. FOSTER. Yes.

Mr. DOWELL. Does this resolution provide for the examination of those in the District the same as those in the States?

Mr. GODWIN of North Carolina. The law provides for the examination of those in the District as it does outside of the District, from the several States. The purpose of this bill is to permit, during the period of the present war, the examination of persons in the District of Columbia who are from other States; say, for example, citizens residing here temporarily who come from the State of Illinois. During the period of the war they would be permitted to take the examination in the District of Columbia without taking the time or going to the expense of going back to Illinois or to Tennessee or South Carolina or any other State. It does not affect the question of residence or the question of domicile. In other words, the bill provides against that. It says the law of apportionment shall not be abridged or affected. The only provision in this resolution is to permit temporary citizens from any State who happen to be here to take the examination here without forcing them to go back across the country to take it in their home States.

Mr. DOWELL. Then there is no change, as I understand, in the original law——

Mr. GODWIN of North Carolina. None whatever——

Mr. DOWELL. With reference to the selection of persons in the departments?

Mr. GODWIN of North Carolina. That is absolutely safeguarded.

The SPEAKER. Is there objection?

Mr. MONDELL. Reserving the right to object, Mr. Speaker——

Mr. FOSTER. Mr. Speaker, as to the amendment——

The SPEAKER. The gentleman from Illinois has not finished——

Mr. FOSTER. Which was placed in the civil-service law, the Senator who placed it there was very particular not only to say that the applicant must be a resident of the State but that he must be domiciled there, so that the filling of these departments all from the District of Columbia might be avoided. We all know that there are thousands here who may come from Michigan or Illinois or Pennsylvania or any other State, and it throws the doors absolutely wide open. It does not provide that those people shall be excluded after the war is over. Nobody knows how many of them may be retained.

Mr. DOWELL. As I understand it, this provision is not in the resolution?

Mr. FOSTER. No.

Mr. DOWELL. Mr. Speaker, I object.

The SPEAKER. The gentleman from Iowa objects.

QUESTION OF PERSONAL PRIVILEGE.

Mr. BLANTON rose.

The SPEAKER. For what purpose does the gentleman from Texas rise?

Mr. BLANTON. To give notice of bringing up a question of privilege.

The SPEAKER. If you are going to have the question of privilege up now, well and good.

Mr. BLANTON. I will state, Mr. Speaker, that I give notice now to the gentleman from Texas [Mr. WILSON] that next Monday I shall rise to a question of personal privilege to answer an article that he has put into the RECORD this morning, yesterday's RECORD.

The SPEAKER. The gentleman from Texas [Mr. WILSON] will take notice.

SOCIALIST STATE CONVENTION IN SOUTH DAKOTA.

Mr. LONDON. Mr. Speaker, I ask unanimous consent to address the House for 10 minutes.

The SPEAKER. The gentleman from New York asks unanimous consent to address the House for 10 minutes. What about?

Mr. LONDON. I received this morning a letter from the secretary of the national executive committee of the Socialist Party, in which he protests against the breaking up of a Socialist State convention by the authorities in South Dakota.

The SPEAKER. The gentleman from New York asks unanimous consent to address the House for 10 minutes on the subject indicated. Is there objection?

There was no objection.

Mr. LONDON. Mr. Speaker, I have not prepared myself for this short talk, and I speak more on impulse than in deliberation.

Only a few moments ago I read this letter from the secretary of the national executive committee of the Socialist Party. He tells me that he is in receipt of several letters from South Dakota, complaining that the authorities prohibited the holding of a Socialist convention at Mitchell, S. Dak., on January 22, 1918. He says:

> Not only was the convention broken up, but a lawless mob seized Comrade William C. Rempfer—

Socialists refer to each other as "comrades"—

> one of our most active comrades, and deported him from the city. The purpose of this convention was to nominate candidates for office and draft a State platform.

He writes further:

> Something ought to be done about this, and I believe that Congress is a good place to unmask the capitalist anarchists that are parading under the mantle of "democracy."

I shall now read a copy of a letter from William C. Rempfer, upon which the complaint of the national secretary is based. The letter was addressed, the national secretary informs me, by Mr. Rempfer to the governor of the State of South Dakota and to Mayor J. F. Wells, of Mitchell, S. Dak.:

> The convention of the Socialist Party of South Dakota, duly called for January 22, 23, and 24, met in Mitchell for the purpose of drafting a platform and nominating State candidates for the next general election, subject to referendum of the party membership.
>
> It was an orderly political convention, conducting its business in a legal way. The sessions were public, and a representative of the city government was requested to be present at all sessions.
>
> Imagine the surprise of the delegates when on the morning of the 23d orders were given by the police of Mitchell to disperse the convention, and the convention was dispersed by the authorities.
>
> We were informed that Mayor Wells, who was attending a meeting of the State council of defense at Sioux Falls, had telephoned the police of Mitchell to disperse the meeting of the delegates then in session and to forbid further sessions of the convention.
>
> If similar action is taken when the Democratic Party and the Nonpartisan League attempt to hold their conventions, Gov. Norbeck will be unanimously reelected governor of South Dakota in November, for the obvious reason that it will be impossible to nominate candidates against him.
>
> I was duly elected delegate to the Socialist convention. A short time after our convention was adjourned sine die by the city authorities of Mitchell, news reached me that the police had ordered me out of town. About half hour later, while I was walking on the main street of the city, an automobile dashed up to the curb near me, five men sprang out, and laying hands on me from all sides, they forced me into the car. I demanded to know by what authority or under what orders I was thus treated, but in vain. Carefully guarded on all sides and ordered to keep my mouth shut, I was driven into the country a distance of 5 miles, when the car came to a stop. The ringleader opened the door and ordered me out, saying, "Ethan is 8 miles south. Don't you attempt to telephone from any farm house along the line. There are men there to stop you. And don't you ever come back to Mitchell. That's permanent." Thereupon these guardians of democracy got into the car and returned to Mitchell.
>
> Do you countenance these two examples of mob-law methods, or do you deem it advisable to institute a thorough investigation and prosecution of the guilty offenders, even though they be public officials?

For the present I will only say that now, when the whole world is watching the work of the German social democracy, when the hope of every mother in America is that the spirit of rebellion and love of democracy and love of general peace among the German socialists will save the American boys from the trenches, when the hope of the whole world is that the revolutionary movement will wind up the war abroad and force a universal peace and compel tyrant and oppressor, plutocrat and financier, imperialist and traitor against the welfare of the people to restore the world to a normal state, it is a dastardly act, it is the act of scoundrels, to be breaking up Socialist conventions. It can do no good to America. It can do no good to the cause in which this country is engaged. It will not increase the respect for the democracy of the United States, and this Congress should take some action. Somebody should take action to condemn methods of this sort.

Mr. AUSTIN. Will the gentleman tell us what this man was doing, or what kind of a speech he was making, to provoke the law officers to arrest him?

Mr. LONDON. I do not know what speech he was delivering, but I have read before you a communication, and I base my speech upon this communication; and I furthermore say——

Mr. AUSTIN. Suppose he was inciting revolution, or opposition to the Federal draft law, for instance; what would be the gentleman's position?

The SPEAKER. Does the gentleman from New York yield to the gentleman from Tennessee?

Mr. LONDON. I do not care to yield, but the gentleman has asked a question, and I say if this man advocated opposition to the draft, there is a law to deal with that subject, and the individual who advocated opposition to the draft should have been dealt with as an individual; but the breaking up of a convention of a political party is a denial of every principle of democracy.

Mr. AUSTIN. That depends on what the convention was doing.

The SPEAKER. Does the gentleman yield?

Mr. LONDON. I decline to yield further, and I do not care to have these interruptions. One can readily see the danger of little groups of men assuming the function of guardians of liberty. What a fine state of affairs we will have if groups of ignorant merchants with their clerks will assume to be censors of speeches and of the press and break up political conventions. If the gentleman thinks that is a good method, that that is a safe thing for democracy, he has a peculiar notion of democracy. I hope Congress will take some action to make a repetition of these offenses impossible. The importance and influence of the United States in the present world contest, the participation of the United States in this world struggle can only be effective to the extent to which people respect America as a liberty-loving country. It is not the armies of America that will count, it is the fact that this Republic is to be the carrier of ideals of democracy; that will count.

Mr. MILLER of Minnesota. Will the gentleman yield?

Mr. LONDON. Pardon me one moment. Every denial by the constituted authorities of the fundamental principles of law injures the United States in the eyes of the world, and by injuring the United States it postpones the day when peace will be restored.

The SPEAKER. Does the gentleman from New York yield to the gentleman from Minnesota?

Mr. LONDON. No—well, I will yield.

Mr. MILLER of Minnesota. The gentleman had better yield, or hereafter when he asks unanimous consent to address the House he will not get it.

The SPEAKER. The gentleman from Minnesota is out of order.

Mr. LONDON. I yield to the gentleman in spite of his threat.

Mr. MILLER of Minnesota. All right.

The SPEAKER. The remark of the gentleman from Minnesota is out of order. Now, any question he wants to ask the gentleman from New York——

Mr. LONDON. I yield to the gentleman——

Mr. MILLER of Minnesota. By permission of the Chair——

Mr. LONDON. I yield for a relevant question, of course.

Mr. MILLER of Minnesota. Does the gentleman recognize any difference between disloyalty and treason and democracy?

Mr. LONDON. Oh, why should the gentleman not ask me whether I recognize any difference between a Member of Congress from Minnesota and a mule from Missouri?

Mr. MILLER of Minnesota. I do not imagine that the gentleman recognizes that there is any difference.

Mr. LONDON. They are two different propositions. The gentleman does not come from Missouri, anyway, and I would not care to designate him as the thing to which I referred. There is no comparison between democracy and the things he mentions.

Mr. MILLER of Minnesota. If the gentleman can tell the difference, his intelligence is greater than I have given him credit for heretofore.

Mr. LONDON. There is no comparison between these things, and if parliamentary practice would permit it I would call the gentleman's question by its proper name; but I prefer to be polite all the time. [Laughter.]

AGRICULTURAL APPROPRIATIONS.

On motion of Mr. LEVER, the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 9054) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1919, with Mr. CRISP in the chair.

The CHAIRMAN. When the committee rose last evening the gentleman from South Carolina [Mr. LEVER] had proposed an amendment, and on that amendment the committee had agreed that there should be 50 minutes of debate, the gentleman from Michigan [Mr. MCLAUGHLIN] to control half that time and the gentleman from South Carolina to control half. For the information of the committee the Chair will now direct the Clerk to read the amendment proposed by the gentleman from South Carolina.

The Clerk read as follows:

Page 78, in lieu of the paragraph stricken out at the top of the page, insert the following:

"For enabling the Secretary of Agriculture to investigate and certify to shippers the condition as to soundness of fruit, vegetables, and other food products, when received at such important central markets as the Secretary of Agriculture may from time to time designate and under such rules and regulations as he may prescribe: *Provided*, That certificates issued by authorized agents of the department shall be received in all courts as prima facie evidence of the truth of the statements therein contained."

Mr. LEVER. I ask the gentleman from Michigan, [Mr. MCLAUGHLIN] to use some of his time.

Mr. McLAUGHLIN of Michigan. I yield five minutes to the gentleman from Pennsylvania [Mr. ROBBINS].

Mr. ROBBINS. Mr. Speaker, I wish to direct my opposition to this amendment, especially to the clause which provides that the certificates issued by the agents of the Department of Agriculture shall be received as prima facie evidence in the courts. This is an attempt to change entirely the rules of evidence, and I appeal now to the lawyers of this body whether we ought to take a drastic step of that kind. The amendment has been changed by the chairman of the Committee on Agriculture by leaving out the provision for "the payment of the fees" for services of this kind by the party whose goods are examined.

Mr. LEVER. Will the gentleman permit me just for a moment?

Mr. ROBBINS. I have only five minutes.

Mr. LEVER. That was in the original proposition——

Mr. ROBBINS. I know. The gentleman has omitted it from the amendment.

Mr. LEVER. It was not done by me, but by the gentlemen on the other side.

Mr. ROBBINS. The gentleman wants to put in this amendment on the ground that it is incorporated in the general food-control bill. That does not make it a legal proposition by any means. What we propose to do here is to make the certificate of an authorized agent of the Department of Agriculture prima facie evidence in the courts.

It is unfair to establish a different method of proof in the case of loss or damage to a consignment of vegetable or fruit from that which applies in case of a shipment of coal, lumber, or merchandise. In case of perishable goods the loss may be occasioned by the negligence of the carrier "in transit," or it may be it is the result of the refusal of the consignee to promptly accept and properly care for the shipment, or the damage or loss may arise from many other causes. Now, I submit, Mr. Chairman, a mere certificate, ex parte in character and not sworn to, should not be accepted as sufficient proof of such loss.

The only proper method of establishing the facts that constitute such loss or damage would be by a deposition regularly taken upon notice and the submission of cross-interrogatories or by taking the evidence in court, where an opportunity is given to meet the witnesses and cross-examine them. This amendment is for the benefit of the farmer. The method proposed does not contain these safeguards and will work great hardship on our farmers.

The procedure here provided is contrary to the practice of all the courts in all the various Commonwealths that I know anything about. It provides that a certificate, not given under oath, but a loose certificate by an agent of the Department of Agriculture, shall be taken in the courts and accepted on the same basis as a deposition, without opportunity to cross-examine, and without an opportunity to ascertain what the facts are, and ascertain them according to the usual practice in courts of law. Here is a prima facie case made out by the mere ex parte certificate not under oath, given by any agent of the Department of Agriculture, a very unusual and unsatisfactory method of procedure.

Let us see how it will work out. If, as the gentleman said last night, a carload of asparagus or lettuce is shipped from South Carolina to the market in the city of Pittsburgh, if, when it arrives, it is in a damaged condition and the consignee refuses to accept it, all he has to do is to go to one of the agents of the Department of Agriculture and get a prima facie certificate that it is damaged, and he is not bound to accept it. Now, the consignor lives at a distance in the South, and is a vegetable grower, because that is the kind of people that are supposed to get protection under this bill, and when he undertakes to collect for his shipment he will be confronted by this ex parte certificate of the agent of the department which will estop him when he seeks to recover. It may be that he will have to go into the district court of the United States, being a citizen of another State.

Mr. COOPER of Wisconsin. Will the gentleman yield?

Mr. ROBBINS. I will.

Mr. COOPER of Wisconsin. I think none of us have seen the amendment or read it. Will the gentleman state what the certificate will contain, what statement of facts?

Mr. ROBBINS. There is nothing to regulate it except that it is expected that the Department of Agriculture, through the Secretary, will prescribe rules and regulations. I do not know what those will be, but I assume that they will be reasonable and just; but that is not the point; we are changing the proceedings in courts and the established rules of evidence.

I think the constitution of the gentleman's State, and I appeal to the chairman of the Agricultural Committee, for I assume he is a lawyer, must contain some provision like we have in the State constitution of Pennsylvania, wherein it is provided that "the legislature shall not pass any law regulating the practice in courts, or change the rules of evidence in any judicial proceeding."

This amendment, therefore, is wrong, wrong in principal, and it is flying in the teeth of all practice in my Commonwealth; and of course the United States courts that would try these cases in the several States are guided by the rules of evidence that apply in the State where the court is located. If we are to accept these certificates, we will establish by statute the principle that the declaration of an agent, unverified, is to be taken as prima facie evidence against the claim made by a citizen of a distant State who may be the consignor of the vegetable product. That is against the practice of our courts and the law as now administered and therefore I think the proviso ought to be stricken from the bill altogether as vicious and of no good value to legislation enacted by this Congress.

Mr. LEVER. Mr. Chairman, I yield five minutes to the gentleman from South Carolina [Mr. BYRNES].

Mr. BYRNES of South Carolina. Mr. Chairman, under the practice existing for marketing foods and vegetables the truck growers have been forced to be the greatest gamblers in the country. They invest their money in high-grade fertilizers, overhead irrigation and other expensive methods, and produce vegetables and fruit. Then, in response to attractive circulars they send them to commission merchants in the great markets of the Nation. They have turned their products over to the

railroads to be transported to the commission merchant and sold by him and the returns made. They have waited to see what the car would bring, and in too many instances it has brought nothing but a demand for a check to pay the freight, because the commission merchant has claimed that the produce when it arrived was in bad condition. The farmer has had no earthly chance to ascertain whether or not the statement was true. He could not maintain a representative in the markets of the Nation.

Now, we propose by this service, for which the appropriation of $113,000 is proposed, to have a representative of the Bureau of Markets stationed in these markets to certify to the condition of the produce whenever the grower asks that an inspection be made to ascertain whether or not the vegetables or fruit are really in bad condition. The mere presence of an inspector of the bureau, whose services are at the disposal of the farmer, will cause the commission man to hesitate to misrepresent the condition of the produce upon arrival. The hearings will show that from the State of Washington the Yakima Truck Growers' Association called on the Bureau of Markets to make such an inspection, and it saved the truck growers money. In the hearings Mr. Brand, the chief of the bureau, also gave an instance of a peach growers' association in Arkansas shipping several cars of peaches to Chicago. The Bureau of Markets, acting on the request of the truck growers' association, made an investigation and found that the commission merchants had robbed the truck and fruit growers of Arkansas, and as a result the growers were able to recover the money due them.

The evil exists and the remedy can be applied by the Bureau of Markets. The question is, shall we refuse to apply it because, as was suggested yesterday, it is paternalism. Why, 50 per cent of the appropriations provided for in the Agriculture bill is paternalistic. Unless some remedy is applied, the truck growers can not continue business. No agency but a Government agency can serve to relieve the situation. Now, the President calls on the farmers to increase their acreage. Under the methods I have described would one of you continue to plant vegetables? You would not, unless you are a natural gambler. I have known many men who were compelled to discontinue the planting of fruits and vegetables simply because there was no way of getting a square deal from the commission men. The gentleman from Pennsylvania says it would be a violation of the rules of evidence to provide that the certificate of the inspector shall be accepted as prima facie evidence of condition. You have similar provisions, providing for a similar certificate by the Interstate Commerce Commission, that it shall be received as prima facie evidence in the courts of any State as to the rates. You can look at the warehouse act and find the same thing. If he has fear that the truck grower will be injured by the certificate, the truck growers will rise and waive their rights under it, because they know it offers them the only chance to secure a square deal from the commission men. The railroads will not object. I have stood in the courthouse time after time when a grower has brought an action against a railroad company based upon a telegram from a commission merchant in some market saying his cantaloupes, for instance, arrived in bad condition. The railroad has brought in employees from the Potomac Yards, and all of the terminal yards, to show that the car was properly iced and that the fruit arrived there in good condition. In the majority of cases, I am satisfied, the railroads were not liable, and the cantaloupes did not arrive at their destination in bad condition. The truth was that the commission merchant was robbing the farmer. And they have defrauded the Colorado farmer, the grower in Washington, California, and throughout the West just as they have the truck growers of the South. Now, if we deny the use of a governmental agency here, we will discourage production at a time when it is needed and hereafter vegetables will be higher in the markets of the East at a time when we all know we ought to do what we can to make them lower. By increasing the production of perishable foodstuffs for consumption in this country we will make it possible to ship more nonperishable foodstuffs to our soldiers and our allies in Europe. [Applause.]

Mr. McLAUGHLIN of Michigan. Mr. Chairman, I yield five minutes to the gentleman from Wisconsin [Mr. STAFFORD].

Mr. STAFFORD. Mr. Chairman, we are launching on a policy, if we adopt this amendment, the final outcome of which no one can predict. Adopt this amendment as it stands here to-day, which is limited only to inspection of truck gardening, fruits, and foodstuffs in central markets, and you will have a demand growing and growing which will finally require you to have inspection not only in the central markets but in every market of the country, not only limited to this character of produce but to live stock and to all character of shipments. As far as I know the dealings between commission merchants and truck gardeners tributary to my home city has not been such as to bring any criticism upon those commission merchants that they were not upright. Their dealings have been based on good faith, and when the farmer has shipped berries or other garden truck to the market in Milwaukee there has been no complaint that he has not received his full rights and compensation for it. But here we have the idea that every character of shipment, whether the dealings between the commission merchant and the producer are satisfactory or not, must be examined by these inspectors. This will create a horde of inspectors where there is no necessity. I grant for the sake of argument that there may be instances cited where the commission merchant has taken advantage of the producer and has not dealt fairly, but in the course of business that condition rights itself. The producer is not going to deal with a disreputable commission merchant, but by this provision, instead of merely inspecting the goods of those where they may not have had proper consideration before, you are going to oblige every shipment sent to the central markets to be examined, and that report accepted with full faith in the courts, regardless of what the commission merchant may say as to the character of the shipment. If we are going to launch on this policy of paternalism, there is no end to which it may go. I felt compelled to make the point of order yesterday against this new activity of the National Government in trying to prevent it going into a field where there is no necessity for it.

Mr. FORDNEY. Mr. Chairman, will the gentleman yield?

Mr. STAFFORD. Yes.

Mr. FORDNEY. I know of an instance where a Michigan fruit grower made a shipment of peaches to Chicago. Word came back from the commission dealer that he did not receive enough for the fruit to pay the freight, and he sent a bill for $2.78, and asked the shipper to remit that amount to him. The shipper replied, "I have no more money, but can send you another carload of peaches." What are you going to do in such a case as that? [Laughter.]

Mr. STAFFORD. Oh, the gentleman can cite isolated cases, but the gentleman knows also there are hundreds of cases where there has not been any unfair dealing between the fruit grower and the commission merchant, and yet every consignment imaginable will have to be inspected and the returns of all the reputable dealings will be passed on, as well as those few instances of disreputable dealings. I answer the gentleman by saying that after that producer has ascertained that the commission merchant is not dealing fairly with him, is he going to continue to do business with him? Are you going to have Government inspectors determine who is the proper person for the gardener to deal with in the sale of produce? Perhaps the gentleman from Michigan is in favor of this paternalistic policy, and I assume he is. I assume he wants all shipments of every kind to be inspected on their arrival to determine whether the dealing between the producer and the commission merchant should continue, or allow the relations in the natural course of business to continue as they have done in the past.

Mr. BYRNES of South Carolina. Is not the gentleman mistaken in thinking that every shipment will have to be inspected? This is only where the shipper calls upon the Bureau of Markets to perform this service.

Mr. STAFFORD. But there is no such limitation at all in the provision. It has been testified here that the head of this bureau wants to enlarge his activities. If the producer is satisfied with existing arrangements with the commission merchant, why should not that condition be continued rather than force on the Government the inspection of every character of shipment of produce sent to these central distributing points?

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. McLAUGHLIN of Michigan. Mr. Chairman, I yield five minutes to the gentleman from Indiana [Mr. FAIRFIELD.]

Mr. FAIRFIELD. Mr. Chairman, I am not opposed to the principle involved in this legislation. I am not sure but that the time will come when shipments will have to be safeguarded more thoroughly to the farmer. What I object to is that in a single paragraph here in an appropriation bill legislation of such far-reaching consequence should be immediately passed upon without proper safeguarding that legislation. Who is interested in this legislation? You would think that only the shipper is involved, but not only the shipper but the common carrier, the commission merchant, and the public are all involved in legislation of this kind. To give an illustration with reference to the need of such legislation, two or three years ago a lawyer friend of mine said to me, "I had a peculiar case the other day. A commission house of this city had refused a carload of watermelons—denied payment. We brought suit for the man

who had shipped the melons. It was found out that when the melons arrived there was an unusual number of melons on the market and that the commission merchant permitted them to remain in the car for 48 hours, when the stock was practically worthless." This called my attention sharply to the problem. I learned also that men sometimes, in shipping onions and in shipping potatoes, were absolutely helpless in the hands of a commission merchant. On the other hand, however, to begin a thing like this it might be well for us to inquire as to what should be the characteristics of the inspector. He should be alert, active, and, above all else, he should be honest, for the commission men of this country are not, as a rule, dishonest. I have but little respect for that sort of a proposition which arraigns a great body of business men as being dishonest, yet it is true that again and again the farmer suffers. In my judgment this legislation ought to compel that the inspector be bonded. It ought to be safeguarded at least to that extent, and that he should be called into court the same as any other witness and examined carefully, so that all sides may have opportunity for redress if it is necessary. For that reason, gentlemen, not because I am opposed to the principle of the legislation, I think the legislation is dangerous thus quickly to be passed without studying it more thoroughly than we are capable of studying it at this time.

Mr. ROBBINS. Will the gentleman permit a question?

Mr. FAIRFIELD. I will.

Mr. ROBBINS. Does not the gentleman think any inspector who has such responsibilities as are placed on him by this bill should be subject to cross-examination?

Mr. FAIRFIELD. Absolutely.

Mr. ROBBINS. For the protection of the farmer as well as the consignee?

Mr. FAIRFIELD. Absolutely.

Mr. LEE of Georgia. I yield five minutes to the gentleman from Texas [Mr. CONNALLY].

Mr. CONNALLY of Texas. Mr. Chairman, it seems to me that I have somewhere read or heard something about it being necessary to conserve food for the purpose of winning the war. One of the cardinal principles in a rational system of conservation is that we shall utilize as much as possible the perishable foods so that the nonperishable foods may be sent to our Army.

Now, it seems to me that gentlemen take a very peculiar position when they are willing to appropriate thousands, yea, millions, of dollars, to make agricultural investigations and publish agricultural reports and bulletins, and in theorizing, and in fictional farming, and yet when it comes to permitting the Department of Agriculture to really do something practical and tangible they throw their hands up in holy horror and say it is no function of the Government.

Already you have heard a great deal here about the abuses that have crept into the system of marketing farm produce. Now, I am not speaking alone for the producer, but also for the consumer, because whenever you destroy a market for the producer you are destroying a market for the consumer. Whenever you prevent the producer from getting his perishable products to the man that is waiting to eat them, you are not only injuring the producer but you are injuring the man who is hungry. And so, gentlemen, it seems to me that this provision of the bill which authorizes the Secretary of Agriculture to permit the inspection of farm products by his inspectors and the making of a certificate to that effect is a very wholesome regulation.

Now, the gentleman from Wisconsin [Mr. STAFFORD] seemed to be very much afraid that this provision would require the inspection of all shipments. This provision is already in the food-control bill, and my information is that the Secretary of Agriculture only inspects shipments when called upon to do so. On the other hand, the gentleman from Wisconsin, I suppose, would only have an inspection made in cases where lawsuits ensue, and he would wait until all the produce and fruit had rotted and been thrown in the river or condemned by the State authorities, and then he would have the Secretary of Agriculture make a professional inspection, or post-mortem examination. [Laughter.]

Now, gentlemen, these abuses have happened in the past, and they will happen in the future unless some regulation of this kind is made.

Mr. MASON. Mr. Chairman, may I ask the gentleman a question?

Mr. CONNALLY of Texas. Yes, sir.

Mr. MASON. Is it not a fact also that these proposed inspectors will be a protection to the honest commission merchant, so far as damaged goods that have been shipped to him are concerned? He can call for an inspection. That certificate is prima facie evidence, which can not be overcome, and it is a protection not only to the producer or consumer but to every commission merchant who is honestly dealing with his customers.

Mr. CONNALLY of Texas. I am very glad indeed to have the gentleman from Illinois call that matter to my attention, and I heartily agree with that proposition, because the honest commission merchant will then have a way of convincing the shipper that he has in fact given him a square deal.

Mr. LITTLE. Will the gentleman yield?

Mr. CONNALLY of Texas. Yes.

Mr. LITTLE. While we will admit, for purpose of argument, anyway, that the commission merchant is just as honest as everybody else, is it not a fact that the peculiar character of this commission business, which subjects the commission man to the rise and fall of the market that he can not regulate really subjects him to more temptation than anybody else?

Mr. CONNALLY of Texas. I have not been a commission merchant, and I am not sure as to how much temptation——

Mr. MOORE of Pennsylvania. Will it tempt the commission merchant any more than it will tempt the farmer to put a few bad apples in the bottom of the basket?

Mr. CONNALLY of Texas. Since the gentleman from Pennsylvania is looking at it from one direction and the gentleman from Kansas from another direction, I am going to leave it to their own settlement. But when you destroy a market for the one, you destroy it for the other.

At the last session of Congress there were loosed in this Chamber many cubic feet of oratory about the venality, the crookedness, and the general all-around cussedness of the middle man; he was castigated and villified; no term of execration was spared, and there was a loud cry for his crucifixion; Members demanded his utter destruction. Now, the functions of the middle man are necessary to healthy and normal commerce. There must be some agency to buy products and resell and distribute them to the ultimate consumer, especially where the consuming centers are far removed from the producing centers. If the Government should destroy the middle man and should fail to furnish a substitute, food would rot in producing centers, and people would starve in consuming centers. Is it not much better and wiser to permit the middle man, the broker, the commission merchant, and jobber to continue to perform the useful functions involved in the purchase, sale and distribution of products and yet at the same time require him to act with fairness and good conscience toward sellers and buyers alike? Great quantities of perishable foods are wasted each year because of poor market conditions and transportation difficulties. Farmers and truck growers often permit products to waste rather than incur transportation charges and run the risk of receiving advices from a broker hundreds of miles away that their produce arrived in a condition so damaged as to be unmarketable. The amendment will measurably remedy that situation, and I hope that it may be adopted.

When we make it easier for the producer of foods to get a "square deal" it will also be easier for the consumer to get a "square meal." [Applause.]

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. McLAUGHLIN of Michigan. Mr. Chairman, I yield three minutes to the gentleman from Illinois [Mr. JUUL].

Mr. JUUL. Mr. Chairman, this clause of the Agricultural bill seeks to appropriate $113,000 to enable the Secretary of Agriculture to investigate and certify to shippers and other interested parties the quality and condition of fruits, vegetables, and other food products when received at such important markets as the Secretary of Agriculture from time to time designates.

I think the gentlemen on this floor fail to take cognizance of the fact that the bill just speaks upon the subject of receiving. You want inspection of fruits, vegetables, when it is received. The difficulty is not happening when the fruit is received, for instance, in Chicago, it is happening about the time it is sold, and I do not imagine that many of you gentlemen have seen the yards in the big railway terminals in Chicago when fruit arrives during the summer time.

Cars arrive by the hundreds, and this difficulty of which you have spoken here to-day, shipping fruits to the great markets and instead of getting the proper checks for the produce receiving bills from the commission merchants for transportation. Many times the cause of this difficulty is not dishonesty but the fact that the fruit comes into Chicago on Saturday or on days before legal holidays, the yards are crowded with the fruit, and there is no opportunity in the time between the arrival of the fruit and the holiday to get it out of the yards and profitably marketed, so the fruit or vegetables, as the case may be, is turned over to a number of peddlers and the fruit offered to them at any price that can be gotten, and I have often seen numerous

peddlers' wagons with the peddlers crying a dozen peaches for a nickel.

You can imagine what he pays for them when he sells them at that price. You can see that condition in Chicago, and I suppose in all large centers of this country, time after time.

And I think, Mr. Chairman, that in this bill, in line 4, the gentleman having the bill in charge ought to insert in addition to the matter of inspection a proviso to enable the Secretary of Agriculture to investigate and certify to shippers and other interested parties the quality and condition of fruit, vegetables, and other food products when received and at the time of sale.

The question is not only of the condition when the fruit is received in the yards, it is a question of the condition of the fruit when it is marketed, and you can not send unlimited numbers of cars of fruit into South Water Street, the great produce street in Chicago, having these cars arrive on Saturday afternoons, and always be sure to sell it at once at prices which such fruit ought to bring.

On the receipt of vast quantities of fruit on a Saturday or the day before any day not a market day you can do one of two things, namely, let the stuff become a total loss or get for it what you can and report the result to the shipper.

I am not here to defend dishonest commission men. I hope they will put them all in jail.

Mr. COOPER of Wisconsin. Mr. Chairman, will the gentleman permit an interruption?

Mr. JUUL. Yes

Mr. COOPER of Wisconsin. As to the reason that you mentioned, of this deterioration of this perishable stuff, does not the commission merchant take that into account in the prices he charges his customers? I think they do that in this city at least.

Mr. JUUL. I will say that he does take it into consideration.

Mr. COOPER of Wisconsin. Then should the farmer be obliged to bear any portion of it, if he sends the goods and they reach the commission merchant in good shape?

Mr. JUUL. That is the question. Do they reach the commission merchant in good shape? They reach the tracks in good shape, but the freight piles up by hundreds and hundreds of cars and the next day is a holiday. If the next day should be a market day, it could be sold; but if the commission merchant does not clear it up the stuff rots on the tracks.

I firmly believe in inspection both as a measure of protection for the farmer and for the protection of the reputation of the honest commission merchant, who is often confronted with enormous shipments of perishable produce.

When said shipments arrive in the great cities faster than disposition can be made of them, the middleman's only choice is to dispose of them for anything they will bring.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. JUUL. Mr. Chairman, I ask leave to insert the few words that I failed to utter.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. McLAUGHLIN of Michigan. I yield three minutes to the gentleman from Wyoming [Mr. MONDELL].

The CHAIRMAN. The gentleman from Wyoming is recognized for three minutes.

Mr. MONDELL. Mr. Chairman, I am not enamored of paternalism, and I think we should be very careful about endeavoring to change the rules of evidence in the courts. I am much impressed by what the gentleman from Michigan [Mr. McLAUGHLIN] and the gentleman from Wisconsin [Mr. STAFFORD] and the gentleman from Pennsylvania [Mr. ROBBINS] have said relative to these matters. Yet, after all is said and done, we are indulging in paternalism to a very large extent in many lines, and if we can, along this line, indulge in a little paternalism that ought to be and could be and will be, if honestly administered, a benefit to the producer and the consumer alike, I think we may very properly do it.

It is something of an experiment. It is an experiment that may involve possibly scandal. The men employed by the Federal Government may not always be honest and conscientious and upright and fair in their judgment. But we must assume that they will be, and there is a service here that, if properly and wisely rendered, will be very valuable. We need to smooth the way between the grower and the producer and the consumer; to cut down, as far as we can, the gap of prices between the two and make the way easy to a distribution that will give the producer a fair price and honest treatment, and the consumer his product at the lowest price possible.

I am inclined to think this experiment is a wise one. We ought at least to try it out and see how it works. I am sure it will do good.

The CHAIRMAN. The time of the gentleman from Wyoming has expired.

Mr. LEVER. Mr. Chairman, I ask the gentleman from Michigan to yield some time.

Mr. McLAUGHLIN of Michigan. Mr. Chairman, I yield three minutes to the gentleman from Pennsylvania [Mr. MOORE].

The CHAIRMAN. The gentleman from Pennsylvania is recognized for three minutes.

Mr. MOORE of Pennsylvania. Mr. Chairman, I do not object to the inspection of these perishable fruits on their receipt at any market place, nor would I object to their inspection at the point of shipment. It seems to me it would be just as important to inspect them when shipped as it would be to inspect them on their receipt, because many things happen between the time they are put on their journey and the time they arrive, and much could be said in behalf of the commission merchant in that regard.

I do not believe commission merchants are wholly dishonest. There may be a few dishonest ones amongst them, just as there may be a few men in the farming fraternity who would be inclined to take advantage of an opportunity to put a few small potatoes in the bottom of a barrel or a few bad apples in the bottom of a basket. But that should not reflect on the entire farming community. We must assume that both parties are honest, and we should realize that one depends upon the other. The commission man is essential to the farmer, because the farmer of Nebraska, for instance, can not get directly to the door of the consumer in New York or Washington. He must depend upon an intermediary to get him to the market. I do not like the wholesale denunciation of the commission man; he is the necessary middleman between the producer and the consumer. The producer and the consumer can not get together with respect to these perishable commodities without the intervention of the commission merchant; he is justified in the position he occupies.

What I do object to here is the proviso in this amendment that the certificates issued by the Government inspector shall be received in all courts as prima facie evidence of the truth of the statements therein contained, without giving the right to either party to the contrary to call him to court. I am not enough of a lawyer to discuss the rules of evidence, but it seems to me if an inspector is capable of making a certificate, he is capable of backing it up in court. I would not care to rely on the certificate of an inspector who operated wholly in a farming district, any more than I would care to rely upon the certificate of an inspector who operated wholly among the commission merchants. He may be influenced by one or the other, and if there was a controversy between the parties who unfortunately had to go to court, one or the other of them ought to have the right to summon that inspector into court to prove the accuracy of his certificate.

Mr. REAVIS. Mr. Chairman, will the gentleman yield?

Mr. MOORE of Pennsylvania. Yes.

Mr. REAVIS. What is there in this to prevent the inspector being called as a witness?

Mr. MOORE of Pennsylvania. Nothing, except that the certificate of the inspector shall be accepted as prima facie evidence.

Mr. REAVIS. Only prima facie, not conclusive, evidence.

Mr. MOORE of Pennsylvania. I say I am not sufficiently versed in law to discuss the rules of evidence, but several gentlemen who are lawyers have done so. I do not think a certificate issued by an inspector, who is essentially human, and who is subject to influence by farmers on the one hand or by commission merchants on the other, should be accepted in court as evidence. A party to a suit ought to have the right to summon the inspector for cross-examination.

Mr. REAVIS. There is nothing in this to prevent his summoning the inspector, and his certificate must be prima facie, not conclusive, evidence.

Mr. MOORE of Pennsylvania. If it means nothing, why is the proviso inserted?

Mr. REAVIS. Of course it means something.

Mr. MOORE of Pennsylvania. It is evident that the certificate is to be taken as evidence in the absence of the inspector.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. LEVER. Mr. Chairman, I yield five minutes to the gentleman from Mississippi [Mr. CANDLER].

The CHAIRMAN. The gentleman from Mississippi is recognized for five minutes.

Mr. CANDLER of Mississippi. Mr. Chairman, the present food-control law contains this item:

For gathering authoritative information in connection with the demand for and the production, supply, distribution, and utilization of food, and otherwise carrying out the purpose of section 2 of this act; extending and enlarging the market news service; and preventing

waste of food in storage, in transit, or held for sale; advise concerning the market movement or distribution of perishable products; for enabling the Secretary of Agriculture to investigate and certify to shippers the condition as to soundness of fruits, vegetables, and other food products, when received at such important central markets as the Secretary of Agriculture may from time to time designate and under such rules and regulations as he may prescribe: *Provided*, That certificates issued by the authorized agents of the department shall be received in all courts as the truth of the statements therein contained.

The amendment pending is in accordance with this provision in the food law and prescribes the amount of money that is to be appropriated.

Now, this provision pending before the House does not enact the law to make the certificates prima facie evidence. That is already in the law. It is in the food law; it is in the warehouse law; it is in the grain-grading law; it is in all the laws that have been enacted along this line on matters of this character. Therefore the argument in reference to enacting this into law necessarily falls to the ground because it is already the law. But if it is not the law it would be a good thing to put in here now. It simply shifts the burden of proof; that is all. It does not deny to the commission merchant the right to controvert it at all. It simply has this effect, that when you introduce that certificate that establishes a prima facie case. Then the other man, if he wants to controvert any statement in this certificate, can furnish the proof, if there is proof, to overcome that prima facie case made by the introduction of the certificate of the inspector. Gentlemen, this provision pending if enacted will not only protect the shipper but it will protect the transportation company; it will protect the honest commission merchant; and it will protect the public. There is not a single criticism that has been offered to this provision up to date by anybody; that is a sufficient answer to show why it ought not to become a law, because the sole purpose of it is to secure honesty in dealing between the shipper and the commission merchant who is dealing with the public. It is in the interest of fair dealing, in the interest of the protection of the man who is honest and wants to do the right thing, whether he be shipper, merchant, or consumer. The merchant who proposes to deal honestly and squarely with the man who is shipping his products to him will not object to this provision. The shipper will not object to it, because it furnishes him with the protection he ought to have. The gentleman from Wisconsin [Mr. STAFFORD] said it would create a horde of inspectors. There is no danger of that, because there will be no demand for inspection unless there is complaint and unless there is a request. Therefore, not every shipment will be inspected, but only shipments where the shipper knows or believes that his product when it left his hands was in good shape and when on reaching destination it is reported to be in bad condition, and when it is of sufficient importance for him to request the Department of Agriculture to have it inspected and see whether it is in good condition, or whether it is in bad condition. Then, when that request is made, the inspector makes that inspection and gives the certificate provided for in this provision, certifying to the good condition or the bad condition of the product as he finds the truth to be. By that the shipper secures protection, and the commission merchant at the other end of the line is protected, because if he has reported the product in bad condition correctly, if the shipment is really in bad condition the inspector goes there and the commission merchant demonstrates that fact to him, and he certifies that it is in bad condition. That satisfies the shipper, it protects the commission merchant, and it protects the public as well. Hence, I say I can not see how it is possible for this provision to do any harm, and it is fraught with much possible good. That being so, it certainly ought to be enacted into law, and I hope the amendment offered by the chairman of the committee and now pending will be adopted. [Applause.]

The CHAIRMAN. The gentleman from Michigan [Mr. MCLAUGHLIN] and the gentleman from South Carolina [Mr. LEVER] have each four minutes remaining.

Mr. McLAUGHLIN of Michigan. Mr. Chairman, last night I called the attention of the committee to the language in the bill largely for the purpose of advising those who have not closely followed the course of these matters of the degree to which the work of the Bureau of Markets is extended, taking in, as I believe, some work that is not properly market work. The speeches that have been made telling of the outrages committed upon shippers by commission merchants can not be answered. There is no doubt of the truth of them. The only question is whether or not it is the duty of the Federal Government to provide relief for everyone who suffers on account of the lack of principle of a party at one end or the other of a contract. As I stated last evening, my principal objection is that we are undertaking to legislate concerning this very important matter in a few lines, a short paragraph, changing, as gentlemen have said, the rules of evidence and the proceedings in court—a matter which should be gone into thoroughly, and concerning which we should adopt a well-digested, well-considered measure. This change in paragraph does not relate alone to fruits and vegetables, but to all food products. It covers the entire field. When we were considering this matter in the committee I think I suggested—at least, the suggestion was made before the committee—that the one who asked the privilege of having this examination made in his behalf for his protection ought to pay the cost. My recollection is that there was no objection to that, and those words, embodying that idea, were included in the measure as presented to the House by the committee. The paragraph went out on a point of order, and the paragraph presented in its place by the chairman of the committee and held to be in order does not contain those words. I wish to offer an amendment to have those words inserted, so that the one who asks to have this inspection made, for whose benefit and protection it is made, shall pay the cost of the inspection. Otherwise this country may be covered by inspectors, and the expense will grow without limit. It is a business proposition. The one who asks for the service ought to pay for it, and I understand that in other measures similar to this, to which reference has been made and quoted for the purpose of justifying this paragraph, it is provided in every case that the cost of the inspection shall be borne by the one who asks it and for whose benefit it is made.

Mr. Chairman, I present the following amendment and ask that it be considered at the proper time.

The CHAIRMAN. The gentleman proposes an amendment to the amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. MCLAUGHLIN of Michigan: Amend the amendment by adding at the end of the first paragraph, after the word "prescribe," the following words: "including payment of such fees as will cover the cost of the service rendered."

Mr. LEVER. Mr. Chairman, I have absolutely no objection to the amendment offered by the gentleman from Michigan. That language was contained in the bill when it was presented to the House. It went out on a point of order, and no doubt this language was a part of the language in the item which subjected the whole paragraph to a point of order. Personally I have no objection to this; in fact, I am in favor of it.

If I thought there was any serious attempt to strike this item out of the bill I would feel greatly worried about the situation, but I do not believe there can be any serious attempt in that direction. This proposes to do nothing more or less than to protect the public against thievery and robbery and dishonest dealing in this business of handling vegetables and perishable products. I presume there is no business which offers so many temptations, so many inducements to dishonest dealing, as this business of handling these highly perishable products from the producer to the ultimate consumer.

Mr. McLAUGHLIN of Michigan. Will the gentleman yield?

Mr. LEVER. Yes.

Mr. McLAUGHLIN of Michigan. Ought not the words "other products" to be stricken out?

Mr. LEVER. I should not want to take that responsibility on the floor. What we are attempting to do is, first, to protect the honest man, the merchant who handles these products, against the relatively few dishonest men in the business. Second, we are trying to protect the consumer by assuring him that these perishables will be produced in quantities sufficiently large to enable them to be bought at a reasonable price. In the third place, we are trying to protect the producer against that element of dishonesty in the business against which he has now no protection except under this act. Gentlemen know, as has been pointed out frequently, that the shippers of vegetables and peaches are sometimes called upon to pay the expenses of the shipment when they get the returns. Testimony before the committee shows that one man selling peaches shipped to him from some part of Arkansas to Chicago for 35 cents a bushel, and the same peaches were traced and were sold in Michigan for $1.20. You ask what we want—how far shall we go—and the gentleman from Michigan suggests that there is dishonesty in all business. That is very true, but it is the duty of this Congress and every legislative body, as far as possible within the bounds of reason, to protect the public against dishonesty wherever it is found, and that is all there is in this proposition. [Applause.]

The CHAIRMAN. The time of the gentleman has expired; all time has expired. The question is, first, on the amendment to the amendment offered by the gentleman from Michigan [Mr. MCLAUGHLIN], which the Clerk will report.

The Clerk read as follows:

At the end of the first paragraph, after the word "prescribed," add the following: "including payment of such fees as will cover the cost of the service rendered."

The question was taken, and the amendment to the amendment was agreed to.

Mr. MOORE of Pennsylvania. Mr. Chairman, I offer the following amendment to the amendment.

The Clerk read as follows:

Page 78, line 3, strike out after the word "other" the word "food," and insert in place thereof the words "perishable farm."

Mr. MOORE of Pennsylvania. Mr. Chairman——

The CHAIRMAN. All debate on this paragraph and amendments thereto has been closed by order of the committee.

Mr. MOORE of Pennsylvania. I ask unanimous consent for one minute.

The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent to proceed for one minute. Is there objection?

There was no objection.

Mr. MOORE of Pennsylvania. Mr. Chairman, unless this amendment is adopted, the instruction to the Secretary of Agriculture to appoint inspectors to conduct a system of inspection would apply to meat products and to other products included in the word "food," which I think the Committee on Agriculture does not contemplate. If the amendment is adopted, striking out the word "food" and inserting "perishable farm products," it would read "vegetable and other perishable farm products," and would confine the inspection to what I believe the committee has jurisdiction over.

The CHAIRMAN. The question is on the amendment to the amendment offered by the gentleman from Pennsylvania.

The question was taken, and the amendment to the amendment was agreed to.

Mr. MOORE of Pennsylvania. Mr. Chairman, I move to strike out the proviso.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment by Mr. MOORE of Pennsylvania: Amend the amendment by striking out all after the word "prescribed."

The question was taken, and the amendment to the amendment was rejected.

The CHAIRMAN. The question now is on the amendment offered by the gentleman from South Carolina [Mr. LEVER] as amended.

The question was taken, and the amendment as amended was agreed to.

The Clerk read as follows:

For investigating, demonstrating, and promoting the use of standards for the different grades, qualities, and conditions of cotton, and for investigating the ginning grading, stapling, baling marking compressing, and tare of cotton, $45,920: *Provided* That of the sum thus appropriated $26,960 may be used for testing the waste, tensile strength, and bleaching qualities of the different grades and classes of cotton in order to determine their spinning value and for demonstrating the results of such tests.

Mr. STAFFORD. Mr. Chairman, I move to strike out the last word. The language of this paragraph would seem to indicate that it was the purpose of the Department of Agriculture to establish standards. I was wondering whether this work was not properly within the purview of the Bureau of Standards.

Mr. LEVER. This work has always been done by the department under the cotton-future act.

Mr. STAFFORD. I am well aware of that, but I am asking whether the work is not more suitable for the Bureau of Standards than it is for the Department of Agriculture. The two departments recognize the difference in their respective fields of activity, the Bureau of Standards not wishing to trench on the chemical analysis or investigation of products, while the establishment of standards is left to the Bureau of Standards.

Mr. LEVER. I do not know when it started, but it seems to have grown up in the Department of Agriculture, the policy of fixing standards, and it does for grain, corn, wheat, and cotton. Practically all of the standardization work touching farm products, as far as I know, is being done by the Department of Agriculture, and I suspect it is in a better position to do it than is the Bureau of Standards, because the Department of Agriculture has more expert knowledge of the matter than has the Bureau of Standards.

Mr. STAFFORD. Only recently have we established standards as far as cereals are concerned. I recognize that the department, as far as wheat and corn and products of the soil is concerned, may be better qualified to establish those standards than the Bureau of Standards.

Mr. LEVER. I do not know what facilities the Bureau of Standards would have, and this has been going on in the department for many years.

Mr. McLAUGHLIN of Michigan. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Page 78, line 21. At the end of line 21 add the following: "But no money provided by this act shall be used for the purpose of buying, leasing, or operating any mill, building, machinery, or other property in carrying on the work herein authorized."

Mr. LEVER. Mr. Chairman, I ask unanimous consent that all debate on this paragraph and all amendments thereto close in 10 minutes.

Mr. MONDELL. Mr. Chairman, I desire to offer an amendment on which I should like to have five minutes.

Mr. LEVER. Then I shall make it 12 minutes, 5 minutes to the gentleman from Michigan [Mr. McLAUGHLIN] and 5 minutes to the gentleman from Wyoming [Mr. MONDELL] and reserving 2 minutes for myself.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that debate upon this paragraph and all amendments thereto close in 12 minutes, 5 minutes to go to the gentleman from Michigan, 5 minutes to the gentleman from Montana, and 2 minutes to himself. Is there objection?

There was no objection.

Mr. McLAUGHLIN of Michigan. Mr. Chairman, my amendment is directed particularly to the paragraph for testing the tensile strength and bleaching qualities of cotton, because I believe this kind of work is not a marketing proposition and ought not to be carried on by the Bureau of Markets. The Chief of the Bureau of Markets, in answer to that criticism when he appeared before the committee, stated it would be helpful to the growers of cotton if they could have all information available from any source as to the best kind of cotton to be grown for the market, and that he would carry on the mechanical operations if they can be called that, to test the strength and bleaching qualities of cotton so as to give the advice that would be helpful to the growers of cotton, leading them to produce the kind of cotton that would market best. That is going a long way outside of the functions of the Bureau of Markets, in my judgment. We may as well establish flour mills to determine the milling qualities of different kinds of wheat, so as to arrive at which makes the best flour. Illustrations might be multiplied to show what might be done to give advice to the farmers of this country as to the kinds of crops they should grow and learn what kind would market the best, that work to be carried on by the Bureau of Markets. I do not believe that is a proper function of the Bureau of Markets, and I have suggested this as a limitation upon the activities of the bureau, that they shall not buy nor erect nor operate any mill or factory or proposition to carry on that kind of work. I sincerely believe the committee should agree with me and limit the bureau to its proper activities in making investigations and giving information strictly in regard to marketing, and not go into this line in which it proposes to engage, or may engage, unless this amendment is adopted.

Mr. MONDELL. Mr. Chairman, I move to strike out the proviso.

The Clerk read as follows:

Amendment offered by Mr. MONDELL: Page 78, line 17, after the figures "$45,920," strike out the remainder of the paragraph.

Mr. MONDELL. Mr. Chairman, great is king cotton, and tremendously active and effective are its subjects and votaries. We go further in this bill and in other legislation in the promotion of cotton, in aiding the industry in governmental activities affecting it, than in connection with any other product or class of products in the country. It is a great product, and exceedingly important and very valuable, and we should do much to promote and encourage it, but there are certain things relative to cotton which, while they may properly be undertaken by the Government, should not be undertaken on an agricultural bill or by the Agricultural Department, and the activities proposed in this paragraph are of that character. If we are to go into the work of testing the tensile strength and bleaching qualities of this product we ought to go into the work along the same lines regarding wool. It is just as important that we should in one class of products as in the other. Whether it be wool or cotton, however, the work should not be taken up by the Department of Agriculture or carried on by that department. It is properly the work of the Bureau of Standards; possibly, to a certain extent, the work of the Department of Commerce. I do not know that I would object to it; in fact, I am rather inclined to think that I should favor and assist the carrying on of the work in the proper place and under the proper agencies, but the Agricultural Department is not organized for this character of work. The Bureau of Standards is. The Agricultural Department has no business to go into manufacturing questions. That is a matter for other bureaus of the Government, if we are to undertake the work at all. Furthermore, the Bureau of Standards does investigate these questions to a certain extent. I think the bureau might properly do it to a still further extent. The amendment of the gentleman from Michigan [Mr. McLAUGHLIN] indicates the danger that the department will go further afield than we contemplate under this provision by starting mills and commercial establishments and manufactories for the purpose of demonstrating these things.

If that is to be done, which is of doubtful wisdom, it certainly should not be undertaken by the Agricultural Department. Let us keep these various activities within the departments of the Government where they properly belong. By so doing we shall be much more likely to get results that are valuable and that are useful. The Agricultural Department has no instruments or instrumentalities or machinery and apparatus to carry on this kind of work. If it had, it should not. Other departments of the Government may have them. It is an investigation plainly outside of the domain of agriculture, outside of the proper activities of the Agricultural Department, relating to commerce, relating to the use of material after it passes out of the hands of the farmer and out of the agricultural domain into the domain of commerce and manufacture. The provisions in this bill should be limited to purely agricultural activities.

Mr. LEVER. Mr. Chairman, the gentleman from Wyoming [Mr. MONDELL] usually speaks with knowledge when he makes a statement on the floor of the House, but in this instance he is speaking absolutely without knowledge of the facts he is undertaking to present. The truth about this matter is that this language has not been changed in the least. It has been carried in this bill to my knowledge for six or eight years. The standardization work of all agricultural products is being done by the Department of Agriculture. So, therefore, I trust the amendment of the gentleman from Wyoming will be voted down, and I trust also that the amendment of the gentleman from Michigan will be voted down. I confess that I do not know just what the gentleman is driving at. There are many, many other provisions in this bill of a like tenor to this that have been already passed and no such limitation has been undertaken to be attached to them. I see no reason for attaching such a limitation to this item in the bill. On the contrary, as far as I know, the Government is operating no mill or factory or gin or anything of the kind in its testing work. I think most of their work is either done in the Department of Agriculture or at certain agricultural colleges in cooperation with those colleges. I hope both amendments will be voted down.

Mr. JUUL. May I be permitted to ask the gentleman a question?

Mr. LEVER. I would be very glad to do so, but all time has expired.

The CHAIRMAN. All time under the order of the committee is closed on this item.

Mr. HAUGEN. I ask that the gentleman may have a minute.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. JUUL. I just want to ask the gentleman if he would accept an amendment to this section on page 78. I do not want to offer the amendment and have it voted down. On page 78, line 4——

Mr. LEVER. What is it about?

Mr. JUUL. I want to ask the gentleman if he will accept an amendment to insert after the word "received," in line 4, the words "and sold," or "at time of sale."

Mr. LEVER. I will say that has been passed, and the gentleman can not go back to it except by unanimous consent, and somebody will probably object. In addition to that, I would hate to broaden that language without a very full consideration of it by the committee.

Mr. JUUL. I just wanted to submit it to the gentleman.

Mr. LEVER. I would be very glad to have the gentleman discuss the matter with me some time and with the committee.

Mr. JUUL. I know and so does the gentleman, that inspection at the time received and inspection at the time of sale might mean a very different thing in the matter of perishable produce.

Mr. LEVER. That is very true, and I hope the Committee on Agriculture may some time have an opportunity to work out this proposition here in greater detail.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wyoming, which the Clerk will report.

The amendment was again reported.

The question was taken and the amendment was rejected.

Mr. MONDELL. Mr. Chairman, I desire to offer another amendment. Page 78, line 20, after the word "cotton" insert the words "and wool."

Mr. LEVER. Mr. Chairman, I make the point of order against that amendment that it is not germane to this section.

The CHAIRMAN. Following a decision of the Speaker, without having it at hand, where he held on a bill regulating the sale of futures as to cotton that an amendment regulating grain was not germane and sustained a point of order on it, the Chair will have to sustain the point of order here that wool is not germane to this paragraph. The Chair sustains the point of order. The Clerk will report the amendment proposed by the gentleman from Michigan.

The amendment was again reported.

The question was taken and the amendment was rejected.

The Clerk read as follows:

To enable the Secretary of Agriculture to make studies of cooperation among farmers in the United States in matters of rural credits and of other forms of cooperation in rural communities; to diffuse among the people of the United States useful information growing out of these studies, in order to provide a basis for a broader utilization of results secured by the research, experimental, and demonstration work of the Department of Agriculture, agricultural colleges, and State experiment stations, $28,280.

Mr. MORGAN. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Mr. MORGAN offers to amend, on page 79, line 5, after the semicolon, by inserting the following:

"*Provided*, That there is hereby constituted a joint committee of the Senate and House of Representatives, to consist of the chairman of the Senate Committee on Agriculture and Forestry, the chairman of the House Committee on Agriculture, and the chairmen of the Committees on Banking and Currency of the two Houses, and two other members of each of said committees, to be designated by the chairmen of the respective committees, and it shall be the duty of said joint committee to prepare, after such investigations as may be deemed necessary, and report to the Congress on or before March 1, 1918, a bill providing for the establishment of a system of short-term farm credit adapted to American needs and conditions, and the Secretary of Agriculture, in his discretion, may use not to exceed $5,000 of the sum appropriated in this paragraph to defray all necessary expenses of said joint committee."

During the reading of the above.

Mr. LEVER. Mr. Chairman, the reading of the amendment shows it is clearly subject to the point of order.

Mr. MORGAN. I hope the chairman will let it be read.

Mr. LEVER. If the gentleman desires the amendment read with the reservation of the point of order, I will not object to the gentleman's occupying five minutes.

The reading of the amendment was completed.

The CHAIRMAN. The gentleman from South Carolina reserves the point of order against the amendment.

Mr. LEVER. For five minutes.

Mr. MORGAN. Mr. Chairman, for the present, not discussing technically whether the point of order is good or not, I want to make an appeal to the able chairman of the Committee on Agriculture, the gentleman from South Carolina [Mr. LEVER], as well as to other Members of the House who might be inclined to make the point of order, not to insist on it. I know, of course, that the chairman of the Committee on Agriculture is deeply interested in this subject of providing the farmers of the United States with the very best system of credits. I know personally that he would be very glad to see legislation on this subject. He knows the history of rural-credit legislation in the Congress. He knows that it was by virtue of a similar amendment put on the Agricultural appropriation bill approved March 4, 1915, that we finally secured the passage in the Sixty-fourth Congress of a bill creating the system of land credits. I have copied almost exactly the provisions of that act approved March 4, 1915, which created this joint committee. Now, I think that committee is still in existence. I think it is a continuing committee, but I will not discuss that now. The chairman of the Committee on Agriculture was the author, I presume, of the provision which went into the Agricultural appropriation bill of 1915 and largely through his efforts the joint committee of the two Houses on rural credits was created. It reported a bill, which was referred to Committees on Banking and Currency of the two Houses. It made a report and we enacted that law establishing a great system of land credits for the farmers of the United States. But we have not finished that job; we have not completed the task that we have undertaken. We have not kept the pledge that we made to the farmers of the United States.

Here is a very important amendment. Technically it may be out of order, but it is nothing unusual to legislate on appropriation bills. Practically every appropriation bill contains new legislation. And I know of no amendment that should appeal so convincingly to the chairman of the Committee on Agriculture as the one I have presented. So, without taking further time upon this point, I sincerely hope that the chairman of the Committee on Agriculture, to whom the farmers of this country are so deeply indebted, will withdraw his point of order or not make the point of order. And I also appeal to every other Member of the House to not make the point of order in case the chairman of the Committee on Agriculture does not do so.

Mr. LEVER. Mr. Chairman, the speech of the gentleman from Oklahoma [Mr. MORGAN] is very powerful, but this is such

an important matter that it should be considered by the proper committee before being acted upon by the Committee of the Whole; and, therefore, I am constrained to make the point of order.

Mr. MORGAN. Mr. Chairman, I offer the following amendment.

The CHAIRMAN (Mr. SAUNDERS of Virginia in the chair). Does the gentleman from Oklahoma desire to discuss the point of order?

Mr. MORGAN. No, sir.

The CHAIRMAN. The point of order is sustained. The matter seems to be new legislation.

The gentleman from Oklahoma offers another amendment, which the Clerk will report.

The Clerk read as follows:

Page 79, line 5, after the semicolon, insert:

"*Provided*, That not to exceed 90 per cent of the appropriation received in this paragraph shall be available unless the Secretary of Agriculture shall have on or before March 1, 1918, prepared and submitted to Congress a bill to provide a system of short-term farm credits for the farmers of the United States."

Mr. LEVER. I make a point of order against that, Mr. Chairman.

Mr. MORGAN. Well, I would like to be heard on that. I do not think that is subject to a point of order.

The CHAIRMAN. The gentleman from Oklahoma is recognized.

Mr. MORGAN. Mr. Chairman, this is a limitation on the appropriation provided in the paragraph. It provides that unless the Secretary of Agriculture, who is authorized to use this appropriation of $28,280 for the purpose of investigating rural credits, shall on or before the 1st of March, 1918, prepare and submit to Congress a bill to provide a short-term system of farm credits, only 90 per cent of this appropriation shall be used. So I limit and restrict this appropriation by this amendment, and I think that, therefore, it is clearly in order under the rule that provides that amendments which limit appropriations are in order on an appropriation bill.

Mr. WALSH. Will the gentleman yield for a question?

Mr. MORGAN. Yes.

Mr. WALSH. Does not the gentleman from Oklahoma think that he himself could prepare a better and more comprehensive measure on this subject and introduce it into the House than could be done by the Secretary of Agriculture with his many and manifold duties which he now has to perform in view of this great war emergency?

Mr. MORGAN. Well, the gentleman knows that I am a very, very modest man, and I have no such idea. Why, we have been appropriating large sums of money to the Department of Agriculture, and I have great respect and admiration for the character and the ability of the Secretary of that department. In addition to that, he has a large number of experts under him who have given great study to this question. But, of course, that is not really the point involved in this matter.

Mr. WALSH. Will the gentleman permit me to say that I doubt if any of his experts are any more interested or perhaps better equipped to express an opinion in the form of a measure than is the gentleman from Oklahoma, who has given years of study to this work?

Mr. MORGAN. I certainly appreciate the very kind words of my friend from Massachusetts.

So that, Mr. Chairman, the amendment which I propose will reduce the amount upon the happening of a certain event. Under the rule, I understand, such an amendment is in order.

Mr. LEVER. Mr. Chairman, hearing the amendment read only from the desk, I take it that, in the guise of a limitation, it is really a direction to the Secretary of Agriculture to prepare a bill and submit it to Congress and, if so—and I have heard correctly the amendment—then it is clearly subject to a point of order and is not a limitation, but is a direction in the guise of a limitation.

Mr. MONDELL. Mr. Chairman, the present occupant of the chair is entirely familiar with these parliamentary questions, and he knows perfectly well that it is not his province to go speculating as to what may be the intent of the limitation. He must judge of the limitation as it is presented to him. This is a provision to the effect that only a certain portion of the appropriation shall be expended, except and contingent upon a certain act being performed. Such a limitation is entirely proper and clearly within the rule, a portion of the expenditure being contingent upon the establishment of a certain condition or situation. Where that shall have occurred, then the entire sum may be used. If it does not, only 90 per cent of it is to be used.

Mr. SLOAN. Mr. Chairman, I desire to raise another point of order against the proposition, more important, in my opinion, than the one that has been raised, and that is this: The amendment provides a direction to the head of an executive department to prepare a bill for consideration and passage by this House. In other words, it directs that the head of a department shall usurp part of the function of this, the legislative department of the Government, in drafting a bill—a feature of legislation usually as important as any other part of it. It should not be the function of the head of any department or any person connected with the Government in any way, except a Member of this House or a Member of the coordinate body, to prepare legislation for the consideration of this House or that body, and I object here and now.

Mr. MONDELL. Mr. Chairman, I object just as much as the gentleman from Nebraska [Mr. SLOAN] possibly can to the purpose of the gentleman from Oklahoma [Mr. MORGAN], who is inviting a practice which is not in harmony with our institutions, which has been infinitely harmful, under which there has been a usurpation of the prerogatives of the House, and which no Member of the House should seek to encourage, but rather to discourage. I disapprove as much as anyone possibly can the purpose of the gentleman from Oklahoma of allowing or inviting or suggesting that an executive officer should prepare legislation for us. But that proposition does not go to the question of the point of order.

Mr. SLOAN. Well, it goes, if I understand it, Mr. Chairman, to the point of order that I raised. I understand that there is a proposition raised here, and that we are not confined to one point of order, but may submit as many objections on the ground of lack of being in order as we see fit, and that is the reason why I have submitted that one.

Mr. WALSH. Mr. Chairman, will the gentleman yield?

Mr. MONDELL. Yes.

Mr. WALSH. Is not the gentleman aware of the fact that during this present emergency the Members of the House have apparently waived the prerogatives we have in the production of measures bearing on the emergency, and that it is now the custom for them to be prepared in the various departments and sent down here for our consideration?

Mr. SLOAN. The proof of the existence of a bad custom is no reason for the continuation of that bad custom, and the question may just as well be raised now as later. The waiver in one instance is no proof or reason why it should be waived again.

Mr. GREEN of Iowa. Mr. Chairman, will the gentleman yield?

Mr. SLOAN. Yes.

Mr. GREEN of Iowa. I understand, then, that the gentleman concludes that Congress has not permanently abdicated its functions.

Mr. SLOAN. I hope not; and I hope that that hope will grow into a conclusion that we have not abdicated our functions. [Applause.]

Mr. ANDERSON. Mr. Chairman, of course the questions involved in this point of order have nothing to do with the merits of the proposition offered by the gentleman from Oklahoma [Mr. MORGAN]. The mere fact, however, that the amendment takes the form of a limitation upon the appropriation does not bring that amendment within the rule of the House which permits legislation in the form of a limitation upon an appropriation bill.

It is well established that the limitation must be a limitation upon the expenditure of the money itself, upon the method of expending the money, and that that limitation can not go to the point of directing the executive functions of an executive officer.

Mr. MORGAN. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. I yield for a question.

Mr. MORGAN. Is it not a fact that this does not direct the Secretary to do anything, but simply leaves it to his discretion? It does not compel him. If he does not do this, then he can only use 90 per cent of this money.

Mr. ANDERSON. The mere fact that it is discretionary does not affect the character of the amendment at all. It is an attempt by a so-called limitation to direct or to interfere with the executive functions of an executive officer. I call the Chairman's attention to the precedent cited in the fourth volume of Hinds' Precedents, from section 3957 to 3966, many of which, it seems to me, are in point on this proposition and are conclusive against the contention of the gentleman from Oklahoma that this so-called limitation is in order.

The CHAIRMAN. The rule in relation to amendments of this character may be stated in brief, as follows: Such an amendment, to be in order, must be a negative prohibition upon the expenditure of money, and not in substance an affirmative direction to an executive officer. The House may by limitation

on a general appropriation bill forbid the use of money for a specific service, but it may not grant the appropriation for the general service on condition that an executive officer shall take a certain course in connection with the service. (IV Hinds, pp. 669-672.)

Now it is perfectly clear to the Chair that the effect of the proposed amendment is to compel an executive officer to do a certain thing not related to this paragraph, as a condition precedent to securing the benefit of the fund appropriated in this connection. He is required to write a bill on a particular subject. The amendment is in effect an affirmative direction to that effect, requiring the Secretary of Agriculture to prepare and submit to Congress before March 1, 1918, a bill providing a farm-credit system, or else lose the benefit of a portion of this appropriation. The amendment is in the form of a limitation, but is more affirmative than negative in its character. Not being a limitation, it is not protected by the rule relating to limitations.

The point of order is sustained.

Mr. MORGAN. Mr. Chairman, I send up an amendment.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Oklahoma.

The Clerk read as follows:

Amendment offered by Mr. MORGAN: Page 79, line 5, after the semicolon, insert the following:

"*Provided*, That not to exceed 90 per cent of the amount appropriated in this paragraph shall be available unless the Joint Committee on Rural Credits appointed by the act approved March 4, 1915, entitled 'An act making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1916,' shall have, on or before March 1, 1918, prepared and reported to Congress a bill establishing a system of short-term farm credits."

Mr. LEVER. Mr. Chairman, I make a point of order on that.

Mr. MORGAN. I would like to be heard for a moment.

The CHAIRMAN. The gentleman from Oklahoma is recognized.

Mr. MORGAN. Mr. Chairman, the act approved March 4, 1915, contains the following paragraph:

That there is hereby constituted a joint committee of the Senate and House of Representatives, to consist of the chairman of the Senate Committee on Agriculture and Forestry, the chairman of the House Committee on Agriculture, and the chairmen of the Committees on Banking and Currency of the two Houses, and two other members of each of said committees, to be designated by the chairmen of the respective committees, and it shall be the duty of said joint committee to prepare, after such investigations as may be deemed necessary, and report to the Congress on or before January 1, 1916, a bill or bills providing for the establishment of a system of rural credits adapted to American needs and conditions. The sum of $10,000 is hereby appropriated, the same to be immediately available, out of any funds in the Treasury not otherwise appropriated, to defray all necessary expenses of said joint committee, payment of said expenses to be made upon vouchers approved by the chairman of said joint committee, who shall be selected by the committee.

Mr. Chairman, that is not a rule of the House, but an act of Congress, which created a joint committee on rural credits, requiring that committee to report a bill or bills on that subject. That committee was created by the Sixty-third Congress. It acted during the Sixty-fourth Congress, and I maintain that that committee is still in existence, because the act names who shall be on that committee. So we have to-day under that law a Joint Committee on Rural Credits, authorized to act upon this subject. Now, my amendment simply limits the appropriation to 90 per cent unless that committee which is now in existence shall make an additional report. The Chair will take judicial notice, so to speak, of the fact that this committee has only partially completed its work. As I say, it was created by an act of the Sixty-third Congress. The committee acted and expended their money during the Sixty-fourth Congress. I do not know whether all of that $10,000 was expended or not, but I will assume that the committee did not expend it all. I do know from personal knowledge that it was during the Sixty-fourth Congress that the committee did all their work. I want to know why that committee is not in existence to-day, and if it is in existence, why it is not a proper amendment to limit this appropriation unless there is a report of that joint committee which is now in existence, not by virtue of a rule but by virtue of an act of Congress passed by the two Houses and approved by the President. That act is upon the statute books to-day. It never has been repealed. I want to know why that committee can not act to-day, and why this limitation is not proper under the rule. I hope that the Chair on investigation will conclude that that committee is in existence, and that they can act to-day, and that my amendment is proper under the rule.

The CHAIRMAN. There are a great many precedents in this connection, for this question of order has been ruled on time and again. The Chair will read one citation before announcing his ruling.

On February 15, 1907, the naval appropriation bill was under consideration in the Committee of the Whole House on the state of the Union, and Mr. WEBB of North Carolina offered the following amendment, as a limitation.

Add after the word "act" in line 14, page 81: "*Provided*, That before the construction of these vessels shall be begun, a test shall be made with the service 12-inch projectile fired against a 12-inch Krupp-ized armor plate at a range of 5,000 yards, to ascertain whether such projectile fired with service pressure will penetrate such armor plate."

This amendment proposed to make the appropriation contingent upon the test provided. It was offered as a limitation. A point of order was made against it, and sustained. Now the amendment under consideration proposes that the benefit of the appropriation included in this paragraph shall not be enjoyed by the Department of Agriculture until a certain committee shall do a certain thing. This committee was required to report on, or before a certain date. To be definite on or before January 1, 1916. That time has passed.

Mr. MORGAN. It did not do so.

The CHAIRMAN. The question very naturally arises whether that committee can now make a report. Having failed to discharge the duty imposed by the act that created it, the committee is in the judgment of the Chair, functus officio, and no longer capable of reporting. This amendment therefore proposes to make the benefit of the appropriation in this paragraph contingent upon the action of a committee which is without power to act. It is therefore not, fairly speaking, a limitation at all. The Chair sustains the point of order.

Mr. MORGAN. Mr. Chairman, I move to strike out the last word. I regret very much that a point of order was sustained against each of the amendments which I have offered. I regret that the distinguished chairman of the Committee on Agriculture felt that it was his duty to make the points of order. Under my pro forma amendment I wish to say a few words about short-term farm credit. Here is an appropriation of $28,280, supposed to be largely for the purpose of having the Department of Agriculture investigate rural credits. If you will go back for several preceding Congresses you will find that this same appropriation has been in this bill. It is a question whether such appropriation ought to be made unless the Department of Agriculture actually produces results. We want results, not mere investigations. Now, I have been through the reports of the Secretary of Agriculture, going back five or six years. So far the Secretary of Agriculture has proposed no concrete plan for short-term farm credit. He no doubt has accumulated much information on the subject. But what good does that do, if Congress does not act on the information. We have an abundance of information now. We are prepared to act. The Secretary of Agriculture is no doubt prepared to submit a plan. This would be a basis for action. There is no practical advantage in adding to the store of information in the minds of the rural credit experts in the Agricultural Department if we can not utilize that knowledge to some practical purpose and make it contribute to the prosperity of the farmers and the general prosperity of the whole country. The time has come when we should call upon the Secretary of Agriculture to present a definite plan. The plan or plans suggested could be acted upon by the Committees on Banking and Currency of the two Houses. These committees could report thereon and the Congress could act. By this course the thousands of dollars we are appropriating would bring practical results.

It is admitted by all that an increased production of food products is essential to the winning of the war. But what has the National Government done, through legislative or by Executive action to equip the farmers for larger production?

If the farmers are to enlarge their business and extend their farming operations, they must have better credit facilities. Credit is a factor in the business of farming as it is in industrial and commercal pursuits.

Why should not Congress proceed at the earliest date possible to complete our rural-credit system by creating a short-term credit system that will enable the farmers to secure short-time loans at a low rate of interest and upon favorable terms? In certain sections of the West there was a failure of the wheat crops last year. Seed wheat was high. It required a large amount of money to buy this seed wheat. The farmers did not have the money. The local banks did not have it. The farmers needed credit, but the credit was not obtainable. The result was, in certain sections of the West, the wheat acreage was reduced rather than enlarged. All because Congress had not established a short-term farm credit system through which the farmers might have obtained ample credit to purchase seed and improve their equipment for farming.

Mr. WALSH. Will the gentleman yield?

Mr. MORGAN. Yes.

Mr. WALSH. What sort of proof does the gentleman think ought to be required to show that the farmers are receiving real benefit from the legislation enacted in their interest?

Mr. MORGAN. I think there ought to be some other proof than the fact that we are appropriating the money and that the number of department employees is increasing.

I noticed the other day that the Secretary of the Treasury proposed to create a great corporation, with a capital of $500,000,000 to help finance business corporations which were engaged in producing munitions of war, or things necessary to win the war. We have assumed control of the railroads and must finance them. But nobody seems to recognize the importance of financing the farmers. It is true Congress, by the act of July 17, 1916, established a new system of long-time-mortgage credit. But this is in its infancy and is unsuited to supplying the farmers with credit for the purchase of seed and implements and in the employment of labor. I maintain that to provide our farmers with a short-term farm credit system is a war measure. It should be acted upon promptly to give our farmers the benefit of it for the season of 1918.

Notwithstanding the fact that my amendments have been ruled out of order on this bill, I sincerely hope Congress may see the wisdom of my suggestions and act favorably thereon at an early date.

Further, I wish to say that I have introduced in the House House bill 8827, to provide a system of short-term credit for the farmers of the United States. It, in my judgment, would prove to be of immense benefit not only to our farmers but the public generally. It would encourage our farmers and enable them to enlarge the amount of their annual products, both through an enlarged acreage in cultivation and by doing better farming. While this would, to an extent, increase the earnings of the farmers, it would insure our own people and our allies with the necessary food to win the gigantic war in which we are engaged.

The Clerk read as follows:

To enable the Secretary of Agriculture to cooperate with the several States in the employment of agents to acquire and diffuse useful information connected with the distribution and marketing of farm products through investigational, demonstrational, or extension methods, $61,500.

Mr. ROBBINS. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 79, line 10, after the word "methods," insert the following: "And for the purpose of procuring labor to plant and harvest the crops for the year 1918 on the farms of the United States, $261,500."

Mr. LEVER. Mr. Chairman, I reserve a point of order on the amendment.

Mr. ROBBINS. Mr. Chairman and gentlemen of the committee, I have gone through this bill, covering 89 pages and appropriating $26,943,773 for the benefit of agriculture, so denominated, and yet I find not one line or provision to meet the greatest emergency that exists in the country against the American farmer to-day—that is the scarcity of labor. I am compelled to occupy the time of this committee for a few moments to call attention to some information that was sent to me from the State board of agriculture which met at Harrisburg, in my native State of Pennsylvania, last week:

218,000 STATE FARMS LOOKING FOR LABORERS—MEMBERS OF BOARD OF AGRICULTURE PREDICT DECREASED PRODUCTION.

HARRISBURG, PA., *January 24, 1918.*

Resolutions adopted by the State board of agriculture at the joint meeting of the board and allied bodies last night, declaring that the draft should be extended to include people in all walks of life, and that there should be conscription of labor if necessary to see that hands are provided for the farms, will be sent to the national authorities at Washington. Conferences of men active in the board were held to-day with a view of ascertaining what steps should be taken to secure men, and representative farmers will likely go to Washington.

The speeches at the closing session of the board and at the joint meeting dealt with conditions which speakers declared would be alarming on the farms this year. Predictions of decreased production instead of an increase as asked were freely made.

On the same date at an agricultural convention in Blair County, which is just east of and almost adjoining the county in which I live, in the district which I represent, this statement appears:

31 FARMERS TO QUIT BUSINESS—LABOR SHORTAGE FORCES BLAIR COUNTY MEN TO SELL LANDS—BEDFORD COUNTY HIT.

ALTOONA, PA., *January 23, 1918.*

Thirty-one farmers residing in the southern end of Blair County are advertising their stock and implements for sale and preparing to go out of business by next April. Among the farms are some of the largest and best in Blair County, in the rich agricultural belt of the Morrisons Cove, a producing section surpassed by Lancaster County only.

A few of the farmers have made sufficient money to retire, but almost all are discontinuing farming because they have not sufficient help.

The same condition exists in Bedford County. It is estimated there will be a 10 per cent reduction in operating farms in Blair County by next April.

This situation is acute in Pennsylvania. It is so in all the Eastern States, and this is the reason of it: Large wages are paid in ammunition factories, at the coal mines, and in various industries, and these public works have drained the farms of the ordinary labor that was employed in that occupation. On top of that came along this selective draft, taking away the farmers' sons, so that there is no one left to operate the farms.

What are the remedies that are offered—and I have listened to the debate here while this bill has been discussed for six days past—and what suggestion has been made to meet this exigency? Four remedies are mentioned: First, it was suggested that we take the boys and girls from the towns and put them on the farms as volunteers to do the farm work. That was tried last year and proved a failure. It would not work. And, second, some patriot has brought forth the proposition that we employ and bring over a great quantity of cheap labor from China and operate our farms by Chinese coolie labor, but that is met with opposition by residents of the Pacific coast; they will not tolerate that kind of labor in competition with American workmen in the United States. A third suggestion made is the one I saw in the Official Bulletin, issued by George Creel, which we all read or do not read, as the case may be, that they propose to bring over 106,000 laborers from Porto Rico and perform our farm labor by aid of these new citizens. I congratulate my friends from the South upon this proposal, because they know very well that no Porto Rican would ever come north to work on an American farm. He would go to Florida or some State near the Gulf and grow lettuce or crocus bulbs and that would be the extent of his farming. Porto Ricans have no knowledge of farming as this industry is conducted in the United States. There is a fourth method suggested by the State Agricultural Board of Pennsylvania, as indicated by the resolution above quoted, that I think is entitled to the serious consideration of this Congress, and it is entitled to the thoughtful consideration of any man on this floor who represents a farming constituency and who wants to take care of their interests in this bill. That is the plan by which we will draft every man, woman, and child in all walks of life between the ages of 16—I fix the age at 16 because under the laws of Pennsylvania and most of the States we can not force anyone under 16 to work; they should go to school—and 60 years of age. Not to force them arbitrarily to work, not by compelling them to labor, but to take stock of our man power from which we can draw labor to use on the farm, if they are willing to farm, during the summer of 1918. This appropriation—and I appeal to the chairman who represents the majority party in this House—is necessary, every dollar of it, but we must add to it a sum large enough to enable the department to send this labor when thus mobilized to the farms where it is needed. The President of the United States in addressing the farmers of Illinois yesterday appealed to them to increase the production of the farms of our country, but he is singularly silent as to where the labor is to be procured to plant the crop and cultivate and harvest the same during the coming season.

The President states in an admirable address to the farmers, delivered yesterday at the University of Illinois, as follows:

And their response to the demands of the present emergency has been in every way remarkable. Last spring their planting exceeded by 12,000,000 acres the largest planting of any previous year, and the yields from the crops were record-breaking yields.

In the fall of 1917 a wheat acreage of 42,170,000 was planted, which was 1,000,000 larger than for any preceding year, 3,000,000 greater than the next largest, and 7,000,000 greater than the preceding five-year average.

But I ought to say to you that it is not only necessary that these achievements should be repeated, but that they should be exceeded.

How is the American farmer to meet this clarion call to high duty, with the demand for labor to help him growing more exasperating with each passing day? Is the Department of Agriculture going to come to his relief by aiding him in securing laborers? Not one cent of all the millions here appropriated is to be used for this imperative purpose. The farmer is invited to perform a greater task in 1918 than he did in 1917 with far less hands to do the work. He can not do it. Furthermore in this address we find this consolation for the farmer:

Farmers have not been exempted from the draft. I know that they would not wish to be. I take it for granted they would not wish to be put in a class by themselves in this respect.

Of course, the farmers do not wish to be placed in a class and branded as that part of our people who seek to avoid the draft for occupational reasons. The farmers are patriotic. They have always been patriotic. In all our wars the farmers of our country have been our first and greatest defenders. They will be such in this war. But we must not allow their love of country and patriotic zeal to cause them to leave the farms to such an extent as to cause a shortage of food for ourselves and our

allies, and endanger the success of our gallant soldiers in their battle for liberty.

What then is the farmer to do but turn, as I now urge, to the Department of Agriculture for help? Are we going to deny our farmers this relief? I sincerely hope not.

Mr. Chairman, the President of the United States in his address further adds—

In certain agricultural sections despair prevails over the scarcity of labor. Farmers have said they could see no prospect of planting new crops this year or of harvesting them if they did so—

from which it appears that the President is alive to the crisis that confronts the American farmer. The President's suggestion is that in the second draft the key men who are engaged in agricultural pursuits will be exempt, and that only the ordinary farm laborer will be taken off the farm. This will not supply the deficiency that now exists. The draft that has already been enforced has taken the farmers and farmer boys to such an extent that the scarcity of labor has been accentuated throughout all the agricultural districts of the country, and this to such an extent that farmers are giving up their farms. They were scarcely able to harvest their crops last summer, and they will not face another such period of hardship, trial, and disappointment, and they can not be expected to do so.

This condition of our farming community imposes upon us, as national legislators, an imperative duty. We must act. We must remember, and be guided by this principle that "that is the best Government which desires to make the people happy, and knows how to make them happy."

Farmer boys pleaded earnestly with the exemption boards, either for a stay of the draft or for exemption on account of occupation, and they were almost uniformly refused; hence they will take no chances on the future draft. Those that are left do not expect to receive any better consideration in the future than their brothers have in the past.

Another suggestion made by the President is as follows:

200,000 SOLDIERS TO HELP.

At harvest time 200,000 soldiers are to be furloughed to return to the farms and assist in the gathering of the crops. In some sections of the United States the wheat harvest begins in May, so that some of the men now in the camps may be called upon in part for this service before going to France.

And this will prove futile for the reason that Pennsylvania alone will require a greater number on the farms than the 200,000 which it proposes to release. The President does not seem to comprehend the extent and magnitude and the insurmountable difficulties that exist in the rural communities because of the scarcity of labor.

Near industrial centers the men have simply forsaken the farms. In the counties of Westmoreland and Butler, in western Pennsylvania, which I have the honor to represent, the ordinary laborer at a coal mine is paid $5 per day; a miner with little skill or experience can earn from $5 to $15 per day. The boy who drives the mule in the mine is allowed $5.15 per day. In the large industrial plants where munitions are made the ordinary mechanic can earn $10 per day; and, although the cost of living is high, these liberal wages have attracted the labor from the farms, and only those who own the land now cling to its cultivation as a means of livelihood. The tenant class and those who work by the month on farms and the day laborers have removed from the land and have gone into industrial employment.

Mr. Chairman, it is not a question of future speculation, it is a question of meeting the irrepressible condition, that now confronts the American farmer and is driving him from his regular avocation; but the critical side of this situation is not confined alone to the farmer. The wheat crop was short last year and the corn crop did not mature well, and we are now engaged in devising means to piece out the wheat crop so that we may have bread, or war bread, until the new harvest comes in July. We must not only feed the American people and the American Army but we must feed the armies of our allies in England, France, and Italy, and they must have the best, because they are now fighting our war; and, in addition to this, the population of England, France, Italy, and even Norway, Sweden, Denmark, and Spain are drawing on us heavily for food, and will continue to draw on us until normal peace conditions come again.

What, therefore, will it profit us to arm and equip one and one-half million men and send them to Europe and have one and one-half million men more in training camps if we are unable to ration them in the field and feed them while training here at home.

If America has fallen down in her military preparations, as Democratic Senators have repeatedly asserted, in my judgment we are now about to fall down in our food production.

Statistics from my own State of Pennsylvania show it, and our farmers in convention as above quoted aver it, and I venture to assert that the same conditions exist in every State east of the Mississippi River, and especially in the great industrial Eastern and Middle States.

What is the use, Mr. Chairman, of appropriating almost $27,000,000 for various purposes and schemes in this Agricultural bill when we overlook the one great need of governmental assistance and aid in procuring laborers for the farmer?

For instance, we are here appropriating $1,000,000 for the Weather Bureau, $5,700,000 for the Forestry Service, $1,200,000 for the Bureau of Chemistry, $1,900,000 for the Bureau of Markets, and $3,150,000 for the States Relations Service and not one penny to obtain labor or labor-saving machinery for our farmers to assist them in planting their crops, cultivating and caring for the same, and harvesting them when matured. It is proposed by this amendment to divert only $261,500 from being used "to acquire information about the distribution and marketing the farm products," to obtaining laborers for the farmers to relieve them in their dire distress, and the chairman of the Committee on Agriculture, from South Carolina, raises a point of order, and the chairman of the Committee of the Whole House, from Virginia, rules it out of order. Such being the case, there is little relief for the farmer in this sort of legislation, in my opinion.

Truly the South is in the saddle and "we are riding for a fall."

Forestry can wait. States Relations Service can stop. The Bureau of Markets can give up a portion of its millions. The patient, patriotic American farmer needs part of these millions to help him in his stupendous task of feeding the world in arms. We must win this war, and our prime necessity is food.

Mr. Chairman, I think there should have been $5,000,000 appropriated for this purpose in this bill, and cut down some of the other appropriations mentioned above, and placed in the hands of the Secretary of Agriculture with explicit instructions that he secure farm laborers, wherever he could get them, to be engaged on the farms of the United States until the war is over and then transport them back to the place from whence they came. Some of these laborers might be procured in western Canada, some of them in Porto Rico, some of them in Mexico, and a vast number of them in the large cities of America. This plan will not draw labor from any organized industry, or take a single man or woman from the ranks of organized labor. It applies solely and entirely to the great body of people in our large cities who are either unemployed, or work in unessential employments, from which they can be easily spared during this short emergency for this great purpose.

In this discussion, Mr. Chairman, there is another matter that is pressing for the attention of Congress. In connection with this situation, the young farmer boys and others that remain at home, even though they may be exempted, as the President suggests, feel the stigma and disgrace at being pointed out and called slackers. Our draft law was passed for the purpose of mobilizing the whole Nation for the purpose of war, and it should be amended and extended, so that it would include every man, woman, and child between the ages of 16 and 60, and all those who are physically able to bear arms should be drafted between the ages of 21 and 30, and the others, when physically able, given industrial employment necessary to sustain the Army. Those that are sent into the mills and factories to manufacture munitions and other supplies, and those that are sent into transportation lines, to transport the same, and those that are sent back to the farms, to produce the most essential commodity of all, namely, the food supply of the Nation, should all be entitled to wear a badge inscribed with the words, "United States service, special detail," and they should have a uniform to wear when they are off duty, with their friends, in the towns, or about their homes, on off days and in the evenings, and they should be required to wear these uniforms. By this means it would become generally known, and it would be well understood, that all are soldiers and all are serving the country, only in different pursuits, and in different occupations, and the stigma and disgrace of being at home would be removed entirely, and we would be truly a united people, all serving alike our common country.

Mr. Chairman, out of this great mass of people between the ages of 16 and 60 we would be able to have sufficient laborers to cultivate our farms, to operate our mills and factories, and to carry on our great lines of transportation and all other business necessary in the time of war, and the American farmer, who is now hard pressed and is our most neglected citizen, would be relieved of his unbearable burden, and would be elevated again to the place he has hitherto occupied, as the leader in our greatest industrial pursuit.

Mr. Chairman, this movement from the land to the towns and cities which is taking place with increased volume each year has produced an alarming situation in the United States. So imperceptibly has it occurred that the danger produced thereby has not yet become apparent to our people.

The war has challenged attention to it for the first time. Buckley in his great work of civilization states that the first evidence of decay of the great nations of the past occurred when the farmers deserted the soil and turned to city life and industrial pursuits.

Rome's fall dated from the time when the farms of the Pyrennes were deserted by the farmers' sons, who joined the Roman legions or settled in Rome, and became part of the Roman rabble that clamored only for "bread and the circus."

The United States Government must now face this growing menace. We have registered our industries, and they are under Government control. The President has taken over our systems of transportation, and they are operated by a Director General of Railroads. Our greatest industry, our most essential source of production, namely, our farms, are as yet entirely neglected. With the cities of the United States full of men and women who could work on the farms, if properly registered, directed and controlled, no step has been taken toward registering and systematizing this source of labor, and yet the entire farming community of the United States is short of labor to such an extent that farms are being abandoned, cultivation is declining, and production of food is rapidly diminishing.

Mr. Chairman, this annual appropriation bill for the Department of Agriculture is the place, and this is the time, to start a great movement to correct this trouble, and to start the means to prevent this approaching calamity.

If we are to win this war quickly, as we will ultimately win it, if we are to support our soldiers in the field with food, clothing, medicine, and other supplies, we must start earnestly and at once this movement back to the land, and we must register the great body of our men and women who can be spared to help during the war in this great work of increasing the food supply of the world, and this must be done during the summer of 1918. If we help our farmers by the legislation I here propose, we will bring back to them the happy days and prosperous times of which Macauley speaks when he says:

> Then none was for a party;
> Then all were for the State;
> Then the great men helped the poor,
> And the poor man loved the great;
> Then lands were fairly portioned;
> Then spoils were fairly sold;
> The Romans were like brothers
> In the brave day of old.

Mr. LEVER. Mr. Chairman, I do not want to be heard on the point of order because I think it is self-evident.

The CHAIRMAN. Does the gentleman from Pennsylvania wish to be heard on the point of order?

Mr. ROBBINS. I have said everything I wish to say, Mr. Chairman, except that I want leave to extend and revise my remarks.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The CHAIRMAN. Does the gentleman contend there is authority in the law for this amendment?

Mr. ROBBINS. Mr. Chairman, the amendment makes no change, except that it gives $200,000 more to be used for this purpose. It simply adds that to the provisions of this section, which, if the Chair will read, he will see is germane to the amendment. The section provides for the employment of agents to acquire and diffuse useful information in connection with the distribution and marketing of farm products through investigational, demonstrational, or extension methods, and the amendment I have proposed simply means that that investigation shall be carried forward for the purpose of securing farm labor. It is certainly germane to the purpose of the section and it ought not to go out on that ground on a point of order. If it is to go out upon the ground that it increases the appropriation, then I shall willingly permit the $200,000 to be stricken out and allow it to stand at $61,500, and then allow the Secretary to use any part of the appropriation he pleases for this purpose, because I believe this great outcry for labor will become so pressing that the Secretary will use all this money for that purpose and not for the other purposes.

The CHAIRMAN. This amendment proposes to give the Secretary authority to procure and pay for labor to work on the farms. Does the gentleman maintain that there is any authority in existing law under which the Secretary can do that? If there is not, then, of course, this plainly enlarges his power and would be out of order.

Mr. ROBBINS. It brings the department under this provision, to make investigation and report and open the way for increasing the labor on the farms. Under some authority of law he proposes to import from Porto Rico labor to the extent of 106,000 men.

The CHAIRMAN. But this is authority to the Secretary of Agriculture to procure and pay for labor. It is not an investigation, but is to furnish labor on the farms. The gentleman can not cite me to any statute that gives that authority. Of course the amendment is legislation and is plainly out of order.

Mr. ROBBINS. I do not have any statute to cite to the chairman. I am not aware that there is any.

Mr. TOWNER. Mr. Chairman, I think perhaps the Chair misinterprets the amendment. It does not give the authority, as I understand it, to the Secretary to procure labor or do anything of that kind but merely to inquire into the best methods of doing it.

The CHAIRMAN. The Chair will read the amendment:

> And for the purpose of procuring labor to plant and harvest the crops for the year 1918 on the farms of the United States.

That is to be inserted after line 10, on page 79.

Mr. ROBBINS. Mr. Chairman, it is just enlarging the duty of these agents. That is the purpose of it. The Chairman is putting a construction upon it that I did not have in mind. In addition to this investigation which they are making, acquiring and diffusing information, my amendment provides that they shall also inquire where labor can be procured.

Mr. LEVER. Mr. Chairman, will the gentleman yield?

Mr. ROBBINS. Yes.

Mr. LEVER. I take it the Chair is trying to ascertain if there is any law which authorizes the Secretary of Agriculture to procure labor for any purpose. There is no such law.

Mr. ROBBINS. That is not the purpose of this amendment. These agents are to inquire where it can be procured. If they can report that 500,000 men can be procured in Porto Rico or 1,000 men in Mexico or 10,000 men in western Canada, then this provides that an investigation shall be made and these facts reported and steps taken to get this labor, and the American farmer relieved from his present perilous situation. It is not that the Secretary of Agriculture is to hire men to do the harvesting.

Mr. LEVER. The Secretary of Agriculture would not have the authority unless we give it to him to make that kind of an inquiry.

Mr. TOWNER. Mr. Chairman, of course, the language is that this amount shall be expended to acquire and diffuse information. "To acquire," of course, is a very broad term, also "to diffuse" is a broad term, and "useful information" is also a broad term. If in any way this amendment merely adds to this statement particulars which are within the general and broad terms used, of course, it is not subject to the point of order. If the Chair interprets it as granting actually an extension of powers to the Secretary to secure labor, I grant that it would be subject to the point of order.

The CHAIRMAN. The gentleman from Iowa correctly states the principle. If this amendment was merely intended to afford the means to enable the Secretary of Agriculture to enlarge his activities in this connection, without enlarging his powers, the amendment would be plainly in order. If it goes further and affords additional powers to the Secretary it is new legislation and is out of order. The Chair will again read the amendment:

> And for the purpose of procuring labor to plant and harvest the crops for the year 1918 on the farms of the United States, $261,500.

It is apparent to the Chair that the amendment extends authority to the Secretary of Agriculture in excess of that contemplated by the paragraph, and the gentleman must reframe his amendment to make it in order. The point of order to the amendment in its present form is sustained.

Mr. ROBBINS. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

> Page 79, line 9, after the word 'products' insert the following: "and the procuring of farm labor."

Mr. LEVER. Mr. Chairman, I make the point of order against that amendment on two grounds. First, it is not germane to the section of the bill and in the second place it is not authorized by law. I desire to call the attention of the Chair to the fact that the authority given to the Secretary of Agriculture is contained in the organic act creating that department, and I shall read that for the information of the Chair:

> There shall be at the seat of government a Department of Agriculture, the general design and duties of which shall be to acquire and diffuse among the people of the United States useful information on

subjects connected with agriculture in the most general and comprehensive sense of that word, and to procure, propagate, and distribute among the people new and valuable seeds and plants.

Now, of course, I know that labor is very vital to agriculture, but it is not any more vital to agriculture than it is to manufacture. I have never seen in my connection with this bill the authority of the fundamental act stretched to any such limit as this. In the second place, this proposition would not be germane to this paragraph because this paragraph deals entirely with the proposition of the employment of agents to acquire, disseminate, and diffuse useful information connected with the distribution and marketing of farm products through certain methods.

Now, the gentleman's amendment proposes that we shall procure information about farm labor. Certainly the two propositions are not related to each other and can not be germane. I insist upon the point of order.

Mr. ROBBINS. Mr. Chairman, I think the amendment offered is entirely germane, and in order to test the proposition and determine accurately we must look at the clause in which it appears and the purpose of the clause. Now, the clause reads thus:

To enable the Secretary of Agriculture to cooperate with the several States in the employment of agents to acquire and diffuse information connected with—

What?—

with the distribution and marketing of farm products—

And now comes the amendment—

and the procurement of farm labor through investigational, demonstrational, or extensional methods.

Why is not that a germane amendment to the proposition in this clause? It does not put in anything that is new. It certainly does not disturb the existing provisions of the bill. It gives to these agents one additional duty, not new or unrelated to those already delegated, but a duty connected with farming. This investigation is concerned with farms. The labor that is proposed to be considered is farm labor. It is germane, and it is certainly pertinent and it is certainly in point with the very purpose of this section. Why is it not proper to insert it here? I need not advert to the great merits of the proposition, because it is not necessary; but I do impress upon the Chairman not to send it out on a point of order on the ground argued by the gentleman—that it is not germane to the purpose of the section. It is most pertinent and most germane to ascertain not only how these farm products are to be marketed but ascertain the labor that is to be used in connection therewith, whether for planting, harvesting, or marketing the same. I deny that it is not a germane proposition, and I ask the Chair to sustain it and not send it out on a point of order.

Mr. STAFFORD. Mr. Chairman, only a few minutes ago, in the consideration of the second paragraph on page 78, when the gentleman from Wyoming [Mr. MONDELL] offered an amendment, after the word "cotton," in line 20, to insert the words "and wool," the then occupant of the chair, the Chairman of the Committee of the Whole, held that it was out of order, and for this reason, that the Speaker of the House had on many occasions decided that you could not add a different provision to that incorporated in a paragraph where it related to only one subject matter. The point now made by the chairman of the committee that it is not germane applies to this amendment here, because this amendment seeks to extend the activities of this Bureau of Markets to a different subject other than that provided by this paragraph. In its present phraseology that is the only authority that this bureau has for the performance of this duty. It is limited to the extent of information connected with the distribution and marketing of farm products. Now it is proposed to extend that activity to the extent of procuring farm labor. The chairman of the committee has called the attention of the Chair to the organic act on which all this legislation is fundamentally based, that it is limited to acquiring and diffusing among the people useful information on subjects connected with agriculture. I wish to call the attention of the Chair in construing that authority to the fact that the Congress has since then created a department, first, of Commerce and Labor, and later divided that department into two—one the Department of Commerce and the other the Department of Labor—and there is at the present time authority in the Department of Labor to perform this very useful work and it is now being carried on. So in the construction by the Chair of that activity or the function of the respective departments the Chair should take into consideration the authority that is vested in the Department of Agriculture and the authority that is vested in the Department of Labor. I respectfully submit, as suggested by the chairman of the committee, that there is no authority in law under the Department of Agriculture to give this additional authority to the Bureau of Markets and, further, that it is not germane.

Mr. TOWNER. Mr. Chairman, if the Chair will pardon me for a moment. The gentleman from Wisconsin [Mr. STAFFORD] states that the Chair rightfully held that to add "wool" to "cotton" in the provision that was under consideration a short time ago was not germane for the reason that another subject could not be added. The gentleman is correct about the judgment of the Chair being correct, but it is upon another ground. It has been held, and it is well established, that when one item is contained in a bill another item may not be added to it. If, however, two items are contained in a bill then another item may be added to it. The proposition is not that items may not be added, but the proposition is as to when and under what circumstances items may be added. I suggest for the Chair's consideration this thought: It is true that in the provisions of this paragraph and in the provisions of the fundamental law which establishes the Department of Agriculture it gives authority to the Secretary to acquire and diffuse useful information regarding subjects connected with agriculture. Now, there is nothing outside of that domain that is suggested by this amendment. When gentlemen say that labor is a subject outside the domain of agriculture, certainly gentlemen do not understand of what agriculture consists. To an extent that does not exist in another occupation or employment; labor is the essential of agriculture. Nine-tenths of agriculture is labor. To say that a proposition regarding labor is not germane to the consideration of the subject of agriculture is certainly, in my judgment, entirely unfounded.

The provision that the gentleman suggests here by way of amendment is not to change the subject of investigation. It is not even to extend it. It is merely to particularize and to say that part of this useful information shall be that regarding labor on the farm. Can it be held that that is not germane to the proposition we have under consideration? I submit, Mr. Chairman, that is going very far afield for the purpose of defeating a very useful amendment.

The CHAIRMAN (Mr. SAUNDERS of Virginia). The Chair has followed the discussion on this point of order with interest. It has been instructive and profitable. The Chair does not wish to be too technical in his rulings, and at the same time he desires to keep within the precedents, and also within the rule of reason. All parliamentary rulings ought to be founded in reason.

If the paragraph under consideration proposed to acquire and diffuse information connected with and relating to the farm, the amendment would be plainly in order, because labor is concerned with and immediately related to the farm. But that is not the purpose of the paragraph. The paragraph contemplates the acquisition and diffusion of useful information connected with the distribution and marketing of farm products. It goes no further.

The ascertainment of the whereabouts of an available labor supply is in no wise related to the collection and diffusion of information concerning the distribution and marketing of farm products. Very plainly, it seems to me, this amendment is not germane to the subject matter of the paragraph. Therefore it violates the rule relating to germaneness. The Chair sustains the point of order.

The Clerk read as follows:

For general administrative expenses in connection with the lines of investigation, experiment, and demonstration conducted in the Bureau of Markets, $19,635.

In all, for general expenses, $961,705.

Mr. FESS. Mr. Chairman, I move to strike out the last word, in order to call the attention of the committee to an item of publicity. Here is an appropriation that approaches a million dollars, a very large proportion of which goes to the collection of information and the distribution or diffusion of the same. So I take it that the diffusion of this information is one of the chief agencies, and it is to that feature that I want to call the attention of the committee.

Here in our system of Government we endeavor to take the public into our confidence and legislate very largely through public opinion, and in so doing the mails are literally flooded with material gathered from various sources and, I presume, sent broadcast, probably to a selected list. I do not know, but I am of the opinion that there is a good deal of it that is not of the value that would warrant its distribution. I am not inclined to criticize, but I hold in my hand, for example, the allotment that reached my office day before yesterday. It all came in one envelope. It comes touching the Bureau of Markets. I have not made a sufficient examination to know whether the information is collated and would be of real value. One sheet is a report of the meat conditions. Another relates to daily

wholesale price of fresh meats. Another sheet relates to live stock at stockyards, with special reference to the receipts. Another one is the same subject continued. Accompanying this list came inclosed three letters, each signed by the chief of the bureau, and each one calling attention to the specific information of the sheet accompanying. What I call your attention to is this, that the mails are literally flooded with this sort of information. I have this word from a publisher in Ohio:

We received this morning on one mail 14 letters, all with free "press dope" inside. And, as the publishing company gets its mail several times a day, owing to the nature of the business, some idea may be gained of the enormous amount of absolutely worthless stuff that is being sent out, for the same thing is being enacted in every newspaper office in the country.

He makes the statement that there is not a single newspaper in that section that prints any of this, and at the same time the mails are crowded, and the mail facility, in a sense, is quite seriously interrupted.

I have another letter from a different section of the State, in which the writer says:

I am not inclined to criticize, but I am inclosing for your inspection a portion of some mail received to-day, which will give you some idea of the demands made on the newspapers. Of course they should do what they can to help, and I believe they are willing to do so, but while they are performing this service they should be protected from imposition.

Now, I admit that when the Government sends out this matter it is no command that the newspapers are to print it. I presume it refers simply to information that the publishers can read and upon which they may write editorials. From that standpoint the information, if important, will serve a good purpose. But I now refer to an incident that I want the committee to know

In my office last week appeared one of these innocent publicity agents who wanted me to give information touching whether my home was observing the rules and recommendations that have been published by Mr. Hoover on the conservation of food.

I am entirely in sympathy, I will say to the committee, with the campaign to conserve food. I was reared upon corn bread, and do not like it at all, but I will eat it, if necessary, so that the boys across the sea may have the wheat they otherwise would be denied. I am perfectly willing to do it, and am willing to make any other sort of necessary sacrifice. But I think that it is a woefully cheap performance for departments or Government agencies to send persons about in order to find some one in public office who would be willing to have his name appear in the papers to the effect that his family is observing this rule and that rule. This character of publicity provokes ridicule in the minds of the great masses. I have seen it in the Washington papers here, bringing in the families of the Cabinet officers and other various men and women high in station. These elaborated rehearsals of official Washington in its table observances have the virtue of furnishing copy I admit, but I am wondering what effect that sort of story is having upon the people throughout the country. In my judgment, it is not having a salutary effect, but rather creates a sense of disgust of an otherwise very creditable as well as important effort. I must confess that when the innocent individual came to me for what she claimed was interesting information, that she might write, as she had in other cases, a beautiful story, I was so outraged with the general itching for cheap publicity so apparent in many quarters that I did not treat her very courteously. I am not here making a public confession or apology, but I do think the Government ought not to undignify itself in such methods of publicity that are being conducted quite generally to-day. I am making the criticism as a friend of food conservation. At this particular time it would appear to me that the mails ought not to be doodled with so much of this—what would the newspaper boys call it?

SEVERAL MEMBERS. Bunk!

Mr. FESS. I would not want to use the word "bunk," but I do think this "canned stuff" should at this time give the mails relief and conserve the print paper, which has now come to be a real crisis.

The Clerk read as follows:

Enforcement of the United States grain standards act: To enable the Secretary of Agriculture to carry into effect the provisions of the United States grain standards act, including such rent and the employment of such persons and means as the Secretary of Agriculture may deem necessary, in the city of Washington and elsewhere, $456,580.

Mr. STEENERSON. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Minnesota moves to strike out the last word.

Mr. STEENERSON. Mr. Chairman, Congress on August 10 last passed the Food Administration law, under authority of which the prices of food and farm products are regulated. The act is broad enough to cover many other things. I notice in the first section that it covers "foods, feeds, fuel, including fuel oil and natural gas, and fertilizer and fertilizer ingredients, tools, utensils, implements, machinery, and equipment required for the actual production of foods, feeds, and fuel."

Now that the products of the farm have been regulated in price, I wanted to know why this authority granted by this act was not extended to the other things, and I wrote to the Food Administration on January 15 about it, as follows:

JANUARY 15, 1918.

UNITED STATES FOOD ADMINISTRATION,
Washington, D. C.

DEAR SIRS: Please advise me what, if any, steps have been taken to control the price of "tools, utensils, implements, machinery, and equipment required for actual production of food, feeds, and fuel," embraced in the food-control act approved August 10, 1917.

Respectfully,

_____.

I received in reply this letter:

UNITED STATES FOOD ADMINISTRATION,
Washington, D. C., January 18, 1918.

HON. HALVOR STEENERSON,
House of Representatives, Washington, D. C.

DEAR SIR: I received your letter of January 15 asking for information in regard to the steps that had been taken for controlling the prices of tools, utensils, implements, machinery, and equipment required for actual production of food, feeds, and fuel.

This matter is under the control of and is being handled by the Department of Agriculture, who have entire charge thereof.

In the Executive order providing for the organization of the United States Food Administration, the only powers delegated to the United States Food Administrator are those with reference to foods, feeds, and their derivative products, the language of said Executive order being as follows:

"Said United States Food Administrator shall supervise, direct, and carry into effect the provisions of said act and the powers and authority therein given to the President so far as the same apply to foods, feeds, and their derivative products."

Since the power of the United States Food Administrator is limited to that delegated to him by the President, the Food Administration has never had any power to take steps for controlling the prices of tools, utensils, implements, machinery, and equipment

Trusting that this satisfactorily answers your letter, I am,

Faithfully, yours,

HERBERT HOOVER.

Then I wrote to the Department of Agriculture, asking what they had done, and so far I have received no answer. But I want to point out that on December 4—that is, three or four months after this act was passed—the President made an address to Congress, in which he said:

"Recent experience has convinced me that the Congress must go further in authorizing the Government to set limits to prices. The law of supply and demand, I am sorry to say, has been replaced by the law of unrestrained selfishness. While we have eliminated profiteering in several branches of industry it still runs impudently rampant in others. The farmers, for example, complain with a great deal of justice that, while the regulation of food prices restricts their incomes, no restraints are placed upon the prices of most of the things they must themselves purchase; and similar inequities obtain on all sides."

The papers this morning contain a letter written by the President to the farmers, in which he repeats the statement that Congress should extend the authority. He says:

"The impression which prevails in some quarters that while the Government has sought to fix the prices of foodstuffs, it has not sought to fix other prices to determine the expenses of the farmer is a mistaken one."

Then he goes on to speak about other regulated prices. Then he says:

"I have every reason to believe that the Congress will extend the powers of the Government in this important, and even essential, matter so that the tendency to profiteering which is showing itself in too many quarters may be effectively checked."

It was no doubt an oversight on the part of the Chief Executive that he overlooked the fact that the authority to control the prices of the things that the farmer buys was in the law. I do not suppose that the President can remember all these things. He is charged with grave responsibilities, and no doubt it is impossible for any human being to remember all of these laws that we have passed giving him power. But he has many Cabinet officers and assistant Cabinet officers, many of whom are learned men, doctors of philosophy and scientists of note.

The CHAIRMAN. The time of the gentleman from Minnesota has expired.

Mr. STEENERSON. Mr. Chairman, I ask unanimous consent for five minutes more.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent to proceed for five minutes more. Is there objection?

There was no objection.

Mr. LEVER. Mr. Chairman, I ask unanimous consent that all debate on this paragraph and all amendments thereto close in five minutes.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that all debate on this paragraph and all amendments thereto close in five minutes. Is there objection?

There was no objection.

The CHAIRMAN. The gentleman from Minnesota is recognized for five minutes more.

Mr. STEENERSON. I say he has Cabinet officers and assistants in each of these departments whose duty it is to aid him in executing and administering the laws of Congress and to remind him if he overlooks anything of importance. And it seems to me they ought not to let the President announce to the farmers of the United States that Congress has failed to act in this matter. We know that the executive department under the charge of the Attorney General several weeks ago agreed with the Harvester Trust to postpone the prosecution of that monopoly. That institution controls the principal tools and implements, the harvesters and mowers and reapers, and so forth, that the farmers have to buy and which have been increased in price to an enormous extent. That trust is now engaged in profiteering at the expense of the farmer, whose grain has been reduced in price under this food-control act, but their prosecution is postponed by the Department of Justice.

Some one ought to inform the Chief Executive that Congress is not lacking; that it passed this law on August 20, which confers, through the President's order, on the Department of Agriculture, as Mr. Hoover says, the power to regulate these prices of which the farmers most complain. It seems to me it would be a good idea to insert in this bill an appropriation for the employment and equipment of flappers, or climenoles. That term may be new to you, but our reliable friend, Gulliver, who visited an island floating in the air some years ago, told us that in that country the people were very scientific; they were addicted to the study of geometry and all the natural sciences, and, in fact, on all their ornamental robes they had pictures of the sun, moon, and stars, and that they were so absorbed in those scientific studies that it was sometimes necessary to remind them of their important duties close at hand; and therefore they had employed climenoles—that is, people who had fixed upon long poles blown bladders filled with dried peas or little pebbles—and when these dignitaries in high station forgot that there was some important duty to perform the climenoles just flapped them on the face and woke them up, so they would know what was going on. [Laughter.]

Now, would it not be a good idea to include in this bill an appropriation for about 16 climenoles, to furnish their own equipment, so that they could remind our executive officers that we had passed last year a law giving full authority to regulate the prices of farm implements and farm machinery and fertilizers, and that the Department of Agriculture now neglects to take any steps to enforce it? These climenoles, it seems to me, would be very desirable and useful. [Laughter.]

Gulliver's description of these people is as follows:

> Their heads were all reclined either to the right or to the left; one of their eyes turned inward and the other directly up to the zenith. Their outward garments were adorned with the figures of suns, moons, and stars, interwoven with those of fiddles, flutes, harps, trumpets, guitars, harpsichords, and many more instruments of music unknown to us in Europe. I observed here and there many in the habit of servants, with a blown bladder fastened like a flail to the end of a short stick, which they carried in their hands. In each bladder was a small quantity of dried peas, or little pebbles (as I was afterwards informed). With these bladders they now and then flapped the mouths and ears of those who stood near them, of which practice I could not then conceive the meaning. It seems the minds of these people are so taken up with intense speculations that they neither can speak nor attend to the discourses of others without being aroused by some external taction upon the organs of speech and hearing, for which reason those persons who are able to afford it always keep a flapper (the original is climenole) in their family as one of their domestics, nor ever walk abroad or make visits without him. And the business of this officer is, when two or three or more persons are in company, gently to strike with his bladder the mouth of him who is to speak, and the right ear of him or them to whom the speaker addresses himself. This flapper is likewise employed diligently to attend his master in his walks, and upon occasion to give him a soft flap on his eyes, because he is always so wrapped up in cogitation that he is in manifest danger of falling down every precipice and bouncing his head against every post, and in the streets of jostling others or being jostled himself into the kennel. (A Voyage to Laputa, ch. II.)

The Clerk read as follows:

> Hereafter, in the performance of the duties required of the Bureau of Markets in the administration or enforcement of provisions of acts (United States cotton-futures act, 39 Stat. L., 476; United States grain-standards act, 39 Stat. L., 482; United States warehouse act, 39 Stat. L., 486; standard-container act, 39 Stat. L., 673; and the acts making annual appropriations for the Department of Agriculture) relating to the Department of Agriculture, the Secretary of Agriculture, or any representative authorized by him for the purpose, shall have power to administer oaths, examine witnesses, and call for the production of books and papers.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on the paragraph. I should like to ask what is the need for inserting the new authority for representatives of the department authorized by the Secretary of Agriculture to administer oaths, examine witnesses, and call for the production of books and papers? Under existing law, as I recall it, that authority is given only to the Secretary of Agriculture. If my memory serves me right, last year there was considerable discussion on the floor of the House as to whether this power should be extended to any person other than the Secretary of Agriculture. Am I right in that recollection?

Mr. LEVER. I think the gentleman is. I was just about to say that this whole matter was referred to a subcommittee. I see only one member of that subcommittee present, the gentleman from Minnesota [Mr. ANDERSON], and I shall be very glad to yield to him to make a statement.

Mr. ANDERSON. May I say that as a member of the subcommittee I never saw this provision, and the only time I was consulted about it was over the telephone. I am not saying this in criticism of the chairman of the subcommittee, but simply to absolve myself from any responsibility for the provision, because I did not draw it, and never saw it until after it was in the bill.

Mr. LEVER. The language submitted in the Book of Estimates reads as follows:

> Hereafter, in the performance of the duties required of the Department of Agriculture by the provisions of this act relating to the Bureau of Markets, the Secretary of Agriculture shall have power to administer oaths, examine witnesses, and call for the production of books and papers.

It was suggested in the committee that it might be wise to enumerate the acts which the committee had in mind, relating to the Bureau of Markets, and therefore the enumeration is made in the bill.

Mr. STAFFORD. My objection is largely to conferring this power on field representatives of the department to go in and compel the production of books and papers; in other words, the right of search. As I recall the argument on that question a year ago, this was severely contested by the leading lawyers of the House, especially the distinguished lawyer from Pennsylvania, Mr. GRAHAM. He thought it was too drastic a power to be vested in any field representative. To make the discussion brief, to curtail the argument, if the gentleman wishes to offer that as contained in last year's bill, simply striking out the words "or any representative authorized by him for the purpose," I shall not have anything further to say.

Mr. LEVER. I will be glad to accept the amendment, because the gentlemen who had charge of this are not present, and I am not well informed on it.

Mr. HAUGEN. I think what the gentleman has reference to is another provision that was in the bill a year ago, and that is modified considerably.

Mr. STAFFORD. No.

Mr. HAUGEN. This bill came out of conference in a modified form.

Mr. LEVER. Yes; that is true.

Mr. HAUGEN. It seems to me if we are to have anything, we ought to have what the bill provides.

Mr. STAFFORD. In last year's bill the phraseology was as follows:

> Hereafter, in the performance of the duties required of the Department of Agriculture by the provisions of this act relating to the Bureau of Markets, the Secretary of Agriculture shall have power to administer oaths, examine witnesses, and call for the production of books and papers.

Mr. HAUGEN. If we are going to incorporate that language, we might as well strike out the whole thing, because that does not mean anything. To confer that power on the Secretary of Agriculture means nothing, because the Secretary of Agriculture is not going to administer oaths. He must delegate that power all along the line to those who are administering the law.

Mr. STAFFORD. That very subject was under consideration last year and it was severely contested on the floor here as to whether we should confer on field agents, mere inspectors, the authority to go into a person's private establishment and compel him to produce books and papers.

Mr. LEVER. Let me say to the gentleman that if he is going to insist on his point of order, probably the best thing to do under the circumstances would be to offer the language of the present act as an amendment.

Mr. STAFFORD. I have no objection to that.

Mr. LEVER. What does the gentleman from Iowa say as to that?

Mr. HAUGEN. If that is to be offered, we might just as well strike out the whole thing. Everybody knows the Secretary of Agriculture is not going to administer oaths to anybody. If that power is not to be delegated to those who administer the law, of course it will be of no effect.

Mr. LEVER. I appreciate what the gentleman says in that respect.

Mr. ANDERSON. May I interrupt right there?

Mr. LEVER. Yes.

Mr. ANDERSON. I think the gentleman from Iowa [Mr. HAUGEN] is mistaken as to the effect of the provision. The solicitor held, as I recall, that the general authority to the Secretary of Agriculture was an authority to anybody in the department, and the purpose of the language—"or any representative authorized by him for the purpose"—was to limit the authority to persons who were specifically authorized by the Secretary of Agriculture to require the production of witnesses, their examination under oath, and so forth. In other words, the purpose of this provision was a limiting one rather than an extending one.

Mr. LEVER. I think it is not divulging committee secrets to say I believe that is what the gentleman from Minnesota [Mr. ANDERSON] had in mind when he suggested in the committee that this matter be looked into, and, as I say, a subcommittee was appointed to prepare a substitute for the langauge of the present law, and that committee reported this language to the full committee, and the committee included it.

Mr. ANDERSON. I had two objections to the proposition. One of them was this, that if this general power to administer oaths was to be given it ought to be given in respect only to administrative laws. By that I mean such acts as are enumerated here.

Mr. LEVER. Yes.

Mr. ANDERSON. And not to the provisions of the general appropriation bill. I am not willing to consent to this provision unless there is stricken out of it the language which makes it applicable to the general provisions of any appropriation bill, because no man under the sun can possibly keep track of this proposition if it is to apply to every single item in every appropriation bill. Clearly it ought to be confined to the administrative acts which the Department of Agriculture is authorized to administer, such as the cotton futures act, the grain grade standards act, and acts of that sort.

Mr. HAUGEN. The bill reported by the committee last year gave to the Secretary of Agriculture the power of seizure, and under it he might seize books and such things, a power which was seriously objected to by the gentleman from Pennsylvania [Mr. GRAHAM]. The bill was amended in the Senate, and it came out of conference in the form of the present law.

Mr. LEVER. I think the gentleman is referring to that provision now.

Mr. HAUGEN. No; I am referring to this one provision.

Mr. STAFFORD. Mr. Chairman, on the statement made by the gentleman from Minnesota and the gentleman from Iowa I think it is better to have the point of order made and submit either last year's phraseology, and permit the gentleman from Minnesota and the gentleman from Iowa, in collaboration with the chairman of the committee, to arrive at some revised form to meet the needs of the service. I make the point of order that it contains new legislation on an appropriation bill not authorized by law.

Mr. LEVER. Mr. Chairman, I concede the point of order.

The CHAIRMAN (Mr. SAUNDERS of Virginia). The Chair sustains the point of order.

Mr. LEVER. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Hereafter, in the performance of the duties required of the Department of Agriculture by the provisions of this act relating to the Bureau of Markets, the Secretary of Agriculture shall have power to administer oaths, examine witnesses, and call for the production of books and papers.

Mr. MONDELL. Mr. Chairman, I reserve a point of order on the amendment.

Mr. LEVER. That is the exact language of the existing law now.

Mr. ANDERSON. If it is existing law, in the ordinary sense in which that term is used, why reenact it here?

Mr. McLAUGHLIN of Michigan. In the act in which that provision occurs it is an emergency for the present war.

Mr. MONDELL. Is the amendment in the exact form of existing law without change or modification?

Mr. LEVER. It is.

Mr. MONDELL. Then why reenact it here?

Mr. LEVER. Does the gentleman object making it permanent law by the word "hereafter"?

Mr. MONDELL. I understood the gentleman to say that it was permanent law.

Mr. LEVER. I think it is. And I do not know that there is any necessity of carrying it in the bill at all.

Mr. MONDELL. Whatever the law is, we ought not to attempt at this time without due consideration to amend it.

Mr. LEVER. Well, Mr. Chairman, I will ask unanimous consent to withdraw the amendment.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent to withdraw his amendment. Is there objection?

There was no objection.

Mr. STEENERSON. Mr. Chairman, I ask unanimous consent to revise and extend my remarks.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent to revise and extend his remarks. Is there objection?

There was no objection.

Mr. ANDERSON. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

On page 81, in lieu of the paragraph ruled out, insert the following: "Hereafter, in the performance of the duties required of the Bureau of Markets in the administration or enforcement of provisions of acts (United States cotton-futures act, 39 Stat. L., p. 476; United States grain-standards act, 39 Stat. L., p. 482; United States warehouse act, 39 Stat. L., p. 486; standard container act, 39 Stat. L., p. 673) relating to the Department of Agriculture, the Secretary of Agriculture, or any representative authorized by him for the purpose, shall have power to administer oaths, examine witnesses, and call for the production of books and papers."

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on the amendment. Do I understand the gentleman to say that under the general phraseology of existing law the Secretary of Agriculture has a right to depute the authority to administer oaths, examine witnesses, and call for the production of books and papers?

Mr. ANDERSON. The gentleman states it a little broader than is justified. The provision about which we have been talking was contained in the so-called food-survey act and applied only to the provisions of that act. It did not apply, as I remember it now, to the general appropriation acts for the Department of Agriculture. It was inserted as an emergency proposition under the food-survey act as a war proposition.

Mr. STAFFORD. Will the gentleman kindly direct the attention of the committee to the provision in the food-survey act?

Mr. ANDERSON. I do not know that I can direct attention to the particular provision. I am giving my impression of it, and I may be entirely wrong.

Mr. STAFFORD. Why not allow this to remain as it is and, if necessary, it can be amended in the Senate.

Mr. ANDERSON. Very well; Mr. Chairman, I ask unanimous consent to withdraw my amendment.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent to withdraw his amendment. Is there objection?

There was no objection.

The Clerk read as follows:

To enable the Secretary of Agriculture to carry into effect the provisions of the act of April 26, 1910, entitled "An act for preventing the manufacture, sale, or transportation of adulterated or misbranded Paris greens, lead arsenates, and other insecticides, and also fungicides, and for regulating traffic therein, and for other purposes," $94,490.

Mr. MONDELL. Mr. Chairman, I move to strike out the last word. This item just read, and the two preceding it, are very illuminating as illustrating the ways of bureaucracy. The Congress was persuaded in 1910 that it was of some importance that we should have legislation for preventing the manufacture, sale, and transportation of adulterated or the misbranding of Paris green and other insecticides, fungicides, and for regulating the traffic therein, and so forth. Probably it was important that there should be legislation on the subject, although it would seem that our general legislation to prohibit and prevent adulteration and misbranding ought to apply to these bug poisons.

But we legislated on the subject specifically, and they have built up in the Department of Agriculture quite a neat little division, which now spends, or we propose to give it the opportunity to expend, $131,240. How on earth they can find ways to spend that much money for the purpose of preventing the manufacture, sale, and transportation of misbranded or adulterated bug powders I do not know. But if we are to divide the prohibitive statutes, the prohibitions by the Government up into sections, with a separate appropriation for each as we have done in this case, we would soon find the prevention of adulteration and misbranding would cost more than even this great war that we are engaged in.

One does not need to be fully informed as to what might be necessary for the purpose of carrying out this insecticide act to realize that $120,000 could not be legitimately or properly or necessarily expended in a year for that purpose. If it can be, then there is no limit to the sum to which the expenditures of the Government may mount in the ordinary administration of

acts of prohibition and acts to prevent fraud. No department under the Government does better work than the Agricultural Department, and no department is more disposed to create new bureaus, new divisions, to reach out for new authority, to expend money in the domain of other departments, to duplicate work, and to extend its activities unnecessarily, than this same most worthy department.

That is a characteristic tendency of all good administrative departments, and there is where the duty of Congress and the committee comes in—to check the enthusiasm, to check the ambition, to check the desire of men who may be well intentioned to spend public money unnecessarily and uselessly.

Mr. TILSON. Mr. Chairman, will the gentleman yield?

Mr. MONDELL. Yes.

Mr. TILSON. Does the gentleman know just how they go about this? Do they send inspectors over the country inspecting establishments?

Mr. MONDELL. I have not any idea, but I have no doubt they have racked their brains to find the most expensive and indirect methods to carry out the provisions of the act. If that were not true, they could not have possibly built up a statutory roll of $26,750 in Washington.

Mr. TILSON. I note they have only three inspectors, and the rest all seem to be clerks.

Mr. MONDELL. Quite likely clerks and clerks and more clerks.

The CHAIRMAN. The time of the gentleman from Wyoming has expired.

The Clerk read as follows:

Experiments and demonstrations in live-stock production in the cane-sugar and cotton districts of the United States: To enable the Secretary of Agriculture, in cooperation with the authorities of the States concerned, or with individuals, to make such investigations and demonstrations as may be necessary in connection with the development of live-stock production in the cane-sugar and cotton districts of the United States, including the erection of barns and other necessary buildings, and the employment of persons and means in the city of Washington and elsewhere, $60,000.

Mr. McLAUGHLIN of Michigan. Mr. Chairman, I move to strike out the last word. The use of money made under this appropriation and the paragraph on the preceding page, 84, for demonstrations on reclamation projects, justify the criticism I made some time ago and the limitation on the use to be made of money that was proposed by one of my amendments to a former paragraph. The testimony shows that in these projects, temporary and experimental in their nature, money has been expended for the construction of permanent buildings, ordinary structures at very large expense, houses costing three, four, and five thousand dollars; barns, to be used for experimental purposes, costing five and six and seven thousand dollars. Evidently it was not intended that such use was to be made of the money; but when an effort is made to limit or direct or forbid its use for purposes not intended by the act, not contemplated by Congress, certainly objection is made, and amendments directing the use of money and intended to prevent its use otherwise than as Congress expressly provides are defeated.

Mr. TOWNER. Mr. Chairman, will the gentleman yield?

Mr. McLAUGHLIN of Michigan. Yes.

Mr. TOWNER. I am informed, and I would like to know whether the gentleman is able to give a confirmation of the statement, that there have been erected, under the authority granted here to cooperate with the authorities of States or of individuals, barns, sheds, and structures of that kind on the property of individuals who obtain the individual benefit, as a method or means of experimentation. Does the gentleman know whether that is true?

Mr. McLAUGHLIN of Michigan. I think as to expenditure of money under this particular item that is not true. In the State of Louisiana, where this work is largely done, land has been acquired by the Federal Government by gift or purchase for the temporary use of the Federal Government, and projects are in process there, and the money has been used for the erection of buildings on that land, and except as the land has been acquired temporarily or for temporary use in these experiments what the gentleman has said is not exactly true.

Mr. STAFFORD. Mr. Chairman, will the gentleman yield?

Mr. McLAUGHLIN of Michigan. Yes.

Mr. STAFFORD. Is this the item that originated because Congress placed sugar, that ultimately would go on the free list, and the plea was made by the Representatives of the State of Louisiana, by reason of such enactment, that the injury that would come to the cane-sugar producers of that State made it necessary to establish some experimental work to see whether cattle production and diverse industries could not be established in its place?

Mr. McLAUGHLIN of Michigan. The gentleman is entirely right about that. That was the origin of the item.

Mr. STAFFORD. Now that the need for it is past, the item still keeps running on.

Mr. McLAUGHLIN of Michigan. Has the need of it passed? Mr. Chairman, the price of sugar is high on account of the war, but the need for relief of the people of this country from the effects of the Underwood tariff law will not cease as long as that law is on the books. It is true that this particular item was suggested and urged very strongly by Representatives and Senators from the State of Louisiana, who stated to us that the sugar industry had been destroyed as the result of the reduction of the tariff on sugar and the prospect of its entire removal, and insisted that it was absolutely necessary that something be done by way of teaching the people of that part of the country to engage in new lines of agriculture, and it was urged that a temporary station should be established in the sugar-cane section of the State for the purpose of experiments in the production of other crops and in the feeding and growing of live stock.

In that temporary experiment, however, they have gone further than was contemplated by the committee and, I am sure, by Congress by the erection of permanent buildings much more expensive than was necessary and in the purchase of a large number of animals. If it had been thought that the money was to be expended in that way, refusal or permission so to expend it would have been carried in the act. I have pointed out matters of similar character time and time again in the House, following the method I have used on the committee, and have urged incorporation in these acts limitations upon the activities of officials and agents of the department in the way of spending money, so as to make impossible the expenditure of money altogether contrary to the intention of Congress.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. McLAUGHLIN of Michigan. Mr. Chairman, I ask unanimous consent to proceed for five minutes.

The CHAIRMAN. Is there objection?

Mr. LEVER. Mr. Chairman, I ask unanimous consent that the debate on this paragraph and all amendments thereto close in five minutes.

The CHAIRMAN. Is there objection?

Mr. TILSON. Reserving the right to object, Mr. Chairman, if the gentleman from Michigan has not explained just how this money is to be expended, I would like to have one minute in which to ask the gentleman from South Carolina to explain just how the money has been expended in times past.

Mr. LEVER. Mr. Chairman, I make the request six minutes.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that all debate on this paragraph and all amendments close in six minutes. Is there objection?

There was no objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan that he proceed for five minutes?

There was no objection.

Mr. MORGAN. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. McLAUGHLIN of Michigan. Mr. Chairman, it was the understanding that money should not be used for the purchase of animals, that the work should be done by way of advice and instruction to those who are engaged or wish to engage in the business, by experiments made with and upon animals, the property of residents of that section of the country, but no limitations having been put by Congress and an immense sum of money having been appropriated, they started upon a large project and purchased a large number of animals. There are hundreds of them on these projects now, and expensive buildings have been constructed for temporary use, but built as permanent structures. It all illustrates the need of this Congress imposing limitations upon the use of money. Just as I suggested a few moments ago by amendment on these experiments as to testing the tensile strength and use of waste of cotton, that no money should be appropriated in the erection of buildings, the leasing of property, the acquisition of real estate or expensive personal property to carry on these experiments, purely manufacturing, mercantile propositions and not marketing propositions, under the Bureau of Markets. The House did not agree with me and no limitations have been placed. I mention these two items—the reclamation project and the project in Louisiana designed to relieve the people of that section of the country from the natural effect of the Underwood tariff law—as glaring instances of the laxness of Congress while appropriating money, at the same time properly and definitely to restrict the use of the money.

Mr. ANDERSON. Will the gentleman yield?

Mr. McLAUGHLIN of Michigan. I will.

Mr. ANDERSON. I think the gentleman might well include the following item relating to experiments upon dry land, semi-arid land, and of that appropriation last year $19.000 was spent for the construction of buildings and $7,000 additional is proposed to be used for the construction of buildings this year

Mr. McLAUGHLIN of Michigan. Yes; and if the committee will notice, it is under an item that calls for investigations and experiments, and permanent houses, costing $2,000, $3,000, and $4,000, and, if my memory is right, the construction of barns costing, I think, as high as $7,000 were erected.

To show the disposition further of these gentlemen to spend the public money, authority was given in the appropriation for the Bureau of Animal Industry to assist in the encouragement of the production of dairy animals and the dairy industry in sections that had been freed of the cattle tick, and it was expressly stated that the money should not be used for the purchase of breeding animals, believing that was expenditure they might make if not forbidden. The result was they did not buy animals for breeding purposes but they bought animals, using thousands and thousands of dollars, for every other conceivable purpose.

Mr. MONDELL. And then bred them?

Mr. McLAUGHLIN of Michigan. I do not know whether they bred them or took precautions they would not breed. I did not follow the work in that particular. They avoided and evaded the law, and precise limitations should be made upon these lump-sum appropriations.

Mr. LEVER. Will the gentleman yield?

Mr. McLAUGHLIN of Michigan. I yield.

Mr. LEVER. I do not know I caught the gentleman's statement or not. Does the gentleman say the department has spent large sums of the cattle-tick appropriation for the purpose of buying stock; and if so, upon what authority does the gentleman make that statement?

Mr. McLAUGHLIN of Michigan. There is a subdivision in which it says $50,000 may be used by the Bureau of Animal Industry for encouraging the production of live stock and making investigations and experiments and demonstrations by way of developing the dairy industries in the areas freed of the cattle tick, and money was at one time used, as I have stated, for the purchase of animals; but such use of money is not now made, because Congress changed the wording of the appropriation and expressly forbid such use; that is, forbid the purchase of animals for any purpose.

Mr. LEVER. I have never heard of it.

Mr. McLAUGHLIN of Michigan. And spent out of that money not money appropriated for exterminating cattle ticks, but money appropriated for encouraging dairying in tick-freed areas. That kind of work is also conducted by the Bureau of Plant Industry through the county agents and others employed in extension work. Therefore there is duplication of work.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. TILSON. Mr. Chairman, the gentleman from South Carolina [Mr. LEVER] usually makes a fair and frank statement in regard to the items in his bill. I should like to have him, in this connection, state to the committee fairly and frankly just how the sum of $60,000 or the $40,000 in the next paragraph are spent. Are we conducting an experimental stock farm, and if so, what are we doing with the proceeds, if there are any proceeds?

Mr. LEVER. I will say very frankly to the gentleman that both of these items were inserted in the bill upon the floor of the House. Neither one of them was suggested by the Department of Agriculture, so far as I know, unless it was the live stock in the reclamation project in the West. At both of these stations, which are permanent stations, I will say to the gentleman, and they are likely to be there for all time or until the experiments have been concluded, that they are undertaking to deal with investigations. For instance, at the Louisiana station of the raising of mules, hogs, cattle, and dairy animals. They make investigations as to the utilization of native grasses and feeds and food, of sorghum, and various and sundry kinds of problems that enter into the live-stock industry. That is true also in a different way of the station on the reclamation project.

Mr. TILSON. A regular experimental station?

Mr. LEVER. It is nothing more nor less than a regular experiment station established for regional investigation.

Mr. TILSON. It was established, as I remember, for meeting a temporary emergency.

Mr. LEVER. The statement was made on the floor of the House, when this matter was under consideration, by the now Senator from Louisiana that he thought it would be a temporary proposition.

Mr. TILSON. That was understood, I will state to the gentleman.

Mr. LEVER. The representative of the Department of Agriculture, before our committee, has never made a statement that the reclamation proposition is a temporary proposition. He has made the statement repeatedly that there are big problems to solve and this work will likely continue for many years until the problems can be thoroughly investigated.

Mr. TILSON. The necessary permanent buildings have been erected?

Mr. LEVER. Yes.

Mr. TILSON. And the expenditure of $100,000 in these two items is apt to be continued indefinitely for the continuation of experiments?

Mr. LEVER. It is very likely to be made for an indefinite period for the conduct of these experiments, but, if the House wishes to do it, they can vote those propositions out and stop them.

Mr. TILSON. Then, in order to meet a temporary emergency, we have gone into permanent experimental work in a State where we were called upon to meet a particular emergency problem?

Mr. LEVER. I do not think that is quite a fair statement of the proposition.

Mr. SHALLENBERGER. Will the gentleman yield?

Mr. LEVER. I will.

Mr. SHALLENBERGER. Can the climatic conditions that surround them in Louisiana, a semiarid district, be said to constitute a temporary condition? Are not those conditions constant?

Mr. TILSON. Was it not the intention to turn Louisiana, after the sugar industry had ceased to be profitable or ceased to exist by reason of the Underwood tariff bill, into a live-stock country, and was not this to be an experiment to try it out and see whether it would work or not?

Mr. LEVER. I will say to the gentleman frankly that I have never been deceived about this item, even if other Members have. I regard it as a permanent institution that will long remain after I am dead and gone. And that is true of the reclamation station.

Mr. TILSON. According to the present course of events, it seems that that is apt to be the result.

The CHAIRMAN. The time of the gentleman has expired.

The Clerk read as follows:

Experiments in dairying and live-stock production in semiarid and irrigated districts of the western United States. To enable the Secretary of Agriculture to conduct investigations and experiments in problems connected with the establishment of dairying and meat-production enterprises on the semiarid and irrigated lands of the western United States, including the purchase of live stock, the erection of barns and other necessary buildings, and the employment of necessary persons and means in the city of Washington and elsewhere, $40,000.

Mr. MONDELL. Mr. Chairman, I move to strike out the last word.

I am very much interested in the statement made by the gentleman from Michigan [Mr. McLAUGHLIN] in regard to the Louisiana item which was read, and which applies, of course, with equal or greater force to the item to which I have addressed my amendment. In this case a very large proportion of the appropriation has been used for permanent buildings, but, as the gentleman from South Carolina, the chairman of the committee, says, this item originated on the floor of the House. Members are responsible for it. The committee is, however, responsible for the regulation of the expenditures under all these items. I am inclined to think that the gentleman from Michigan is not entirely accurate in suggesting that there have been large expenditures made out of the appropriations for demonstrations on reclamation projects for buildings. I am not fully informed on the subject, but am under the impression that no considerable part of that appropriation has been so spent.

Mr. McLAUGHLIN of Michigan. I will say to the gentleman that I had in mind those experiments on the semiarid district, the one on the middle of page 85.

Mr. MONDELL. The item just read?

Mr. McLAUGHLIN of Michigan. The item just read.

Mr. MONDELL. A large proportion of that appropriation has been expended for permanent buildings. If any considerable portion of the reclamation item has been used for buildings, or for anything but temporary buildings, it has been misapplied, because, while that work is important and valuable, it is not necessary or wise to build expensive buildings. The Reclamation Service does some work along these lines, and the service does not spend any considerable amount of money for buildings. It erects such temporary buildings

as may be necessary, buildings costing at the outside a few hundred dollars apiece, and those are the only buildings that are necessary or justified in connection with any of these enterprises. It is true that if the committee starts out with the purpose and intent of establishing a permanent demonstration station permanent and more expensive buildings may be necessary. But that is not true with regard to the character of the work on the reclamation projects. It is valuable, useful, and helpful, but I hope it is not used to any considerable extent for building. I know the Reclamation Service does not use its funds in that way, and the Agricultural Department should not.

The Clerk read as follows:

That not to exceed $63,000 of the lump-sum appropriations herein made for the Department of Agriculture shall be available for the purchase, maintenance, repair, and operation of motor-propelled and horse-drawn passenger-carrying vehicles necessary in the conduct of the field work of the Department of Agriculture outside the District of Columbia: *Provided*, That not to exceed $13,000 of this amount shall be expended for the purchase of such vehicles, and that such vehicles shall be used only for official service outside the District of Columbia, but this shall not prevent the continued use for official service of motor trucks in the District of Columbia: *Provided further*, That the Secretary of Agriculture shall, on the first day of each regular session of Congress, make a report to Congress showing the amount expended under the provisions of this paragraph during the preceding fiscal year.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on the paragraph. What is the necessity for authorizing the Secretary of Agriculture to purchase motor boats? I believe there is no such authority under existing law. We do authorize him to purchase automobiles for use on the forest reserves and in other activities of the department.

Mr. LEVER. The statement is made in reference to this item that there is no authority in the law to buy a motor boat. The Comptroller of the Treasury has decided that. So it requires specific authority to do so, and this is to give the authority, which is new. And the motor boats are used in connection with the Forestry Service, largely in Alaska. I think there are probably half a dozen or more of them.

Mr. STAFFORD. I would have no objection to giving the authority to the Secretary of Agriculture to purchase motor boats for use in Alaska, but I am not willing to allow them to purchase motor boats in the field service to be used for pleasure and to go around on joy rides at all seasons of the year.

Mr. LEVER. I certainly agree with the gentleman on that proposition.

Mr. STAFFORD. I can not see any necessity, perhaps, for having motor boats in Alaska, except in the southern waters. The streams up there are frozen most of the time. What is the necessity for them?

Mr. JOHNSON of Washington. There is no other means of transportation in certain parts of Alaska, except on the railroads in the interior. In many parts there is no way to go except by water.

Mr. STAFFORD. Are they small pleasure boats?

Mr. JOHNSON of Washington. Yes; the boats are of small tonnage, driven by motors, and are the prevailing boats used there. They are called fish boats, largely, but they are a little better than fish boats; they are ocean-going boats of 15 or 20 tons.

Mr. STAFFORD. What has the gentleman to say about limiting the authorization for motor boats for use in Alaskan waters?

Mr. LEVER. I will say to the gentleman candidly that I think Alaska is the only place where they use these motor boats. It may be, however, that in some of the national forests they might have lake conditions, as we have in Alaska. I am not sure of that. I would hate to do that.

Mr. STAFFORD. We have some very desirable lakes in the national forests where it would be very nice to have a motor boat.

Mr. HAUGEN. If the gentleman will permit, I think a few are used in connection with the investigation of oysters and various things of that kind.

Mr. STAFFORD. In that connection the Secretary of Commerce has had authorized under an appropriation last year a large boat for that very purpose. There is no use in duplicating activities. That is a work for the Department of Commerce.

Mr. WALSH. Mr. Chairman, will the gentleman yield?

Mr. STAFFORD. Yes; I yield to the gentleman.

Mr. WALSH. Has not the gentleman from Washington [Mr. JOHNSON] had experience in transportation up in Alaska by means of motor boats, and does he not own one in that vicinity?

Mr. JOHNSON of Washington. Yes; but I was very glad to get rid of it.

Mr. LEVER. If the gentleman from Wisconsin has an amendment he can offer it.

Mr. STAFFORD. Mr. Chairman, I withdraw the reservation of the point of order if the gentleman will accept an amendment.

Mr. LEVER. We will accept it.

Mr. STAFFORD. No. I will not present the amendment at present.

The CHAIRMAN. The pro forma amendment is withdrawn.

The Clerk read as follows:

Eradication of foot-and-mouth and other contagious diseases of animals: In case of an emergency arising out of the existence of foot-and-mouth disease, rinderpest, contagious pleuropneumonia, or other contagious or infectious disease of animals which, in the opinion of the Secretary of Agriculture, threatens the live-stock industry of the country, he may expend in the city of Washington or elsewhere, out of any money in the Treasury not otherwise appropriated, the sum of $1,000,000, which sum is hereby appropriated, or so much thereof as he determines to be necessary in the arrest and eradication of any such disease, including the payment of claims growing out of past and future purchases and destruction, in cooperation with the States, of animals affected by or exposed to, or of materials contaminated by or exposed to, any such disease, wherever found and irrespective of ownership, under like or substantially similar circumstances, when such owner has complied with all lawful quarantine regulations: *Provided*, That the payment for animals hereafter purchased may be made on appraisement based on the meat, dairy, or breeding value, but in case of appraisement based on breeding value no appraisement of any animal shall exceed three times its meat or dairy value, and except in case of an extraordinary emergency, to be determined by the Secretary of Agriculture, the payment by the United States Government for any animal shall not exceed one-half of any such appraisements: *Provided further*, That so much of the appropriation of $2,500,000 made by the Agricultural appropriation act of March 4, 1915, for the fiscal year ending June 30, 1916, for the arrest and eradication of foot-and-mouth disease, rinderpest, contagious, pleuropneumonia, or other contagious or infectious disease of animals as remains unexpended at the close of the fiscal year 1918, is hereby reappropriated and made available for expenditure during the fiscal year ending June 30, 1919, for the objects mentioned in said appropriation act, including necessary investigations to determine whether said diseases have been completely eradicated in districts where they previously existed.

Mr. LEVER. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from South Carolina offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 87, line 15, after the word "contagious," strike out the comma.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. KREIDER. Mr. Chairman, I rise for the purpose of asking the chairman of the committee whether the payment of one-half of the value of the cattle as appraised by the Federal Government is in any way contingent on the State paying to the owner of the cattle the other half, or whether the Government pays its half regardless of the State, where the cattle are located and condemned, paying anything?

Mr. LEVER. My understanding is that the Government pays its half regardless of what action the State takes, but the Government is always desirous of having the State pay the other half, and always tries to make such arrangements before going into a State. This matter has not been fresh in my mind for two or three years, because there has not been any outbreak of foot-and-mouth disease in the last three years. I am a little hazy in my recollection of it.

Mr. KREIDER. Well, I have no amendment prepared, but it occurs to me that for the protection of the owner of the cattle it would be a splendid idea to make the payment by the Federal Government conditioned upon the State paying also one-half.

Mr. LEVER. Here is the other end of that proposition: I think the gentleman will see it in a moment. This disease is so fearfully contagious and dangerous that I do not think the Federal Government could afford to cease its efforts to stamp it out simply because a State might be recalcitrant or belligerent or refuse to do its duty. If the foot-and-mouth disease should spread generally in this country it would practically wipe out the live-stock industry, so far as cattle is concerned; and while it would be desirable we can not afford to stand back on account of a State refusing to do its duty.

Mr. TILSON. Would it not result in the man not receiving anything at all?

Mr. LEVER. That might be the result.

Mr. KREIDER. I grant that that is possible, but I do not believe it would be probable. I think it would result in proper action being taken by the several States, providing that the owner of the cattle should be reimbursed for at least half by the State, and then the Government could pay the other half.

Mr. LEVER. I assure the gentleman that it would be a very desirable thing to do. Many of our appropriations are being made on that theory. But this is a matter of extreme exigency. When we are dealing with the foot-and-mouth disease it is like dealing with a house on fire. It must be dealt with promptly. We can not afford to take chances of a State not having the money or the legislature not being in session, or something of that kind, that would interfere with the work.

Mr. KREIDER. But is it not a fact that the actual taking of the cattle and slaughtering of them is under the police powers of the several States, and can only be done upon proper legislation by the State?

Mr. LEVER. Yes.

Mr. KREIDER. Now, if this appropriation and money available for this purpose were based upon a law of the State which would compel the State to pay the other half, it seems to me that the property owner, the cattle owner, the live-stock owner, would be reimbursed more nearly the value of the cattle which have been slaughtered than by this way, because his loss not only consists in the destruction of the cattle, but another contingent loss that is possibly as great as the loss of the cattle themselves, which the owner must bear.

Mr. LEVER. Let me say to the gentleman that, as he will recall, in the last outbreak of the foot-and-mouth disease we had a very serious difficulty with one State. Of course the Federal Government has the power which it can use and by indirection bring about a situation such as that which the gentleman has in mind. The Federal Government can quarantine any State against the spread of this disease and can keep the quarantine over that State until the State does adopt the methods and policies that the Government has outlined for all the States in the Union, and I think that is the way they have been getting at it in the past.

Mr. KREIDER. Is there any way in which we might perfect this bill so as to take care of that?

Mr. LEVER. This language, I will say to my friend, carried us through the greatest outbreak of foot-and-mouth disease that the country ever saw, and it has been very carefully worked out, and it would be dangerous to tamper with it.

Mr. WALSH. Mr. Chairman, I move to strike out the last two words, in order to ask the chairman of the committee, along the line suggested by the gentleman from Pennsylvania [Mr. KREIDER], upon what theory does the department proceed whereby it is willing to pay for the cattle which may be diseased under the foot-and-mouth disease item and not pay for property, such as a citrous tree, or a tree afflicted with white-pine blister rust?

I understand there is a prohibition that none of those appropriations shall be expended in payment for property destroyed in attempting to wipe out the citrus canker or the white-pine blister rust. Yet they are permitted to pay for an animal which is killed in an attempt to wipe out the foot-and-mouth disease. Will the gentleman state the reason for the distinction that has been made?

Mr. LEVER. I am not sure that this is a departmental theory at all. I am inclined to think it is more the theory of the committee which reported these items than it is of the department itself; and I am not sure that the committee has any definite theory about the matter except this: In my own mind I should think that on account of the great contagiousness and infectiousness of the foot-and-mouth disease, and the tremendous interests involved in it if it should spread over the country, it has been felt that the payment in part for the losses suffered is the best method of eradicating the disease. In other words, you get closer cooperation from the people, and you bring about a more certain eradication of the disease. For example, if a man has a very valuable animal that has foot-and-mouth disease, if he knows his loss has got to be a total loss, and if the animal is worth $500 or $1,000, or $5,000, he may undertake to conceal the fact that this valuable animal has the disease in the hope that he may effect a cure; but if he knows that the Federal Government and the State government, acting together, will reimburse him for at least a part of his loss, that man is very likely to report the fact of the disease in his herd. I think that is the theory upon which we act.

Mr. WALSH. But upon the legal proposition, does not the gentleman think that the Government would have authority to kill the diseased animal without providing any compensation, the same as it has authority to destroy a tree without compensation?

Mr. LEVER. The Federal Government itself, except on its own property, of course, would not have authority to kill any of these animals. The Federal Government in fighting the foot-and-mouth disease has to act largely through the police powers of the State; but the principle is the same. Of course the State governments, I think, under their police powers, would have the right to kill these animals without making any compensation whatever; but the committee have gone on the theory that it is a wise policy, from the standpoint of stamping out the disease, to make some compensation.

Mr. WALSH. And the disease has been apparently stamped out.

Mr. LEVER. The disease has been absolutely stamped out.

Mr. FESS. The tree, being stationary, will not spread the disease so rapidly as the cattle which are shipped, and in that way, if not properly handled, will spread the disease so much more rapidly. Therefore the necessity of dealing with it immediately.

Mr. LEVER. Therefore the necessity of dealing with it immediately and vigorously.

Mr. WALSH. But from the standpoint of fair play, it does seem as though the man who has his property destroyed in the one case because of the danger of communicating disease should not be discriminated against in another case of destruction because of a similar danger, simply for the reason that his property is stationary and does not, perhaps, enter into interstate commerce.

Mr. FESS. I admit that from the standpoint of the individual there ought not to be a difference, but from the standpoint of public health there ought to be a vast difference.

Mr. LEVER. I think that is the view of the committee.

Mr. McFADDEN. Mr. Chairman, I rise in opposition to the amendment, to ask the chairman of the committee a question. This bill appropriates $1,000,000 to be expended in the city of Washington and elsewhere, and also provides for any balance from last year's appropriation. Can the gentleman tell us how much remains of last year's appropriation?

Mr. LEVER. Five hundred and eighty-one thousand two hundred and forty-eight dollars and twenty-eight cents.

Mr. McLAUGHLIN of Michigan. I move to strike out the last word, for the purpose of making a suggestion to the chairman of the committee. Line 20, page 86, authorizes the payment of claims growing out of past and future purchases and destruction of animals. Is it proper at this late day to authorize the Secretary of Agriculture to pay old and stale claims? The Secretary of Agriculture considered a great many claims, and I think settled every one; but under this language he would be authorized to reach away back into the years of the past and pay claims that might be presented. It seems to me that this bill, which provides for the future alone, ought to appropriate only for the payment for future purchases and destruction of animals in case a new outbreak arises.

Mr. LEVER. Let me make this suggestion to the gentleman from Michigan: This matter was not taken up by the committee. This language has been well worked out. As I said a moment ago, it carried us through the worst outbreak of foot-and-mouth disease that we have had. Does not the gentleman think it would be inadvisable to attempt to amend this language on the floor without pretty full consideration?

Mr. McLAUGHLIN of Michigan. If there is any doubt as to the effect of the change, I would say yes.

Mr. LEVER. I will say very frankly that I do not know whether there are any outstanding claims. I assume that there are not.

Mr. McLAUGHLIN of Michigan. I do not think there are any outstanding claims.

Mr. LEVER. I do not think so, either.

Mr. McLAUGHLIN of Michigan. But this leaves the door wide open.

Mr. LEVER. I think we had better leave the language as it is.

Mr. HAUGEN. What would the gentleman say to striking out the words "past and future"? Then the bill would read—claims growing out of purchases and destruction.

Mr. LEVER. Does the gentleman think that in a matter as delicate as this we ought to try to amend it on the floor of the House?

Mr. HAUGEN. I do not think it is very important.

Mr. LEVER. I wish the gentleman would not press it. We had better leave it as it is. It has been passed upon.

Mr. ANDERSON. In the time of the gentleman from Michigan I wish to ask the gentleman from South Carolina if he can state how much of last year's appropriation was expended for the foot-and-mouth disease?

Mr. LEVER. My recollection of the testimony before the committee is that about $17,000 was so expended.

Mr. ANDERSON. In looking over the report of the expenditures in the Department of Agriculture I found that something like $600,000 was allotted for the foot-and-mouth disease, and I was wondering what the balance of that $1,000,000 was allotted for and how it was spent—for these other contagious diseases?

Mr. LEVER. The clerk of the committee informs me that my recollection is correct. They spent $17,000 out of the fund last year for the eradication of the foot-and-mouth disease, and I think the balance went back to the Treasury.

Mr. ANDERSON. In looking over the expenditures of the department I find that they made an allotment of $600,000 and some odd for the foot-and-mouth disease. I do not know what the balance of the $1,000,000 was allotted for. What I wanted

to ascertain was whether any part of the million dollars was expended for the outbreak of other diseases.

Mr. GOOD. How much has been expended, all told, for eradicating the foot-and-mouth disease in the last outbreak?

Mr. LEVER. I can not tell the gentleman, but it has been several million dollars—quite a considerable sum. I think the first appropriation was $2,000,000, and since that we have been carrying a million dollars appropriation in the bill for several years, but not all of that has been expended.

Mr. SHALLENBERGER. Will the gentleman yield?

Mr. LEVER. Certainly.

Mr. SHALLENBERGER. Can this money be used to eradicate tuberculosis?

Mr. LEVER. The appropriation in this item?

Mr. SHALLENBERGER. Yes; it says "or other contagious or infectious diseases of animals which, in the opinion of the Secretary of Agriculture, threatens the live-stock industry of the country."

Mr. LEVER. This appropriation is for an emergency arising out of the existence of the foot-and-mouth disease, rinderpest, contagious pleuropneumonia—yes; I think so. I presume it might be used for tuberculosis.

The Clerk read as follows:

To make surveys to determine the actual distribution of the pink bollworm in Mexico and to exterminate local infestations in Mexico near the border of the United States, in cooperation with the Mexican Government or local Mexican authorities, $25,000.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on the paragraph. The bill appropriates all told $500,000 for the elimination of the pink bollworm. As I recall, we appropriated $250,000 in the last Congress——

Mr. LEVER. We appropriated $300,000—$250,000 in the deficiency act and $50,000 in the Agricultural appropriation bill.

Mr. STAFFORD. How much of that $300,000 has been expended up to the present time?

Mr. LEVER. About $175,000; or, in other words, the amount appropriated will have been used by June 30 of this year.

Mr. STAFFORD. What is the condition of the pest at the present time so far as the United States is concerned?

Mr. LEVER. The pink bollworm made its appearance at three places in Texas—Hearne, Beaumont, and the Trinity Bay neighborhood. The outbreak at Hearne was not very serious, and I assume from the testimony before the committee that that has practically been taken care of. They had only one infection.

The situation at Beaumont is not so certain, because the worm was found in the cotton seed and some of the cotton seed has been sent throughout the country and has been planted this year. In the Trinity Bay section the situation is still considered serious. The State of Texas has passed a law creating a cotton free zone, I think of about 50 or 75 miles in width, in the hope of preventing the spread of the pink bollworm. Someone asks what a free cotton zone is. It is a zone in which no cotton is permitted to be grown.

Mr. STAFFORD. Were any hearings had before the committee as to this item? I have searched the various pamphlets furnished me but was unable to locate the hearing on this item.

Mr. LEVER. Yes; it is in the statement of Dr. Marlatt, of the Federal Horticultural Board.

Mr. STAFFORD. I have read some of the hearings in regard to the cotton boll weevil and it was stated that the cold weather had resulted in keeping down the spread of that pest. Has the cold weather had a similar effect on the pink bollworm?

Mr. LEVER. The pink bollworm, as I understand it, is not affected by climatic conditions as much as the cotton boll weevil is. Another thing brought to the attention of the committee was that the pink worm is a very, very much more serious menace to the cotton industry of the United States than the boll weevil ever had time to be. Now, this amount of money carried here, $500,000, is to be used as set out in the bill. It was sent up to us in a lump sum and the committee, of its own initiative, segregated the items. The gentleman will notice that $400,000 of the $500,000 is really an insurance fund, which is on all fours with the item that we have passed for the foot-and-mouth disease. The other $100,000 will be used as set out in the bill.

Mr. STAFFORD. What is the logic of the gentleman's position that the pest be controlled, as indicated by him, and $125,000 available during the remainder of this year, already provided, and $400,000 deficiency appropriation under the guise of an insurance fund that may be utilized? If this pest becomes a menace to the cotton industry of the South, why can not they come before Congress, as they did last year, and receive the large appropriation awarded them by the Committee on Appropriations?

Mr. LEVER. The department estimated $800,000 for the work in a supplemental estimate sent in in the regular way. The committee considered the matter very carefully and I considered it very carefully myself. I concluded, and the committee agreed with me, that it should be reduced $300,000, and this, at my suggestion, was done. We concluded that $500,000 would be a sufficient fund to make us safe against the invasion of this worm. I felt this way about it: If we had had the foresight when the boll weevil was first introduced into this country to have taken vigorous, active measures against it, such as we are trying to do in this case, we might have saved the cotton situation. The fact about the matter is that the production of cotton has been decreasing year after year for the past four or five years. This past season's crop amounts to only about 11,000,000 bales, and that is not the world consumption of cotton; it is hardly two-thirds of the world consumption. Now, if we are to be invaded by another pest, which they say is worse than the boll weevil, I foresee that the cotton industry of this country is practically doomed.

Mr. STAFFORD. You change the language of the authorization from that carried in the prior acts so to permit the Department of Agriculture to go into Mexico and have surveys made either in collaboration or without collaboration of the Mexican Government and local authorities.

Mr. LEVER. Let me say to the gentleman on that point that I recognize what he has in mind. It is an unusual proposition and necessarily would require an explanation. The pink worm came into Mexico from Egypt about 1911. We discovered it in one or two Mexican localities in 1915 or 1916. It has been confined in Mexico to one or two small areas. The Laguna district is the largest area, and it affords a good situation for us to work upon, because the cotton planters of that district in a large measure are Americans and are large planters, willing to cooperate to the very limit. They have tendered to this Government 125 or 130 acres for experimental purposes. They are willing to clean up their seed and quarantine themselves, and do all that is necessary to try to wipe out this pest.

The other area in Mexico is nearer the Texas border, about 30 miles from Texas, and the infection is not so serious. Very little cotton is planted in that area. What we are trying to do is to make a drive on the seat of the trouble, which is the Laguna district in Mexico and the Trinity Bay district in Texas. If we can wipe the thing off the continent we are in pretty good shape to keep it out.

Mr. STAFFORD. Applying the logic of the gentleman's position, if we establish this as a precedent, we will be going into all countries of the world to stamp out such things as anthrax and all other pests that affect the commerce of this country.

Mr. LEVER. The answer to that is this. Here is a country, Mexico, which is torn by an internal war, which really has no very stable government. Revolution is sweeping back and forth over this very area.

Mr. STAFFORD. The same thing is true of Russia, as far as anthrax is concerned.

Mr. LEVER. Oh, I want to make my statement, for I am very earnest about this matter.

Mr. STAFFORD. So am I.

Mr. LEVER. Here is this country, a neighbor of Mexico, and here is a pest in Mexico within 30 miles of our border which absolutely threatens to destroy one of the greatest crops. Is it not wise for us to establish a precedent, which I hope we will be sensible enough not to follow except where absolutely necessary, under the most extraordinary circumstances—is it not wise for us, is it not good statesmanship for us to go down there and try to wipe out this thing, get at the seat of the trouble and completely eradicate it and relieve ourselves from the constant menace of this thing coming in from time to time?

Mr. GARNER. Mr. Chairman, if the gentleman will permit, I believe it is more economical in the long run to undertake to stamp this thing out in Mexico than it is to continue to fight it along the border.

Mr. STAFFORD. Following the logic of the gentleman's position, it is more economical to go to the source of all these pests, abroad or otherwise.

Mr. GARNER. This Congress will be appropriating for an indefinite period from year to year in order to keep this from coming into this country. It is a part of economy, in my judgment, to use the largest amount of money you can toward stamping this out of Mexico, so as not to have to appropriate in the future from year to year to keep it out of this country. I investigated the thing pretty closely when they were about to close up one-half of my district.

Mr. STAFFORD. I realize that last year the gentleman was energetic, and properly so, in trying to secure the $250,000 emergency appropriation. That has accomplished some good,

but that appropriation was limited in its effect to this country. If it has had its effect, why should we go to foreign realms and establish a precedent that may come back to plague us in the future?

Mr. GARNER. I just explained to the gentleman that in my judgment—of course it may not be very good—if we make this appropriation and make it available to fight this in Mexico, we will be able to save money in the future by keeping it out of this country from Mexico.

Mr. STAFFORD. If the gentleman will permit. Have not the present means been effective in suppressing, as far as it could, the pest in Texas?

Mr. GARNER. Indeed it has.

Mr. STAFFORD. What is the need of adopting new methods?

Mr. HEFLIN. Not yet.

Mr. GARNER. It is not entirely eliminated, of course.

Mr. HEFLIN. There are 5,000 acres now in Texas which has not been eradicated.

Mr. STAFFORD. That is because, maybe, of the limited time at disposal of the Government.

Mr. LEVER. If the gentleman from Wisconsin will permit——

Mr. BLANTON. Will the gentleman allow me a suggestion?

Mr. LEVER. If the gentleman will let me handle this——

Mr. BLANTON. I would like to add this suggestion: Along the border in certain places, for instance—the Rio Grande River is an imaginary stream, by the way—these eggs can be carried across by the wind. You can not control it. It may be brought across by Mexicans or Americans or by the wind, or in other ways, and you have to get at the source of this in order to stop it.

Mr. STAFFORD. As I understand from the statement of the chairman of the committee, the two localities where this pest is present in Mexico are not near the border, where the winds from the south can not carry it across the Texas border?

Mr. BLANTON. But it is coming over the border all the time.

Mr. LEVER. One infected place in Mexico is within 30 miles of the border and the other, the Laguna district, is about 150 miles.

Mr. SLAYDEN. Not the Texas border?

Mr. LEVER. I will ask the gentleman from Texas [Mr. SLAYDEN] how far it is from the Texas border.

Mr. SLAYDEN. About 200 miles.

Mr. LEVER. I got the impression in my mind it was a farther distance. Now, I want to appeal to the gentleman from Wisconsin. This worm does not travel very far of its own accord, but may be transported hundreds of miles, largely on account of being in the seed or in the lint. It is being transported from the Laguna district into the Texas district. It is carried most largely in the seed of cotton, in railroad cars, automobiles, and things of that kind. It can go a couple of hundred miles a day in a passenger coach, for instance.

Mr. MONDELL. Will the gentleman yield?

Mr. LEVER. I will.

Mr. MONDELL. Does the gentleman know how long this pink bollworm has been known in Mexico as an enemy to cotton; how long it has been operating there, and how extensively?

Mr. LEVER. My recollection is that it has been in Mexico since 1911, and it was discovered in the United States in 1916.

Mr. MONDELL. The gentleman does not know the origin of it as an enemy of cotton?

Mr. LEVER. It is an Egyptian pest; it came from Egypt.

Mr. STAFFORD. Why would it not meet conditions if this money should be continued in the phraseology of existing law——

Mr. LEVER. The gentleman means the sundry civil bill?

Mr. STAFFORD. We are going pretty far when we are going to consider local conditions in another country.

Mr. GARNER. Let me explain to the gentleman——

Mr. STAFFORD. Permit me to say this: If the pink bollworm was on the increase and the ravages were continuing, I think perhaps we might go to the experiment of going to a foreign country. Everything essential that is necessary I wish to do——

Mr. GARNER. I know that the gentleman does——

Mr. STAFFORD (continuing). In eradicating this pest, but I question whether we should go into a foreign country and disturb local conditions there to stamp out the pest there.

Mr. GARNER. Let me give you an illustration. These gentlemen who are undertaking to fight this pest probably know more about it, technically, than the gentleman from Wisconsin or myself.

Mr. STAFFORD. Naturally.

Mr. GARNER. Here is a border 600 or 700 miles long along this country in which cotton can be raised. There is not a great deal of it raised on the Mexican side at this time. Now, let us suppose this pest does spread in Mexico and it gets up and down the river for 600 miles, the change in the tide of the river and the flow of it would bring the pest to this side.

Mr. STAFFORD. The gentleman is supposing a case that does not exist.

Mr. GARNER. It undoubtedly will exist if it continues in Mexico. If it does it will come along the river and we will have to fight continuously to get anything on this floor.

Mr. STAFFORD. When that condition confronts us we will meet it, but it is now two or three hundred miles away from the border.

Mr. GARNER. I am trying to impress on the gentleman that when the condition develops it will cost us two or three times as much as now.

Mr. GILLETT. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. GILLETT. Will the Chair kindly state what is before the House? There has been an interlocutory conversation going on here for 30 minutes, which may be interesting to the gentlemen but not to the committee generally, and I make the point of order that the gentlemen are not in order.

Mr. STAFFORD. Mr. Chairman, I am not satisfied at the present time from the statement made that there is warrant for us going ahead to allow the Secretary of Agriculture to go into the business of revising and reforming conditions there.

A MEMBER. Mr. Chairman, the regular order.

Mr. STAFFORD. Mr. Chairman, I make the point of order on the paragraph. It changes existing law.

Mr. LEVER. Mr. Chairman, this item is fairly subject to a point of order, in my judgment, and I am not going to argue a position I can not sustain.

The CHAIRMAN. The point of order is sustained.

Mr. LEVER. Mr. Chairman, I offer an amendment in lieu of the paragraph stricken out.

The CHAIRMAN. The gentleman from South Carolina offers an amendment, which the Clerk will report.

The Clerk read as follows:

In lieu of the paragraph stricken out on the point of order insert the following:

"On account of the menace to cotton culture in the United States arising from the existence of the pink bollworm in Mexico, the Secretary of Agriculture, in order to prevent the establishment and spread of such worm in Texas and other parts of the United States, is authorized to make surveys and determine its actual distribution in Mexico; to establish, in cooperation with the States concerned, a zone or zones free from cotton culture on or near the border of any State or States adjacent to Mexico; and to cooperate with the Mexican Government or local Mexican authorities in the extermination of the local infestations near the border of the United States. For rent outside of the District of Columbia and for the employment of such persons in the city of Washington and elsewhere as the Secretary of Agriculture may deem necessary, $500,000."

Mr. LEVER. That is identical with the language in the act.

Mr. STAFFORD. I understand the amendment is the same as in this bill?

Mr. LEVER. Yes.

Mr. STAFFORD. Under the phraseology I admit the department has the right to conduct surveys in Mexico.

Mr. LEVER. Yes.

Mr. McLAUGHLIN of Michigan. In carrying on any of its operations as to extermination in Mexico.

Mr. LEVER. I am inclined to think the department is exercising the power now to cooperate in exterminating this insect, under this language, in Mexico. I will be very frank with the committee.

Mr. McLAUGHLIN of Michigan. I will say that in many of these matters we have to rely on the Secretary. And if it is true even in a small part, as he tells us it is, it will be very well for us to stamp it out in Mexico right along the border. I hope the gentleman from Wisconsin will not object to the use of a little money in Mexico.

Mr. MONDELL. Mr. Chairman, I desire to speak on the amendment.

Mr. LEVER. Will the gentleman from Wyoming excuse me just a moment? Mr. Chairman, I understand that the parliamentary situation is this, That all of the language of the bill relating to the pink bollworm went out on the point of order made by the gentleman from Wisconsin.

The CHAIRMAN. The Chair, as soon as the gentleman from Wyoming had concluded, was going to ask the extent to which the gentleman from Wisconsin wanted his point of order to apply. The principle of it not only includes the language on page 88, but down as far as line 10 on page 89.

Mr. LEVER. I assume if any part of this item is sustained it will carry out the balance of the item.

The CHAIRMAN. The Chair would rule that way.

Mr. MONDELL. Mr. Chairman, I believe the appropriation should be made. I think there is a condition warranting the

appropriation of a large sum of money to be used as necessary and when necessary, in view of a situation in which it seems altogether probable that we may be able to entirely stamp out an insect pest which is a very great menace to a very great industry. It is very clear that the item will in some form go in the bill. The money will be appropriated. It ought to be appropriated and used in the way in which the item was segregated by the Committee on Agriculture. That is the proper form, and in view of that fact I want to appeal to the gentleman from Wisconsin [Mr. STAFFORD] to withdraw his point of order and allow the item to go in as the committee segregated it and in the form in which it, the committee, wisely approved it. There is certainly nothing gained by striking out the language of the committee, drawn after careful consideration, and then making the same appropriation in a different form and in a form which does not give the department that free hand in the extermination of the pest which it ought to have in order to be effective.

If we are to attempt to stamp out this pest, let us go where it is, whether it be in Mexico or in the United States, and do the work. We might spend millions on our side of the line and never get anywhere, whereas the expenditure of a few thousand dollars on the Mexican side might accomplish all we seek to accomplish.

I hope the gentleman will withdraw his point of order.

Mr. MOORE of Pennsylvania. Mr. Chairman, does the gentleman from Wisconsin intend to act on the suggestion of the gentleman from Wyoming [Mr. MONDELL]? If not, I move to strike out the last word. I want to get some information on this subject.

The CHAIRMAN. The gentleman from Pennsylvania moves to strike out the last word.

Mr. MOORE of Pennsylvania. Mr. Chairman, if this appropriation became effective, as intended in the bill, there would be one, two, three, or four methods of expenditure. First, there would be an expenditure of $50,000 to prevent the removal of cotton and cotton seed from Mexico into the United States.

Mr. LEVER. That is quarantine work.

Mr. MOORE of Pennsylvania. I assume that money would go for the employment of men, would it not?

Mr. LEVER. It would go for disinfecting cars and seeing to it that there were no worms in the seed or in the lint.

Mr. MOORE of Pennsylvania. It would not be for material, but for the services of individuals?

Mr. LEVER. Entirely.

Mr. MOORE of Pennsylvania. The next item, if the plan here is carried out, no matter how the Secretary gets the money, is for $25,000 to make surveys to determine the actual distribution of the pink worm in Mexico. That means the employment of individuals, does it?

Mr. LEVER. Yes; the employment of individuals.

Mr. MOORE of Pennsylvania. Twenty-five thousand dollars for that.

Mr. LEVER. We think the infection, or the pest, is confined to two districts in Mexico. It may be possible that he is somewhere else, but what we want to do is to get him on this continent.

Mr. MOORE of Pennsylvania. I want to find out how the money is to be spent. The next item is for $25,000 to investigate the pink worm in Mexico and elsewhere. That means the employment of more men?

Mr. LEVER. That means the employment of half a dozen experts to work in cooperation with the farmers in the Laguna district.

Mr. MOORE of Pennsylvania. That makes a total appropriation thus far of $100,000. The next item is an important one. It provides $400,000 to conduct surveys and inspections in Texas, or in any State where the pest may appear. Does that go wholly for the employment of individuals?

Mr. LEVER. It is very largely for the employment of individuals. The method they adopted in the Trinity Bay district was to go into a cotton field and pull up the cotton by the roots and cut it down and pile it up and pour kerosene on it and burn it up and absolutely get rid of it.

Mr. MOORE of Pennsylvania. Will there be any instruction of farmers in connection with this? That might be what is called "survey work"?

Mr. LEVER. I think the Secretary would stretch his authority if he attempted to do that under this item.

Mr. MOORE of Pennsylvania. The plan is for the expenditure, in all, of $500,000 for the employment of individuals in various ways in Texas and Mexico?

Mr. LEVER. I will say to the gentleman that our hope is that practically the only expenditure that will be made will be a portion of the $100,000 appropriation. We hope that it will not be necessary to encroach upon the $400,000 fund, because we hope to keep this worm out of Texas.

Mr. MOORE of Pennsylvania. I hope that will be done.

Mr. LEVER. And if so, we could not expend any more.

Mr. MOORE of Pennsylvania. Texas is a very large State. We will concede that. But the expenditure of $500,000 for this purpose means the employment—if you wanted to figure it out this way—of 100 men at $5,000 per year, or 200 men at $2,500 a year, or 250 men at $2,000 a year, or 500 men at $1,000 a year; or, if these men were employed merely for the purpose of pulling up cotton plants it would mean that if you paid $500 per annum you could employ a thousand men for this work.

Mr. LEVER. The fact is you would not have to employ many men on a per annum salary. You would only employ these men when you found an infestation somewhere, and probably a large number of laborers in the community—farmers and farmers' boys, white and black—who could go into a field and pull up the cotton stalks and pile them up and pour kerosene on them and put a match to it. Of course, you would have to have some experts in the crowd.

Mr. MOORE of Pennsylvania. That is what I want to get at. I would like to know the number of experts and lecturers who may use up this $500,000. If it is for common labor, such as the gentleman has described, I would not have much objection to it; but it seems to me we ought to stop employing so many of these "lecturers" at good salaries to tour the country.

Mr. LEVER. I agree with the gentleman fully on that. Let me say this: I believe I try to be frank with this committee——

Mr. MOORE of Pennsylvania. The gentleman always is.

Mr. LEVER. I take it that the very nature of this work would preclude the necessity of employing any very large number of experts, that the larger portion of this money, if it is used at all, would be used in payment of these day laborers in the community where the outbreak took place.

Mr. MOORE of Pennsylvania. Does Texas offer to cooperate in any way?

Mr. LEVER. I will ask my colleague on the committee [Mr. YOUNG of Texas] to answer that.

Mr. MOORE of Pennsylvania. It is apparently a Texas proposition, for the present.

Mr. LEVER. Let me answer that suggestion. I want to say, as pointed out so strongly by the gentleman from Texas [Mr. YOUNG] the other day, this cotton proposition is not a sectional proposition any more than the cattle proposition is a sectional one. For some reason or another—God in His providence knows more about that than we do—we are all dependent upon a certain number of States for the cotton production of this world, and especially for the cotton production of this country. Now, here is a worm which the entomologists tell us is the most destructive pest that has ever threatened the cotton industry. The query is, Are we going to fight that vigorously in the interest of all the Nation, or not? It is going to take money. I appreciate that. But if we had spent $500,000 at the outbreak of the boll weevil in Texas and had adopted the drastic remedies that we are proposing here, both through the State of Texas—which is cooperating nicely—and the Federal Government, we probably would have saved the cotton situation in the South.

Mr. MOORE of Pennsylvania. This pink worm is of Egyptian origin, as I understand.

Mr. LEVER. Yes; it is found in Egypt, the Hawaiian Islands, the Philippine Islands, and, I think, in Brazil and in Mexico.

Mr. MOORE of Pennsylvania. There was a movement some years ago in the East to prevent the importation of certain Egyptian cotton, due to the prevalence of this pink worm in Egypt. We have an interest in this matter.

Mr. LEVER. That is right, and we carry an appropriation in this bill for that purpose; and they have a concern in Boston where they put cotton seed coming from Egypt under very high pressure to kill the worm.

Mr. MOORE of Pennsylvania. If this bill passes, will the Secretary of Agriculture have authority to prevent the invasion of this country at other points than Texas?

Mr. LEVER. Oh, yes; undoubtedly.

Mr. HEFLIN. If the gentleman from Pennsylvania [Mr. MOORE] will permit me, I will state that this pink bollworm is in three cotton districts in Mexico. In one of the cotton districts in Mexico he reduced the cotton yield one-third in one year, and he has made it impossible to grow cotton in the Hawaiian Islands. He is the most dangerous pest that ever came into our country and I trust that the gentleman from Wis-

consin will withdraw his point of order and let this provision become a law as soon as possible. With this appropriation of $500,000 we hope to prevent the spread of the pink bollworm in the cotton belt of the United States. Help us to destroy this terrible pest.

Mr. PAIGE. I move to strike out the last word. As a cotton manufacturer I want to say that I believe this is the best item in this Agricultural bill. I agree fully with the gentleman from Wyoming [Mr. MONDELL], and I trust that if it is not too late the gentleman from Wisconsin [Mr. STAFFORD] will withdraw the point of order. [Applause.]

Mr. YOUNG of Texas. The gentleman from Pennsylvania [Mr. MOORE] asked a question as to what Texas has done or contemplates doing with reference to the elimination of this pest that threatens the cotton industry of the country. Let me give just a little history. So far as Texas is concerned, we did not know there was such a pest until last year. This pest came across the border from Mexico—from the Laguna district and from the district just across from Del Rio. It was discovered in Texas during the crop-growing season of the past year. Prior to the discovery of this worm it was not unlawful for cotton seed to be shipped out of Mexico up into Texas or anywhere else in the cotton belt, for the purpose of crushing the seed. So last year some 12 or 14 cotton mills in Texas purchased cotton seed in Mexico and brought it over on the Texas side to be crushed by these oil-mills. It was a legitimate business. It was discovered that in the shipments of seed this pink bollworm was being brought into Texas. Now, what happened? Some of this seed went to the mill at Beaumont, Tex.; some went to Houston, Tex.; and some went to Galveston, Tex. That is down near the border line of Mexico; but two shipments of that came to the northeast Texas, and 12 carloads came into my own town in northeast Texas to be pressed. Immediately upon the discovery of the fact that this seed was coming from infested districts quarantine regulations were made, and no seeds can be shipped out of Mexico into Texas or any other part of the United States now.

What did the Government do? The Government followed the history of the shipments of this seed. They went to the vicinity of each oil mill that purchased this seed and found out whether or not these oil-mill people had sold any of this seed for planting in their vicinity. In my own town, across the street where I live, my brother-in-law planted eight acres of cotton from these seeds. During the growing of the crop there would come a stranger, an agent of the Government, who would go through the patch examining stalk after stalk of the cotton. Nobody knew what his purpose was until late in the season, when it developed that he had found that the cotton-oil mill people in that town had sold this seed to my brother-in-law, who planted this patch. He was examining to see whether the insect reproduced itself in the crop. That is what was done all over Texas in the vicinity of these oil mills where the seed had been shipped.

What was the result as finally obtained? In the field in the vicinity of Hearne, where the seed had been pressed that had come out of Mexico, they discovered one infestation. That is below the central part of the State. There was one local infestation. The greatest infestation was around Beaumont and Trinity Bay section of the country between Beaumont and Galveston, where there was a general infestation.

But you must understand that that section of Texas is not the cotton-growing section of Texas. It has only little patches, little farms; whereas when you get to the central and northern part of the State the whole country is one great cotton plantation. So we did not find as big a problem to deal with in the lower section of Texas as we would have if it had struck the black-land section where you will find as much as a thousand acres in one field of cotton.

Now, when they discovered this infestation at Hearne they destroyed the field. The localities contributed and paid the man whose field was destroyed. The Government did not do it. The Government agents discovered the insect and labor was employed and the field destroyed. They are destroying the stalk, the matter on which they live, in the Trinity Bay section and the Beaumont section. That is the only way we know how to do it—destroy the cotton stalk on which the insect lives. The fly, from which the weevil comes—you gentlemen have all seen the little canned fly, the pink weevil comes from a similar one—deposits the eggs on the little boll, and when the eggs hatch the insect goes into the boll and destroys it. They live on nothing but cotton.

Now, as to the destruction of the cotton, I am here to say that I know of one county in my district where the insect has not come but where the boll weevil has come. It attacks the square and the square falls and children have gone into these fields—merchants have put up notices offering prizes—children have gone into these fields and collected these little squares by the multiple of thousands and have taken them in and got their reward. Then they burn these squares that contain the eggs of the insect that will destroy the crop.

Now, what has Texas done? The legislature was in session at the time this Hearne farm infestation was found.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. WALSH. Mr. Chairman, I ask unanimous consent that the gentleman may proceed for five minutes.

Mr. STAFFORD. Will the gentleman permit me to make a statement?

Mr. YOUNG of Texas. Certainly.

Mr. STAFFORD. Mr. Chairman, after conferring with gentlemen on the committee about the phraseology of the amendment as carried in the bill and considering the form of the pending amendment, as I was not so fully aware when I made the point of order of the phraseology of the authorization of last year, the only difference is that the department will be limited in going to Mexico to that district near the border, whereas under the paragraph in the bill they can go anywhere. I will say that my making the point of order was under some misunderstanding of the present law, and therefore I withdraw it. [Applause.] The gentleman from South Carolina can offer the phraseology that is contained in the bill as a substitute to the pending amendment and thus, I suppose, will accomplish what he had in mind.

Mr. LEVER. Mr. Chairman, I thank the gentleman from Wisconsin [Mr. STAFFORD] for that suggestion and for his fairness in this matter, and I ask unanimous consent to withdraw the amendment which I offered, so that the original matter of the bill may be incorporated.

The CHAIRMAN. The gentleman from Wisconsin withdraws his point of order, and the gentleman from South Carolina asks unanimous consent to withdraw the amendment which he has offered. Is there objection? [After a pause.] The Chair hears none. The gentleman from South Carolina now asks unanimous consent that the matter heretofore stricken out of the bill on a point of order may be considered and reinserted as a part of the bill. Is there objection?

There was no objection.

The CHAIRMAN. The bill now stands as it was before the point of order was made.

Mr. STAFFORD. Mr. Chairman, as the first paragraph alone was read, is it not advisable to read all of the paragraphs and have them all considered as one?

The CHAIRMAN. The Chair will order that that be done. The bill now stands as it was before the gentleman made his point of order.

Mr. WALSH. Mr. Chairman, I submitted a request that the gentleman from Texas might be allowed to proceed for five minutes more.

The CHAIRMAN. The Chair will put that request now. The gentleman from Massachusetts asks unanimous consent that the gentleman from Texas may have an additional five minutes. Is there objection?

There was no objection.

Mr. LEVER. Mr. Chairman, I suggest that it would be better, first, to read the items in the bill.

The CHAIRMAN. The Clerk will read the balance of the paragraph.

The Clerk read as follows:

To prevent the movement of cotton and cotton seed from Mexico into the United States, including the regulation of the entry into the United States of railway cars and other vehicles, and freight, express, baggage, or other materials from Mexico, and the inspection, cleaning, and disinfection thereof, $50,000.

To make surveys to determine the actual distribution of the pink bollworm in Mexico and to exterminate local infestations in Mexico near the border of the United States, in cooperation with the Mexican Government or local Mexican authorities, $25,000

To investigate in Mexico or elsewhere the pink bollworm as a basis for control measures, $25,000.

To conduct surveys and inspections in Texas or in any other State to detect any infestation and to conduct such control measures, including the establishment of cotton-free areas, in cooperation with the State of Texas or other States concerned, as may be necessary to stamp out such infestation, to establish in cooperation with the States concerned a zone or zones free from cotton culture on or near the border of any State or States adjacent to Mexico, and to cooperate with the Mexican Government or local Mexican authorities, or otherwise, by undertaking in Mexico such measures for the extermination of the pink bollworm of cotton as shall be determined to be practicable from surveys showing its distribution, $400,000: *Provided*, That no part of the money herein appropriated shall be used to pay the cost or value of crops or other property injured or destroyed.

Mr. YOUNG of Texas. Mr. Chairman, the question was asked, What has Texas done? The legislature was in session when this discovery was made. We did not know how serious it was—nobody did. The legislature immediately appropriated $10,000, but they did something better than the appropriation.

The legislature passed a law by which the matter could be handled, and but for the enactment of that statute we would have been without authority to handle it. That law provided a certain quarantine regulation, very drastic, and under that statute the governor of our State only a few days ago, exercising the authority given him by the statute, threw a quarantine district around every section of the infested part of the State, making it broad enough so that where this insect has been discovered no man can plant or grow one stalk of cotton this coming year, and by doing that, stamping it out in that way. Having no new cotton planted in that territory, there is nothing on which the insect can breed or thrive. By the exercise of this power we believe that this insect will be driven out of existence during the present year, and with this appropriation I believe that we can do what was done in Florida with the appropriation that you gave for the protection of the citrus-fruit industry. I believe that we can wipe out the insect in one year's time. Texas heretofore has grown from four to four and a half million bales of cotton to go forth and clothe the world, although this year only three million bales. With this appropriation, I feel that this industry will not be wiped out, and that that great State may still continue to give to civilization that which goes to bless humanity. [Applause.]

Mr. CANDLER of Mississippi. Mr. Chairman, I want to call the attention of the House to the following statement by D. R. Coad, United States Bureau of Entomology, Delta Laboratory, Tallulah, La. This statement gives a short history of this pink bollworm and demonstrates what a destructive pest it is, and, therefore, the necessity for the appropriation provided for in this bill. Here is the statement, and I hope the House will give it full consideration:

The cotton industry in the United States to-day faces one of the greatest menaces with which any agricultural industry has ever been threatened, a menace which threatens its very existence. This is the establishment within our cotton belt of the famous or, more properly, infamous pink bollworm of cotton. We have long been threatened with the introduction of this pest from Asiatic and African countries. Later it was discovered in the cotton fields of our immediate neighbor, Mexico. Now it has been found in the fields of our own cotton belt. Its establishment there and spread over this country must be prevented. My purpose here is to tell you something of what steps are being taken to accomplish this end and to describe something of the problem before the men intrusted with this important task. Before dealing with this phase of the question, however, I wish to outline briefly something of the characteristics and injury of this pest as well as its history in other countries.

The pink bollworm resembles the boll weevil in that it passes through several different forms in the course of its life cycle. However, instead of producing a weevil in the adult stage, as is the case with the old familiar enemy, a moth or "miller" is developed. This moth lays the eggs, which hatch and produce the larvæ or grubs. These develop into a quiescent stage, called the pupa, and this in turn produces the moth, which starts the cycle off again. As is the case with the boll weevil, the pink bollworm accomplishes its damage in the larval or grub stage. The moth deposits the eggs on the cotton boll or square, and as soon as the young worms hatch they bore into the interior of the form, where they feed in much the same manner as the larva of the boll weevil. However, there is this important difference: The boll weevil prefers the squares and attacks the bolls only when necessary, while the pink bollworm reverses this order and, whenever possible, selects large, well-developed bolls for its attack. Incidentally the difficulties which would accompany cotton production in the presence of both these pests may readily be imagined, since one would specialize on the squares and the other on the bolls. Instead of being competitors, they would be allies in the battle against the farmer.

ATTACKS IMMATURE SEED.

The larval period during the summer lasts from 20 to 30 days, during which time it continues to travel through the cotton form, and when in the bolls it usually concentrates its attack on the immature seed. It then pupates, and the adult moth soon emerges. The normal life cycle or period from egg to egg is ordinarily from 35 to 50 days during the summer. Thus this pest may produce from four to six overlapping generations in the course of the season. The last brood in the fall, instead of producing adult moths, forms a cell inside the hull of the cotton seed, which it has hollowed out, or, in many cases, fastens two hulls together and remains in the cell between them. In this manner the worm passes the winter and is ready to produce a moth in the spring. However, it has been shown that in case of necessity the worm can remain alive in this cell for several years.

The actual injury of the pink bollworm to the cotton crop is in part precisely the same as that of the boll weevil. The feeding of the worms causes the bolls and squares to fall to the ground in many cases and frequently as much as 50 per cent of the crop of an infested field is lost in this manner. This by no means ends the injury, however, as wherever a single worm attacks a large boll and confines its attention to a single lock it forces the premature opening of the boll, thus greatly injuring the fiber of the uninfested locks. In addition, the inclusion of the infested locks in a bale produces a stained cotton, which is severely penalized in classing. The seed-feeding habit of the worm also causes great loss. The oil yield of the seed is reduced by several per cent and the germination is so seriously injured that it is frequently necessary to plant double the ordinary amount in order to secure a stand.

The methods of dissemination of this insect are, of course, of great importance. Flight, the method by which the boll weevil spreads from State to State, is of very slight importance, as the adult moth is a very weak flyer and has a decided tendency to stay under cover as much as possible. By far the most important method of spreading is in the seed. As I have already mentioned, the worms seal themselves up within the seed in the fall to spend the winter. These seed cells go through the gins uninjured and wherever these seed are transported the moths will emerge in the spring and seek cotton. Consequently cotton seed or anything containing cotton seed moved from infested to noninfested territory is exceedingly likely to carry the infection. Some years back when the danger of importing this pest into this country was first considered a study was made of the baled cotton lint coming to our mills from Egypt. This cotton was roller ginned, and it was found that some seed passed around the ends of the rollers and others slipped through damaged rollers, so that the baled lint contained a considerable number of seed. These seed were found to frequently contain live pink bollworms. Calculations based on the examination of 37 bales showed that we were importing 16,000 live pink bollworms annually, and in the ordinary distribution of this cotton about 300 of these worms would go to the southern mills located within the zone of cotton cultivation. This very grave danger was eliminated by a system of quarantine, which I will discuss a little later.

IS WIDELY DISTRIBUTED.

This pest is now so widely distributed over the globe that it is difficult to determine its original home, but all indications are that it was a native of Africa. From there it has been distributed so that it is now present in all cotton-raising countries of Asia, including India, Japan, China, and others. In Africa it is found in all cotton-raising countries, including Egypt. It was introduced on the American Continents in both Brazil and Mexico. In many of these countries it is difficult to secure accurate estimates as to the damage, but all reports are unanimous in that the loss is very great. In Hawaii the pest forced the abandonment of cotton cultivation. In Egypt the minimum yearly loss is estimated at 10 per cent of the value of the crop, and the normal damage is much greater than this. In India the minimum annual loss is placed at more than $10,000,000. Further information on the depredations of this pest being received from time to time indicate that there is hardly any limit except the cotton crop itself to the extent of its damage.

As exemplifying the manner in which this pest may be introduced and spread, I wish to describe the importation into Brazil and Mexico. With the very laudable view of improving the staple of their cotton, the Brazilian Government in 1913 and again in 1914 imported considerable quantities of planting seed from Egypt. These seed were distributed widely throughout Brazil, and it was found in 1915 that this had resulted in the establishment of pink bollworm in all cotton-growing regions of the country. It would be difficult to devise a more thorough and effective method of distribution for the pest. In 1916 these worms caused as high as 50 per cent loss in production at many points. The ultimate effect of this importation on the cotton industry in Brazil remains to be seen, but the best that can be hoped is a permanent decrease of the crop which may easily result in making cotton production unprofitable in that country.

FROM EGYPT TO MEXICO.

The introduction into Mexico was produced in much the same manner. In 1912 a supply of Egyptian seed was imported and planted near Monterey. This produced such a good crop that there was a great demand for the seed the following year, and they were planted throughout the entire Laguna district, which is the principal cotton-producing section of Mexico. Some time before this importation representatives of our Department of Agriculture had visited the Mexican cotton-growing sections and had found that Mexico at that time possessed no cotton pests which we did not have. In view of this and the fact that cotton cultivation in Mexico and in the United States is practically continuous at several points along the border the quarantine regulations against Mexican cotton were not nearly so stringent as those against other countries. In 1916 permits were requested for the importation of a large amount of Mexican seed. Owing to rebel activities, the Mexican oil mills had discontinued operations and the seed from three crops had accumulated. In order to realize on this stock of seed they were offered to Texas mills at very low prices. In all, 467 carloads of these seed from the interior of Mexico were admitted into this country, and these were distributed to 10 Texas mills distributed throughout the State. Shortly after this the pink bollworm was discovered in Mexico. Immediately all further importation of seed was stopped and all seed which had crossed the border was traced to the mills receiving them. Conditions at each mill were studied very carefully, with the view of determining the possibility of infestation of adjacent cotton, and it was deemed advisable to organize a force of scouts to watch the cotton surrounding these mills throughout the season. This work was undertaken by the Federal Horticultural Board, under the charge of Dr. W. W. Hunter, and has been continued by that office in cooperation with the Texas State agricultural departments throughout the subsequent developments. A force of inspectors was organized and all cotton which seemed in any danger of infestation was examined once a week throughout the season of 1917. All inspections were negative until on September 8, 1917, at which time a live pink bollworm was found in the field Hearne. Immediately a force of 25 entomologists were assembled at this point and all fields in the neighborhood were most thoroughly examined. Traces of the worm were found in four or five fields and the worm itself was found in two fields.

About 500 laborers were assembled immediately and these were put to the task of completely cleaning up all the cotton fields within the zone of infestation. For this purpose the plants were first cut down and then gathered and piled. The fields were then raked and, as a final measure, laborers were sent down every row on their hands and knees picking up every scrap of cotton plant remaining on the ground. All of this material was saturated with oil and burned. Seed cotton gathered from the fields was treated in a like manner and every effort was made to completely destroy everything which stood the slightest chance of harboring a pink bollworm. In all, 105 acres were treated in this manner at Hearne. The cotton and cotton seed which had been shipped from this district was traced up and its disposal was very carefully supervised.

BEAUMONT FINDS INFESTATION.

Following this, the examinations at other points were continued and in a very short time an infestation near Beaumont was reported. Investigation in that neighborhood showed that there were in reality two distinct infestations present. The Beaumont oil mill had received 184 cars of the Mexican seed and it was found that these were responsible for the infestation of a considerable number of the fields in that vicinity which were planted with seed secured from the Beaumont mill. In addition, however, a much larger infestation which was apparently of some years' standing was found southwest of Beaumont, extending practically around Trinity Bay. This infestation was traced as rapidly as possible and was soon found to include parts of five counties in the neighborhood of Galveston, Houston, and Beaumont. The infestation in the district around the Beaumont oil mill was found to be very light,

but the other infestation proved to be very heavy in spots. Considerable attention was devoted to tracing the origin of this second infestation, and it was finally determined to be very probably due to cotton blown ashore during the hurricane of 1915. At that time a considerable number of bales of cotton imported from the Laguna district of Mexico were on the docks at Galveston. These were blown off the docks and northward onto the shores of Trinity Bay. They were later salvaged from where they had been deposited by the tide and in order to get them out through the marshy ground the bales were broken open. Undoubtedly a considerable amount of cotton was left and the worms contained in this produced an infestation which persisted during 1916 without discovery.

A large force of both entomologists and laborers were assembled at Beaumont and started immediately on the task of cleaning up these infested fields as had been done at Hearne. Large forces of laborers were organized and furnished with complete camp outfits. Motor trucks were provided and the most thorough possible campaign of extermination was inaugurated. In all approximately 3,000 acres were found to be infested, and of this something over 2,300 acres has been cleaned up to date. Work is progressing on the remainder as rapidly as possible. All cotton originating in these fields is being traced and effective measures are being taken for its safe disposal.

EMBARGO AGAINST MEXICO.

Beginning in 1912 quarantine measures aiming at the prevention of the introduction of the pink boll worm into this country were instituted. At first these consisted of quarantines against the importation of seed from all countries except Mexico. Then the discovery of worms in Egyptian bales was made and the importation of these bales was prohibited. Experiments soon showed that by a new system of fumigation in a partial vacuum it was possible to kill the worms within the bales. Since that time large fumigating plants have been erected at the principal ports of entry and now all foreign lint entering this country is passed through the vacuum fumigation processes under Federal supervision. Following the discovery of the pink boll worm in Mexico the importation of Mexican cotton was absolutely prohibited. In addition, quarantines were promulgated providing for the inspection and fumigation of almost everything entering this country from Mexico except the natives themselves. All cars, regardless of their contents, are inspected, and since many of them contain old cotton seed from previous shipments they are carefully fumigated. The contents, whenever in the least suspicious, are treated in a like manner, and every step which can possibly be taken to prevent any chance of introduction is very carefully carried out.

On December 28, 1917, a Texas law became effective giving most drastic powers of quarantine. Among other things the governor is authorized to prohibit the planting of cotton at any point along the Texan border which appears subject to infestation from Mexico. In addition, this law provides for the prohibiting of cotton cultivation around any areas in Texas found to be infested with the boll worm. This power will be utilized and the districts around Hearne and Beaumont will be declared cotton free for the next three years. In this connection the Federal and State agents are doing all possible in advising and instructing the farmers in the use of substitute crops. In addition, all quarantines which I have mentioned will be strictly enforced and additional zones promulgated as may be necessary. The work of scouting at all suspected points will also be continued most vigorously.

Mr. JOHNSON of Washington. Mr. Chairman, I ask unanimous consent to return to page 45 for the purpose of submitting an amendment.

The CHAIRMAN. The gentleman from Washington asks unanimous consent to return to page 45 for the purpose of submitting an amendment. Is there objection?

Mr. STAFFORD. Mr. Chairman, reserving the right to object, let it be read first for information.

The CHAIRMAN. The Clerk will report the amendment for information.

The Clerk read as follows:

Page 45, add a new paragraph after line 11, as follows:

"That during the existing state of war the Secretary of War is authorized to make sales, without advertisement, at a fair valuation, to be determined by him, of national forest timber to be used, so far as suitable, for the construction of aeroplanes."

Mr. JOHNSON of Washington. Mr. Chairman, I have eliminated from the amendment proposed a day or two ago all of the contentious matter, leaving the amendment to cover the actual necessities. I think I can convince the membership of the advisability of this by referring to a statement from the office of the Signal Officer of the United States Army, dated December 1, in which he calls upon the North Pacific country to furnish twice the amount of spruce for aeroplane stock that was being furnished at that time.

Mr. STAFFORD. I do not know whether there is any objection by anybody else, but there is no objection on my part.

Mr. NORTON. Reserving the right to object——

Mr. WINGO. Will the gentleman yield for a question?

Mr. JOHNSON of Washington. Certainly.

Mr. WINGO. As I gathered from the reading of the gentleman's amendment, there is no provision to take care of the question which the gentleman from Michigan [Mr. FORDNEY] raised yesterday.

Mr. JOHNSON of Washington. I am afraid that can not be done at this time. If the gentleman will remember, the amendment as offered heretofore carried two new legislative provisions, one of which opened up a way through which the War Department could go into the forest reserve and take timber without charge, use part, and sell the remainder. The Navy Department has the right to take without charge forest-reserve timber, the railroad engineering building in Alaska has that right, the Reclamation Service has that right, but the War Department has not. But, Mr. Chairman, I realize that I had too much new legislation in one item offered as a paragraph of an appropriation bill. So in eliminating the War Department free-gift provision I had, of course, to cut out the War Department sales provision. I have reduced the amendment to the first and immediate necessity. While the Army appropriation bill is being considered in committee I hope to see adopted a paragraph giving the War Department the right to forest-reserve products; also to permit the War Department to cut and sell timber on certain military reservations. My present amendment does only one thing; it provides that the advertising requirement be suspended, so that men can go into the forest reserves and bring out pieces of spruce.

Mr. WINGO. Does the gentleman's amendment authorize the Secretary of War to go ahead and sell the waste timber after the heart timber has been taken out of the tree for aeroplane stock?

Mr. JOHNSON of Washington. No; that phase is not now touched. The War Department will pay its price per thousand in the tree, and the Agricultural Department, through its Forestry Bureau, will receive that money. Whoever rives out the log will get the prices offered by the War Department for spruce pieces and the bonus as well.

The CHAIRMAN. The question is on the amendment.

The question was taken, and the amendment was agreed to.

Mr. MONDELL. Mr. Chairman, a point of order was reserved by the chairman of the committee on an amendment I offered on page 16, an amendment to the meat-inspection item. The proposed amendment increases the appropriation for meat inspection by $100,000, that sum to be used for the inspection of horses and horse meat for export. I desire to ask the gentleman from South Carolina if he intends to insist upon the point of order?

Mr. LEVER. Mr. Chairman, I took that matter up with the Secretary of Agriculture, and he informs me that he has had the matter up with Mr. Hoover, of the Food Administration, and that they have found there is no demand for horse meat in this country and little, if any, in foreign countries with which we are allied in this war. Personally, I think it is bad legislation psychologically for us to write in the bill any suggestion relative to horse meat, and I feel I must make the point of order, and I do make the point of order.

Mr. MONDELL. Mr. Chairman, this matter came up through the desire of certain horse growers in the West to find a market for their product, and the desire of others who have viewed with alarm the growing shortage in meats for export to utilize for export meats such as certain people of Europe have been accustomed to use. The State Department has had the question up with some of the European governments as to whether or not a certain amount of horse meat could be used in the countries of the allies where the people have been accustomed to the use of such meat. I am inclined to think that those negotiations have not come to a conclusion; that is my latest information. I think it is quite probable that our allies, some of them, may conclude that they can relieve the situation in regard to meat by the utilization of the meat of some of our horses not suitable for other purposes, but the item is clearly subject to the point of order, and therefore if the gentleman insists upon it the amendment goes out. I regret that he does insist on it, because I think that a condition may arise under which the State Department, even the Food Administration, may desire to have such meats inspected for export to the civilian populations of the territory of some of our allies who are unable to secure other meats. The gentleman seems to think that psychologically it is not wise. I yield to his psychological objection.

Mr. LEVER. I make the point of order, Mr. Chairman.

The CHAIRMAN. The point of order is sustained.

Mr. RUBEY. Mr. Chairman, a few days ago we had authority to return to an item on page 45, the paragraph beginning line 12 to 17, which went out on a point of order. At that time I offered an amendment, but at the time we had the item up for discussion the gentleman from Michigan offered an amendment, and I have embodied his amendment in my amendment and have made a slight change in the phraseology, and I offer the following substitute for the amendment which I offered and ask that I may have unanimous consent to modify my former amendment by offering this one.

The CHAIRMAN. The gentleman from Missouri offers an amendment, which the Clerk will report.

Mr. ANDERSON. That is subject to the reservation of the point of order?

The CHAIRMAN. Of course.

Mr. LEVER. I reserve the point of order.

The CHAIRMAN. It was stated it was subject to the reservation of the point of order.

The Clerk read as follows:

Mr. RUBEY offers the following amendment, to be inserted on page 45, following the amendment just adopted: After line 11 insert the following:

"Whenever the Secretary of Agriculture shall find the expenses of travel can be reduced thereby, he may, in lieu of the actual traveling expenses, under such regulations as he may prescribe, authorize the payment of not exceeding 2 cents per mile for a motorcycle or 6 cents per mile for an automobile used for necessary travel on official business in the Forest Service: *Provided*, That there shall be no payment of mileage for use or travel of motorcycle or automobile furnished or owned or maintained by the Government of the United States."

Mr. ANDERSON. Will the gentleman yield for a question?

Mr. RUBEY. I will.

Mr. ANDERSON. Is it contended this language shall be permanent legislation now?

Mr. RUBEY. No. I left out the word "hereafter." It is not permanent legislation.

Mr. STAFFORD. If the gentleman will permit, the very language as submitted is permanent in form, and will be so considered, I believe.

Mr. RUBEY. It says "whenever the Secretary shall determine."

Mr. STAFFORD. That is enacting language for all time.

Mr. RUBEY. I do not think so.

Mr. STAFFORD. In my judgment it is.

Mr. ANDERSON. I have no objection to trying this proposition out for a year.

Mr. RUBEY. I would ask the gentleman from Wisconsin this question: Suppose, instead of the word "whenever," we should say "should the Secretary of Agriculture determine"?

Mr. STAFFORD. That is the same. That is continuing it for all time and not restricting it to this appropriation bill. Why not insert there "during the fiscal year 1919"?

Mr. RUBEY. I have no objection to that. I will, by unanimous consent, modify the amendment by inserting after the word "whenever" the words "during the fiscal year 1919."

The CHAIRMAN. The gentleman from Missouri asks unanimous consent to modify his amendment as indicated. Is there objection? [After a pause.] The Chair hears none. The Clerk will report the amendment as modified.

The Clerk read as follows:

Modification of amendment: After the word "whenever," in the first line of the amendment, insert the words "during the fiscal year ending June 30, 1919."

The CHAIRMAN. The question is on agreeing to the amendment as modified.

The amendment was agreed to.

Mr. BORLAND. Mr. Chairman, I offer an amendment as a new paragraph, following line 9 on page 89.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 89, following line 9, insert the following as a new paragraph:

"No part of any amount herein appropriated shall be used to pay salaries or for personal services in any department, bureau, or office in the District of Columbia which does not, subject to the provisions and exceptions of section 7 of the legislative, executive, and judicial appropriation act, approved March 15, 1898, require eight hours of labor each day."

Mr. LEVER. Mr. Chairman, I would like to be recognized a moment. I ask unanimous consent that the debate on this amendment and all amendments thereto may close in five minutes.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that the debate on this amendment and all amendments thereto shall terminate at the expiration of five minutes. Is there objection?

There was no objection.

Mr. BORLAND. Mr. Chairman, I suppose that the great majority of farmers in this country would be somewhat surprised to learn that the great Agricultural Department of the United States maintains a seven-hour working day. I think they would be rather surprised to find that to be so in time of peace, because I am confident the matter has never been called to their attention. And I think they would be more surprised than ever to find that that condition exists in time of war. I think they would be intensely surprised to find it at a time when they are urged to speed up the production of food products in this country, and when they realize, as they must realize, the shortage of labor. The farms are crying for labor. They are asked to put on high pressure in the production of food, and yet the Department of Agriculture in Washington is overmanned and underworked. Any department in Washington that can do its work in seven hours, with 137 days off of the yearly calendar that are not working days, is overmanned and underworked.

Now, the farmers of the United States, I undertake to say, are willing to do their full share. I have heard a great deal in this debate about the shortage of labor. No man realizes that more than the farmer. The farms are, as I said, crying for labor. The mines are crying for labor. The shops are crying for labor. The railroads are crying for labor. The manufactories are crying for labor. There is a shortage of labor everywhere, and yet in the face of that fact most of the departments in Washington are working on a seven-hour day, with long vacations, numerous holidays, and numerous sick leaves. In the face of that they are bringing and attempting to bring to Washington thousands of new employees to work in the Navy Department and in the War Department and in some branches of the Treasury Department and State Department. They have already brought here between ten and twenty thousand new employees, and they have men now scouring the country to-day trying to bring additional employees to Washington.

If there is a shortage in the departments in Washington, if any department needs extra clerical help, there is one way to remedy it, and that is for the Department of Agriculture and the Interior Department and the Department of Labor and all these departments that are working on a seven-hour day to go on an honest basis of eight hours a day. [Applause.] When they do that and release the surplus number of clerks that they are now using and paying, whether they are using them or not, then those surplus clerks will be available for the department that needs them, and will be available without further exhausting the already overtaxed labor supply of the United States. [Applause.]

Why, we are asking men now to pay enormous taxes. What does that mean? It means an enormous production, for taxes can only be paid out of production. Productive toil is the only source that the Government can levy upon, and men must produce or they can not support the Government. They can not produce without labor, and the Government has no right to augment the labor shortage. It is an indefensible thing to think that the labor market is being affected and the shortage is being made more stringent by the bringing of thousands of young people here to Washington who ought to be engaged on the farm and in the productive toil of the country.

Now, the chairman of the committee may say, as the chairman of every committee has said, "Why tie this can on me? Why put this on my bill?" It is a duty on the part of every committee to put it on every bill, because unfortunately our bills are divided up among a number of committees. [Applause.] And I say the American taxpayer will not excuse any committee or any chairman of a committee for attempting to shove the thing aside, as regards his committee.

Mr. LEVER. Mr. Chairman, will the gentleman yield? I will say to the gentleman that I propose to let this committee say——

Mr. BORLAND. I do not say that the gentleman has taken that position, but I want to forestall his taking that position.

Mr. LEVER. I have not any time. I have closed the debate.

Mr. BORLAND. The gentleman ought not, and will not, I think, take the position that the Committee on Agriculture, of all the committees of the House, ought to be unwilling to establish an eight-hour day in the Department of Agriculture.

Now, I just want to show what the business men in the United States think about this situation, and I will send to the Clerk's desk, to be read in my time, a letter I have received from a wholesale grocer of Kansas City.

The Clerk read as follows:

KANSAS CITY, MO., *June 29, 1917.*

Hon. W. P. BORLAND,
Washington, D. C.

DEAR MR. BORLAND: You have favored an eight-hour day for employees of the United States Government at Washington, and you still favor it. You are right. We favor it. Fight it out on this line if it takes all summer, and if we can do anything to help the cause, let us know.

We have never heard of a serious argument why these employees of the Government should not work eight hours a day. If there is such an argument, we would like to read it. The last quibble which we saw was to the effect that a seven-hour day was best for the United States Government clerks because it gave them a chance to spend more money with the Washington shopkeepers.

If you know of any arguments in favor of a seven-hour day which serious-minded people can read with patience, let us have the literature.

Yours, truly,

RIDENOUR-BAKER GROCERY CO.
J. C. LESTER, *Vice President.*

Mr. BORLAND. Gentlemen, I would be glad to have a vote on this proposition. [Applause and cries of "Vote!" "Vote!"]

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Missouri [Mr. BORLAND].

The amendment was agreed to.

Mr. LEVER. Mr. Chairman, I would like to call the attention of the gentleman from Missouri to the fact that the chairman of the committee did not oppose the amendment.

The CHAIRMAN. The Clerk will read.

The Clerk resumed and completed the reading of the bill.

Mr. LEVER. Mr. Chairman, I move that the committee do now rise and report the bill to the House with the amendments and with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. SAUNDERS of Virginia, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the Agricultural appropriation bill (H. R. 9054) and had directed him to report the same to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The SPEAKER. Is a separate vote demanded on any amendment?

Mr. WALSH. Mr. Speaker, I ask for a separate vote on the amendment on page 27, increasing the appropriation for the distribution of valuable seeds—the congressional seed-distribution item.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. CANDLER of Mississippi: Page 27, line 24, strike out the figures "$242,320" and insert in lieu thereof "$363,480."

The SPEAKER. The question is on agreeing to the amendment.

The question being taken, on a division (demanded by Mr. CANDLER of Mississippi) there were—ayes 33, noes 69.

Mr. SAUNDERS of Virginia. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER. Evidently there is no quorum. The Doorkeeper will lock the doors. The Sergeant at Arms will notify absentees. Those in favor of the Candler amendment will, when their names are called, vote "aye," those opposed "no." The Clerk will call the roll.

The question was taken; and there were—yeas 121, nays 157, not voting 150, as follows:

YEAS—121.

So the amendment was rejected.

The following pairs were announced:

Until further notice:

Mr. O'SHAUNESSY with Mr. BURROUGHS.

Mr. PRICE with Mr. GEORGE W. FAIRCHILD.

Mr. SULLIVAN with Mr. BRITTEN.

Mr. SCULLY with Mr. HUTCHINSON.

Mr. BYRNS with Mr. BENJAMIN L. FAIRCHILD.

Mr. TALBOTT with Mr. BROWNING.

Mr. MARTIN with Mr. FREAR.

Mr. HOLLAND with Mr. GILLETT.

Mr. EAGAN with Mr. KENNEDY of Rhode Island.

Mr. ALEXANDER with Mr. CARTER of Massachusetts.

Mr. BARNHART with Mr. COPLEY.

Mr. STEELE with Mr. BUTLER.

Mr. BRODBECK with Mr. ANTHONY.

Mr. COLLIER with Mr. DAVIS.

Mr. ASWELL with Mr. CHANDLER of New York.

Mr. CAMPBELL of Pennsylvania with Mr. BACHARACH.

Mr. DILL with Mr. DAVIDSON.

Mr. CAREW with Mr. BROWNE.

Mr. BANKHEAD with Mr. CRAGO.

Mr. DENT with Mr. COSTELLO.

Mr. CHURCH with Mr. BOWERS.

Mr. DEWALT with Mr. CHANDLER of Oklahoma.

Mr. DOOLING with Mr. CURRY of California.

Mr. DOREMUS with Mr. GOOD.

Mr. HARDY with Mr. KELLEY of Michigan.

Mr. GALLIVAN with Mr. MCCULLOCH.

Mr. HAMILL with Mr. MCKENZIE.

Mr. KETTNER with Mr. EDMONDS.

Mr. ESTOPINAL with Mr. KAHN.

Mr. MCLEMORE with Mr. MILLER of Minnesota.

Mr. GODWIN of North Carolina with Mr. LONGWORTH.

Mr. DOUGHTON with Mr. GRIEST.

Mr. KEY of Ohio with Mr. HOLLINGSWORTH.

Mr. FOSTER with Mr. ELLSWORTH.

Mr. HAMLIN with Mr. LUFKIN.

Mr. DUPRÉ with Mr. GOODALL.

Mr. HOUSTON with Mr. FOCHT.

Mr. GALLAGHER with Mr. HULL of Iowa.

Mr. HELVERING with Mr. SWIFT.

Mr. EVANS with Mr. HASKELL.

Mr. GREGG with Mr. FULLER of Massachusetts.

Mr. MAHER with Mr. LEHLBACH.

Mr. OLNEY with Mr. MOORES of Indiana.

Mr. FLYNN with Mr. GRAY of New Jersey.
Mr. MONTAGUE with Mr. PETERS.
Mr. HOWARD with Mr. MCKINLEY.
Mr. RAGSDALE with Mr. PORTER.
Mr. TAGUE with Mr. SANDERS of New York.
Mr. SMALL with Mr. TINKHAM.
Mr. OVERMYER with Mr. SIEGEL.
Mr. STEPHENS of Mississippi with Mr. PRATT.
Mr. RAYBURN with Mr. ROWE.
Mr. POU with Mr. SLEMP.
Mr. SIMS with Mr. STINESS.
Mr. SHOUSE with Mr. RAMSEY.
Mr. THOMAS F. SMITH with Mr. WHITE of Maine.
Mr. RIORDAN with Mr. STRONG.
Mr. STERLING of Pennsylvania with Mr. WATSON of Pennsylvania.
Mr. STEPHENS of Nebraska with Mr. ROWLAND.
Mr. SLAYDEN with Mr. WARD.
Mr. TAYLOR of Colorado with Mr. WILSON of Illinois.
Mr. SIEDMAN with Mr. WINSLOW.
Mr. VAN DYKE with Mr. WOODYARD.
Mr. WHITE of Ohio with Mr. SWITZER.
Mr. TILLMAN with Mr. REAVIS.
Mr. WILSON of Louisiana with Mr. TEMPLETON.
Mr. WALKER with Mr. FRENCH.
Mr. WISE with Mr. MCLAUGHLIN of Pennsylvania.
Mr. PADGETT with Mr. ZIHLMAN.

The result of the vote was then announced as above recorded.

A quorum being present, the doors were opened.

Mr. LEVER. Mr. Speaker, I move the previous question on the bill and amendments to final passage.

The previous question was ordered.

The SPEAKER. Is a separate vote demanded on any other amendment? If not, the Chair will put them in gross.

There was no demand for a separate vote.

The other amendments were agreed to.

The bill was ordered to be engrossed and read a third time, and was read the third time.

Mr. McLAUGHLIN of Michigan. Mr. Speaker, I wish to make a motion to recommit the bill with instructions.

The SPEAKER. Is the gentleman against the bill?

Mr. McLAUGHLIN of Michigan. I am not, but I am a member of the committee.

The SPEAKER. If there is any gentleman opposed to the bill who wishes to make a motion to recommit, the Chair will recognize him. If not, the Chair recognizes the gentleman from Michigan.

The Clerk read as follows:

Mr. McLAUGHLIN of Michigan moves to recommit the bill to the Committee on Agriculture with instructions to report the same back forthwith with an amendment as follows: On page 13, line 19, strike out "$250,000" and insert "$500,000."

Mr. LEVER. I move the previous question on the motion to recommit.

The previous question was ordered.

Mr. McLAUGHLIN of Michigan. That is increasing the tuberculosis item.

Mr. LEVER. I make the point that it is not debatable.

The SPEAKER. The question is on the motion to recommit.

The question was taken.

Mr. LINTHICUM. I demand the yeas and nays.

Mr. MONDELL. I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 139, nays 142, not voting 147, as follows:

YEAS—139.

Edmonds	Kettner	Rowland	

So the motion to recommit was rejected.

The Clerk announced the following additional pairs:

On the vote:

Mr. HELVERING (against) with Mr. SWIFT (for).

Until further notice:

Mr. POU with Mr. DAVIS.

Mr. THOMAS F. SMITH with Mr. WILSON of Illinois.

Mr. VAN DYKE with Mr. SWITZER.

Mr. DEWALT with Mr. MCCULLOCH.

Mr. GALLAGHER with Mr. LONGWORTH.

Mr. CLAYPOOL with Mr. GOODALL.

Mr. GLASS with Mr. VARE.

Mr. PADGETT with Mr. ZIHLMAN.

Mr. RUCKER with Mr. HEATON.

The result of the vote was announced as above recorded.

The SPEAKER. The question now is on the passage of the bill.

The question was taken, and the bill was passed.

On motion of Mr. LEVER, a motion to reconsider the vote by which the bill was passed was laid on the table.

Mr. LEVER. Mr. Speaker, I ask unanimous consent that the engrossing clerk may correct the totals if there should be any correction.

The SPEAKER. The gentleman from South Carolina asks that the engrossing clerk may correct the totals. Is there objection? [After a pause.] The Chair hears none.

ADJOURNMENT UNTIL MONDAY.

Mr. KITCHIN. Mr. Speaker, I ask unanimous consent that when the House adjourns to-day it adjourn to meet on Monday next.

The SPEAKER. The gentleman from North Carolina asks unanimous consent that when the House adjourns to-day it adjourn to meet on next Monday. Is there objection. [After a pause.] The Chair hears none.

LEAVE OF ABSENCE.

By unanimous consent, Mr. BURROUGHS was granted leave of absence for the day, on account of illness.

EXTENSION OF REMARKS.

Mr. FERRIS. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. Is there objection?

Mr. WALSH. Mr. Speaker, reserving the right to object, on what subject?

Mr. FERRIS. I want to print a short editorial on the war—peace and against war.

Mr. NORTON. And prosperity?

Mr. WALSH. Mr. Speaker, I object.

The SPEAKER. The gentleman from Massachusetts objects.

ADJOURNMENT.

Mr. KITCHIN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 36 minutes p. m.), under its previous order, the House adjourned to meet Monday, February 4, 1918, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the president of the Georgetown Gas Light Co., transmitting detailed statement of the business of the Georgetown Gas Light Co., together with a list of stockholders for the year ending December 31, 1917 (H. Doc. No. 891); to the Committee on the District of Columbia and ordered to be printed.

2. A letter from the Postmaster General, transmitting report regarding the transmission of postal matter to and from members of the American expeditionary forces in France (H. Doc. No. 892); to the Committee on the Post Office and Post Roads and ordered to be printed.

3. A letter from the president of the Washington Railway & Electric Co., transmitting report of the Georgetown & Tennallytown Railway Co. for the year ending December 31, 1917 (H. Doc. No. 893); to the Committee on the District of Columbia and ordered to be printed.

4. A letter from the president of the Washington Railway & Electric Co., transmitting report of the Washington Interurban Railroad Co. for the year ending December 31, 1917 (H. Doc. No. 894); to the Committee on the District of Columbia and ordered to be printed.

5. A letter from the president of the Potomac Electric Power Co., transmitting report of the Potomac Electric Power Co. for the year ended December 31, 1917 (H. Doc. No. 895); to the Committee on the District of Columbia and ordered to be printed.

6. A letter from the president of the Washington Railway & Electric Co., transmitting report of the City & Suburban Railway of Washington for the year ended December 31, 1917 (H. Doc. No. 896); to the Committee on the District of Columbia and ordered to be printed.

7. A letter from the president of the Washington Railway & Electric Co., transmitting report of the Washington Railway & Electric Co. for the year ended December 31, 1917 (H. Doc. No. 897); to the Committee on the District of Columbia and ordered to be printed.

8. A letter from the president of the East Washington Heights Railway, transmitting annual report for the year ended December 31, 1917 (H. Doc. No. 898); to the Committee on the District of Columbia and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. SHOUSE, from the Committee on the Library, to which was referred the resolution (S. J. Res. 107) authorizing the erection on the public grounds in the city of Washington, D. C., of a memorial to Francis Asbury, reported the same without amendment, accompanied by a report (No. 280), which said resolution and report were referred to the House Calendar.

Mr. GOULD, from the Committee on the Library, to which was referred the resolution (H. J. Res. 154) authorizing the erection of a memorial in Washington to the memory and in honor of the members of the various orders of sisters who gave their services as nurses on battle fields, in hospitals, and on floating hospitals during the Civil War, reported the same without amendment, accompanied by a report (No. 281), which said resolution and report were referred to the House Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. MOORE of Pennsylvania: A bill (H. R. 9455) to make valid certain certificates of naturalization; to the Committee on Immigration and Naturalization.

By Mr. BORLAND: A bill (H. R. 9456) authorizing the Postmaster General to cancel or readjust the terms of star-route and screen-wagon contracts; to the Committee on the Post Office and Post Roads.

By Mr. GLASS: A bill (H. R. 9457) authorizing national banks to make contributions to the American National Red Cross; to the Committee on Banking and Currency.

By Mr. GRAHAM of Pennsylvania: A bill (H. R. 9458) to prevent and punish the sale of Army and Navy uniforms to persons not authorized to wear them; to the Committee on the Judiciary.

By Mr. CARY: A bill (H. R. 9459) to increase the pensions of the widows of the War with Mexico; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9460) to regulate the hours of duty of the officers and members of the fire department of the District of Columbia; to the Committee on the District of Columbia.

Also, a bill (H. R. 9461) to pension widow and minor children of any officer or enlisted man who served in the War with Spain or Phillipine insurrection; to the Committee on Pensions.

By Mr. HICKS: A bill (H. R. 9462) to prescribe the personnel of the Navy Nurse Corps, the qualifications for appointment, and the method of appointment therein, the pay, allowances, and leave of absence of members of said corps, and the conditions under which they may be retired; to the Committee on Naval Affairs.

By Mr. FRANCIS: A bill (H. R. 9498) providing for the free transportation of officers and enlisted men of the Army, Navy, and Marine Corps of the United States, and of members of the Nurse Corps of the Army and Navy; to the Committee on Interstate and Foreign Commerce.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. AUSTIN: A bill (H. R. 9463) granting an increase of pension to James L. Henderson; to the Committee on Pensions.

By Mr. CALDWELL: A bill (H. R. 9464) granting a pension to Margaret Jackson; to the Committee on Pensions.

Also, a bill (H. R. 9465) granting a pension to William F. W. Gordon; to the Committee on Pensions.

Also, a bill (H. R. 9466) granting a pension to Louisa Donnelly; to the Committee on Pensions.

Also, a bill (H. R. 9467) for the relief of Thomas Campbell; to the Committee on Military Affairs.

By Mr. CURRIE of Michigan: A bill (H. R. 9468) granting a pension to Ida M. Van Epps; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9469) granting a pension to Carrie L. Kibbe; to the Committee on Invalid Pensions.

By Mr. DENISON: A bill (H. R. 9470) granting an increase of pension to Charles Owens; to the Committee on Invalid Pensions.

By Mr. DOWELL: A bill (H. R. 9471) granting an increase of pension to Cyrus Riffle; to the Committee on Invalid Pensions.

By Mr. GRAY of Alabama: A bill (H. R. 9472) granting an increase of pension to James Powers; to the Committee on Invalid Pensions.

By Mr. GREGG: A bill (H. R. 9473) for the relief of the legal representatives of Sarah J. Montgomery, deceased; to the Committee on War Claims.

By Mr. HAMILTON of New York. A bill (H. R. 9474) granting a pension to George H. Roberts; to the Committee on Invalid Pensions.

By Mr. HILLIARD: A bill (H. R. 9475) for the relief of Elizabeth T. Wells; to the Committee on Military Affairs.

By Mr. KEARNS: A bill (H. R. 9476) granting a pension to Chester A. Dryden; to the Committee on Invalid Pensions.

By Mr. KRAUS: A bill (H. R. 9477) granting an increase of pension to William Ducy; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9478) granting a pension to Nancy Ault; to the Committee on Invalid Pensions.

By Mr. LANGLEY: A bill (H. R. 9479) granting an increase of pension to J. R. Evans; to the Committee on Invalid Pensions.

By Mr. McKINLEY: A bill (H. R. 9480) granting an increase of pension to George T. Smith; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9481) granting an increase of pension to Christian Marxmuller, alias Christopher Miller; to the Committee on Invalid Pensions.

By Mr. MAPES: A bill (H. R. 9482) granting a pension to Mahalah A. Palmer; to the Committee on Invalid Pensions.

By Mr. MILLER of Minnesota: A bill (H. R. 9483) granting a pension to Frank Bachmeyer; to the Committee on Pensions.

Also, a bill (H. R. 9484) granting a pension to George A. Holmes; to the Committee on Pensions.

Also, a bill (H. R. 9485) granting a pension to Carlos Forsman; to the Committee on Pensions.

By Mr. MUDD. A bill (H. R. 9486) granting a pension to E. P. Aler; to the Committee on Pensions.

Also, a bill (H. R. 9487) for the relief of Charles C. Serrin; to the Committee on Military Affairs.

By Mr. RAINEY: A bill (H. R. 9488) granting a pension to Abigail Butts; to the Committee on Invalid Pensions.

By Mr. ROGERS: A bill (H. R. 9489) granting a pension to George F. Cook; to the Committee on Invalid Pensions.

By Mr. SHALLENBERGER: A bill (H. R. 9490) granting an increase of pension to R. H. Stewart; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9491) granting a pension to Marion Burnham; to the Committee on Invalid Pensions.

By Mr. STEENERSON: A bill (H. R. 9492) granting an increase of pension to Christian Gulbranson; to the Committee on Invalid Pensions.

By Mr. WHEELER: A bill (H. R. 9493) granting an increase of pension to Edgar Parks; to the Committee on Invalid Pensions.

By Mr. WOOD of Indiana: A bill (H. R. 9494) granting a pension to Millie B. Cook; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9495) granting a pension to George F. Harter; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9496) granting an increase of pension to Phoebe Miller; to the Committee on Invalid Pensions.

By Mr. OSBORNE: A bill (H. R. 9497) granting a pension to Sarah A. Dow; to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. DALE of New York: Petition of Association of Lithuanian Patriots of America, relative to independence for Lithuania; to the Committee on Foreign Affairs.

By Mr. FULLER of Illinois: Memorial of Union Label Trades Department of the American Federation of Labor, asking repeal of the second-class postage provisions of the war-revenue bill; to the Committee on Ways and Means.

Also, petition of Prairie Club of Chicago, Ill., opposing the granting of grazing privileges in the national parks and of shooting in the bird reservations; to the Committee on the Public Lands.

By Mr. MOORE of Pennsylvania: Memorial of tenth annual convention of the Union Label Trades Department of the American Federation of Labor, favoring elimination of section in war-revenue bill dealing with second-class postage; to the Committee on Ways and Means.

Also, memorial of Tyrone Chamber of Commerce, protesting against periodical postage amendment; to the Committee on Ways and Means.

Also, memorial of Asbury Chamber of Commerce, protesting against zone system for second-class mail; to the Committee on the Post Office and Post Roads.

By Mr. RAKER: Petition of Henry Adams, Veterans' Home, Cal., favoring volunteer officers' retired-list bill; to the Committee on Military Affairs.

Also, memorial of National Council, Sons and Daughters of Liberty, favoring passage of House bill 4892, relative to immigration law; to the Committee on Immigration and Naturalization.

Also, petition of Columbia Post, No. 141, Department of California and Nevada, Grand Army of the Republic, favoring increase in pensions of ex-Union soldiers of the Civil War; to the Committee on Invalid Pensions.

By Mr. STEENERSON: Petition of citizens of Halstad, Minn., protesting against the proposed repeal of the second-class mail rates provision of the war-revenue act; to the Committee on the Post Office and Post Roads.

SENATE.

MONDAY, *February 4, 1918.*

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, we open the Senate this morning with a very great burden upon our hearts. We hear of our boys at the front receiving their first baptism of fire and blood. Our hearts go out to them. We present them to Thee, O God, asking Thy guidance and Thy blessing upon them. We pray that they may feel the support of a united country, and that they may have the courage which springs out of a consciousness of the pureness of their flag and the united support of a mighty Nation back of them. We pray Thee speedily to bring to them and their arms and to their flag the victory which comes to the unconquerable will of men who do right in Thy sight. For Christ's sake. Amen.

The Secretary proceeded to read the Journal of the proceedings of Thursday last, when, on request of Mr. VARDAMAN and by unanimous consent, the further reading was dispensed with and the Journal was approved.

READING OF WASHINGTON'S FAREWELL ADDRESS.

The VICE PRESIDENT. In accordance with an order heretofore made by the Senate, that upon the 22d day of February in each year, or if that day should fall on Sunday then on the day following, immediately after the reading of the Journal, Washington's Farewell Address should be read to the Senate by a Senator designated for the purpose by the presiding officer, the Chair announces the appointment of the Senator from Rhode Island [Mr. GERRY] to read the address this year.

CRIPPLED SOLDIERS AND SAILORS (S. DOC. NO. 173).

The VICE PRESIDENT laid before the Senate a communication from the Secretary of War, transmitting, in response to a resolution of January 31, 1917, certain information relative to the rehabilitation and vocational reeducation of crippled soldiers and sailors, which, with the accompanying paper, was referred to the Committee on Military Affairs and ordered to be printed.

WASHINGTON GAS LIGHT CO. (H. DOC. NO. 891).

The VICE PRESIDENT laid before the Senate the annual report of the Washington Gas Light Co. for the year ended December 31, 1917, which was referred to the Committee on the District of Columbia and ordered to be printed.

WASHINGTON RAILWAY & ELECTRIC CO. (H. DOC. NO. 897).

The VICE PRESIDENT laid before the Senate the annual report of the Washington Railway & Electric Co. for the year ended December 31, 1917, which was referred to the Committee on the District of Columbia and ordered to be printed.

GEORGETOWN & TENNALLYTOWN RAILWAY CO. (H. DOC. NO. 893).

The VICE PRESIDENT laid before the Senate the annual report of the Georgetown & Tennallytown Railway Co. for the year ended December 31, 1917, which was referred to the Committee on the District of Columbia and ordered to be printed.

WASHINGTON INTERURBAN RAILROAD CO. (H. DOC. NO. 894).

The VICE PRESIDENT laid before the Senate the annual report of the Washington Interurban Railroad Co. for the year

ended December 31, 1917, which was referred to the Committee on the District of Columbia and ordered to be printed.

CITY & SUBURBAN RAILWAY CO. (H. DOC. NO. 896).

The VICE PRESIDENT laid before the Senate the annual report of the City & Suburban Railway Co. of Washington for the year ended December 31, 1917, which was referred to the Committee on the District of Columbia and ordered to be printed.

POTOMAC ELECTRIC POWER CO. (H. DOC. NO. 895).

The VICE PRESIDENT laid before the Senate the annual report of the Potomac Electric Power Co. for the year ended December 31, 1917, which was referred to the Committee on the District of Columbia and ordered to be printed.

CAPITAL TRACTION CO. (H. DOC. NO. 889).

The VICE PRESIDENT laid before the Senate the annual report of the Capital Traction Co. for the year ended December 31, 1917, which was referred to the Committee on the District of Columbia and ordered to be printed.

EAST WASHINGTON HEIGHTS TRACTION RAILROAD (H. DOC. NO. 898).

The VICE PRESIDENT laid before the Senate the annual report of the East Washington Heights Traction Railroad Co. for the year ended December 31, 1917, which was referred to the Committee on the District of Columbia and ordered to be printed.

FINDINGS OF THE COURT OF CLAIMS.

The VICE PRESIDENT laid before the Senate communications from the chief clerk of the Court of Claims, transmitting certified copies of the findings of fact and conclusions filed by the court in the following causes:

William Ioder *v.* United States (S. Doc. No. 169); and

Benjamin K. Roberts, Harris L. Roberts, and Helen F. C. Roberts, guardians of Benjamin S. Roberts, jr., heirs of Benjamin S. Roberts, deceased, *v.* United States (S. Doc. No. 170).

The foregoing findings were, with the accompanying papers, referred to the Committee on Claims and ordered to be printed.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had passed a bill (H. R. 9054) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1919, in which it requested the concurrence of the Senate.

ENROLLED BILL AND JOINT RESOLUTION SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bill and joint resolution, and they were thereupon signed by the Vice President:

H. R. 3135. An act to amend section 4 of the act entitled "An act to provide for an auxiliary reclamation project in connection with the Yuma project, Arizona; and

H. J. Res. 174. Joint resolution for the purpose of promoting efficiency, for the utilization of the resources and industries of the United States, for lessening the expenses of the war, and restoring the loss caused by the war by providing for the employment of a discovery or invention called the "Garabed," claiming to make possible the utilization of free energy.

PETITIONS AND MEMORIALS.

The VICE PRESIDENT. The Chair lays before the Senate a memorial to the Congress of the United States from the house of delegates and the officers of the American Medical Association, praying for the repeal of section 209 of the war-revenue act, which will be referred to the Committee on Finance.

Mr. GALLINGER. Mr. President, I am not in the habit of asking that telegrams be inserted in the RECORD, but the two brief telegrams I send to the desk are of such great importance I ask that they may be read.

The PRESIDING OFFICER. Without objection, the Secretary will read.

The Secretary read as follows:

NEW YORK, N. Y., *February 1, 1918.*

Hon. J. H. GALLINGER,
United States Senate, Washington, D. C.:

Coal famine fast forcing shutdown of New England mills and cutting off Army cloth urgently needed by Government. Can not another large inactive Navy collier be immediately put en route from coal-loading ports to Boston? Many other mills on verge of closing.

FREDERICK S. CLARKE,
Acting President National Association of Wool Manufacturers.

BOSTON, MASS., *February 1, 1918.*

Hon. JACOB H. GALLINGER,
United States Senate, Washington, D. C.:

Coal situation very critical. New England mills will soon be closed and supplies needed for Army and Navy cut off unless coal is provided at once. Shutdowns will result in thousands being unemployed, and great suffering certain unless relief comes quickly.

A. F. BEMIS,
President National Association of Cotton Manufacturers.

Mr. GALLINGER. Mr. President, all I can do about that matter, which is a very serious one, is to have these telegrams inserted in the RECORD with the expectation that the officials who possibly can give relief will have their attention called to them.

Mr. McLEAN. I have a brief resolution adopted by the Equal Suffrage League of Bridgeport, Conn., which I ask to have printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

Resolution adopted at a meeting of the Bridgeport Equal Suffrage League, the Stratford Equal Suffrage League, and the Fairfield Equal Suffrage League, in Bridgeport, January 31, 1918.

Resolved, That this meeting most earnestly urges Senator GEORGE P. MCLEAN to vote for the Federal suffrage amendment and to work for its passage, thus demonstrating the faith of this country in the democracy for which we and our allies are fighting; and be it also

Resolved, That Senator GEORGE P. MCLEAN be requested to see that this resolution is read into the CONGRESSIONAL RECORD.

Mr. JONES of Washington. I have a resolution adopted unanimously by the Pastors' Federation of the City of Washington and the District. I ask that it may be printed in the RECORD and referred to the Committee on Foreign Relations.

There being no objection, the resolution was referred to the Committee on Foreign Relations and ordered to be printed in the RECORD, as follows:

PASTORS' FEDERATION ON WINE AND BEER SITUATION IN FRANCE.

Resolved, That we rejoice in the unparalleled efforts of our Secretaries of War and the Navy to safeguard our fighting forces morally, which has had a large measure of success in cantonments and ships, and urge more drastic action to insure their protection when on leave and especially when in foreign service.

—

Whereas Gen. Pershing issued an order more than a month ago, forbidding our soldiers in France to "buy or receive as a gift" the stronger liquors, but specifically excepting beer and light wines, which both Houses of Congress had previously refused to except in legislation for soldiers and others; and

Whereas the extension of this order to include all intoxicating drinks, which it was reported he was discussing with the French Government, has not been made; and

Whereas silence on the part of the American people might seem to give consent to the present un-American distinction in favor of beer and wine, which will seem to excuse if not sanction their use at home as well as abroad; and

Whereas there has been no official action, so far as the public is informed, to stop the shipment to foreign breweries of American grain, now spared for our allies at the sacrifice of our people and all needed by them for food: Therefore

Resolved, That we join the National Legislative Conference, representing all temperance forces, in asking the President to request the British and French Governments to forbid their people to sell or give any alcoholic beverage, beer, or wine, or any other to any of our fighting forces; be it further

Resolved, That inasmuch as the grain we can spare only by sacrifice is being used, directly and indirectly, to produce intoxicants abroad that imperil our common cause in their influence upon the fighting men, the munition workers, the food supply, the funds and the transportation, we urge joint war prohibition by Great Britain, France, and the United States be proposed by our own Government either by the President or by Congress. We can not regard as a valid reason in any country for not prohibiting beer and wine for the war, especially not in our own, the fear that working men would refuse to sacrifice these drinks even when it was required as a patriotic necessity. There has been no labor revolt in any of our "dry" cities when put under prohibition, and labor leaders of "dry" States, as shown in the House amendment debate, have generally approved prohibition after trial—the labor petitions against prohibition having come from States that have not tried prohibition. Nor do we accept the statement that for the President to prohibit beer would necessarily "put the country on a whisky basis" since the President is fully authorized to commandeer all distilled liquors in bond or stock for redistillation to prevent use of foodstuffs for future manufacture of munition alcohol, which redistillation could be done at a very small cost for assembling, since 60 per cent of the whisky is in one State, and the cost of redistillation would be less than 2 cents a gallon, according to official chemist.

Above petition was adopted unanimously by Pastors' Federation of Washington, D. C., on January 28, 1918.

Mr. JONES of Washington presented a petition of the Trades and Labor Council of Hoquiam, Wash., praying for an increase in the salaries of all civil-service employees, which was referred to the Committee on Appropriations.

Mr. LODGE. Mr. President, I present a letter in the nature of a petition from the president of the National Association of Cotton Manufacturers. I ask that it may be read into the RECORD.

The VICE PRESIDENT. It will be read.

The Secretary read as follows:

THE NATIONAL ASSOCIATION OF COTTON MANUFACTURERS,
Boston, Mass., February 1, 1918.

Hon. HENRY CABOT LODGE,
United States Senate, Washington, D. C.

MY DEAR SENATOR LODGE: Notwithstanding that you are probably fully aware of the critical condition of our New England mills in respect to a supply of fuel, it seemed to me my duty as president of this association to send you direct information, which I did to-day, as per the following telegram:

"Coal situation very critical. New England mills will soon be closed and supplies needed for Army and Navy cut off unless coal is provided at once. Shutdowns, thousands unemployed, and great suffering certain unless relief comes quickly."

Believe me, very respectfully, yours,

A. F. BEMIS, *President.*

Mr. LODGE presented a petition of sundry citizens of Brookline, Mass., praying for the creation of a war cabinet, which was referred to the Committee on Military Affairs.

He also presented resolutions adopted by the Massachusetts Chiropody Association, of Boston, Mass., favoring the establishment of a chiropodist corps in the Army, which were referred to the Committee on Military Affairs.

Mr. JOHNSON of South Dakota. I present a communication from Rev. D. M. Brown, pastor of the First Congregational Church, of Estelline, S. Dak., which I ask to have printed in the RECORD.

There being no objection, the communication was ordered to be printed in the RECORD, as follows:

ESTELLINE, S. DAK., *January 25, 1918.*

Hon. THOMAS STERLING and Hon. EDWIN S. JOHNSON, *Senators;* Hon. CHARLES H. DILLON, Hon. ROYAL C. JOHNSON, and Hon. HARRY L. GANDY, *Representatives, of the State of South Dakota.*

MY HONORABLE AND DEAR SIRS: The injection of partisan politics into the governmental business of waging a world war is most reprehensible and disloyal. Speeding up war measures and affairs is one thing, and breaking down the confidence of the people and weakening their cooperation with the Government is quite another thing. The United States has but one President, Woodrow Wilson. He is Commander in Chief of the Army and Navy. The presence of Theodore Roosevelt in Washington at this time, and his criticisms adverse to the administration and its management of the war preparations detract in every way possible from the spirit of winning the war and embarrass the people and Government of the United States. Such things as these greatly help the Kaiser. The suffering and blood of our young manhood, at home and abroad, cry out against these partisan outbreaks and devilish thrusts now being made by an ex-President and those who follow in his trail.

Yours, most respectfully,

D. M. BROWN,
Pastor of Congregational Church.

Mr. WEEKS presented a resolution adopted by the Middlesex-Essex Pomona Grange, No. 28, Patrons of Husbandry, of Massachusetts, and a petition of sundry citizens of Lowell, Mass., praying for national prohibition, which were ordered to lie on the table.

He also presented a petition of sundry citizens of Boston, Mass., and a petition of sundry citizens of Lawrence, Mass., praying for an increase in the salaries of postal employees, which were referred to the Committee on Post Offices and Post Roads.

REPORTS OF COMMITTEES.

Mr. FLETCHER, from the Committee on the Judiciary, to which was referred the bill (S. 1735) to create an additional judge in the southern district of Florida, reported it with an amendment.

Mr. ASHURST, from the Committee on the Judiciary, to which was referred the bill (S. 714) providing for an additional judge for the district of Arizona, reported it with an amendment, and submitted a report (No. 240) thereon.

Mr. MYERS, from the Committee on Military Affairs, to which was referred the bill (S. 922) for the relief of Orion Mathews, reported it without amendment, and submitted a report (No. 241) thereon.

Mr. OVERMAN, from the Committee on the Judiciary, to which was referred the bill (H. R. 6361) to extend protection to the civil rights of members of the Military and Naval Establishments of the United States engaged in the present war, reported it with amendments.

Mr. TILLMAN, from the Committee on Naval Affairs, to which was referred the bill (S. 3403) for the relief of Paymaster Alvin Hovey-King, United States Navy, reported it without amendment and submitted a report (No. 242) thereon.

FUNERAL EXPENSES OF THE LATE SENATOR BRADY.

Mr. THOMPSON, from the Committee to Audit and Control the Contingent Expenses of the Senate, to which was referred S. Res. 187, submitted by Mr. BORAH on the 18th ultimo, reported it favorably without amendment, and it was considered with unanimous consent and agreed to, as follows:

Resolved, That the Secretary of the Senate be, and he hereby is, authorized and directed to pay, from the miscellaneous items of the contingent fund of the Senate, the actual and necessary expenses incurred by the committee appointed by the Vice President in arranging for and attending the funeral of the Hon. JAMES H. BRADY, late a Senator from the State of Idaho, upon vouchers to be approved by the Committee to Audit and Control the Contingent Expenses of the Senate.

DEMOCRACIES AGAINST AUTOCRACIES.

Mr. FLETCHER. I report favorably from the Committee on Printing a resolution touching the printing of a document, and I ask unanimous consent for its present consideration.

The resolution (S. Res. 196) was read, as follows:

Resolved, That the pamphlet submitted by the Senator from Florida [Mr. FLETCHER] on July 12, 1917, entitled "An International Confederation of Democracies under a Constitution," by David Lubin, delegate to the United States International Institute of Agriculture, be printed as a Senate document.

Mr. SMOOT. If I am not mistaken, the Committee on Printing decided not to print that document.

Mr. FLETCHER. The committee ordered it to be reported favorably.

Mr. SMOOT. At the meeting held last Saturday?

Mr. FLETCHER. At the meeting held last Saturday. It was done before the Senator came in, perhaps.

Mr. SMOOT. It was certainly done before I came into the committee meeting if it was agreed to.

Mr. FLETCHER. It was agreed to. I reported it pursuant to the action of the committee. I think the Senator was a little late in getting in.

Mr. SMOOT. Yes; I was late—about 10 minutes.

Mr. FLETCHER. It does not cost very much.

Mr. SMOOT. Of course, if the committee has decided that it should be printed as a public document, I am not going to object to the consideration of the resolution; but I think, Mr. President, we have printed enough such documents prepared by a certain individual, and as it is costing the Government of the United States I do not know how much each year, I think it ought to cease some time or other.

The VICE PRESIDENT. Is there objection to the consideration of the resolution?

Mr. OVERMAN. I wish to ask the Senator from Florida one question. I remember that in the Diplomatic and Consular appropriation bill there is an appropriation of $10,000—my recollection is—for Mr. Lubin, including salary and printing bill. Is not that appropriation sufficient to print this document?

Mr. FLETCHER. That has nothing to do with this matter. The appropriation is made to him as the American delegate to the International Institute of Agriculture at Rome.

Mr. OVERMAN. But it is made for printing, and I wish to know, because that appropriation bill will be here next week——

Mr. FLETCHER. That has nothing to do with the printing of this document.

Mr. OVERMAN. If that appropriation does not include the printing, then the appropriation of $10,000, including salary and printing, ought to be reduced that much. I have no objection to the resolution, but I wish to say that there ought not to be an appropriation made for printing in the appropriation bill and then have a separate resolution brought in for printing.

Mr. FLETCHER. This has nothing to do with the printing of the material in connection with the International Institute.

Mr. OVERMAN. That is the question I wanted to ask.

Mr. FLETCHER. It is an entirely separate and distinct matter. This has nothing to do with Mr. Lubin's work as an American delegate; but, simply as a publicist, a man of vision and farsightedness, he has some suggestions to make which I think are valuable.

Mr. SMOOT. Mr. President, I think Dr. Lubin has not very much to do as a delegate, but spends a good deal of time in writing articles upon policies that he thinks ought to be adopted by the Government of the United States.

Mr. OVERMAN. That statement is interesting to me, having charge of the appropriation bill. Does the Senator say he does not spend his time——

Mr. SMOOT. I do not say any of his time, but I suppose he spends very little of his time.

Mr. FLETCHER. Dr. Lubin is in Rome now and is there attending to his work continuously. The printing provided for in the appropriation bill is in connection with his work as a delegate to the International Institute, and his expenses far exceed his compensation. He is actually out of pocket in connection with his work as a delegate to that institute. The sum of $10,000 appropriated to him for salary and compensation for expenses does not at all cover the actual amount that he expends himself. He is there at his work all the while. Of course, he has time for other work.

Mr. OVERMAN. Let me ask the Senator a question. Dr. Lubin was appointed as a delegate before the war. During this war does he have any duties as a delegate?

Mr. FLETCHER. I understand that they go on with the work. Perhaps there is not a full attendance from all the countries.

Mr. OVERMAN. All the countries that entered into a treaty are at war.

Mr. FLETCHER. Not all of them, but some of them are. There are 52 nations participating in the International Institute of Agriculture.

Mr. OVERMAN. I wish to ask the Senator whether he thinks that during the war this appropriation ought to be continued? Are there any conventions held? He is a delegate to a certain convention and receives $3,500. If there is no convention held, is it necessary to make the appropriation?

Mr. FLETCHER. I think the appropriation ought to be continued, by all means, because they are doing a great deal of work collecting statistics and data. Dr. Lubin is engaged continuously in that work. Of course, the war is not going to last forever, and even while the war is on there is a great deal to do, and he is giving it his undivided attention. The data which they have collected are very valuable data, and they furnish to the respective Governments very valuable information and material. I think the appropriation, by all means, ought to be continued.

Mr. JONES of Washington. I ask the Senator what he considers to be the special value of this document?

Mr. FLETCHER. I think it has some very thoughtful discussion and some important suggestions that are of international importance.

Mr. JONES of Washington. Are they new suggestions?

Mr. FLETCHER. I think they are quite new.

Mr. JONES of Washington. I think the resolution ought to go to the calendar. I should like to examine it and find out about the matter.

Mr. FLETCHER. If the Senator objects to present consideration, it will have to go to the calendar.

The VICE PRESIDENT. The resolution will be placed on the calendar.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SMITH of South Carolina:

A bill (S. 3713) to provide for the operation of transportation systems while under Federal control, for the just compensation of their owners, and for other purposes; to the Committee on Interstate Commerce.

By Mr. SIMMONS:

A bill (S. 3714) to provide further for the national security and defense, and for the purpose of assisting in the prosecution of the war, to provide credits for industries and enterprises in the United States necessary or contributory to the prosecution of the war, and for other purposes; to the Committee on Finance.

By Mr. FRELINGHUYSEN:

A bill (S. 3715) for the relief of sundry building and loan associations; to the Committee on Claims.

By Mr. JONES of Washington:

A bill (S. 3716) to amend paragraph No. 2 of section 1207 of an act entitled "An act to provide revenue to defray war expenses, and for other purposes," approved October 3, 1917; to the Committee on Finance.

By Mr. JOHNSON of South Dakota:

A bill (S. 3717) granting an increase of pension to John Magorien (with accompanying papers); and

A bill (S. 3718) granting an increase of pension to Paleman S. Castle (with accompanying papers); to the Committee on Pensions.

By Mr. CHAMBERLAIN:

A bill (S. 3719) for the relief of Mary J. McLaughlin; to the Committee on Military Affairs.

By Mr. WEEKS:

A bill (S. 3720) for the relief of Ellen Driscoll; to the Committee on Claims; and

A bill (S. 3721) granting a pension to Sarah I. Westcott (with accompanying papers); to the Committee on Pensions.

By Mr. THOMPSON:

A bill (S. 3722) granting an increase of pension to Godfrey Bohrer (with accompanying papers);

A bill (S. 3723) granting a pension to Ben F. Perkins (with accompanying papers); and

A bill (S. 3724) granting a pension to Josh De Grafinreid (with accompanying papers); to the Committee on Pensions.

By Mr. SMOOT:

A bill (S. 3725) granting an increase of pension to Thomas E. Keith (with accompanying papers); to the Committee on Pensions.

By Mr. PENROSE:

A bill (S. 3726) for the relief of Owen S. Willey; to the Committee on Naval Affairs.

By Mr. DILLINGHAM:

A bill (S. 3727) granting a pension to Olive A. Foster (with accompanying papers); to the Committee on Pensions.

By Mr. SUTHERLAND:

A bill (S. 3728) granting an increase of pension to Spencer Phillips; and

A bill (S. 3729) granting a pension to Harrison Pierson; to the Committee on Pensions.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. NELSON submitted an amendment relative to the Wisconsin band of Pottawatomie Indians, intended to be proposed by him to the Indian appropriation bill, which was referred to the Committee on Indian Affairs and ordered to be printed.

Mr. PENROSE submitted an amendment relative to an increased allowance for postal employees, intended to be proposed by him to the Post Office appropriation bill; which was referred to the Committee on Post Offices and Post Roads and ordered to be printed.

ADJUDICATION OF PRIVATE CLAIMS.

Mr. GALLINGER submitted an amendment intended to be proposed by him to the bill (S. 1795) to relieve Congress from the adjudication of private claims against the Government, which was ordered to lie on the table and be printed.

FUNERAL EXPENSES OF THE LATE SENATOR HUGHES.

Mr. FRELINGHUYSEN submitted the following resolution (S. Res. 197), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Secretary of the Senate be, and he hereby is, authorized and directed to pay, from the miscellaneous items of the contingent fund of the Senate, the actual and necessary expenses incurred by the committee appointed by the Vice President in arranging for and attending the funeral of the Hon. WILLIAM HUGHES, late a Senator from the State of New Jersey, upon vouchers to be approved by the Committee to Audit and Control the Contingent Expenses of the Senate.

Mr. THOMPSON subsequently, from the Committee to Audit and Control the Contingent Expenses of the Senate, to which was referred the foregoing resolution, reported it without amendment, and it was considered by unanimous consent and agreed to.

EMPLOYMENT OF ADDITIONAL CLERK.

Mr. FLETCHER submitted the following resolution (S. Res. 198), which was read and referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Committee on Commerce of the United States Senate be, and it is hereby, authorized to employ an additional clerk at the rate of $120 per month, to be paid from the miscellaneous items of the contingent fund of the Senate, until the end of the present session of the Sixty-fifth Congress.

COST OF OFFICERS' UNIFORMS.

Mr. TOWNSEND. Mr. President, I noticed from the reading by the Secretary that the Senator from North Carolina [Mr. OVERMAN] reported this morning, from the Committee on the Judiciary, a bill for protecting the civil rights of members of the Military and Naval Establishments of the United States engaged in the present war. That reminds me of the fact that the Senator from Washington [Mr. JONES] introduced a bill on January 9 relative to protecting the officers of the Army and the Navy against the robbers who constantly prey upon these officers whenever their necessities require them to purchase from these human sharks, and I am wondering what is the status of the Jones bill.

Mr. CHAMBERLAIN. Mr. President, that bill is now before the Committee on Military Affairs, but the committee has been so engaged all of the time that it has been difficult to report any bill; but we do hope to get that bill acted upon by the committee in a very short time. The Secretary of War is to appear before the committee in a very little while. I think the department itself has the power to permit the purchase of uniforms in the Quartermaster's Department, and I do not know why it is not allowed; but we are going to bring that matter up at a very early date.

Mr. TOWNSEND. I am very glad to hear that statement. I know the committee have been very busy and I am not criticizing them at all, but I feel that this question of profiteering at the expense of our soldiers and sailors is a live one which should be solved. The question of increasing the allowance for quarters or commutations for officers of the Army and Navy is also of the utmost importance. I hope when we get through with these other matters which seem to be especially emergent now, that the men who are making supreme sacrifices for their country will not be longer neglected. Our officers are obliged to pay a profit of from 100 to 1,000 per cent to dealers who for their nefarious conduct in this particular should be branded and treated as enemies of their country. At nearly every place where our soldiers or Federal employees are collected they are surrounded by profiteering landlords and dealers in supplies. This Congress should deal effectively with these worse than alien enemies.

A STUDY OF THE UNITED STATES SENATE.

Mr. FLETCHER. Mr. President, I have here a document entitled "A Study of the United States Senate." I should like to

have it referred to the Committee on Printing with a view of having it printed as a document.

The VICE PRESIDENT. It will be so referred.

HOUSE BILL REFERRED.

H. R. 9654. An act making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1919, was read twice by its title and referred to the Committee on Agriculture and Forestry.

DISTRICT ATTORNEY FOR RHODE ISLAND.

Mr. GERRY. Mr. President, I ask unanimous consent for the present consideration of the bill (S. 2116) to increase the salary of the United States district attorney for the district of Rhode Island.

The VICE PRESIDENT. Is there further morning business? If not, morning business is closed. The Senator from Rhode Island asks unanimous consent for the present consideration of the bill named by him. Is there objection?

Mr. SMOOT. Mr. President, I am not going to object to the consideration of this bill, but I shall object to the consideration of any other bill on the calendar out of its order.

Mr. GALLINGER. Mr. President, when the bill the consideration of which is asked for by the Senator from Rhode Island was once before the Senate, I asked that it should be postponed until I could ascertain what were the salaries of similar officials in the other New England States. I find there is a great discrepancy in those salaries. This bill, as a matter of fact, gives a larger salary to the district attorney in Rhode Island than the salary of the district attorney in New Hampshire; but I presume there are some special reasons for that increase. Inasmuch as the committee has examined the bill, I will make no objection to its present consideration.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (S. 2116) to increase the salary of the district attorney for the district of Rhode Island, which had been reported from the Committee on the Judiciary with an amendment, in line 5, after the words "rate of," to strike out "$5,000" and insert "$3,500," so as to make the bill read:

Be it enacted, etc., That from and after the passage of this act the salary of the United States district attorney for the district of Rhode Island shall be at the rate of $3,500 a year.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. HITCHCOCK. Mr. President, a few days ago I gave notice that to-day I should present to the Senate as concisely as possible the reasons which have led the Committee on Military Affairs to recommend the passage of two bills. One creates the office of director of munitions; the other creates a war cabinet of three persons. In both cases, of course, the President would make the appointments.

The Military Affairs Committee voted to support these bills after a month and a half of almost continuous daily meetings. During this time it took much testimony—most of it public and now in printed form, and some of it of such a confidential nature that it was not reduced to writing.

By the 20th of January the committee was practically a unit in reaching the conclusion that the disclosures called for drastic action. When I say the committee I mean those members of it who had been in regular attendance at the hearings and who were familiar with the testimony. The question then arose as to what action the committee should take. Should it merely present the testimony to the Senate and denounce the various officials whose departments or bureaus had failed to perform their work?

The committee might have done that; that was perhaps the natural course to take; that is the course often taken by committees, where departments are found to have broken down and failed in their duties; but, Mr. President, the committee felt that such a report would be inadequate; the committee felt that it would not do simply to make scapegoats of a few officials; it felt that the higher duty of the committee was to point out a remedy for the future, and so it reported these bills.

At this point, Mr. President, I deem it proper to say that, without regard to the action taken by the Democrats of the committee, the action of the Republican members was particularly patriotic and loyal. They waived any possible political benefit which their party might have derived from denouncing those in power, and willingly joined their Democratic associates in pointing out what they felt would remedy the evils in the future.

Mr. MYERS. Mr. President, may I ask, for information, if both of the bills referred to have been reported? I was under the impression that only one of them had been reported.

Mr. HITCHCOCK. The bill providing for the director of munitions was formally reported. The committee voted to report the other bill; but, there being some question as to whether it had the right to report a bill under any objection when it had not been first formally introduced, a formal report has not yet been made, and I may say is being withheld for a variety of reasons. The one which moves me particularly is the hope that, after a proper exposition of the situation, the President himself and his advisers may be led to look with favor upon the bill, and may possibly suggest some amendments to it which would meet with presidential approval. So, Mr. President, the committee took that action. We felt we ought to do our part to give to the Executive in this hour of crisis up-to-date, approved, and tried governmental machinery to conduct the great affairs of war.

We found in the present system such an obsolete and cumbersome organization as to make efficiency very difficult and well-nigh impossible. We found in the War Department, particularly, provisions for checks, delays, debates, and disagreements, but little or no provision for action and decision.

We found the war machine much better equipped with brakes than with motive power. We found divided responsibility and doubtful authority in many places.

These conditions are particularly serious in the bureaus of the War Department charged with the duty of supplying and equipping the Army. Confusion of authority, red tape, circumlocution, and incapacity have borne their natural fruit. Nine months after we entered the war and three months after our men were gathered in cantonments, in the dead of winter, we found tens of thousands of men without overcoats, tens of thousands lacking woolen breeches, tens of thousands without woolen blouses, and other serious shortages. We found most of the machine-gun companies unable to drill two months after they were formed because they had no machine guns. Even in December we found 1,200 machine guns still kept in storage for some foolish and inexplicable reasons while each camp had only been supplied with about 80 machine guns.

We found hundreds of thousands of men drilling with wooden sticks for weeks and months because of mistakes and delays in ordering rifles last spring. We found men sent to France without opportunity for rifle or machine-gun practice. We found a distressing amount of sickness in most camps and an unnecessary mortality due to lack of clothing and to overcrowding. The overcrowding we found due to a failure to provide an adequate number of tents. We found camp hospitals without drainage, plumbing, or heat, and sick men without nurses.

We found that we must depend on overworked and overstrained France for machine guns for ground use until nearly the end of this year, and that not over one-tenth of the new Browning machine guns on which we are to rely can be delivered before August.

We found that the first heavy artillery of American make can not be received until July, and not much before 1919 can we expect to use in France American heavy artillery in any great quantity. What we get before this fall we must buy from England.

Mr. KIRBY. Mr. President——

The VICE PRESIDENT. Does the Senator from Nebraska yield to the Senator from Arkansas?

Mr. HITCHCOCK. I yield.

Mr. KIRBY. The Senator in his disenssion says, "We found" at the beginning of practically every sentence, and I want to know if he means by that that the committee found, or is that his own individual interpretation of what the evidence discloses?

Mr. HITCHCOCK. I mean those who attended the meetings.

Mr. KIRBY. Then, I will ask if the committee has made any finding at all as such and reported anything?

Mr. HITCHCOCK. It has not.

Mr. KIRBY. Has it made any findings as a committee?

Mr. HITCHCOCK. As I have said, it voted to report two bills to remedy the troubles which it found.

Mr. KIRBY. That is what I wanted to know.

Mr. HITCHCOCK. We found that we are only now, nine months after entering the war, just beginning work on two great powder plants, costing $90,000,000, the powder from which will not be available until next August. We found that we need a million pounds of powder a day more than America is producing. We found that the need of this powder was known last spring, and that now for the first time we are beginning to build the factories in which the powder is to be made.

We found that though the Medical Department asked for hospital ships last July they have not yet been ordered, though sick and wounded men are now already beginning to come home, and it will take three months to equip the ships.

I do not deny that we also found much that was creditable and satisfactory. The task undertaken was a huge one and much of the work has been ably done. Personally, I know that some of the War Department officials who have been most severely criticized have worked desperately hard. This comment covers the Secretary of War himself, who has had a burden of detail which has kept him at his office all day and far into the night most of the time. These considerations lead me to hold a defective organization responsible for the shortcomings to a greater degree than any individual or group of individuals.

If a high-class business man could be made director of munitions and be given power to buy all supplies needed by the various bureaus of the War Department, he would soon bring order out of disorder, cut red tape, stop delays, and furnish the Army with its supplies promptly and economically. We would then locate and centralize responsibility and authority. The business of supplying the department would be run on up-to-date methods of great business concerns. Great Britain had to come to it. France had to come to it.

In both cases it was resisted. In both cases it proved necessary, and has been a tremendous success.

I have here, and I should like to read it if I had the time, a speech delivered in the House of Commons during the last year by the Minister of Munitions; and, as one of the members of the House of Commons said after the Minister of Munitions took his seat, it reads like a tale of Arabian Nights, so great have been the accomplishments of the Ministry of Munitions since it was established in Great Britain—an enormous increase in production, an enormous reduction of costs, a great increase in the efficiency of the ammunition. Compare that with the disorder, the confusion, the delays, the blunders of our supply departments in the Army!

West Point makes a good soldier, but it spoils a business man, as a rule. To undertake to place in the hands of a West Point graduate, educated for war, the great business duty of going out into the business world and getting supplies in enormous quantities is folly.

No amount of hard work can compensate for lack of business sense and experience. Some of the reported blunders almost surpass belief. I am told, Mr. President, on good authority, that we have ordered 21,000,000 pairs of shoes for our Army, and they will all be delivered before June. What are we going to do with 21,000,000 pairs of shoes for an army of 1,300,000 men? Why, Great Britain, in the three and one-half years she has been in the war, with her enormous army, has not ordered as many shoes as that. Apparently it was an effort to make up for the lack of overcoats by giving an excess of shoes.

Mr. MYERS. Mr. President, may I ask the Senator if he considers that statement authoritative?

Mr. HITCHCOCK. I do, and I have verified it.

Mr. WILLIAMS. Who made the statement?

Mr. HITCHCOCK. I can not tell the Senator where I got it first. I have made inquiry, though, at sources which I deem authoritative, and that is a fact; and I may say, in addition to that, that they have even been considering ordering 7,000,000 pairs more.

Mr. WILLIAMS. The Senator has the statement upon hearsay, and he is giving his hearsay to the country without stating the source of the information.

Mr. HITCHCOCK. Well, Mr. President, I do not want to involve anyone in difficulties by what I may say.

Mr. WILLIAMS. Then, if that is the case, would it not have been wiser if the Senator had not repeated it?

Mr. HITCHCOCK. I am perfectly willing for the Senator to dispute it and bring in any evidence to the contrary. The inquiry that I have made to verify many of my statements has been among men who have come here to serve the Government during the war, and I dislike to get any of those men into trouble; but I assure the Senator they are men in position to know what the records show.

Mr. WILLIAMS. It is all mere hearsay, after all; is it not?

Mr. BECKHAM. Mr. President, may I ask the Senator a question?

Mr. HITCHCOCK. I yield.

Mr. BECKHAM. Was there any evidence before the committee as to this large number of orders for shoes?

Mr. HITCHCOCK. No; that particular figure may not have been before the committee, Mr. President. The fact was before the committee, however, that the Quartermaster Department had supplied the various camps with shoes so small that the men could not wear them. I have learned the reason for that, and it is a very interesting reason, that I should like to give. It seems that the records which they have been using to decide upon the sizes for shoes are the records of the Civil War; and during the Civil War so many boys in their teens were taken into the service that the sizes of shoes were phenomenally small; so that instead of making any study of what the average size ought to be for grown men, they have been making hundreds of thousands of boys' shoes to supply the present Army.

Mr. FLETCHER. Mr. President, may I ask the Senator a question?

Mr. HITCHCOCK. I yield.

Mr. FLETCHER. Of course, it is realized that shoes wear out and you have to keep on supplying them. It seems to me it becomes important to know when these shoes were to be delivered.

Mr. HITCHCOCK. They were to be delivered by June of this year.

Mr. WEEKS. Mr. President——

The VICE PRESIDENT. Does the Senator from Nebraska yield to the Senator from Massachusetts?

Mr. HITCHCOCK. I yield.

Mr. WEEKS. I wish to call to the attention of the Senator from Nebraska the fact that the committee hearings contain a list of the contracts made for shoes, and, of course, the total number of pairs of shoes ordered; and it is between twenty and twenty-one million pairs.

Mr. HITCHCOCK. I did not remember that fact. I am sure of the figures, however. I have no doubt of it in the world, because I did not content myself with one verification.

Mr. WARREN. Mr. President, will the Senator permit me to interrupt him?

Mr. HITCHCOCK. I yield.

Mr. WARREN. Does the Senator know whether any portion of that large number of shoes was ordered for our allies? I am asking for information. I do not know myself.

Mr. HITCHCOCK. It was reported as having been ordered for our Army. I do not suppose the War Department could have ordered anything for our allies. They make their own purchases, under proper regulations. I hope our allies will be kind enough to take some of the surplus off of our hands, however. [Laughter in the galleries.]

The VICE PRESIDENT. The occupants of the galleries must keep quiet. The Chair is not going to say that very many times more in the Senate.

Mr. HITCHCOCK. Mr. President, I am told that one order of iron bolts affords a picturesque example of the methods used in the supply department. This order specified 325 different sizes of iron bolts, and it provided that the manufacturers should supply exactly the same number of each of the 325 sizes. Here were sizes commonly used and sizes rarely used, sizes current and sizes obsolete; and this genius in the department is reported to have ordered 170,688 of each of the 325 sizes! The order was sent back to the War Department twice, because the commercial world could not believe that such a preposterous order was intended; and the order embraced over 100 carloads of bolts.

Mr. VARDAMAN. What are those bolts used for?

Mr. HITCHCOCK. I suppose they are used in construction work, probably in France. I am glad to say that the matter has been sent back a third time. This time to Gen. Goethals, and I have every reason to believe that the order will be modified.

I am told that some genius in one of the War Department bureaus succeeded in shipping to France in our much-needed cargo space a carload of sawdust, and that when it was received there by an American official engaged in the work of construction behind the lines he swore a streak that was blue and long about the follies of the War Department here, because if there is anything that is common and anything easily obtained in France it is sawdust.

Mr. TOWNSEND. Mr. President, does the Senator mean a carload or a cargo?

Mr. HITCHCOCK. I understood it was a carload. I hope it was not a cargo.

I have understood that 150 tons of meat taken over to France in one of our cargo ships, and receipted for on the other side, was brought back to Hoboken, and then they discovered that it had spoiled on the way, because the refrigerating plant had been turned off, and the compartment in which this 150 tons of meat was located had never been opened.

SEVERAL SENATORS. Why?

Mr. HITCHCOCK. Echo answers, "Why?" Why do a lot of these things happen?

Mr. MARTIN. Mr. President, I will ask the Senator if that is a mere rumor, or if he has any evidence of the correctness of the statement?

Mr. HITCHCOCK. That is a report that was widely published some months ago and never denied by anybody.

Mr. MARTIN. I do not know that anybody is called on to deny all the vague rumors that are published in the press, but I suggest to the Senator that it is hardly likely to be true.

Mr. WILLIAMS. Would the Senator mind telling me where it was published?

Mr. HITCHCOCK. It was published in the Philadelphia Ledger by Mr. Colcord, who for three months has been rendering a great service to his country by visiting shipyards, discovering the facts, and exposing the evils; among other things, exposing the folly of the Shipping Board's prediction that it would build 6,000,000 tons of ships this year when everybody with information knew that half that tonnage was barely possible.

Mr. WILLIAMS. I did not catch the man's name.

Mr. HITCHCOCK. Mr. Colcord, of the Philadelphia Ledger, a man who has been on the ground and has been investigating day after day.

Mr. WILLIAMS. He was the father of this report?

Mr. HITCHCOCK. He was the man who published the report, and no man has denied it.

Mr. WEEKS. Mr. President, if I may interrupt the Senator once more, I will remind him that that matter was brought up in the committee, and either the Quartermaster General or the Secretary of War was asked the question if it was true, and he stated that it was and added some other matters connected with it.

Mr. WILLIAMS. What was that—about the sawdust or the meat?

Mr. WEEKS. The spoiled meat.

Mr. MYERS. Mr. President, may I ask the Senator if he does not consider the fact that that meat was returned to this country a blunder of somebody on the other side in shipping it back? How can he charge that as a blunder to the purchasing department on this side?

Mr. HITCHCOCK. It was a blunder of somebody in the Quartermaster Department who was on the ship and did not unload it; and I will say, furthermore, that that is not the only case in which cargoes have been brought back to this country. The fact is that we have taken over munitions of war in our ships and brought tons and tons of those same munitions of war back to this country because ballast was not conveniently to be had on the other side. It has been brought back as ballast and made the extra trip across the ocean.

Mr. MYERS. The Senator does not deny, then, it seems to me, that the blunder there was a blunder of somebody perhaps in the Quartermaster Department on the other side in the execution of matters and not a blunder of anybody in the purchasing department on this side.

Mr. HITCHCOCK. Possibly it was. I have not located the blunderer. I am telling of the egregious blunders that are occurring and which are costing this country dearly and embarrassing us in the war.

Mr. MARTIN. Mr. President, I will ask the Senator if he has brought these matters to the attention of the War Department?

Mr. HITCHCOCK. In many cases I have.

Mr. MARTIN. The Senator is mentioning them here on the floor of the Senate. It seems to me he should have brought them to the attention of the department.

Mr. HITCHCOCK. I have made myself a nuisance to the Secretary of War by bringing things to his attention; and, in my opinion, the Secretary of War ought not to be troubled with these details. He is completely overwhelmed with complaints and details all the time. He has little time to plan out the great affairs of the war.

Mr. MARTIN. Mr. President, I have been to him a good many times and he has heard what I had to say with the utmost patience and has found a way to remedy nearly everything that I have brought to his attention; and in the case of those things that he did not remedy he gave some good reasons why he did not.

Mr. HITCHCOCK. I indorse what the Senator says, that Secretary Baker has been patient, painstaking, and energetic, whenever a matter has been called to his personal attention, to remedy it; but running a war does not consist simply in listening to complaints and remedying them. The Secretary of War ought not to be compelled to have such matters come to him.

Mr. President, I am giving too much time to these small matters. I have larger ones ahead.

I am told that three different orders were made out for bags for gas masks. One was for a million bags, another for 2,000,000 bags, while a third was for 5,000,000 bags.

Mr. WILLIAMS. Mr. President, does the Senator object to telling us who told him that?

Mr. HITCHCOCK. I shall not give names for any statement I make.

Mr. WILLIAMS. Very well.

Mr. HITCHCOCK. But the Senator, if he will inquire of the proper authorities, will find that those orders were given, and that it was a civilian who discovered the thing and took it personally to the Secretary of War.

Mr. WILLIAMS. I hope the Senator will not misunderstand me and not conclude that I am being hypercritical; but the Senator is taking the country into his confidence, and he is doing it without giving his authority.

Mr. HITCHCOCK. Well, what I say will be open to criticism and open to refutation; and I shall hope that some Senator will stand here upon the floor and undertake to correct some of the statements of fact I make.

Mr. WILLIAMS. As far as that is concerned, it is an ordinary rule of pleading, you know, to enter a general denial when there is no evidence. I enter a general denial.

Mr. HITCHCOCK. I shall leave it to the jury.

Fortunately, one of the civilian committeemen outside of the War Department discovered the conflicting orders and the enormous aggregate, and secured a revision.

I merely cite these things to show the degree of ability we have in our supply departments in the War Department at the present time, what they are doing, what they are trying to do, and what they are failing in doing.

Mr. President, if at the time we entered the war we had created the office of director of munitions, and if the President had placed in it a high-class business man of big vision and broad experience, things would have been different. He would have ascertained at once how many men he had to provide for and what each would require, and when they gathered in the September camps the supplies would have been ready for them. That is the habit and the fashion of the business world. That is the way they do business. We have a great country, full of great facilities for making these things, and they were not used.

The President and the Secretary of War have evidently realized the defect in the existing system and have attempted to change it without legislation and therefore without success.

First, they organized the Advisory Commission of the Council of National Defense, with its many and various committees of civilians. Still failing to get successful results they next organized the General Munitions Board. After that board had been in operation for some time they reorganized again and created the War Industries Board. Still finding inefficiency and a failure to get results they then took Gen. Crozier out of the Ordnance Department, Gen. Sharpe from the Quartermaster's Department, and, with several other officers, placed them in a war council. Then a director of purchases was selected to preside over the five purchasing bureaus of the War Department.

Unfortunately, however, the able officer who was placed in the position of director of purchases was himself only a colonel, and he was supposed to give orders to major generals and brigadier generals under him. These major generals and brigadier generals are heads of various supply bureaus in the War Department. The plan was unworkable, even if the officer himself is as capable as a business man.

Mr. GORE. Does that still continue?

Mr. HITCHCOCK. I do not know certainly. Some of the changes have become obsolete. It has been a regular kaleidoscope here of changing bureaus, until it has been confusion worse confounded, and anyone coming to town bringing an idea, bringing a plan, attempting to help the Government has worn himself tired in trying to find where to go. Every Senator knows that difficulty. There is probably not a Senator here upon the floor who has not found it from time to time almost impossible where to advise his constituents to go. He starts them out on the road to the War Department, and they have been referred to a bureau and then to a division and then to a colonel and then to a major and then to a captain, down finally to a lieutenant, and then finally they have run out of the basement and been unable to find anyone with authority to act. It is like the old story of a man who started to go somewhere in the country and followed the directions which were given him. He first walked upon a broad highway, and then he was directed into a country road. Then he was directed into a cow path, and he followed the cow path until it turned into a squirrel track and ran up a tree. [Laughter.] It has been very much that way, Mr. President, with people who have undertaken to do business here in Washington during these war times.

Mr. McKELLAR. Will the Senator yield?

Mr. HITCHCOCK. I yield.

Mr. McKELLAR. In reference to the statement the Senator made a few moments ago about the number of shoes that had been ordered, on page 893 of the hearings it will be found that there were ordered and contracted for between March 27, 1916, and December 31, 1917, 21,117,612 pairs of shoes. I just wanted the actual facts to be shown.

Mr. HITCHCOCK. I thank the Senator for this proof. I have not undertaken to delay the Senate with proof. I am stating facts as I have found them.

But to go back. Finally the Secretary of War or some one in authority has realized the impossibility of the colonel acting as a superior officer to Maj. Gen. Goethals and the other major generals and brigadier generals at the head of the supply departments in the War Department, and now the next step has been taken. Since the introduction and its report to the Senate of the bill providing for a director of munitions another step has been taken. By administrative orders the office of surveyor of purchases was created, with rather vague and doubtful authority and somewhat undefined duties. He has no power to make war purchases, because legislation is necessary to vest him with power. The power under legislation is in the officers in the War Department. The President can not give the surveyor of purchases power to take away authority from the officers. The legislation must come from Congress. All this new official can do as a matter of law is to give advice. In this position has been placed one of the best of business men, Mr. Edward Stettinius, a man of broad experience, big vision, and acknowledged ability in his line. He served the allies for many months, and if he were vested with power he would be, in my opinion, a great director of munitions. But the same folly has once again been created in putting a strong man merely in an advisory position for the purpose apparently of avoiding an acceptance of the self-evident reform which has been in existence in England for nearly two years and in France for about the same length of time.

All of these experimental efforts are made when experience shows that the simple, direct, and effective method is to change the law; to take the power of purchase out of the hands of military men and put it in the hands of a business man who will act on business methods in making purchases and in planning ahead for purchases. So much for the director of munitions.

Mr. President, this brings me to the war cabinet. This bill has been received with a strange degree of antagonism, yet it is based on experience in Great Britain and to some extent in France. Great Britain found the same weakness which we have found, and overcame it by establishing a war cabinet.

Some question was raised the other day as to the character of the war cabinet in Great Britain, so I applied to the British Embassy here for information. This is the information I get. The war cabinet is composed as follows:

Mr. Lloyd George, Lord Milner, Lord Curzon, Mr. Bonar Law, Mr. G. N. Barnes, Gen. J. C. Smuts.

Mr. Bonar Law is the only member of the war cabinet holding a portfolio, and none of the others are chiefs of any departments. They have no departments to run.

That is what our war cabinet ought to be. We have been told through the press that in high places this is considered as an invasion of the President's right and authority. If so, Congress invaded his right and his authority when it created recently the Department of Labor. If so, it has invaded his authority every time in recent years when it has added a member to the Cabinet. Congress is the only power that can create these executive departments, and the creation of them is intended to facilitate the exercise of administrative power belonging to the President.

As a matter of fact, this bill is no different from any other bill which creates an office whose occupant is to be named by the President and confirmed by the Senate. The three men appointed to the war cabinet by the President would be his personal selection. They would be subject to his instructions. They would perform powers vested in him. They would be subject to removal by him, with cause or without. He would have the power, if he pleased, to appoint Secretary Daniels, Secretary Baker, and Secretary McAdoo to the war cabinet, provided they retired from the positions which they now hold in the three great departments of which they are the heads. He could appoint all three of them or any one of them to membership in the war cabinet.

A consideration of this fact, Mr. President, demonstrates that it is not intended, and could not be intended, by the creation of a war cabinet to embarrass the President or to curtail his power. His powers would remain just the same afterwards as before. As a matter of fact, the creation of a war cabinet is intended to aid in carrying on the war. It is intended to give to the President additional powers and machinery through which to act. It is intended to strengthen the administration and to coordinate Government functions which are now operating more or less without coordination. It neither adds to nor subtracts from the presidential power. He has now the power to coordinate all the heads of departments and bureaus and boards of government, but he does not do it and can not do it; neither could any other man in the Executive office. His power to coordinate is only theoretical and nominal, because he lacks the machinery of government through which to exercise it.

We all know that even in peace times the office of President is burdensome beyond the strength of the ordinary man. From early morning until bedtime he is under a pressure. He has close relations with the 10 executive heads of great departments, is liable to visits from nearly a hundred Senators and more than 400 Representatives, distinguished out-of-town visitors, governors of States, mayors of cities, writers of books, seekers for office. It is not necessary for me to recite the many tasks that call on the President's time and the heavy burden he struggles under. A vast correspondence is constantly arriving at the White House, the diplomatic representations of other nations take some of his time, and in war times like these it might well take all of the President's time in the study of the delicate and intricate foreign relations which mean so much to the United States. He is his own foreign minister. Legislative matters often require much study and many conferences. Thousands of commissions and tens of thousands of letters must be signed. A daily program of current reading follows. This indicates the presidential life in time of peace. Suddenly the Nation is plunged into war. Congress could do nothing better than to vest in the President a lot of additional powers. He appointed men to exercise them so that now he has the oversight not only of the executive departments represented by the two so-called Cabinet meetings each week but of many additional war bureaus. Some exist by authority of Congress, some without it. Let me mention some of them:

1. The Board Controlling Priority of Freight Shipments.
2. The Raw Materials Board.
3. The War Industries Board.
4. The Food Administration.
5. The Fuel Administration.
6. The Shipping Board.
7. The Aircraft Production Board.
8. The Allies' Purchasing Board.
9. The War Trade Board.
10. The Director General of Railroads, and a number of others, all exercising great functions of war.

Can the President coordinate them? Can he give the time to bring them together and harmonize them in the proper work without any machinery to do it? It is utterly beyond the possibility. These great war bureaus should be focused in some authority that would harmonize them and coordinate them. That is what is proposed in the bill for a war cabinet of three men. At present these bureaus are running independently and sometimes running wild. The nearest approach to a coordination is an occasional conference of one bureau with another or with the President.

Mr. President, yesterday I found in the New Republic an article by William Hard entitled "The Senate speaks," from which I shall undertake to read two paragraphs. It illustrates from Biblical story the real desire that the Military Committee has in reporting these bills. It is the desire to strengthen and hold up the hands of the President. Mr. Hard says:

Mr. President, much is said about "holding up the hands" of the President.

Aaron and Hur held up the hands of Moses. They were the first recorded holders up of hands. They held up the hands of Moses, but they did not hold them up by saying they were up. They held them up by holding them up. For the hands of Moses were heavy. They were heavy with many labors. And Jethro said to him:

"What is this that thou doest to the people? Why sittest thou thyself alone? Thou wilt surely wear away, both thou and this people that is with thee; for this thing is too heavy for thee; thou are not able to perform it by thyself alone."

And so his hands were heavy. He insisted on being the whole legislative overhead as well as the whole administrative overhead of Israel. He insisted till there came a war. And his hands were so heavy that he let them down. And when he let them down, Amalek prevailed. And doubtless many of the children of Israel stood afar off, helping by applauding. But Aaron and Hur went up to the hill where Moses sat, and they took a stone and put it under him, and stayed up his hands, this one on the one side and the other on the other, and Amalek was discomfited with the edge of the sword.

Aaron and Hur were not lip-service loyalists and lackeys. They have been traduced. Aaron and Hur were the first historic special war cabinet.

Mr. President, it is not going to do any good for us to say the President can do it alone. We have got to furnish him with the machinery if we want to help him.

I have said a weak attempt at coordination was made by Congress. We created a Council of National Defense, but unfortunately we placed upon it, or authorized the President to place upon it, six overworked Cabinet officers. You can not get good service from overworked men. You can not get plans. You can not get valuable services from men who are buried up to their eyes in work from early morning until late at night. England tried it and failed, and every other country that has tried it has failed.

This body of weary men meets only twice a week in the Council of National Defense, and often there are only three of them there. The others are called hither and yon. The only vital force in the organization of the Council of National Defense is the director, Mr. Gifford. He has rendered a great service, but it has been only an advisory service. Mr. Gifford is merely an advisor. We have brought great men here to Washington—great business men—but merely placed them in advisory positions instead of positions where they would have power to act.

Let me return to the members of the Council of National Defense. When war came two, at least, of their departments were thrown into a feverish state of activity—the War and Navy Departments. They were enormously expanded and enlarged. Their chiefs were overwhelmed with a great burden of increased work. They are at their desks from early morning till late at night. They have no time even to think of anything outside of their immediate pressing problems. To give them outside functions and responsibilities means to overburden them and make certain that the work will not be done. Therefore, when we took a number of these overworked department chiefs and constituted them a Council of National Defense we did a vain thing. To be of any value as a coordinating body the Council of National Defense should be composed of men having no other duties and vested with full power. Being composed of men already overworked, the council has proved to be merely a name, without activity, without energy, and without life. Realizing this fact, an effort was put forth to make it a reality by adding to it an "advisory commission" of men from the business world. This brought to Washington many able men who served on various committees of the advisory commission of the Council of National Defense. But it added to the complication and confusion. These men found they had in law no power. They found no organization or coordination. One by one they have gradually become discouraged and many have already resigned and retired to private life. Many of those still persisting talk freely of the disorder and lack of system in the war activities of the Government, and all of them believe that we ought to have something the equivalent of a war cabinet.

Look at the situation as it presents itself to-day, nine months after we entered the war, and even before we have fought a battle.

I have already spoken of the supply departments of the Army. Now let us look at some of the activities entirely outside of any of the 10 executive departments. Take the matter of transportation. It is not too much to say that the great transportation system of the United States has broken down. It is a gigantic wreck to-day; even travel has become difficult. Freight shipments are demoralized to such an extent as the country has never known anything of. Anticipating troubles of this sort, Congress authorized the control of shipments, and the granting of priority of shipments became one of the functions of government. How is it exercised?

It is exercised in such a way as to make "confusion worse confounded"; and on some of the roads 80 per cent of the freight has been traveling on priority orders, with no discrimination and no one to select. Every department of Government, apparently, from the smallest quartermaster's clerk up to the highest official, was permitted to blue-tag Government shipments and give them priority regardless of whether there was any hurry for their transportation or not. There was no one to coordinate, no one to differentiate, no one to select, and the great mass of Government shipments was permitted to clog the channels of transportation. Anchors for ships not yet built were rushed to their places of destination months before they could possibly be used. Hundreds of carloads of piles for construction work were rushed across the country and allowed to remain upon the cars for weeks, because the time had not yet come to use them. There was no supreme power, apparently, to limit the enormous and dangerous control of priority shipments, and the whole transportation system of the country was thrown into confusion. There was no one to coordinate priority orders with the needs of the country; no one to differentiate, to select; and the great mass of Government shipments was permitted to clog the channels of transportation, regardless of whether there was any hurry for those shipments or not. A priority order has become a joke.

Mr. SMITH of Georgia. Then, Mr. President, were we not responsible for passing such a broad law, allowing these priority orders?

Mr. HITCHCOCK. Well, Mr. President, I suppose we must assume our share of the responsibility; but if there had been a war cabinet, where the director of priority orders would come in contact through the cabinet with the Administrator of Fuel, with the Administrator of Food, with the Shipbuilding Board, with the Aircraft Board, and with the other War Department activities, there would have been some coordination of faculties, and priority shipments would have had some relation to their importance.

Mr. SMITH of Georgia. Then, Mr. President, does not the Senator really think that we, in passing the legislation, ought to have put a limitation upon the use of priority orders so as to have made it impossible for this confusion to have arisen?

Mr. HITCHCOCK. That would undoubtedly have made matters better.

Take the matter of contracts for production. Obviously, in contracting for production of supplies for Europe, some sort of regard should have been had for the capacity of our ships to take them, yet various bureaus have rushed production in factories to an enormous extent until there are now piled up on the docks of a few great harbors nearly 2,000,000 tons or more of freight awaiting shipment, and every day adds to the mass and makes the confusion more confounded, and the pile grows larger day by day. Some of the men who had been manufacturing these products ought to have been employed in building ships; and they would have been so employed if there had been a war cabinet to coordinate these two great energies. Here again there has been no power to coordinate between production and transportation across the Atlantic. Now, we must begin to curtail production.

Again, in the selection of factories for the manufacture of goods, care should have been exercised not to congest population beyond the housing possibilities, but enormous contracts have been made which required the concentration of tens of thousands of workmen without anyone planning ahead for the housing of the extra men.

Again, it may be said that one of the inevitable results of the war is that manufacturing institutions engaged in peacetime occupations will find a falling off in the demand, and factories will become to some extent idle. That occurs in every country; and where the demand falls off those factories will become unprofitable and may have to close. They should receive Government orders; Government orders should be distributed to them. Instead of supplying work to these factories the tendency has been to mass the work in factories of a few States and congest the labor population, so that to-day there are thousands of factories in the country with facilities for doing Government work, or capable of being transformed so they can do Government work, which have lost a large share of their occupations of peace and are not in receipt of any Government work, so that the lines of idle men are already appearing in those Central and Western States, while there is an enormous shortage of labor in the congested regions. If we had had some power of coordinating the work of various bureaus, this evil would not have resulted. Our industrial establishment is likely to break down. We have had no one to coordinate; no one who was in touch with the Aircraft Board, the Shipping Board, the War Supply Department, or any of the other departments requiring production; no one to coordinate them and see that all of the mass of production was not centered within a few miles.

Take the matter of the Fuel Administration. Congress authorized the control of the fuel of the country, and an attempt has been made to control prices, supply, and distribution, but it has apparently been made without any successful effort to coordinate the work with other functions of the Government. To-day we have a fuel famine in the country, not because we lack productive mines but because they have not been permitted to operate. Lack of knowledge, lack of transportation, and lack of harmony between the Fuel Administration and other functions of the Government are the causes of the breakdown.

I am impersonal in what I say. I am not attributing any part of the failure to the Fuel Administrator, though some would attribute it to him; but I am saying that it is the system which is chiefly at fault—the failure to have any coordination between his bureau and the others.

If there had been some authority which could have brought the Fuel Administration into close contact with the mining and labor interests of the country and with the war industries of the coun-

try, as well as into conference with the Priority of Shipments Board and other branches of the Government, much of the present breakdown could have been prevented. But the Fuel Administration, like the Food Administration, the War Industries Board, the Raw Materials Board, the Priority of Shipments Board, the Shipping Board, the Aircraft Production Board, and all of the other boards, was running an independent course. Its activities were not focused with the other activities at any point. Its decisions were reached and its orders were made practically as though the others did not exist. It started trouble last summer by fixing prices for coal at such figures as to make impossible the operation of hundreds of small mines. It reached a climax in midwinter by closing arbitrarily for more than a week thousands of industries, throwing millions of laborers and clerks out of work and causing the loss of millions of dollars.

The Aircraft Production Board, straining every nerve to secure aircraft and aircraft materials, already two months behind on its program, found its production interfered with. The allied Governments, purchasing in this country products necessary to the war, found some of their factories embarrassed. The Shipping Board, waiting for materials from certain plants, found their program interfered with. Almost every other department of the Government stood aghast at the revolutionary character of an order that they had no knowledge of until it appeared in the public press. I know it may be said that there was a conference, but, as a matter of fact, the thing which had been discussed at the conference was not the thing which was brought out in Mr. Garfield's order. It is true that following the order constantly increasing lists of exceptions were made so as to remedy in part the evil that had been inflicted and the damage that had been done, but the illustration shows the evils of Government bureaus operating without coordination. It is safe to say if there had been a war cabinet to which this order could have been submitted to the acid test of its effect on the various branches of the Government and industry it never would have been issued in its existing form.

Take the Shipping Board. That was an authority of law created nearly a year and a half ago, in the fall of 1916, months before we got into the war. It has been running as an independent branch of the Government, coordinating with nothing else whatever. For months it was more than a dismal failure; it was a farce and almost a crime. Even since it got into more vigorous operation it has been enormously handicapped and embarrassed because there has been little or no coordination of its energies and operations with the energies and operations of other branches. It has needed materials; it has needed labor; and every effort should have been made to get the materials and get the labor supply in priority over every other activity of Government. It is a matter of common report, however, that enormous delays have occurred in our shipyards because of their failure to receive materials as well as because labor has been diverted in other directions. I have been told on what I deem reliable authority that 1,000 carloads of ship plates made for the Shipping Board, loaded upon cars at the place of manufacture, were lost in the congestion of freight for more than a month while the shipyards waited anxiously for their arrival. Production of war materials for Europe has been rushed to completion in factories by labor which should have been employed in building ships; and, as I have said, 2,000,000 tons of freight rushed to production are piled up now on our docks and can not be transported because of the lack of ships. These things would have been coordinated if we had had a war cabinet, if we had had some one to coordinate, bring together, and focus these functions of government that are now running wild. Now we have the products filling every warehouse, sidetrack, and dock without the ships to carry them.

The present condition of our shipbuilding is nothing less than shocking. The present supply of shipping is worse than alarming. I am afraid to go too deeply into the figures, for one might be charged with giving information of value to the enemy were one to tell the truth about the present supply of shipping. All who are informed as to the present supply of our shipping were thunderstruck at the statements of Secretary Baker before the Military Affairs Committee. His sanguine predictions as to our ability to ship men to Europe and to supply them when there are exaggerations of the wildest sort.

Mr. PENROSE. Mr. President——

The PRESIDING OFFICER (Mr. HOLLIS in the chair). Does the Senator from Nebraska yield to the Senator from Pennsylvania?

Mr. HITCHCOCK. I do.

Mr. PENROSE. I am curious to know whether any explanation has occurred to the Senator as to how the Secretary of War was so widely apart from the facts in this connection. Had he not been informed, or did his sanguine disposition and hopeful nature lead him to predict a result which the facts did not justify? I am quite curious to know what explanation the Senator has of the attitude of the Secretary of War on this vital question.

Mr. HITCHCOCK. Well, Mr. President, I really am not able to explain and I would not like to attempt to explain the motives which led the Secretary of War to make such a statement. I consider it reckless. I think it a terrible thing to mislead the people when the facts are ascertainable. My own opinion is that the Secretary of War has not been in touch with the Shipping Board; that there has been nothing to coordinate the Shipping Board with the other functions of Government; and that there has not been knowledge in high places of what the actual facts were. That is my idea. I do not think the Secretary of War purposely misled the country. Let any Senator take a pencil and paper and figure the matter out for himself. Under the most favorable circumstances it takes 5 tons of shipping to supply one man in France. I mean by that that the ships must sail regularly, cross rapidly, and be loaded and unloaded promptly. These figures take no account of the transports necessary to take men across the ocean. They contemplate only the supplying of men over there. It makes no allowances for sinkings, no allowances for delays, no allowances for bad loading, all of which have already occurred and are still occurring. It makes no allowances for hospital ships that will be needed.

Now, figure up what total tonnage of shipping in constant and effective operation would be necessary to supply a million men in France, supposing we could get them over there. We find that for supply alone it will require 5,000,000 tons of shipping in constant use. Where is that shipping? When are we going to get 5,000,000 tons of shipping? The figures of our shipping have been presented. They are available in the offices of the Shipping Board. I wish I could hope that we will have 5,000,000 tons of shipping for cargo supply a year from now. I hope it, but there is not a brilliant prospect of having it even a year from now.

These figures—5 tons of shipping per man—contemplate only the supplying of the men. They make no allowance for sinkings, no allowance for delays, no allowance for bad loadings, all of which have already occurred; and I have been informed that under the management of the Quartermaster Department our ships have been running at an efficiency of from only 30 to 60 per cent, due to delays, due to bad loadings, due to mistakes and blunders.

Mr. WILLIAMS. Mr. President, I hate to bother the Senator——

Mr. HITCHCOCK. I am perfectly willing to be interrupted.

Mr. WILLIAMS. Does the Senator mind giving his authority for that statement?

Mr. HITCHCOCK. That it takes 5 tons of shipping per man?

Mr. WILLIAMS. No; that the efficiency has been only 30 per cent. The Senator said he was informed of it, but he did not state by whom.

Mr. HITCHCOCK. That is the estimate, and I have made it 30 to 60 per cent because it is an estimate. It has been made by men in whose judgment I have a good deal of confidence; not by one man, but by a number of different men. I have endeavored to verify it. I can not vouch for it absolutely. I hope the efficiency is 100 per cent; but if it is 100 per cent it will still take 5,000,000 tons of shipping to supply our soldiers over there.

Mr. WILLIAMS. Still, the information as to the efficiency is such that the Senator does not care to give it?

Mr. HITCHCOCK. I prefer not to give it. I am even going to avoid putting into the RECORD the actual supply of shipping. I have got it here. I know what the shipping was on the 30th of November. I know what part of it was passenger vessels and tankers, and I have subtracted them, and what part of it was not and can not be in trans-Atlantic waters, and I have subtracted that. The result is so pitifully small that I agree with some others who believe that we are facing an enormous disappointment when the truth finally becomes known to the War Department. It will not do to have a few hundred thousand men or five hundred thousand men or a million men over there and not be able to supply them. We would be face to face with one of the greatest disasters of the world if such a thing occurred. It would be folly to get into such a disaster, and it is a miserable thing for us to live in a fool's paradise and to think that we can do the impossible.

We all know that the total tonnage of shipping available now to the United States is nothing like enough to supply a million men. We all fear that it will not approximate that amount a year from now, even if we build 3,000,000 tons this year, and there are no sinkings and no losses. Yet the Secre-

tary of War, who is compelled to depend on shipping to get his Army and supplies across the ocean, is so out of touch with the Shipping Board and shipping authorities and shipping information that he makes a statement that is absolutely preposterous. I have no doubt of his sincerity, but his act indicates again the extent to which one department is out of touch with another department with which it ought to be coordinated.

We apparently have no authority to plan out a program. No one is deciding how much shipping we have, how much is available for soldiers, how much is available for supplies, and what the margin of safety must be, and the result is that the Secretary of War himself is grossly misled into making an official statement to Congress so exaggerated as to convey an entirely false impression as to what we can do and what we are doing. I can not believe that the Secretary intended it as a gigantic bluff to Germany. I can not believe that he intended to deceive the American people. I think he simply revealed the fact that he did not know; that he was out of touch.

Another feature of the ship-construction program is discouraging, and that is the failure of anybody to provide housing facilities for men who are necessary to build the ships. When the plans were made to construct hundreds of ships at high speed at various places along the coast, enormous contracts were let for the purpose and plans made on a vast scale. The Shipping Board in the past seemed to feel that all it had to do was to let the contracts or order the ship construction to Tom, Dick, Harry, anybody. Now, it has awakened to the fact that the plans can not be carried out without the expenditure of millions of dollars in providing housing accommodations for the tens of thousands of men that are to be drawn together at the shipyards. This means more delay. If we had had a war cabinet to coordinate the various functions of government, that cabinet would have had a housing committee at work upon plans for housing ship employees months ago, but without the proper coordination the ship-building program was stunted and checked because nobody has looked out for the housing question.

Mr. GALLINGER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from New Hampshire?

Mr. HITCHCOCK. I yield.

Mr. GALLINGER. This very morning I transmitted to the Shipping Board a series of resolutions adopted by the Portsmouth (N. H.) Chamber of Commerce on this very point. We have a navy yard there, and the number of employees has been largely increased, and two contracts have been let for the building of ships in the immediate vicinity of Portsmouth—one for wooden ships and one for steel ships. They now find precisely the condition which the Senator has stated—that there is no possibility of taking care of the employees. The chamber of commerce appeals to the Government to provide money and immediately proceed in some way to meet the requirements of the men who must be employed if we are to get any ships built in Portsmouth.

Mr. PENROSE. Mr. President, will the Senator permit an interruption at that point? I do not want to interrupt the Senator if it disturbs him.

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Pennsylvania?

Mr. HITCHCOCK. Certainly.

Mr. PENROSE. I do not know whether the Senator intends to refer also to a question intimately connected with that of housing, and that is the question of transportation. I know that at Hog Island, near Philadelphia, that immense shipbuilding plant is almost inaccessible to the many thousands of men who have to go there and come back every day; and even up to the present time no actual, definite action has been taken to provide transportation.

Mr. HITCHCOCK. That is very true, Mr. President. We have undertaken at Hog Island to construct a Government plant for shipbuilding——

Mr. PENROSE. And the men can not get there.

Mr. HITCHCOCK. What we need is ships. We need them this year. We will not get a ship out of that great shipyard until 1919—not one. It is the greatest shipyard we are to have, and it will not begin to deliver ships until next year. We contracted for 200 wooden ships along the Atlantic coast last summer. A contract was made with a certain concern that got its lumber from the South. I think the contract was made in July. Along about October or November it was discovered that while they could get all the yellow pine they needed from the South for the upper timbers for those 200 ships they could not get any lumber for the keels, that must be laid first, and the floor timbers. So in November they woke up to the fact that they would have to send to Oregon for the floor timbers and the keels, and only now are those coming across the country, and it will be 60 days before all of those will be delivered.

Mr. OVERMAN. Mr. President, why could they not get the timber in the South?

Mr. HITCHCOCK. I am told that there was none large enough there. I do not know any better reason.

Mr. WILLIAMS. That is evidently not true, Mr. President. There is plenty of lumber in the southern pine forests large enough for keels. Everybody knows that who knows anything about the South.

Mr. HITCHCOCK. Well, this is testimony that developed before the Commerce Committee, and I am not very familiar with it; but the fact is that while the contract was made last June or July it was not until November that they woke up to the fact that they had to send to Oregon for the lumber for the keels that must be first laid; and the yards are piled high now with lumber that can not be used because it is only for the upper part of the vessels.

Mr. VARDAMAN. Mr. President, will the Senator give me the name of the company that has made that contract?

Mr. HITCHCOCK. I will say to the Senator from Mississippi that I am not able to do that. It is just a detail that I have mentioned here incidentally.

Mr. VARDAMAN. I suppose I could get it from the records.

Mr. HITCHCOCK. I think it will come out before the Senator's committee. It has already come out there, I think.

Mr. President, the confusion in governmental affairs here is pathetic. It is sickening. I remember that when I was a young man I went to Hampton Court, near London—that great estate which Cardinal Wolsey, I think, finally was compelled to give Henry VIII. One of the interesting features of Hampton Court is a wonderful maze, constructed of some English evergreen growing higher than a man's head. People enter that maze with the idea of finding their way out, and other people stand upon platforms to watch them in their struggles to get out of the place they go into so merrily. They go around and around, and they look through the verdant walls, and they see other people going around, and in a little while there are hundreds of people going through there, and none of them is able to get out without a guide.

It is very much that way here at Washington. People have come to Washington, bright and fresh and hopeful and patriotic, with the idea of rendering some service. They have come to their Senator or their Representative; he has taken them to one department after another, and sometimes after weeks of footsore and patient labor they have discovered that they absolutely need a guide to get out, because of the confusion worse confounded in our governmental organization.

Mr. THOMAS. Mr. President——

Mr. HITCHCOCK. I yield to the Senator from Colorado.

Mr. THOMAS. The Senator, of course, will realize that those conditions, which are unhappily true in every department, are not the result of the war. They have been in existence for more than two generations, and of course they are constantly becoming more complicated.

The Senator doubtless recalls that during the administration of President Taft a very efficient commission was appointed to look into that situation, and to recommend to Congress certain legislation doing away with it. They made an exhaustive report, with recommendations, which, of course, was designed to outline, and I think did outline, some appropriate legislation. The report, if my memory serves me correctly, was filed with the Committee on Ways and Means of the House, where it was pigeonholed, and never has been heard of since. Does not the Senator think that the Congress of the United States is in a very large degree to blame for that situation?

Mr. HITCHCOCK. Possibly; but, Mr. President, I am impressed by the need of a business organization. What we need in the Government at Washington at the present time is a business organization for carrying on these great affairs, and we will not get efficiency until we get it.

Mr. STONE. Mr. President——

Mr. HITCHCOCK. I yield to the Senator from Missouri.

Mr. STONE. I have heard nearly all the speech of the Senator—all except for a few moments, when I was called out. I have listened to it with great interest. As to the particular matter adverted to in the colloquy between the Senators from Nebraska and Colorado, I desire to say that for some reason or other I have not been subjected to the confusion and inconvenience referred to in trying to reach the proper men in the departments.

Now, Mr. President, I think I have an average number of constituents who come to see me, desiring to communicate with this department or that one about the same kind of things that other Senators have to deal with; and I have had very little difficulty, practically none, in finding the officer who could be directly communicated with. That has been my experience.

Mr. HITCHCOCK. I congratulate the Senator; and, having discovered that there is one Senator here who knows the ins and outs of the Government, I shall apply to him in the future when I find myself confused.

Mr. STONE. If the Senator will do so, and will notify me that he desires to see some particular officer of the Government about any particular thing, while I have no means, so far as I am advised, nor right to any means, so far as I am advised, of obtaining the information desired, if the Senator can not find it and will advise with me I will undertake to tell him whom to see.

Mr. HITCHCOCK. I thank the Senator.

Mr. WILLIAMS. Mr. President, would the Senator mind my asking him a very simple question, almost an idiotic one?

Mr. HITCHCOCK. Not at all.

Mr. WILLIAMS. I notice that the bill for which the Senator is vouching mentions, I think, "three distinguished men" of "demonstrated ability" who are to form a war council. Will the Senator please tell me by whom they are to be distinguished, and before whom they are to demonstrate their ability? And then, after he is through with that, will he please tell me what three men he would pick out, or dare pick out, now?

Mr. HITCHCOCK. It is very well known that the President of the United States will have the authority to select the three distinguished men of demonstrated executive ability.

Mr. WILLIAMS. The President of the United States has already selected a Secretary of the Navy and Secretary of War and a Secretary of State who, in his opinion, are three distinguished gentlemen of demonstrated ability. What I am trying to get at is this: You are talking about the need of business ability in connection with this war. I venture to say right now you can not name three men that you would dare offer to take the place.

Mr. HITCHCOCK. I shall not undertake to do it anyhow. I never expect to be elected President of the United States, and until I am I certainly would not undertake to do it.

Mr. WILLIAMS. I am talking about the three men you would recommend the President to appoint. You can not name them.

Mr. HITCHCOCK. I shall not name them. I shall not make the effort.

Mr. WILLIAMS. You can not.

Mr. HITCHCOCK. I am here for the purpose of demonstrating that we will not have coordination of our forces and a bringing together of these various departments and bureaus until we have a coordinating body. I am here to say that the President does not and can not, on account of the limitations of the human system, coordinate them. I am here to say that it is folly to think that the Secretary of War, the Secretary of the Navy, or any other Government officer can perform coordinating functions when he is up to his eyes from early morning until late at night in the details of his own department, and it is because he can not do it——

Mr. WILLIAMS I should like to ask the Senator from Nebraska another question. If it be impossible for the President of the United States to select a fit man for the Secretary of the Navy or the Secretary of War and vest him with authority to carry on this war, then how is it possible for the same man being still President of the United States to select three distinguished gentlemen of demonstrated ability? And one more question.

Mr. HITCHCOCK. Let me answer that.

Mr. WILLIAMS. Will the Senator please inform me how he can add to the strength of a chain by putting one more link in it?

Mr. HITCHCOCK. The trouble is the chain lacks the link now; it is not together. I want to bring the chain together. You have got to have a link to bring the chain together. You have not only two pieces of chain, but you have a dozen pieces of chain. Now, bring them together. It is not a question of strength, but of unity.

Mr. WILLIAMS. And a chain is only so strong as the weakest link in it. The trouble is I do not want to add another link to the chain. He is not proposing to take off any links.

Mr. HITCHCOCK. I am proposing that these 8 or 10 separate and independent departments of the Government that each of which is now running on a single track without any coordination shall be brought up into one station, where they will be united, where they will be focussed, where they will come in contact with each other, and where somebody having authority will say to the Fuel Administrator and to the Food Administrator and to the Shipping Board and all the other boards and bureaus, "Let us see your plans; we want to compare them and coordinate them and work together."

Mr. WILLIAMS. One more question and I will let the Senator from Nebraska alone. You say you want somebody who shall be able to do this thing, vested with authority to do it, and that somebody is to be the President of the United States, who is already very fully vested with authority.

Mr. HITCHCOCK. No; the Senator misunderstands me. The President appoints the men and the men do the coordinating.

Mr. WILLIAMS. But the President can now appoint the men, and the men now do the coordinating.

Mr. HITCHCOCK. He can not. They can not have any power unless it is given by Congress.

Mr. WILLIAMS. The President has already appointed those same men as Secretary of War, Secretary of the Navy, and Secretary of the Treasury, and these three men are already trying to coordinate.

Mr. HITCHCOCK. They are not. They can not. It is impossible. They are occupied.

Mr. WILLIAMS. How can anybody else named by the President do what these three can not do, and how could the President have any ability superior to that which he now has if we pass the bill?

Mr. HITCHCOCK. The Senator, I hope, will now desist from him questioning and let me cover my ground. I am not criticizing the Secretary of War or the Secretary of the Navy or any other Secretary. I have endeavored to avoid personal criticism. I am excusing them. I am saying that the system is such that even if the Secretary of War runs the War Department in a good way and the Secretary of the Navy runs his department as well as he knows how and the Food Administrator runs his as well as he knows how, and the Fuel Administrator as well as he knows how, if they have separate plans they are in the predicament of the five brothers who built a house. There is an old story of an uncle with much money, who called in his five nephews and said, "Boys, here is a great amount of money. I want you to build a house. Buy all the materials that you please. Each of you build a part of the house." They arranged among themselves that one should build one side, one should build the other, one should build one end, and another the other end, and the fifth one was to build the top. They were good workers; they were able men; they knew how to build. One built his end high and short, while the other built his end low and long. One built a long side that was low and the other built a short side that was high. The fifth boy built the roof. After they got the portions together they would not work. There had been no architect, there had been nobody to plan; each one had done his own part, but there was nobody to give the master plan, and it was not a house at all.

Mr. WILLIAMS. If the Senator will allow me——

Mr. HITCHCOCK. Now, I am presenting the consideration that a poor architect would have been better than none; that even a poor adviser and coordinator would have been better than none. That is the predicament we are in to-day. The various bureaus are running each independently, and they are not being coordinated.

Mr. WILLIAMS. But you say that this aulic council which you propose to organize will be the somebody to do the coordination. The President of the United States will be——

Mr. HITCHCOCK. It will be the three men under the President. He has no time to do it.

Mr. WILLIAMS. But the President will appoint them.

Mr. HITCHCOCK. He will appoint them.

Mr. WILLIAMS. But the source of authority after all is with the President.

Mr. HITCHCOCK. Absolutely.

Mr. WILLIAMS. Absolutely?

Mr. HITCHCOCK. Absolutely.

Mr. WILLIAMS. If the President has not enough brains now, how can you give him brains by an act of Congress?

Mr. HITCHCOCK. The President has brains.

Mr. WILLIAMS. I rather had the idea the way the Senator was talking that he thought he did not have.

Mr. HITCHCOCK. If the President of the United States had the brain of Omniscience and the genius of perfection he could not do all these things. He could not run the great foreign affairs of the United States; he could not be his own prime minister; he could not be Commander in Chief of the Army and Navy; he could not dictate the legislation of the country; he could not do everything. Human limitations make it impossible. He has got to operate through others. He runs the War Department through the Secretary of War; he runs the Navy Department through the Secretary of the Navy; and he runs the various bureaus through the head of the bureau. He ought to coordinate them also through three men chosen for the purpose. He can not do it personally.

Mr. President, another evidence of the failure to make the departments work together and to coordinate their efforts may be seen in the food situation. While in and near New York they

have nearly 2,000,000 tons of freight piled up and waiting for ships, we had down in New Orleans last week 250,000 tons of shipping, with only 83,000 tons of food and feed with which to load them. In one place there was freight waiting for ships, in another place ships waiting for freight; so the shipping has to lie idle and wait for food and feed to arrive. Out West at the present time we have hundreds of millions of bushels of corn that can not be moved from the farms for lack of cars.

The actual corn shipments in the last two months have been only 50 per cent of what they were a year ago. With the vast corn supply actually wasting and spoiling on western farms we have dairymen and other owners of cattle and live stock in the East actually feeding wheat to their live stock because the market is bare of corn. In January we shipped to Europe only one-fifth as much corn as we should have shipped and as we promised to ship. Yet that corn is available in the West in quantities never before known. Where is the power in the Government to equalize the priority orders and shipping privileges so that the shipping of food and fuel will be planned months in advance and carried out in accordance with the plans? It does not exist, and it will not exist until we have a war cabinet.

Secretary Baker says we have plans. I am sorry I can not agree with him. If there has been one thing more conspicuous by its absence than any other in the operation of the various departments and bureaus at Washington since we went into this war, it has been planning for the future. I do not deny that the various departments and bureaus have planned as far as they could for what they immediately had to do, but who has prepared a master plan which will harmonize and coordinate the other plans? Nobody. There was nobody who could do it. The President could not.

The President, in the daily press, is quoted as objecting to any change in the law on the ground that he alone has the responsibility for the conduct of this war. Mr. President, I would not be surprised if the President should object to this legislation. He belongs to a school of political philosophers who believe that all legislation should originate in the Executive. He believes that the initiative should not be taken in the legislative body, that it should all come from the Chief Executive. There are some advantages in that idea; I recognize them. It makes order; it makes leadership; it makes system.

But, Mr. President, shall the Congress of the United States abdicate its powers, abdicate its duties? Look at the countries across the sea; democracies, in a way, like ours. Does the Parliament abdicate its duty in Great Britain? When Parliament feels that things are not going satisfactorily it upsets the cabinet. The representatives of the people indicate from time to time what they want done. In France it is the same. There have been four or five changes of the French ministry since this war started, and at last they have got an efficiency both in France and Great Britain that they never had before. Shall the Congress of the United States not even have the power to change the machinery through which things are done by enacting a law?

The President has given his reason, as far as I know, only in the press, and as it has been given by the press it is that he alone has responsibility for the conduct of the war. He means exclusive responsibility, apparently. The mere statement presents an absurdity. It would be a monstrous wrong to hold him responsible for the 2,000,000 tons of freight piled up in and around New York. It would be a monstrous wrong to hold him responsible for the breakdown of railroad transportation. It would be a monstrous wrong to hold him responsible for the muddle and jumble of priority of shipments. It would be a monstrous wrong to hold him responsible for the shortcomings of the Ordnance and the Quartermaster Departments. It would be a monstrous wrong to hold him responsible for the suffering unnecessarily of sick in the cantonments of the country. It would be a monstrous wrong to hold him responsible for the delay in the construction of a powder factory, so that it is only to be built nine months after the war broke out, although its necessity was known last summer. It would be a monstrous wrong to hold him responsible for this and other shortcomings, because, as I have said, nothing but the genius of perfection and the power of omniscience would make it possible for a man to be responsible for these things, and then he would be more than a man. He can not at one time design and conduct our difficult and delicate foreign policy and perform the duties of Commander in Chief of the Army and Navy or organize and design all the legislation for Congress to pass, dictate all the industrial, financial, and political activities of the country, and look after the expenditure of $250,000,000 a week. It is out of the question and out of reason.

The President has announced his opposition to both these bills. He does not want the committee to report the cabinet bill, we hear, and if the press reports are true he objects even to the discussion of this legislation in Congress, it is said. I am not surprised at that attitude, because I know the school to which he belongs, and I think it is very unfortunate. In the main, I have been one of those who have followed the President. It is only on very rare occasions that I have made an exception, and at all times I have had the highest admiration for him. On great occasions he rises to the supreme height of greatness. There are perhaps two great men in the world to-day—one is Lloyd George and the other is Woodrow Wilson. But the President can not do these things; it is beyond human power. He needs help, he needs machinery, and it is our duty to give it.

This is one of those cases in which I believe it my conscientious duty to bring this measure before the Senate in this way. I believe it should come before the country in this way, and I am confident that the intelligent public opinion of the United States will approve of this thing which Great Britain found necessary and which we shall find necessary to bring order out of chaos, to bring efficiency to our great business of war.

I agree with the chairman of the committee, Senator CHAMBERLAIN, that the President does not know the real situation. He can not give two months to an investigation, as we have done. He is like a king surrounded by a court. He hears practically only one side. The people who complain do not reach the President nor even the members of his Cabinet. They write to their Senators or Representatives. We must listen. We should investigate; we should remedy. It is we who have the responsibility. We declared the war; we levied the taxes; we authorized the sale of billions of dollars in bonds, for which we mortgaged the future. We created the present machinery of government. We alone can change it.

The French Parliament and the British Parliament do not shirk their responsibilities. They go much further than we do or than we could go. When dissatisfied with conditions of the war, those parliaments go so far as to upset the administration by an adverse vote and thus bring about a change in cabinets. That can not be done in this country, but we can change the machinery when we find it wrong. Since this war began four such complete changes at least have occurred in France and one in Great Britain, to say nothing of some minor changes. Shall the Congress of the United States not even be permitted to mend defective machinery? Can one of these great committees of Congress not be permitted to report its conclusions on a pending bill? Shall the Senate be prevented from discussing bills duly reported and widely demanded by public opinion? I can not believe that our duty to the people would be performed by such a weak abdication of responsibility. To use a slang phrase, it is "up to us."

We appropriated billions of dollars, and we find much of that money used to make 2,000,000 tons of munitions of war piled up on the docks because we lack the ships to send it to Europe, while the pile grows larger day by day. We know this is due to a failure to coordinate production and transportation. We say the answer is a war cabinet.

We drafted a great army of men from the people and provided abundant money for their clothing, arms, and equipment, but we find that while they have 20 pairs of shoes apiece, tens of thousands have suffered for lack of clothing and tens of thousands have had to drill with wooden guns. We say the answer is a director of munitions. We supposed the various agencies of government created by law to carry on the war would all work to a single plan in harmony and accord. We find there has apparently been no one to plan ahead, no one to bring unity of action, no one to coordinate the many different functions of government, and we say the supreme need of the hour to win the war is a war cabinet of three men to do these things.

Mr. WILLIAMS. Mr. President, I have listened with a great deal of attention and respect to the speech just made by the Senator from Nebraska [Mr. HITCHCOCK]. Jeremiah and his lamentations are not in it with the Senator from Nebraska. He begins away back yonder and tells us that we have no ships. He tells us that we have not this nor that nor the other thing that we need and that every one of us knows we need. He has drawn an indictment against the executive departments of the Federal Government that is very strong. During the course of his remarks he said that he might be accused of giving information useful to the enemy if he disclosed all that he knew. He has disclosed about all he did know, and he gave information very useful to the enemy.

Mr. President, the human memory is a treacherous and a foolish thing. It leads a man whither it will. Mine leads me right now back to a day in this Senate when men were standing here wanting to stop the shipment of munitions and food to Great Britain and to the allies. They proposed measures then almost as foolish as this aulic council now suggested. Of course, if we had stopped the munitions and food from going to Great

Britain, Great Britain would merely have said, "Very well; find your own ships. You have none. We will take ours out of the North Atlantic trade. If you can not send us munitions and can not send us food, there is nothing else that we want from you." My memory goes back almost irresistibly to that day.

That was the German game then. The German game now is muckraking this administration. If the Senator from Nebraska is right in what he has said, we are whipped already; we are out of this war game right now, because he has drawn and attempted to prove an indictment against the Executive authority of the United States Government that shows not only inefficiency but it proves stupidity. He comes here with a measure to invest the President with more power in order to prove that the President can become efficient with more power when he has been inefficient, in his opinion, with less power.

Mr. President, these aulic council propositions have been tried from time to time everywhere. Even the Austrian Empire, I will inform the Senator from Nebraska, has had sense enough to do away with the aulic war council. Napoleon Bonaparte forced that.

The Senator might go back a little further in history and find that the senate of Carthage came very near ruining Hannibal's war plans. The Senator could go back a little in our history and find out that the Continental Congress came very near ruining George Washington with its committees upon the conduct of the war.

If the Senator will he can find that it was the typical committees of Congress that came very near ruining Lincoln and Grant in the Civil War. He can go below Mason and Dixon's line and find that the Confederate congress came very near ruining Robert E. Lee and Jefferson Davis while they were carrying on war.

If there is anything that any man ought to know who has any sense at all it is that Congress or a committee can not carry on a war and can not furnish the brains to anybody else to carry it on. Here is this stupid bill, a stupid thing demanding "three distinguished men of demonstrated ability" to be appointed by the President of the United States to carry on the war, a so-called war cabinet. "Distinguished" by whom? Ability "demonstrated" before whom? After you are through with it all, as the Senator just confessed in answer to a question, it all goes back to the President of the United States and the President has got to "distinguish" them and their ability has got to be "demonstrated" before the President, and here is the President already not only armed with the duty but charged with the responsibility of distinguishing men and of recognizing demonstrated ability. If the President is a fool, how are you going to give him brains by an act of Congress? If the President of the United States is not a fool, what is the need of your legislation?

The Senator quoted from somebody back in the Bible. I have forgotten just how it did go. "Thou art not able to hold up thy hands by thyself alone," and "they stayed his hands one on one side and the other on the other."

I suppose the Senator from Nebraska [Mr. HITCHCOCK] is going to stay them up on one side and the Senator from Massachusetts [Mr. WEEKS] or the Senator from Pennsylvania [Mr. PENROSE], probably, stay them up on the other side. [Laughter.] Great God, Senators, if the President of the United States has not brains enough to perform the functions of his great office, he can not be lent brains by this "staying up of hands."

My memory goes back treacherously to the time when men were standing upon this floor wanting an embargo on all American commerce with Europe, but I need not dwell upon it; the balance of you know about it. Now, the Senator from Nebraska has made his argument; he has drawn an indictment, and a powerful indictment, too, against some inefficiency that all of us know and that all of us recognize. I will tell you the trouble with the Senator from Nebraska and the trouble with the Senator from Oregon [Mr. CHAMBERLAIN], both of whom I love very well—especially one of them. I will tell you the trouble with you: You have been engaged as chairman and members of an investigating committee for four or five weeks, and the business of an investigating committee is to look at specks. Everything that is called to its attention is a speck. It becomes speck obsessed. After you got through with the investigation you came out, and you drew a circle with chalk on the blackboard, and you filled it plumb full of specks, and you wrote on it, "This is the sun." It is no more the sun than my sole is my foot. [Laughter.]

The American people have faced this situation with magnificent efficiency and I am tired of hearing them muckraked. No people at any time in the whole history of the world turned around from a complete peace establishment, devoted to peace and pacifism as a passion, with the apostle of democracy at the head of the procession, Thomas Jefferson himself, and within nine months converted themselves so nearly completely into a war machine. My boys are there and your boys are there, my sons-in-law are there and yours are there. I deny the right of any man to draw this indictment against the American people or against the American people's Executive's control.

The Senator from Oregon tells me, and the Senator from Nebraska tells me, that the trouble with the President and the Secretary of War is that "they do not know"; that they "can not find out"; that it is "impossible for them to know." Well, will you, in God's name, then tell me how it is possible for the Senator from Nebraska and the Senator from Oregon to know—how they are going to find out? They are not the superiors of the President and his Secretary in native ability or brains or information.

Why should we have had all this thing? Why should it all have come here? Was not everybody trying to do his level best? The Senator from Oregon told us the other day in his speech that the efforts of the Secretary of War had been "commendable"; the Senator from Nebraska pays a high tribute to him to-day; and they both pay a high tribute to the President of the United States. Has not each one of us, here as a Senator, there as the Secretary of War, over there as the President, over yonder as the Secretary of the Navy, out there as the Secretary of the Treasury, been trying to do his level best?

This is a remarkable thing: Unlike the War between the States; unlike the Mexican War; unlike the Spanish-American War, not one charge of moral crookedness has been made against any man. In the Civil War there were plenty of such charges made and sustained; in the Spanish-American War there were plenty of them made and sustained; in the Mexican War there were plenty of them made and sustained; in the War of the Revolution there were plenty of them made and sustained.

Here stand 100,000,000 people ready to fight Germany by themselves, if necessary, and they can whip her by themselves. Nobody knows but that the Germans may go over the line between the British and the French to-morrow; and France may be put out of the war. If she is, then Italy will be put out. Roumania is already out; Russia is already out. Then we two English-speaking peoples can whip Germany by ourselves, and will have it to do. It may take us a long time to do it, but we will do it. We have got the blood; we feel "the mettle of our pastures"; we have the boys, and even those of us who would be a Government liability instead of a Government asset, still have the spirit.

What is the use of standing here and muckraking this administration? It is charged that we have ordered too many shoes. My God, if we have, we can sell them later on. [Laughter.] They will go at a very good price. It is also said that we sent some munitions abroad and had to bring them back. Did we? I do not know whether we did or not. The Senator from Nebraska declined to give his authority for the statement, and I doubt it. I mean I doubt the truthfulness of his informant; not his truthfulness, of course. But suppose we did. Here is your circle on the blackboard with specks all around in it. Under it is written, signed by the Senator from Nebraska, "This is the sun."

You know it all reminds me a little of a fellow who once went to see a statue, and he said, "It is a magnificent statue; the head is divine; the breast is superb; the legs, the legs of an athlete; the arms, the arms of an athlete; but there is a little defect on the right heel;" and he went out and wrote 346 pages on the defects in the right heel of that statue. [Laughter.]

What is the use in it? What is the sense of it? Can we not help one another win this war? The Senator says he might be accused of giving information useful to the enemy. Great God, I suppose so. He might be accused of it. The information would not be useful to anybody except the enemy. I doubt if it would be useful to the enemy, but certainly it would not be useful to anybody else. Are we not all trying to do our very best? Is there a Republican on the other side of the Chamber who is not behind the American people in this war, except a few fool pacifists that have pretty nearly passed out of political existence? [Laughter.] Do we not know the task before us? Do we not know we have got to win? Does not the Senator from Michigan know it, and does not the Senator from Wyoming know it, as well as I, from Mississippi? Do we not know we have got to win, and that the only way in God's world to win is to support the men who happen to be in authority? I do not care who put them there.

Oh, this idle talk about passing a bill for a war cabinet "in order to strengthen the arms of the President," to "hold up his hands"! I should think when it came to the question of somebody strengthening my arms or holding up my hands, I

would be the best judge; and I imagine the President is the best judge of whether he wants that sort of strengthening or not. You know that is not the intention of it, as well as I do; you know it is a usurpation by the legislative of executive authority; and, if you are lawyers, you know that it is absolutely unconstitutional.

Do you know what I would do if I were President of the United States and you dared pass that war cabinet bill on me? I would veto it first; and then if you passed it by a two-thirds majority, I would utterly refuse to obey it, upon the ground that the Constitution invested certain duties and liabilities in me, and that I could not forsake them.

Mr. GALLINGER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from New Hampshire?

Mr. WILLIAMS. I do.

Mr. GALLINGER. Does not the Senator think that, if the President did what the Senator suggests, he would come pretty nearly making himself liable to impeachment?

Mr. WILLIAMS. Not unless two-thirds of a brute force impeached me, and in violation of the Constitution; no. There might be a two-thirds majority to impeach me in violation of the Constitution, as they tried to impeach Andrew Johnson under similar circumstances when he refused to obey the tenure of office bill.

Mr. GALLINGER. And they came very near doing it.

Mr. WILLIAMS. They came very near doing it, yes; and there is no page of American history more shameful and more discreditable—"shameful," did I say?—"shameless"—than the page of American history that records the attempted impeachment of Andrew Johnson for sustaining his powers as the Executive under the Constitution against the usurpation of the Congress of the United States.

Mr. GALLINGER. Mr. President, if the Senator will permit me, I desire to say that is the Senator's opinion, but other men honestly differ from the Senator in that conclusion.

Mr. WILLIAMS. That may be. I do not doubt that there are men everywhere who honestly differ with pretty nearly every proposition one can state.

Mr. President, I heard a Senator here the other day on the floor of the Senate complaining because they did not have any plan of campaign for the war here in Washington—when the war is being fought in Belgium and in France. Did you ever hear anything as stupid as that since the day you were born—quarreling with an administration in America, 3,000 miles from the field of battle, about not having a war plan? That is worse than the old Aulic Council of Austria that could not make itself heard even from Vienna to Campo-Formio. How do you expect a lot of men here, gathered together accidentally, colonels, lieutenant colonels, and majors, to draw a war plan to fight a war in Europe? Either Pershing will fight the war or Pershing ought to be put out of commission; and, in my opinion, Pershing can fight that war; and, in my opinion, if Pershing and Bliss put together can not fight it we have plenty of other men who can; but of all things in the world I know that the Congress of the United States can not give either one of them one particle of useful information or suggestion. With all due respect to the intelligence of distinguished Senators, Members of this august body, of which I am one, I do not think a single one of them could give Pershing an idea that Pershing would care to entertain for three seconds, or could give Bliss one. Yet the Senator said, "We have been nine months at war, and we have no plan of war, no plan of campaign." Why, Robert E. Lee carried his plan in his head, so did Stonewall Jackson, so did Napoleon Bonaparte, so did the Duke of Wellington, so did the Duke of Marlborough, so did Prince Eugene, so did Julius Cæsar, so did Hannibal. Do you suppose that Pershing or Bliss would regard any hints from me or from you about it? What do you know about it? You know less than I do, and I know nothing. [Laughter.]

Then Senators complain and say they have been down to the departments, and "their constituents did not know where to go"; that one man would send their constituents to another man, and the other man would send them to a third man, and the third man might send them to a fourth man. Who are your constituents and what did they want—Army contracts? If so, it is a pretty lucky thing that it was rather hard to find the proper fellow to deal with, and that several fellows had to pass on it before they could get dealt with at all. I have not had any trouble. I am like the Senator from Missouri. I suppose I have got about as much senatorial business as the average Senator, but I have never found any trouble, because I always address the man in charge, and he sends the communication to the proper official. I do not go down with constituents, and I will not do it. I do not go to the departments with constituents hunting one official and then hunting another, and when men come to me with useful ideas I communicate their ideas to the proper official.

The Senator says that even in peace times the President is oppressed with work. Of course he is, and therefore in war times you want to vest him with the duty of selecting "three distinguished men of demonstrated ability," as if he did not have work enough to do already. Why, Senators, if there is anything that is foolish, it is the idea of trying to rebuild in America in the twentieth century the old obsolete aulic council, which had to map out campaigns for war, plans for war, at Vienna and send them out to all the Austrian junkers while they were fighting the freemen of France. Go back to the stupid days of the Confederate Congress when it wanted to interfere with Robert E. Lee, and when Robert E. Lee, in a moment of his highest chivalry and courage, sent his resignation to Jefferson Davis and said when he came back from Gettysburg: "The test of merit in my profession is success. I have failed." And Jefferson Davis said: "If you are not a soldier, Gen. Lee, the South has none. Your resignation will not even be considered."

Why, I heard a Senator complaining the other day about Gen. Crozier. Crozier has been kicked upstairs. What more do you want? Do you want to humiliate the man? If you can get rid of him and get somebody in his place, that is all you want, is it not?

Then you have been complaining about the Quartermaster General. By the way, he seems to have come out on top, as near as I can judge; he seems to have known more about it than his critics did.

Mr. President, I did not come into the Senate this morning with any idea of making a speech. I have just returned from the funeral of one of the dearest friends I have ever had in my life, and I thought this morning about him while the discussion was proceeding. He was as loyal and true to the United States Government as a man could be. A Welshman by blood, an Irishman by birth, and a loyal, true American citizen, he was one of the first men to exceed in insight into this trouble. I remember four or five days after war was declared in Europe I introduced a bill to enable the United States to buy and build ships, because I knew we would have to have them. I did not get any votes for it; I could not even get the Foreign Relations Committee to call a meeting to consider it. Later it took the administration four or five or six weeks to discover the necessity of it, and yet here is the Senator from Nebraska this morning, to quote his own language, saying, "We have no ships." Why? Is it the fault of the President, the fault of the Shipping Board, or the fault of any of the executive departments? It is your fault, and the fault of every one of you. I introduced that bill within four or five days after war was declared in Europe, after Belgium was invaded, and every man, it seemed to me, with a particle of common sense ought to have known that was the first thing we had to do—to get ships to carry our products to Europe; and whether we were to remain neutral or whether we were to enter the war made no difference; but here stands a Member of the Congress of the United States to-day complaining that we have no ships. Whose fault is that? It is yours; it is not the fault of the Executive.

Mr. President, why can we not drop this? Why can we not just quit this thing of looking at specks on the sun, and nothing else, and writing pages about the heel of Achilles, when the balance of Achilles is all right? Why can we not go ahead and uphold the arms of the President in the way the President wants them upheld? He is the best judge. Who doubts his patriotism? Who doubts his honesty? Who doubts his loyalty? Who doubts his courage? Who doubts his gentleness under it all—a gentleman with the strength of a man and the gentleness of a woman? What do Senators hope to attain by this agitation? They do not expect the bill to pass. I doubt if any of you expect it to pass. You know the President is going to veto it if it should pass. I can understand why I, as a Democrat, in ordinary peace times might want to put a Republican President in a hole, and I can understand how a Republican in ordinary peace times might want to put a Democratic President in a hole, but I do not understand why any Democrat wants to put a Democratic President in a hole during a war. You know the bill is never going upon the statute books as a law, as well as you know your name. Then why are you agitating for it? Just to show where you stand? Well, you might send a private telegram to the Kaiser, telling him, if you wanted to, or you might tell anybody outside. What is the object of it? What is the intent? What is the desire of the heart that makes the mouth speak? Do you just want to see if you can get a popular sentiment behind the thing and have the President

veto it, so as to make him temporarily unpopular? I dare say you would not confess that that was your motive; and yet, if that be not your motive, what is your motive? What do you expect to attain by it—not a law upon the statute books, for the President has already told you, as I would have told you in his place, that he does not propose to have Congress usurp executive functions, and that so long as he is the President of the United States and vested by the Constitution of the United States with certain duties and responsibilities, he is going to exercise the one and perform the other.

Suppose we just quit all this now, or quit it after to-day's session, and just unite with one idea, and that is, to wage war in order that we may put an end to war as a constantly contemplated national purpose, whether in Prussia or anywhere else; that we shall resort to a universal compulsory military service temporarily in America, in order that we may put an end to the hellish system all over the world for all time to come; that we shall wage war in order to have a just, enduring, and lasting peace; and that we shall wage it as Americans, not as Democrats or Republicans, not as northerners or as southerners, but let my boy go with the boy of the man from Massachusetts, side by side, and fight for liberty and a chance for liberty to have a place under the sun against Prussian militarism, autocracy, tyranny, cruelty, rape, murder, and rapine.

Mr. REED. Mr. President, with some hesitancy, because of the character the debate has assumed, I rise to speak to the bill under discussion.

I think we shall gain little by challenging either the motives of Senators who propose this legislation or the motives of those who oppose it. It is getting to be too much the habit for men to clinch an argument, or to supply the lack of argument, by a polite insinuation that their opponent is a friend of the Kaiser. That is one of the things that ought to be stopped in this Chamber. I hope it finally stopped when the Senator from Mississippi [Mr. WILLIAMS] stopped speaking.

I am opposed to the position taken by the Senator from Nebraska [Mr. HITCHCOCK]; yet I know that in this Senate Chamber and in the country there is not a more sincere patriot. There are but few, if any, more thoughtful, painstaking, or laborious men in all the country than GILBERT HITCHCOCK. I know that his motives in presenting this bill are of the highest. I know that the motives of the chairman of the committee, the Senator from Oregon [Mr. CHAMBERLAIN], in conducting the investigation by the Military Affairs Committee, have been those of a patriot, of a lover of country and of universal liberty. I have no patience with the policy of impugning the motives of all men who, seeing faults, seek to correct those faults. Neither have I patience with those who describe the conditions that have been disclosed by these investigations as "mere flyspecks on the firmament," or as "slight defects in the heel of a perfect statue."

Mr. President, if 7,000 men in the cold winter are compelled to leave their homes and are not furnished with sufficient clothing, that is not a flyspeck. That is a serious matter.

If soldiers are permitted to die in hospitals because of a want of proper medical attention, that is not "a speck." That is a tragedy, all the sadder because it befell those who were willing to yield bodies and lives in the service of country.

If cannon that might have been obtained have not been provided, that is not "a speck." It may mean the loss of a battle and the sacrifice of thousands of precious lives.

If ships have not been bunkered with coal, although the coal was available, that is not "a speck." That is a grievous wrong, for ships are vital to the winning of this war. Whoever so grossly blundered committed that character of offense which Napoleon characterized as "worse than a crime." It may well be questioned whether such a blunderer should further hold authority.

So I might at great length catalogue and comment upon the many failures and mistakes developed by the investigations, but those I have cited will suffice. I utterly decline to accord with the view that they or any of them are "mere trifles," "mere specks," bits of thistledown to be blown away by a breath of satire. They can not be obliterated by a sneer. They are matters of serious, of grave, of almost tragic importance. They should be so met, so considered, and such action as Congress should take ought to be fearlessly taken.

But, Mr. President, disappointing as these conditions are, we must in all fairness along with them take into account the great things that have been achieved. My distinguished friend from Nebraska [Mr. HITCHCOCK] and my friend, the chairman of the committee [Mr. CHAMBERLAIN], are as willing to do that as is the Senator from Mississippi [Mr. WILLIAMS]. They, however, maintain that the highest patriotism requires the searching out of defects and in applying proper remedies. For this I commend them, but at the same time I think they might have been a little more generous in giving credit for that which has been accomplished.

Mr. President, it must be borne in mind that we were plunged into this war without preparation. It should not be forgotten that every man in this body believed, as did the President of the United States, that we would escape being drawn into the conflict.

In this state of almost total unpreparedness we were thrown into the war. We needed ships. The Senator from Mississippi did not discover that fact. Shortly after the first shot of the European war was fired a bill for the purchase of ships was brought forward and was debated for weeks. It was defeated by the almost solid vote of the other side of the Chamber, aided by some Senators of this side. Yet I do not severely criticize my brothers on the other side of the Chamber. They could not look ahead and see the conditions that now confront us. They did not see them. If they had, they would have voted for the bill.

Mr. President, it has been said upon this floor that the military machine has broken down. If the statement had been that the military machine had failed in some respects, but that in the main it had been successful, it would have been more nearly correct. You can not justly say that a machine that put 1,500,000 men into the field in eight months' time is a complete failure. You can not say that a machine that has carried some hundreds of thousands of men across the ocean without the loss of a single life is a total failure. You can not say that a machine that is now producing a fleet of airplanes that will soon obscure the sun above the great cities of Germany has "broken down." You can not, in justice, assert that a machine that has laid the keels of ships which will within 12 months represent a greater tonnage than has been produced in a similar period of time by all the nations of the earth has "ceased to function."

And yet, while we may point to these and other illustrious and splendid examples, it does not follow that we should not call attention to defects and to mistakes wherever they exist. So long as the criticisms are made for the purpose of helping, the critic should be applauded. The man who discovers and calls attention to a serious oversight or wrong policy in order that correction may result is engaged in a more patriotic work than the individual who seeks to hide them beneath a camouflage of adjectives. An honest critic is of more value than a hundred incense burners.

This war can not be won upon paper. It can not be won with speeches. It can not be gained by laudation. Fine phrases will not take the place of cannon. On the battle front you can not supply the lack of rifles by assertions that they exist. This war must be fought with men and with metal. The men and metal must be put upon the field. Every man who succeeds in pointing out, every committee that succeeds in demonstrating, that there is a rotten spot anywhere in our preparations is doing a good work and should be commended for that work.

Now, Mr. President, I come very briefly to a consideration of these two bills.

It will be observed that they both distinctly and absolutely relate to the prosecution of the war in the sense that they deal with the very movements of the Army and Navy. They are not like the fuel or the food regulations, which have to do with the domestic concerns of the civil population. These bills relate to the carrying on by our armed forces of the conflict between the United States and Germany. Therefore, in my judgment, they come within the control of that provision of the Constitution which provides that the President of the United States shall be the Commander in Chief of the Army and of the Navy.

I think there is a very clear line of distinction between the passage by Congress of a bill which deals with the furnishing of supplies, with the furnishing of moneys, with the creation of the machinery that ultimately results in making the Army and the Navy, or in supplying the Army and Navy, and another class of legislation that attempts to control the actions of the Army and the Navy after they have been created and a state of war exists. When we come to the latter class, I believe the President is, as the Constitution says, "the Commander in Chief," with all that term implies. He has the right therefore to say where the Army shall go, and where the Navy shall go, and how and when and where they shall fight. In a word, the Constitution has placed upon the President the duty and has granted him the power "to formulate the plans" for the war and "to direct and procure their execution."

With that preliminary statement, let me call attention to what is known as the war-cabinet bill.

SEC. 2. That said war cabinet—

Now, notice the language—

shall have jurisdiction and authority as follows—

Jurisdiction and authority—

(a) To consider, devise, and formulate plans and policies, general and special, for the effectual conduct and vigorous prosecution of the existing war, and, in the manner hereinafter prescribed, to direct and procure the execution of the same.

Let me scan that, to make it plainer:

Said war cabinet shall have jurisdiction * * * to * * * formulate plans * * * for the * * * prosecution of the existing war, and * * * to direct * * * the execution of the same.

Mr. President, if you can put that power in a war cabinet, and if the war cabinet exercises that power, what is there left to the President? Instead of being the Commander in Chief of the Army, with the power to make plans for the movements of the Army, the plans are, according to this bill, to be made by a war council. Instead of being the Commander in Chief, with the power and the authority to execute the plans he has made for the movements of the Army, he finds that power has been by this bill taken from him and reposed in a cabinet unknown to the Constitution.

If we were to pass the bill in its present form, would not the war cabinet, that possessed the power "to make the plans for the war," "to prosecute the war," and "to direct the execution of the plans for the prosecution of the war," be in fact the commander? Would not the President become a mere figurehead directed by the war cabinet?

I shall not take the time of the Senate to read the other provisions of this bill. Senators who read them will find that the objection I raise runs throughout the bill. While there are certain paragraphs of it that provide that particular things shall be done with the direction or the sanction of the President, the paragraph I have read has no such limitation, and you will find other paragraphs in the bill without limitation. For those reasons I think it is not a bill that should be passed.

There is another view——

Mr. KNOX. Mr. President——

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from Pennsylvania?

Mr. REED. I yield to the Senator from Pennsylvania.

Mr. KNOX. Before the Senator from Missouri passes to the other point he is about to make, I should like to inquire what significance he attaches to the following words, which are not a part of the preamble, but are a part of the first section of the bill:

That there is hereby created a war cabinet, to be composed of three distinguished citizens of demonstrated executive ability, to be appointed by the President, by and with the advice and consent of the Senate, through which war cabinet the President may exercise such of the powers conferred on him by the Constitution and the laws of the United States as are hereinafter mentioned and described.

What significance does the Senator attach to that provision as qualifying the subsequent vesting of powers in the war cabinet. Would or would they not be all subject to the provision that the war cabinet shall be under the direction of the President?

I am inquiring for information. I never saw the bill until this moment.

Mr. REED. I grant, of course, the rule of construction that all of a bill must be considered together, and that the words just read by the Senator must be taken in connection with the other provisions of the bill, and yet I do not think that the words are controlling. I think that the specific power is found in the language I read a few moments ago in paragraph (a).

Mr. KNOX. But, Mr. President, may I not inquire if the Senator from Missouri does not also recognize that other rule of construction, that if it is possible to give a statute a construction that would make it constitutional, that is the construction that would be placed upon it, rather than a construction that would make it unconstitutional; and does not the insertion of these words make possible a constitutional construction of the bill?

Mr. REED. The rule for which the Senator contends—that a bill shall be construed as constitutional if it can be—is a rule which is applied by the courts after Congress has acted, the courts then taking the position that they will assume that Congress did not mean to do an unconstitutional thing; and accordingly they will limit the language, even twisting it somewhat from its natural meaning, in order that they may sustain the law. That is only another way of saying that the courts might remedy that which we ought to remedy here while we are passing the statute.

I do not care to do more than state this matter. I have not taken time to go into the libraries and search the books. I give it as my opinion that this bill, as drawn, plainly impinges upon the constitutional prerogatives of the President of the United States.

Mr. KNOX. Mr. President, if I may again interrupt the Senator from Missouri——

Mr. REED. Certainly.

Mr. KNOX. I have been impressed with the argument of the Senator from Missouri, and if I had not discovered this language I certainly would have been convinced by it. I doubt very much whether the proponents of this bill contemplated that any such construction should be placed upon it as the Senator from Missouri has placed upon it; and as for myself, I certainly should insist upon an amendment, if this measure is to pass at all, so that there could be no doubt whatever of the proposition that this war council is under the authority of the President.

Mr. REED. I am glad to have the Senator say that, because I know his respect for the Constitution is such, his knowledge of the law is such that his opinion will carry great weight with this body and with the country.

Mr. CHAMBERLAIN. May I interrupt the Senator?

Mr. REED. Yes.

Mr. CHAMBERLAIN. I can speak, I think, for some of the committee at least when I say that in formulating the bill the committee thought that the first section would cover the whole bill; in other words, that it would all be subject to the power of the President, and the cabinet, when appointed should be subject to him entirely. That is embodied in two or three of the subdivisions of the second section of the bill, but probably it would be better to put it in all. The committee intended that it should be all under the President, and that he should have the power.

Mr. REED. I think enough has been said to show that whatever should happen to this bill, it ought to have some further consideration in the committee and the language ought to be cleared up.

Mr. President, I come to another point, that seems to terminate all chance of any practical result from this bill. What is the situation? We have a President, we have a Cabinet, appointed by the President. The President is Commander in Chief of the Army. The Cabinet members perform the various duties falling to them, one member being Secretary of War, another Secretary of the Navy, and both of these responsible to their chief. In addition to that six of the members of the Cabinet are, by a statute of Congress, made into a war council. If those bodies thus created do not coordinate and bring together all of the various authorities of the executive branch of this Government, then it is inconceivable to me that they can be brought together by the appointment of three additional men. If the Secretary of War, the Secretary of the Navy, and the President of the United States do not constitute a war council having the power to coordinate and bring together every function of the executive department and of the war and naval forces of the country, then how will you accomplish it by the appointment of three other men?

It has been said by the Senator from Nebraska [Mr. HITCHCOCK] that the present war machinery is so complicated as to constitute a maze, in which we are hopelessly lost. He compares the war organization to that grove an English King planted in which people, mystified and bewildered, wander aimlessly. Mr. President, I adopt the simile and remark if the grove is made greater and larger and its ramifications more intricate, it will not help us find our way out.

We are told by these gentlemen that with the present machinery everything is chaos. If it is chaotic and if human ingenuity or lack of ingenuity is responsible for it, then where must we look for the individuals who are to be charged with the condition? Clearly, if there is chaos in the War Department, it must be charged to the Secretary of War; if there is chaos in the Navy Department, it must be charged to the Secretary of the Navy—unless, indeed, it must be charged to their chief, the President of the United States. If he did not interfere, if he allowed these Cabinet officers to act, then they are responsible. If he did interfere and caused them to act in an improper way, then the President as well as the Cabinet officers is responsible.

If it be true that the President has selected Cabinet officers who have produced chaos in the Army and in the Navy; if that indictment be a just indictment; if he has selected a man who is inefficient for Secretary of War, and a man who is inefficient for Secretary of the Navy—if he has done those things, what reason have we to believe that conditions would be at all improved if we were to command the President of the United States, by a law passed even over his veto, to select three more men? What reason have we to believe that he would select three better than those already there? How will you gain anything by compelling or requesting the President of the United States to pick more men, if those he has already selected are bad men?

If those he has already selected were fastened upon him and he could not get free from them, we might afford him a means of escape by authorizing him to select three more. But he can, in a moment, get rid of the men he already has. Not only can he remove them, but their resignations, of course, will be tendered on the instant an intimation is offered.

Mr. WILLIAMS. Mr. President——

Mr. REED. In just one moment. If, upon the other hand, the President of the United States has the wisdom to select the three men that this bill proposes to authorize him to select, then he certainly has wisdom enough to select his Cabinet; and if he selected a Cabinet and selected it wisely and prudently, and if it has been doing that which it ought to do, then we should not, against his will and over his protest, force upon him men whom he does not want, and thus add a fifth wheel to a wagon, the driver of which says he does not want that fifth wheel, that he is content with the four wheels he already has. I yield to the Senator from Mississippi.

Mr. WILLIAMS. A new link to a chain will not make it any stronger. Now, let me ask the Senator a question there. Suppose this attack upon the Secretary of War—for that is what it is—were made directly and the Congress of the United States passed a vote of lack of confidence in the Secretary of War, does the Senator doubt one minute that the Secretary of War would resign and the President would accept his resignation?

Mr. REED. I hardly know how to answer.

Mr. WILLIAMS. I know if you were Secretary of War you would resign, and I know I would if Congress passed a vote of lack of confidence in me.

Mr. REED. Mr. President, I confess to a very great desire that all of the functions and the powers of our Government should be coordinated. I confess to a feeling of chagrin that some mistakes have been made. I do not see how we are going to remedy those defects by saying to the President, "You must appoint more men, although you do not want them. Although you say you are content with the men you have, you must nevertheless appoint more men." In what manner shall we profit? Who can guarantee the President would not appoint men who would make worse mistakes than those complained of. Let me be understood, I do not charge that bad men have been selected. I only argue from the hypothesis of the proponents of the bill.

Now, let me say a word in regard to these mistakes. If I thought there was a member of the Cabinet who would not correct abuses once his attention was called to them, I would say he ought to be impeached. But the truth of the matter is that mistakes having been discovered they have been corrected in most instances, and I believe will be corrected in every instance where possible.

The fundamental error of the sponsors of these bills is well illustrated by the argument of the Senator from Nebraska. He said if we had had a war cabinet, we would not have had a mistake made in the ordering of fuel; if we had had a war cabinet, we would not have had a shortage of ships or a lot of goods piled upon the docks that could not be moved, and so forth. Mr. President, how do we know we would not have had all these misfortunes? How do you know your war cabinet, if created, would not have made worse mistakes than have been made by the Secretary of War or the General Staff?

The Senator states if you had the Secretary of War and the Secretary of the Navy and the Secretary of the Treasury in a war cabinet, it would be satisfactory to him; yet the Senator's chief argument for the bill is the alleged inefficiency of two of these men. In what way would the situation be bettered if their titles of office were to be slightly altered. If you took them out of the Cabinet positions they now hold and in which inefficiency is charged, and put them into another room and painted over the door "War Cabinet," would you thereby increase their intelligence, their patriotism, their earnestness? If when you changed the titles you also changed the duties, the case would be different. But observe the duties of the war cabinet are in substance the duties of the Secretaries of War and Navy, on top of which are to be added the great duties of the President.

Mr. President, the trouble that nearly every reformer makes is in seeing the evil that is and multiplying it very many times over in his imagination, and then in conjuring up some remedy which he confidently assumes to be perfect in both theory and practice. The reformer always asserts for the child of his brain absolute infallibility. The proponents of this bill insist that there have been mistakes made by Cabinet officers, and now they say: Give us a war cabinet, even though it be composed of the very men who have made the mistakes, and it will make no mistake. But if you had had a war cabinet, it would have inevitably made mistakes, because it would have been human, and the same gentlemen who now urge this bill could then probably have made a very forcible argument about as follows: "Abolish the war cabinet and let us have just an ordinary Cabinet, and we will have done with all these mistakes."

With all due modesty, I suggest that the proper thing is not to condemn a system because there has been a mistake, but to find the mistake and correct it. A good system should never be destroyed because some individual has blundered. I have used the illustration before, and venture to repeat it. There are some men who if they find the plumbing out of order in their house know no other remedy than to burn down the house and build a new one of a different kind, and perhaps get worse plumbing in the new house than they had in the old one. But there are other men who wisely say: "This old house was built by honest workmen; it kept us from wind and storm these many years. True, the plumbing is out of order, but we will not for that cause destroy the house; we will simply fix the plumbing." So it is that we find men who because some mistakes have come to us in the great haste of preparation in this war think the thing to do is to destroy the system, take the authority from those officers who have heretofore had it, and create a new machinery, and then they assume that the new machinery will work with infallibility. But that is the greatest mistake men ever made in the world, for the new machine is as liable to go wrong as the old machine; it has no especial virtues or powers.

Ah, but somebody says these three men would be together; everything would be considered and coordinated by them. Mr. President, the Secretary of War, the Secretary of the Navy, and the President of the United States are compelled to be together, and are together almost every day of their lives. The great war plans are supposed to be worked out through the War College and by the General Staff, and after they have all been thus worked out they are brought up through the Secretaries of War and the Navy to the President of the United States. If that be not coordination, can we get coordination by appointing three other men to possess powers that will in the very nature of things conflict to a greater or less extent with the powers of the Secretary of War, the Secretary of the Navy, and the President of the United States. We are much more likely to produce a conflict than a coordination of powers.

Mr. STONE. Or to subordinate the powers of the President and the Secretary to the three men.

Mr. REED. I accept the amendment of my colleague to subordinate the power of the President, to subordinate the power of the Secretary of War, to subordinate the power of the Secretary of the Navy to three other men; to place the Secretary of War and place the Secretary of the Navy and place the President of the United States in a position where before they can move they must obtain the consent of the three other men. If that be not complicating the machinery, if that be not increasing the size of the maze and the difficulties of the road that must be traveled, if that be not the creation of additional red tape, then I do not understand the import of the bill.

I know the purpose of the authors of this bill. It is a good one. I know the intention was good; but when the President, charged with these responsibilities, declares he does not want this legislation, and when this legislation pertains absolutely to the movement of the Army and the Navy and of the Military Establishment, that comes within the special prerogatives of the President, I do not see what is to be gained by attempting to force the legislation upon him.

It is well known to all of you that I have been one of the men in the Senate who have stood for the independence of the legislative branch. I have held it to be utterly abominable to claim that Congress can not originate its own legislation. I have held it to be unwise that the will of Congress should be interfered with in any way by outside influences or by intrigue or by lobbying, whether it come from a high or a low source. I still hold to that doctrine. But just as I would repel every attempt to take away from Congress its constitutional power, so will I stand here and elsewhere and insist that Congress shall not attempt to take away those powers which the Constitution has vested in the Executive of the country.

Now, let me offer a word, which I hope I can do without injuring the sensibilities of any man. I think it is not wise to press this legislation for the reasons I have given. I think that if we were to force this legislation upon the President and if we were to appoint men under this pressure from Congress he would certainly be superhuman if he did not appoint men who would do exactly as he wanted them to do. Thus you would have added only three more men, and the President would still exercise, as he ought to exercise, his powers under the Constitution of the United States.

But, Mr. President, I think the thing to do is to not press this legislation. I think the thing to do is to let this matter stop. At the same time I believe that Congress should try to discover every mistake that has been made. But the inquiry should be pursued not in malice but really with the hope of correcting the blunders of the past and thus strengthening our arms for the future.

Remember, as we criticize how easy it is for the brain that is incapable of evolving a great plan once the plan has had birth in the brain of another, once it has been put into execution, to point to a fault here and to a failure there, how easy it is to then recklessly condemn the whole. I appeal for a different sentiment in this body and in the country. I appeal for free criticism, but for kindly criticism. I appeal for constructive criticism, and I insist that as we apply that constructive criticism we should also give credit where credit is due. Behold what has been accomplished. From their homes a million five hundred thousand men have been mobilized in camps. If every rifle was not at once ready every rifle will soon be ready. If we did not have factories capable of making all the cannon needed, behold the factories are now at work creating the armament that will, as we hope, under the providence of God win the war. If we do not have powder factories, let those of us who thought this country so far removed from the conflicts of Europe that we would never become involved in her quarrels, who sat supinely confident of our isolation and our greatness, take our share of the responsibility for lack of the powder mills.

As we pause to look at what has been accomplished, I point to the fact that the greatest fleet of aeroplanes ever conceived in the brain of man will soon be in the skies and over the battle line. If the hospitals have not been all that we desire—and I with all of you execrate the physicians who allowed boys to needlessly die—remember that that superb representative of the medical profession, Gen. Gorgas, has promised investigation and rectification and punishment for the guilty.

As we look upon this scene remember that we have been obliged to mobolize industries from the Atlantic to the Pacific, to tranform factories, to train men; and we have even been obliged to send men armed with rifles, members of the military, into the forests to cut down the trees. Remember that everywhere there are millions of hammers pounding at this moment. Sparks are flying from hundreds of thousands of anvils. Countless wheels are whirring. Amidst the snows of the forest men are, with tireless arms, hewing the timbers for a mighty fleet. Great freight trains are rushing across the continent laden with munitions of war. Ships are sailing from every American port laden with food for the gallant nations that fight by our side. Remember that Uncle Sam is gathering the wealth and power of the earth in his mighty arms, and that he will not fail to render a good account on Europe's blood-drenched battle fields. Remember that back of all this is something better than armament—the deathless courage and determination of the American people to win this great conflict. Let no man discourage the people; let no man seek to put out in the hearts of the people that flame of patriotic ardor which burns to-day. Let us have done with whatever there may be of politics. Let us, I say again, relentlessly pursue these mistakes to the end that they may be corrected. But let us not try to win this war by seeking to deprive the President of the powers conferred upon him by the Constitution of the fathers.

SOLDIERS AND SAILORS' CIVIL RELIEF.

Mr. OVERMAN. I move that the Senate proceed to the consideration of the bill (H. R. 6361) to extend protection to the civil rights of members of the Military and Naval Establishments of the United States engaged in the present war.

Mr. SMOOT. What is the calendar number?

Mr. OVERMAN. It is not on the calendar. It was reported this morning from the Judiciary Committee.

The VICE PRESIDENT. The question is on the motion of the Senator from North Carolina to proceed to the consideration of the bill indicated by him.

The motion was agreed to; and the Senate, as in Committee of the Whole, proceeded to consider the bill.

Mr. STONE rose.

Mr. OVERMAN. As the bill is now the unfinished business, I yield to the Senator from Missouri to move an executive session.

EXECUTIVE SESSION.

Mr. STONE. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened and (at 4 o'clock and 5 minutes p. m.) the Senate adjourned until to-morrow, Tuesday, February 5, 1918, at 12 o'clock meridian.

Lieut. Col. Lewis S. Ryan.
Lieut. Col. Howard L. Landers.
Lieut. Col. William H. Burt.

To be lieutenant colonels.

Maj. Lewis S. Ryan.
Maj. Howard L. Landers.
Maj. William H. Burt.
Maj. Clarence N. Jones.
Maj. Frederick B. Hennessy.
Maj. Laurin L. Lawson.
Maj. Morris E. Locke.
Maj. John W. Kilbreth.
Maj. James H. Bryson.
Maj. Roger O. Mason.
Maj. William S. Browning.
Maj. Joseph F. Barnes.
Maj. William P. Ennis.
Maj. Dennis H. Currie.
Maj. Beverly F. Browne.
Maj. Raymond S. Pratt.
Maj. Alden F. Brewster.
Maj. Norton E. Wood.
Maj. Albert S. Fuger.
Maj. William N. Michel.
Maj. Ernest S. Wheeler.
Maj. Lesley J. McNair.
Maj. Walter D. Smith.
Maj. Creed F. Cox.
Maj. Leo P. Quinn.
Maj. Walter H. Smith.
Maj. Albert T. Bishop.
Maj. Harold W. Huntley.
Maj. Edwin De L. Smith.

To be majors.

Capt. Charles J. Ferris.
Capt. Walter D. Smith.
Capt. Creed F. Cox.
Capt. Leo P. Quinn.
Capt. Walter H. Smith.
Capt. John S. Hammond.
Capt. Albert T. Bishop.
Capt. Harold W. Huntley.
Capt. Edwin De L. Smith.
Capt. Ralph McT. Pennell.
Capt. Walter S. Sturgill.
Capt. Sherman Miles.
Capt. Cortlandt Parker.
Capt. Richard C. Burleson.
Capt. Joseph R. Davis.
Capt. John R. Starkey.
Capt. Rene E. De R. Hoyle.
Capt. Dawson Olmstead.
Capt. John C. Maul.
Capt. Albert L. Hall.
Capt. George H. Paine.
Capt. Leroy P. Collins.
Capt. Ballard Lyerly.
Capt. Robert H. Lewis.

Capt. Phillip W. Booker.
Capt. Fred T. Cruse.
Capt. James P. Marley.
Capt. Waldo C. Potter.
Capt. John W. Downer.
Capt. Benjamin M. Bailey.
Capt. William F. Sharp.
Capt. Frank Thorp, jr.
Capt. E. R. Warner McCabe.
Capt. Donald C. McDonald.
Capt. John G. Tyndall.
Capt. Otto L. Brunzell.
Capt. Clifford L. Corbin.
Capt. Pierre V. Kieffer.
Capt. Charles T. Harris, jr.
Capt. Maxwell Murray.
Capt. Alfred L. P. Sands.
Capt. Henry H. Pfeil.
Capt. Charles P. George.
Capt. Charles W. Harlow.
Capt. William H. Rucker.
Capt. William H. Shepherd.
Capt. Marshall G. Randol.
Capt. John N. Greely.
Capt. Webster A. Capron.
Capt. John E. Mort.
Capt. James H. Burns.
Capt. Everett S. Hughes.
Capt. Thomas J. Smith.
Capt. Roger S. Parrott.
Capt. Thurman H. Bane.
Capt. Thomas D. Sloan.
Capt. Harold Geiger.
Capt. Claude B. Thunnell.
Capt. Edwin M. Watson.
Capt. Harold E. Miner.
Capt. Joseph A. Rogers.
Capt. Charles T. Griffith.
Capt. Ronald D. Johnson.
Capt. Jacob E. Devers.
Capt. Lucien H. Taliaferro.
Capt. Harold H. Bateman.
Capt. Frank A. Turner.
Capt. George G. Seaman.

To be majors with rank from December 5, 1917.

Capt. Franz A. Doniat.
Capt. Carl A. Baehr.
Capt. Robert S. Donaldson.

CAVALRY ARM.

To be colonels.

Lieut. Col. Frank M. Caldwell.
Lieut. Col. James J. Hornbrook.

HOUSE OF REPRESENTATIVES.

MONDAY, *February 4, 1918.*

The House met at 12 o'clock noon.

The Rev. William Couden, of Washington, D. C., offered the following prayer:

Our Heavenly Father, wilt Thou illumine, reenforce, and cheer the membership of this legislative body endeavoring to serve our Nation. Guide our chosen leaders. Crystallize public thought and direct public action by the highest and noblest ideals. We do not ask Thee to side with us, but we desire that we shall be found unfailingly with Thee. Unify us, one and all in this Nation, to Thy will.

Bless the Members of this House personally. Forgive their sins. Lead them through this day. And at last by Thy grace bring them to life everlasting, through Jesus Christ our Lord. Amen.

The Journal of the proceedings of Friday, February 1, 1918, was read and approved.

SPECIAL SESSION OF HOUSE.

Mr. SHERWOOD. Mr. Speaker, I ask unanimous consent for an order for a special session to be held on Sunday, February 10, 1918, for the purpose of holding memorial services in honor of the late ELLSWORTH R. BATHRICK, a Representative from the fourteenth Ohio district.

The SPEAKER. The gentleman from Ohio [Mr. SHERWOOD] asks unanimous consent that there be a special session of the House on February 10, at 12 o'clock noon, for the purpose of memorializing the late Representative BATHRICK. Is there objection?

There was no objection.

EAST ST. LOUIS RIOTS.

Mr. JOHNSON of Kentucky. Mr. Speaker, the special committee which was appointed under House resolution 128 for the purpose of investigating the interference with interstate-commerce traffic and other matters in East St. Louis went over there and took about 5,000 pages of testimony during the five weeks the committee was there. We now find that to publish 500 copies of the testimony would cost about $5,100, and the amount of money now at the disposal of the committee is not sufficient to have the printing done. The report upon the matter is now almost completed. I have been requested by the committee to ask unanimous consent that some photographs of the scenes which have been described in the testimony, but which can not be described accurately in the report, be published with the report of the committee.

The SPEAKER. The gentleman from Kentucky asks unanimous consent that, in printing the report of the select committee which went to East St. Louis to investigate matters there, it may be permitted to print certain photographs for the illumination of the situation. Is there objection?

Mr. MONDELL and Mr. DYER rose.

The SPEAKER. The gentleman from Wyoming is recognized.

Mr. MONDELL. Mr. Speaker, reserving the right to object, how voluminous is the committee's report?

Mr. JOHNSON of Kentucky. Well, I have made the first draft of it, and thus far it has only been submitted to one Member, and that is the gentleman from Wisconsin [Mr. COOPER], and as soon as I can do so I wish to submit it to the others. But it would take, in my judgment, about as much as five or six columns of a newspaper.

Mr. MONDELL. And the committee is of the opinion that this report will contain sufficient information without the general publication of the testimony?

Mr. JOHNSON of Kentucky. Perhaps, but we wish to make a report as voluminous and explanatory of the situation as possible, since the committee has not the money with which to have the testimony printed. Various witnesses discussed scenes which the members of the committee visited and with which they are familiar, but which they are unable to portray, except by the use of photographs.

Mr. MONDELL. It is the opinion of the committee that the use of a few photographs—how many?

Mr. JOHNSON of Kentucky. Well, between 50 and 20.

Mr. MONDELL. Will add very much to the value of the report?

Mr. JOHNSON of Kentucky. We think the report will not be complete without them.

Mr. MONDELL. And that by publishing the photographs it will not be necessary to publish the testimony?

Mr. JOHNSON of Kentucky. That is our idea.

Mr. MONDELL. And it will aid in illuminating the report so that the publication of the testimony will not be necessary?

Mr. JOHNSON of Kentucky. That is the intention.

Mr. MONDELL. How long will it delay publication?

Mr. JOHNSON of Kentucky. I have not gone into that, but I can not very well see how the making of a few cuts will delay it very long.

Mr. DYER. Mr. Speaker, reserving the right to object, I would like to ask the gentleman from Kentucky whether or not, in his judgment and opinion, the publication of the hearings will be worth the money many times over?

Mr. JOHNSON of Kentucky. No; I do not.

Mr. DYER. As for future reference and future use?

Mr. JOHNSON of Kentucky. No; I do not. The report is now being thoroughly indexed, and everything pertaining to the matter is being put upon an invoice, the whole thing to be put into a congressional box and placed here in the file room, or wherever it belongs, so that it will always be accessible to anybody who may want it; but I do not believe $5,100 should be spent to print it.

Mr. DYER. I will ask the gentleman how many lives were lost in East St. Louis as the result of these riots, to the best of his judgment, from the hearings had there?

Mr. JOHNSON of Kentucky. Well, that is a matter of dispute. I think something like 50 corpses were actually viewed. Then these photographs show that it is possible that some number of the negroes, at least, were burned in the several hundred houses that were burned. One photograph shows the partial remains of a negro who was burned in one of them, and the supposition is that other negroes were burned in the others. That is one of the reasons why we want to use these photographs instead of relying on words alone to describe the situation.

Mr. DYER. Mr. Speaker, my information is that the testimony taken by this committee, which rendered great service to the country, shows that there were several hundred—at least three or four hundred—human lives destroyed in these race riots.

Mr. JOHNSON of Kentucky. The report will show the number, and will contain a statement showing what the coroner said about it, and also show what those who visited the morgue said about it. Whatever more people may have been killed in the riots may possibly be shown from these photographs. But I can say to the gentleman that there is nothing to show that anything like the number indicated by him lost their lives in that unfortunate riot.

Mr. DYER. I understand the gentleman requests leave that he be permitted to include certain photographs in the report or that they do not want to publish the report. What is the gentleman's request?

Mr. JOHNSON of Kentucky. Simply that some of the photographs be published in the report that the committee will make.

Mr. DYER. Mr. Speaker, the House of Representatives did an extraordinary thing, thoroughly called for and just, in my opinion, in sending to East St. Louis one of the most splendid representative committees of this House to look into this question. They did splendid service. They did great work that will be worth many times the expense that the House has gone to, or that it can go to, in the publication of this report, and I believe that in view of everything that happened down there in East St. Louis, Ill., and of the hundreds of lives that were destroyed without the least possible excuse—men, women, and children burned and thrown into the river—I think, under the conditions, every bit of information that is possible to obtain on this matter ought to be had and published to the world. This committee obtained this information in the examination of witnesses sworn to tell the truth, and I for one am going to insist as best I can in this House that the whole report, every bit of testimony they took, including the photographs, be included in this information and published.

The SPEAKER. The only point now is whether these photographs will be included in this report. It is not desired to print the testimony.

Mr. DYER. I understand it is not the intention of the committee to print the proceedings.

The SPEAKER. Anybody has the right to demand it if he can.

Mr. JOHNSON of Kentucky. The committee is not at all opposed to publishing the testimony taken, but the appropriation that has been made for this investigation will not warrant the publication of it, because we have not got money enough left to publish it, and we have already had these photographs taken, and the simple request now is to use those photographs in the report.

The SPEAKER. Is there objection?

Mr. LITTLE. Reserving the right to object, Mr. Speaker, how much is there left? You say it will cost about $5,100 to print this?

Mr. JOHNSON of Kentucky. To print 500 copies of that.

Mr. LITTLE. How much have you toward that?

Mr. JOHNSON of Kentucky. I do not know exactly, but I think approximately $800 or $1,000.

Mr. LITTLE. I understood at first that you wanted permission not to print it, but I understand there is no such request here now.

Mr. JOHNSON of Kentucky. Oh, no.

Mr. LITTLE. I should object to not printing that, but I have no objection to including the photographs, and I hope you will.

Mr. LENROOT. Reserving the right to object, Mr. Speaker, I desire to ask whether or not the committee is unanimous in its recommendation?

Mr. JOHNSON of Kentucky. The committee is unanimous in this request.

Mr. LENROOT. I mean in its report.

Mr. JOHNSON of Kentucky. I just said I have made only the first draft, and only Mr. COOPER of Wisconsin had seen that. The gentleman evidently did not hear me.

Mr. LENROOT. I mean on the general conclusion. Is the committee unanimous?

Mr. JOHNSON of Kentucky. I think so; but whether the committee is unanimous in the way I have written it or not, I do not know. We will find out in the next few days.

Mr. LENROOT. In his report the gentleman is trying to carry out the unanimous judgment of the committee?

Mr. JOHNSON of Kentucky. Yes. Whether I have accomplished that or not I do not know yet.

Mr. LENROOT. What does the gentleman expect to accomplish by the publication of these photographs?

Mr. JOHNSON of Kentucky. It will give the description of things that we can not describe by words.

Mr. LENROOT. In what respect? I do not quite understand. To illustrate, for instance.

Mr. JOHNSON of Kentucky. Well, to illustrate, there were three negroes on a street car who lived in St. Louis. They had been over in St. Clair County, 12 or 15 miles beyond St. Louis, fishing. They did not live in East St. Louis, and they had nothing whatever to do with the riot or its cause there. These three negroes were taken off that street car and killed. The man was beaten to death; the son was shot to death. I said three of them were killed; only two of them were killed. The negro woman was taken off and almost scalped and dragged around on the ground until she was unconscious. A photograph of that was taken at the time.

Mr. LENROOT. At the time?

Mr. JOHNSON of Kentucky. The correctness of that photograph was verified. We took testimony showing that that was the truthful situation. That photograph shows soldiers in uniform, with their guns, standing there, and they did not interfere.

Mr. LENROOT. Those photographs were taken at the time of the actual occurrences?

Mr. JOHNSON of Kentucky. All of them were not. Some of them were taken while the testimony was being taken. For instance, it was charged that some of the industries there and the railroads were importing negro help from the South for the purpose of breaking a strike, particularly one at the Aluminum Ore Co. While we were engaged in taking testimony regarding that feature of it a bunch of negroes turned up from the South—negroes who had been gotten there under false promises. They were compelled to accept smaller wages than had been promised

them. They were compelled to sleep in box cars, without any bed or bedding. They were generally mistreated, and the committee authorized at the time to have their photographs taken, and they were photographed during the progress of the trial. We have a number of things like that.

Mr. GARNER. Question!

A MEMBER. Regular order, Mr. Speaker.

Mr. COOPER of Wisconsin. Mr. Speaker, I was not in when the gentleman from Kentucky made his request. Being a member of that committee, I would like to know what the request was.

Mr. JOHNSON of Kentucky. The request was to have the photographs included with the report of the committee.

The SPEAKER. Is there objection? The regular order has been called for a number of times.

Mr. DYER. Then I shall have to object for the present.

Mr. JOHNSON of Kentucky. I wish it understood that while the gentleman objects "for the present," his objection will be permanent, because I will not renew the request; and if he wants to cut these negroes out from the benefit of this showing, let him do it.

SENATE BILL REFERRED.

Under clause 2, Rule XXIV, Senate bill of the following title was taken from the Speaker's table and referred to its appropriate committee, as indicated below:

S. 3131. An act for the relief of Brig. Gen. Littleton W. T. Waller, United States Marine Corps; to the Committee on Claims.

ENROLLED BILL AND JOINT RESOLUTION PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. LAZARO, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States for his approval, the following bill and joint resolution:

H. R. 3135. An act to amend section 4 of the act entitled "An act to provide for an auxiliary reclamation project in connection with the Yuma project, Arizona."

H. J. Res. 174. Joint resolution for the purpose of promoting efficiency for the utilization of the resources and industries of the United States, for lessening the expenses of the war, and restoring the loss caused by the war by providing for the employment of a discovery or invention called the "Garabed," claiming to make possible the utilization of free energy.

LEAVE OF ABSENCE.

By unanimous consent leave of absence was granted as follows:

To Mr. FOCHT, for one week, on account of illness; and

To Mr. SANDERS of Louisiana, indefinitely, on account of illness.

QUESTION OF PRIVILEGE.

Mr. BLANTON. Mr. Speaker, I rise to present a question of privilege.

The SPEAKER. The gentleman will present it. In the first place, he has to state what the question of privilege is without making a speech about it.

Mr. BLANTON. Mr. Speaker, on the 31st day of January the gentleman from Texas [Mr. WILSON], just before the close of the session on that day, obtained unanimous consent to extend his remarks in the RECORD. Following that permission he had published in the RECORD a five-page article, every portion of which was in violation of the custom of this House under the rule as to extending remarks. He attacked my integrity, my veracity, and standing as a gentleman and a Member of this House.

The SPEAKER. In what language did he attack it?

Mr. BLANTON. First, concerning remarks that I made in this House on the 8th day of January explaining my absence at the time that the vote was taken on the national prohibition amendment, he states that the remarks made by me at that time concerning a pair were absolutely false, without any foundation, and he states in that connection that the representations I made——

The SPEAKER. Is that what he said, or is that the inference?

Mr. BLANTON. That is what he says in the article.

Mr. WILSON of Texas. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman from Texas rise?

Mr. WILSON of Texas. If I may be permitted to deny here the statement already made——

The SPEAKER. No; the other gentleman from Texas [Mr. BLANTON] has the floor.

Mr. BLANTON. And I refuse to be interrupted right now, Mr. Speaker.

Mr. WILSON of Texas. Mr. Speaker, a parliamentary inquiry. If I did not say that his statement was absolutely false, as he has just stated, has he a right to speak here to a question of personal privilege?

The SPEAKER. The Chair is trying to ascertain whether he has a question of privilege or not.

Mr. WILSON of Texas. I leave that to the RECORD.

Mr. BLANTON. I will point out the statements——

The SPEAKER. Will the gentleman from Texas please quote the language and not state what he thinks is the language?

Mr. MADDEN. Read the language.

Mr. BLANTON. May I have the article read by the Clerk?

The SPEAKER. Not that whole article; no.

Mr. BLANTON. The whole article, if the Speaker pleases, is teeming——

The SPEAKER. The Chair does not want to hear any remarks about what the article says, but he wants the gentleman to read the particular language that he says constitutes a question of personal privilege.

Mr. BLANTON. I will proceed to read it:

The primary purpose of these gentlemen—

Referring to myself and the gentleman from Oklahoma [Mr. CHANDLER]—

is to build up or repair their political fences in their respective districts.

That, I take it, impugns the motive of myself and my colleague.

The SPEAKER. Will the gentleman please read the citation that he says constitutes the basis for a personal privilege?

Mr. BLANTON. Without comment?

The SPEAKER. Without comment.

Mr. BLANTON. I will do so. I cite the following paragraphs, viz:

I should have replied to these statements sooner. Whether intentionally or not, they each selected a time when I was absent to make them. Also about this time I sustained a broken rib, due to a fall on the ice, and have been slow in getting some of the records.

* * * * * * *

Now, Mr. BLANTON concedes that there was a special verbal agreement qualifying the written agreement. In a Western Union telegram to me, dated the 20th of December, 1917, at Hondo, Tex., he says: "The only thing said about release was that if I returned then we could release and vote." That is a very unreasonable statement and would be a dishonorable agreement where three were involved. He says nothing about the return of the third party and nothing about my return, but he contemplates my presence. This feature of it merely shows that he understood from our conversation that I would likely be present to vote. But the gentleman contradicts himself in his statement before the House.

* * * * * * *

He stated:

I sent a telegram to Mr. WILSON of Texas, urging him as his colleague and particular friend since college days, to support the prohibition amendment, thus permitting the States to pass upon the question once for all, and stated that if he would vote for prohibition to pair Mr. CHANDLER and myself with some other negative vote.

All of this statement is true except the vital part of it, the one fact intended to be conveyed and impressed, namely, that he authorized me to pair them with a negative vote, provided I would vote for prohibition.

* * * * * * *

The telegram has two periods in it, and I specifically call your attention to the last one and the sentence following: "Pair CHANDLER and me with some other negative vote, and don't deny the States this privilege." There is no "if" in this sentence; there is no such condition anywhere imposed in the telegram. "And don't deny the States this privilege" is an appeal and not a condition. I can submit this telegram to a thousand fair-minded people and would receive a thousand answers all alike—that there is no such condition in it; yet look at the statement the gentleman solemnly made before this House. Unfortunately, this telegram, though in my office, was not delivered to me until the morning after the vote. But I needed no such authority from Mr. BLANTON by telegram, as I had it through our agreement, as I stated. The telegram is exactly in line with our agreement. Mr. BLANTON sent this telegram before it appeared in the daily papers that he was not present when the vote on national prohibition was taken and was not paired.

* * * * * * *

The gentleman made his race against Judge W. R. Smith right next to the district I represent, and I heard that one of the principal talking parts of his platform was that Congress did not meet until 12 o'clock noon, and that he was condemning Judge Smith for not having stopped such a practice, and promising if elected he would bring about a reform in this respect and force the Congress to meet at 8 o'clock a. m.

* * * * * * *

The point is, it all shows that the gentleman who comes before this House and charges me with a dishonorable act is not a stranger to controversies where his veracity is involved.

* * * * * * *

The SPEAKER. The Chair thinks that the gentleman from Texas [Mr. BLANTON] has a question of privilege; not very well defined, but in three or four places, as far as read, the intimation of the lack of veracity is very plain, and the gentleman will proceed now to speak in line with that.

Mr. BLANTON. Mr. Speaker, this is really no time for Members or citizens to engage in private quarrels, when a murderous public enemy yet unwhipped is grappling at our throats; but I

owe it as a duty to myself, my family, my district, and my country not to let these false charges go unnoticed and unchallenged.

On January 8, on the floor of this House, in a modest way, and without feeling, I explained why I was absent when the vote was taken on national prohibition, and so forbearing and considerate was I that nowhere in my remarks did I reflect upon the gentleman from Texas [Mr. WILSON] or upon anyone else. I challenge him to point out the word, clause, sentence, or paragraph that in any way reflects upon him, for it nowhere states that he voted or even intimates that he violated a pair. I thought too much of the good name of my State and of the good reputation of the delegation of which I have the honor to form a part than to thus expose a family skeleton and let the world know that a Texas Member had ruthlessly Prussianized a sacred written agreement by violating a pair with his college friend and colleague when he was 2,000 miles away. Yet in the article he extended in the RECORD he states "that I intended to reflect upon his character, and that such statement, if believed by anybody, does reflect upon his character; that my statement was false in many respects, maligns and slanders him; and that it forms an issue between us that involves our veracity." The gentleman further intimates that I inspired the pair clerk, Mr. Small, to make the statement which he signed and addressed to the gentleman from Oklahoma [Mr. CHANDLER] and myself, and which the former inserted into the RECORD on January 9, which statement he says is false, yet he intimates that it was worded by me.

I accept his challenge and the issue as made by him and will attempt, first, to prove that my said statement of January 8 is in every particular absolutely true, and, second, that I neither inspired nor worded the statement made by the pair clerk, Mr. Small, but that he prepared it himself and submitted it to the Republican pair clerk, Mr. Hollingsworth, for approval before he delivered it, and, furthermore, that Mr. Small's statement is true.

Mr. Speaker, to save the time of the House, I will ask permission to print in the RECORD my statement made January 8 and the statements made by the pair clerk, Mr. Small, and the gentleman from Oklahoma [Mr. CHANDLER].

Mr. WILSON of Texas. Mr. Speaker, I shall object unless he adds mine.

Mr. BLANTON. Then I will ask to have it read by the Clerk. I merely wanted to save the time of the House in reading it.

The SPEAKER. The Clerk will read.

The Clerk read as follows:

Mr. KITCHIN. Mr. Speaker, I desire to prefer a request for unanimous consent, and if it be granted, then, at the conclusion of the remarks to be made, I shall move to adjourn. I ask unanimous consent that the gentleman from Texas [Mr. BLANTON] be permitted to address the House for three minutes.

The SPEAKER. Is there objection?

Mr. ROBBINS. Mr. Speaker, on what subject?

Mr. BLANTON. I desire to explain my absence from the House at the time of the taking of the vote on the prohibition question. It is a personal matter.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The gentleman from Texas [Mr. BLANTON] is recognized for three minutes.

Mr. BLANTON. Mr. Speaker, I have been criticized—by one not in my district, however—for being absent on the 17th day of December when the vote on the prohibition amendment was taken. Shortly after the convening of the present session of this Congress, learning that there would be few matters considered before the holiday recess, I had agreed upon a pair with my colleague from Texas [Mr. GREGG] on the prohibition amendment. Later on he informed me that he was inclined to support the resolution, that he had about made up his mind to support it, and I released him from the agreement. On the 7th day of December Mr. T. A. CHANDLER, of Oklahoma, Mr. JAMES C. WILSON, of Texas—my colleague—and myself signed a written agreement to pair both on the national prohibition amendment and the woman-suffrage amendment, Mr. T. A. CHANDLER, of Oklahoma, and myself pairing in favor both of prohibition and suffrage, and Mr. JAMES C. WILSON, of Texas, against both measures, agreeing, however, that should all three of us be present whenever the vote was taken on either measure that then we should be released from the pair and all could vote. This signed written agreement was filed with the pair clerk on the 7th day of December, 1917, after which I left for Texas and Mr. CHANDLER left for Oklahoma, both Mr. CHANDLER and myself relying implicitly upon our pair duly executed and filed.

Having in my district 58 counties running 566 miles east and west, from Mineral Wells to El Paso, and several hundred miles north and south, from Lubbock to Rock Springs and Presidio, with over 400,000 people in it, and being the largest district in the United States, while over 90 per cent of the people are loyal, patriotic, dependable citizens standing solidly behind their flag, President, and Government, yet because of socialistic propaganda and ignorance of condtions there existed some disloyal seditious sentiment, three men having already been sent to the Federal penitentiary for such crime, and, moreover, many boys from my district stationed at Camp Bowie were dying, and some at Camp Travis were dying, I went to my district and drove in an automobile, through freezing weather part of the time, over 100 miles a day, making two, three, four, and even five speeches a day, and making a personal inspection of condtions at said camps, and upon one day especially I remember I drove 167 miles from Abilene, Tex., to Junction, speaking at Ballinger, Paint Rock, Eden, and Junction in behalf of our Government policies, no politics, however, being in any of my speeches. On the 15th day of December I received a telegram from Dr. A. J. Barton, president of the Antisaloon League of Texas, from Washington, indicating that the prohibition cause might be embarrassed by my pair with Mr. WILSON, and asking me to wire Mr. KITCHIN to change pair to some one else provided Mr. WILSON could be induced to vote for prohibition. I immediately wired Mr. KITCHIN on December 15 that provided Mr. WILSON of Texas would support the prohibition amendment, then to change my pair to benefit the prohibition cause.

Also, on December 15 I wired Dr. A. J. Barton that I had complied with his request and had wired Mr. KITCHIN, authorizing him to change pair if Mr. WILSON of Texas would vote for prohibition, and that if necessary to count Mr. WILSON's vote for prohibition I would return immediately. On the 16th day of December, from Albany, I sent a telegram to Mr. WILSON of Texas, urging him as his colleague and particular friend since college days to support the prohibition amendment, thus permitting the States to pass upon the question once for all, and stated that if he would vote for prohibition to pair Mr. CHANDLER and myself with some other negative vote.

The SPEAKER. The time of the gentleman has expired.

Mr. BLANTON. Mr. Speaker, may I have two minutes additional?

The SPEAKER. The gentleman from Texas asks unanimous consent to speak for two minutes additional. Is there objection? [After a pause.] The Chair hears none.

Mr. BLANTON. I received no reply from Mr. WILSON. Also, on December 16 I wired Mr. E. Y. WEBB, chairman of the Committee on the Judiciary, that in case Mr. WILSON would vote for the prohibition amendment to pair Mr. CHANDLER and myself with some one else.

Also, on December 16 I wired Mr. GREGG, of Texas, and others, urging that they support the prohibition amendment.

I refer to page 669 of the Appendix to the RECORD of last session for remarks I made on October 5, 1917, in favor of the passage of the national prohibition amendment and predicted that it would pass the House early in the December session. I missed only seven days' sessions of the House, as during my entire absence the House met only on the 11th, 12th, 13th, 14th, 15th, 17th, and 18th days of December.

I will state on the prohibition question I am further already on record. On April 9 I introduced a joint resolution (H. J. Res. 401) proposing an amendment for national prohibition, which is practically the same resolution introduced by Senator SHEPPARD that passed this House on the 17th of December, and on the 19th of April I introduced a bill (H. R. 3565) to suspend the manufacture of and all traffic in intoxicating liquors for beverage purposes during the war. On May 8 I introduced an amended bill (H. R. 4248) to suspend the manufacture of and all traffic in intoxicating liquors for beverage purposes during the war, and on May 9 I got Senator KENYON to introduce a copy of this last amended bill in the Senate. These matters, I take it, place me upon record on this question as being unalterably in favor of national prohibition, and I ask unanimous consent that these documents may go into the RECORD in connection with my remarks.

The SPEAKER. The gentleman from Texas asks unanimous consent to extend his remarks in the RECORD by inserting these telegrams, and so forth. Is there objection?

Mr. WALSH. Mr. Speaker, I think the gentleman's statement is sufficiently clear as to what the telegrams contain, and I object.

Mr. BLANTON. And in order to have the whole matter clearly before you, I will have the Clerk also read the statement made by the Democratic pair clerk, Mr. Small, which on January 9 was inserted in the RECORD by the gentleman from Oklahoma [Mr. CHANDLER], which is as follows.

The Clerk read as follows:

Mr. CHANDLER of Oklahoma. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing a statement by one of the pair clerks of the House.

The SPEAKER. The gentleman asks unanimous consent to print in the RECORD a statement from one of the pair clerks of the House. Is there objection?

There was no objection.

The statement is as follows:

HOUSE OF REPRESENTATIVES, UNITED STATES,
Washington, D. C., January 8, 1918.

MESSRS. THOMAS L. BLANTON, M. C., and T. A. CHANDLER, M. C.,
House of Representatives, Washington, D. C.

MY DEAR SIRS: On day before yesterday you requested me, as pair clerk of the House of Representatives, to make you a statement in writing as to the facts concerning the pair made between you and Hon. JAMES C. WILSON, giving the reason why the pair was not observed and did not appear in the CONGRESSIONAL RECORD.

About two weeks before the vote was taken on the constitutional amendment for national prohibition, Hon. THOMAS BLANTON, Member of Congress from the sixteenth Texas district, came to me and stated that he had a pair upon the votes to be taken upon the constitutional questions of national prohibition and woman suffrage, Mr. BLANTON stating that he was for both these propositions and that Mr. WILSON would be against both, and that they would secure some other Member who would vote as Mr. BLANTON would in the matter. (Pairs upon these constitutional questions are in the same proportion as the vote, and as it requires a two-thirds majority for legislation of this character, it would take two Members for either of these amendments to protect one Member voting against.) On the next day Mr. BLANTON came to me with Mr. T. A. CHANDLER, Member of Congress from Oklahoma, and handed to me a pair, which was out of the ordinary for the reason that it was a typewritten agreement, with the names of Messrs. BLANTON and CHANDLER voting for the prohibition amendment and Mr. WILSON voting against the prohibition amendment inserted in the pair and duly signed by each of them, and I told them, as pair clerk, that the pair would go into the RECORD.

Two or three days before the vote was taken on the prohibition amendment Mr. WILSON came to me and said he had expected to leave the city, but that as he had not desired to have the pair changed to some one else who would vote as he would in order that he might vote.

Now, pairs are simply agreements between Members of Congress, the idea being that one vote will offset the other, and should one or all Members concerned in a pair or an agreement made between Members be absent, these agreements and pairs are observed. After such an agreement is made it is never altered by the pair clerks except by the consent or permission of those concerned.

Therefore, when Mr. WILSON requested the pair clerks to release him we had nothing to do with it, as the matter was between Messrs. BLANTON, of Texas, CHANDLER of Oklahoma, and Mr. WILSON of Texas. I told Mr. WILSON that if he would communicate with Messrs. BLANTON and CHANDLER, and they would agree to do so, of course it would be all right; otherwise I would put the pair up for the RECORD.

In the meantime Hon. CLAUDE KITCHIN, the Democratic floor leader, handed me a telegram from Mr. BLANTON, which is as follows:

"Am making three speeches a day in my district, embracing 58 counties, in effort to wipe out all disloyalty and force absolute support behind Government. If WILSON of Texas will support prohibition amendment, then change my pair to benefit cause, or if necessary I will return immediately."

Mr. WILSON came back to see me and said, so far as Mr. BLANTON was concerned, he was willing to release him (Mr. WILSON) from the pair. Mr. Hollingsworth, who represents the minority in the matter of pairs, who was present, asked Mr. WILSON how he expected to protect Mr. CHANDLER. Mr. WILSON said that he had no agreement with Mr. CHANDLER, and then we cited Mr. WILSON to the signed agreement, with all names filled in, and which is as follows:

"Mr. Speaker: We, the undersigned, have paired on the resolutions for the national prohibition amendment and the national woman suffrage amendment. THOMAS L. BLANTON, of Texas, and T. A. CHANDLER, of Oklahoma, each voting both for national prohibition and national woman suffrage, and JAMES C. WILSON, of Texas, voting against both of these said resolutions, and we request that this agreement be printed in the RECORD.

(Signed) "THOMAS L. BLANTON, of Texas.
"T. A. CHANDLER, of Oklahoma.
"JAMES C. WILSON." [Name later erased.]

Mr. WILSON then said that he intended to vote anyway. I went to Mr. FERRIS, of Oklahoma, and, although it was late, we made an effort to communicate with Mr. CHANDLER as to whether he wanted to hold Mr. WILSON to the pair, as it was my plain duty as pair clerk to have the pair as made announced for printing in the RECORD. Mr. WILSON came to the pair clerk's desk again, and with him was Mr. MORGAN, of Oklahoma, who stated that he was not willing to state whether or not Mr. CHANDLER would be willing to release Mr. WILSON from the pair, after the matter had been explained to him. Mr. WILSON then left and returned after a few minutes and said that he was going to vote and asked to see the signed pair, which he took and said as he intended to vote, would not have his name on it, and then erased his name from the agreement, which he had, according to his own statement, signed.

Mr. BLANTON'S telegram released Mr. WILSON from the pair, provided he intended to vote for the prohibition amendment, and on the final vote he voted against the amendment, so that he had no release from Mr. BLANTON and did not claim to have any from Mr. CHANDLER. We, the pair clerks, could not put the pair into the RECORD because Mr. WILSON had erased his name, and there was nothing to hold him to the agreement, as he had announced his intention of voting.

This is how the matter happened, and no one regrets as much as do the pair clerks that you both were left unprotected on the vote, as we knew when you left the city it was with the understanding that you would be taken care of.

With highest personal regard, I am,

Very respectfully, yours, W. E. SMALL, Jr.,
Pair Clerk, House of Representatives.

Mr. BLANTON. I realize that a pair is merely a gentleman's agreement between Members, yet section 2 of Rule VIII of the rules governing this House provides:

Pairs shall be announced by the Clerk, after the completion of the second roll call, from a written list furnished him, and signed by the Member making the statement to the Clerk, which list shall be published in the RECORD as a part of the proceedings.

The gentleman from Texas [Mr. WILSON] starts out by saying that the gentleman from Oklahoma [Mr. CHANDLER] and myself each selected a time when he was absent to make our statements, indicating that we took an unfair advantage of him, stating that about that time he had sustained a broken rib due to a fall on the ice. On January 8 the House met at 12 o'clock noon and adjourned at 2.31 p. m., and it was during this short session that I made my statement on the floor of the House, after the Democratic leader [Mr. KITCHIN] had requested such time for me. Am I to be blamed because Mr. WILSON was absent from even this short session of the House and was unaware of the proceedings going on in the Legislative Chamber? On this date he did not even dream that he had a broken rib. On January 9 the House met at 12 o'clock noon, and within a few minutes after the prayer and the reading of the Journal the gentleman from Oklahoma [Mr. CHANDLER] requested and obtained unanimous consent from the House to print in the RECORD the statement made by the pair clerk, Mr. Small. Are we to be condemned because the gentleman from Texas [Mr. WILSON] preferred to remain away and not be present when important business was being transacted by the House? He did see fit that day—January 9—to come on the floor of the House long enough to answer a roll call—his office getting notice by electric bell in plenty of time for him to answer either the first or second call of the roll—and he saw fit to appear on the floor of the House on the next day—January 10—and remain long enough to be marked present at three different roll calls occurring at least 40 minutes apart. The RECORD shows that he was on the floor of the House at least sufficiently long to be marked present at roll call on the 16th, 17th, 18th, 19th, 21st, 22d, 23d, 24th, 25th, and 26th days of January.

Mr. WILSON of Texas rose.

The SPEAKER. Does the gentleman from Texas yield to his colleague?

Mr. BLANTON. I do not.

Mr. WILSON of Texas. A parliamentary inquiry, Mr. Speaker.

The SPEAKER. The gentleman will state it.

Mr. WILSON of Texas. If the gentleman has the right to speak to a question of personal privilege, has he a right to make an attack on me?

The SPEAKER. He has not.

Mr. WILSON of Texas. Well, he is making one.

The SPEAKER. The gentleman from Texas will keep within the strict limits of the rule.

Mr. BLANTON. If I get out of it, Mr. Speaker——

The SPEAKER. The Chair will take care of that. [Laughter.]

Mr. BLANTON. He says that he should have replied to these statements sooner, but gives as his excuse for waiting from January 8 to January 31 to explain why he scratched his name from a sacred written agreement with two of his colleagues and violated a pair the following: "Also about this time I sustained a broken rib, due to a fall on the ice, and have been slow in getting some of the records I wish to introduce in connection with my statement."

Mr. WILSON of Texas rose.

The SPEAKER. Does the gentleman from Texas yield to his colleague?

Mr. BLANTON. I absolutely do not.

Mr. WILSON of Texas. Mr. Speaker, if the Speaker is going to watch gentlemen and call him down I will not rise again, but he is getting on to me now. [Laughter.]

The SPEAKER. The gentleman has his remedy; if the gentleman from Texas makes any remarks about him that are improper, he can have the words taken down. The gentleman will leave out all remarks as to the other gentleman from Texas giving excuses. If the gentleman wants to deny the statements made by Mr. WILSON of Texas, he has a right to do so.

Mr. BLANTON. The only record he has introduced besides my telegrams to him already in his office was my telegram to the gentleman from Colorado [Mr. TAYLOR], as everything else was printed in the CONGRESSIONAL RECORD on the desk of every Congressman, and his secretary in two hours' time could have gotten from the efficient service of the Western Union a copy of the said telegram by requesting it.

The extended remarks of the gentleman from Texas [Mr. WILSON] did not appear in the RECORD until last Friday morning, January 31, and though being ready then to reply, I promptly gave notice on the floor of the House that I would rise to this privilege to-day, as he was absent then, and he having accused us of purposely presenting the other matters in his absence, and I knowing that the House would adjourn Friday not to meet until to-day, and feeling certain that it would be a bare chance for him to be present to-day without such notice, I notified him through the RECORD to be present to-day, and being present he can not again accuse me of acting in his absence.

Now I will prove that every statement made by me on January 8 is absolutely true.

(1) I said I had been criticized for my absence by one not in my district. The man making this criticism was the commercial secretary of the chamber of commerce at Brownwood, Tex.—but now is such officer no longer—who so far forgot the courtesy, hospitality, and love of fairness proverbial in central west Texas as to attempt to speak for the loyal, patriotic citizens of Brownwood and Brown County, in trying to engage in cheap politics by placing in the daily press of Texas an insulting telegram to me, relative to my having been invited to speak at Brownwood by leading, substantial citizens of Brown County.

(2) I said that after the convening of this session I learned that there would be few matters considered before the holiday recess. The RECORD proves this, for after January 7, the House met only seven times and was in session only 40 hours before it recessed for the holidays, and while in Texas I missed only 40 hours of the House proceedings.

(3) I said that I first agreed to pair with my colleague from Texas [Mr. GREGG], but being later informed by him that he felt inclined to support the prohibition resolution, I released him. I have neither mentioned this matter to him nor asked him for a statement, because I did not want to involve my colleague in a controversy, but he is here present, and I now give him an opportunity to deny it if it is not absolutely true, and you see he does not deny it. And he had no intention of being away from Washington.

Mr. GARNER. Mr. Speaker, my colleague made a statement that the gentleman from Texas [Mr. GREGG] was present. I have looked around the Chamber, and I do not see him.

The SPEAKER. The Chair thinks that ought not to go in the RECORD.

Mr. BLANTON. I thought the gentleman from Texas [Mr. GREGG] was present, because I understood he was to be present.

Mr. GARNER. I do not see him, and I do not think my colleague wants that statement to go unchallenged.

Mr. BLANTON. I will say that if the gentleman from Texas [Mr. GREGG] denies that he first agreed to pair and was later released by me I will resign my position. I will let it go in and let it stand for all that it is worth, and if the gentleman from Texas [Mr. GREGG] denies it I will agree to resign.

Mr. GARNER. Mr. Speaker, will the gentleman yield?

Mr. BLANTON. Yes.

Mr. GARNER. Do I understand my colleague desires to make a statement in the RECORD that his colleague, Mr. GREGG, of Texas, is in the Chamber and does not deny this, when, as a matter of fact, he is not in the Chamber?

Mr. BLANTON. Oh, no; and I thank my colleague for his suggestion. I am glad the gentleman made the suggestion, because I was mistaken in thinking he was here.

Mr. GARNER. I only wanted to call the gentleman's attention to it.

Mr. BLANTON. I am glad the gentleman called my attention to it, because I thought Mr. GREGG was here.

(4) I said:

On the 7th day of December Mr. T. A. CHANDLER, of Oklahoma; Mr. JAMES C. WILSON, of Texas—my colleague—and myself signed a written agreement to pair both on the national prohibition amendment and the woman-suffrage amendment, Mr. T. A. CHANDLER, of Oklahoma, and myself pairing in favor both of prohibition and suffrage, and Mr. JAMES C. WILSON, of Texas, against both measures, agreeing, however, that should all three of us be present whenever the vote was taken on either measure that then we should be released from the pair and all could vote. This signed written agreement was filed with the pair clerk on the 7th day of December, 1917, after which I left for Texas and Mr. CHANDLER left for Oklahoma, both Mr. CHANDLER and myself relying implicitly upon our pair duly executed and filed.

Now, all of us are agreed that the written pair agreement was signed up and delivered to the pair clerk on the afternoon of December 7.

But the gentleman from Texas [Mr. WILSON] asserts that he is positive on the following points: (1) That he had only one conversation with me about pairing, and that was the one he had at the time he signed his name to the pair agreement; (2) that such conversation resulting in the signing of his name to the agreement occurred on the afternoon of December 7 at a time when the House had either adjourned or recessed; (3) that at the time he signed the agreement no other name was signed to it; (4) that I asked him to pair with me and Mr. TAYLOR of Colorado, and that I did not mention Mr. CHANDLER; (5) that at the time he signed it, he said, "BLANTON, I will sign it with this understanding, if I am here I will have the right to vote, provided I get you a pair in my stead, and that I said, "That is all right. If either one of us is here, he will have that privilege"; (6) that I made a false statement when on December 20, concerning what had been said at the time he signed the agreement, I wired him, "What I told you was that I would furnish two votes against yours; that I had wired TAYLOR of Colorado and expected him to join me in pair, but if he did not CHANDLER would," he asserting that the telegram I sent to the gentleman from Colorado [Mr. TAYLOR] was sent after he signed the agreement, which he says occurred at a time on the afternoon of December 7, when the House had either adjourned or recessed; (7) that I asked him if he was opposed to the prohibition and suffrage resolutions; (8) that he told me that he was thinking of going to Santo Domingo. Now I shall attempt, my colleagues, to prove that this gentleman is mistaken in each one of these positive assertions.

On December 6, after I had released my colleague from Texas, Mr. GREGG, I told Mr. WILSON of it, and mentioned the fact that it was very imperative that I should go to Texas, calling his attention to seditious sentiment which was growing as a result of a speech made by the Hon. Oscar Callaway and a lot of socialistic propaganda that was being discussed in Texas, and of the bad health conditions prevailing at Camp Bowie and Camp Travis, and I asked him if he would not pair with me and let me go, as I would not leave under any circumstances unless I arranged for my vote to count on both prohibition and suffrage. without hesitation he replied, "Yes; I will pair with you, for to tell the truth, BLANTON, on account of conditions in my district, I would rather pair on these two questions than to vote." I thanked him, told him that it would be a special favor to me, that I would prepare the agreement, and I then left him. On this day, December 6, the House met at 12 o'clock noon and adjourned at 12.54 p. m., being in session only 54 minutes. During this short session I went to the pair clerk, Mr. Small, at his desk on the floor of the House, and learned from him that on all constitutional questions, such as the proposed prohibition and suffrage amendments, Members in pairing were required to have two affirmative votes against one negative vote. I then told Mr. Small, whom I had never met or had any dealings with before, as I had always voted and never paired before, that I had a pair on both national prohibition and woman suffrage, that I was for both of these measures, and that Mr. WILSON of Texas would be against them both, and that we would secure some other Member that would vote as I did and arrange the pair. He said all right, and I left him, shortly after which the House adjourned. Now for the proof. In the pair clerk's statement, which the gentleman from Oklahoma published in the record January 9, Mr. Small says:

About two weeks before the vote was taken on the constitutional amendment for national prohibition, Hon. THOMAS BLANTON, Member of Congress from the sixteenth Texas district, came to me and stated that he had a pair upon the votes to be taken upon the constitutional questions of national prohibition and woman suffrage, Mr. BLANTON stating that he was for both these propositions and that Mr. WILSON would be against both, and that they would secure some other Member who would vote as Mr. BLANTON would in the matter. (Pairs upon these constitutional questions are in the same proportion as the vote, and as it requires a two-thirds majority for legislation of this character, it would take two Members for either of these amendments to protect one Member voting against.) On the next day Mr. BLANTON came to me with Mr. T. A. CHANDLER, Member of Congress from Oklahoma, and handed to me a pair which was out of the ordinary for the reason that it was a typewritten agreement, with the names of Messrs. BLANTON and CHANDLER voting for the prohibition amendment and Mr. WILSON voting against the prohibition amendment inserted in the pair and duly signed by each of them, and I told them, as pair clerk, that the pair would go into the RECORD.

Hence you see that Mr. Small proves conclusively that it was on December 6 when I told him that the gentleman from Texas [Mr. WILSON] and myself had arranged to pair and would file it with him as soon as we could find a third man to comply with the rule, for he says that the pair agreement was actually filed with him the next day after I had this conversation, and it is agreed that the pair agreement was filed with him on the 7th of December, on the evening of which the House adjourned not to meet again until December 11.

Likewise on December 6 I met my colleague, the gentleman from Oklahoma [Mr. CHANDLER], at one of the elevators, and he agreed, merely as a favor to me, that if I called on him to pair he would do so. At that time he had no intention of leaving Washington, but expected to be here when the votes mentioned were to be taken, and for this reason I preferred, if possible, to find some man voting affirmatively who might not be here, in order to save a vote for the cause I espoused. That night in my office I had the pair agreement drawn up on the typewriter, leaving the names in the body blank, and I then signed it myself with pen and ink and put it in my pocket to get executed by the others the next day. On the morning of December 7 I learned from my friend and colleague, the gentleman from California [Mr. RAKER], that the gentleman from Colorado [Mr. TAYLOR] was then in Colorado and would probably not return in time to vote, so I immediately prepared the following telegram:

WASHINGTON, D. C., *December 7, 1917.*

Hon. EDWARD T. TAYLOR, M. C.,
Glenwood Springs, Colo.:

KITCHIN advises House will vote on national prohibition 19th and woman suffrage 20th. Understand you favor both; so do I, and want both of us counted. WILSON of Texas strong anti, offers to pair, but under rules takes two for one. Please authorize me by wire immediately to enter pair of record. Also please agree not to call up your H. R. 4431 until January, as I may have to leave on urgent matter and won't leave without such agreement. Kindly agree and answer immediately.

THOMAS L. BLANTON.

Mr. Speaker, at this point I would like to submit that telegram to the membership of the House, and I want that part of the Western Union certification showing that it was filed at 12.30 p. m., December 7, to go into the RECORD.

Mr. WILSON of Texas. Mr. Speaker, will the gentleman yield?

The SPEAKER. Does the gentleman yield to his colleague?

Mr. BLANTON. I most certainly do not, Mr. Speaker.

Mr. WILSON of Texas. I just want to know if that is the only telegram the gentleman sent to Mr. TAYLOR of Colorado?

Mr. BLANTON. I will yield to the gentleman.

Mr. WILSON of Texas. I just wanted to know if that is the only telegram you sent to Mr. TAYLOR of Colorado?

Mr. BLANTON. Absolutely so; one and only one, and it was filed 30 minutes after the House met on January 7, long before you thought of signing that agreement.

Mr. WILSON of Texas. Will you permit another inquiry? Why did you send in it——

Mr. TAYLOR of Colorado rose.

The SPEAKER. To whom does the gentleman yield?

Mr. BLANTON. I yield first to the gentleman from Texas.

Mr. WILSON of Texas. Was that sent after your conversation with me?

Mr. BLANTON. That was after my first conversation with you on the 6th.

Mr. MADDEN. Mr. Speaker, I make the point of order that these gentlemen ought not to address each other in the first person.

The SPEAKER. That point of order is sustained.

Mr. WILSON of Texas. And you claim that you had two conversations with me about this pair agreement?

Mr. BLANTON. There is no question in the world about that.

The SPEAKER. Does the gentleman from Texas yield to the gentleman from Colorado?

Mr. BLANTON. Yes; I gladly yield to my friend from Colorado.

Mr. TAYLOR of Colorado. I think possibly it is only fair to both these gentlemen for me to say that I was away from home when this telegram came, and after returning home I assumed it was too late then for me to pair with the gentlemen, so I never really answered the telegram at all.

Mr. BLANTON. I attach no blame to the gentleman. On that day, December 7, the House met at 12 o'clock noon, and immediately after the prayer and the reading of the Journal I took the above telegram to the branch office of the Western Union on the House corridor floor in the Capitol and delivered it for transmission, and this telegram shows by the indorsements on it that the Western Union filed it for transmission at exactly 12:30 p. m., which was within 30 minutes after the House met. And the gentleman from Texas [Mr. WILSON] must have overlooked this very important and absolutely convincing fact when he got a copy of this message from the Western Union and inserted it in his extended remarks to prove a contention the very opposite of which it absolutely established. After waiting about three hours for an answer from Colorado and getting none, I concluded that the gentleman from Colorado was probably on his way back to Washington, which would give prohibition the benefit of his vote, and I concluded to take advantage of the kind offer of the gentleman from Oklahoma [Mr. CHANDLER] before adjournment and use him in the pair if I did not receive an answer from Colorado in time. I therefore found Mr. WILSON of Texas and presented the written agreement to him, already signed by me in ink, and he read it over, and then, without any hesitation, signed his name with a pencil. I then told him that the pair clerk had informed me that it was necessary on constitutional questions to have two affirmative votes for one negative; that I had wired Mr. TAYLOR of Colorado to join me in the pair, and that if he did not agree to do so, Mr. CHANDLER of Oklahoma would, as I had already seen him about it, and I called his attention to the fact that he ought to feel very important to offset two opposing votes with his one. I never at any time asked him how he stood, for I have known him since we were boys, we being college mates together at the University of Texas nearly 25 years ago, and I have known for years that he was a strong antiprohibitionist. Moreover, just a few days before this I had prepared a careful, correct poll of the Members on this issue of prohibition, and I knew that we had enough votes of men who would stand hitched and who were going to be here to pass the resolution by the necessary two-thirds vote and have at least seven extra votes additional. He did not tell me that he expected to go to Santo Domingo, but when he agreed to pair I understood that he was going to remain in Washington, and believed that he was merely doing me a favor as an old friend, and I also believed him when he said that he really preferred to pair than to vote on the question, as I knew what he meant when he referred to the conditions in his district. He reserved no conditions whatever; but it was I who said, just as I was leaving him, "Now, WILSON, if I get back before these votes are taken, and we are all three here, we can then release each other and vote." I left; found the gentleman from Oklahoma [Mr. CHANDLER], and he signed the agreement with a pencil, and we then went together to the Speaker's desk. As this was my first pair I was under the impression that it had to be presented to the Speaker, and as this one agreement was to cover the vote both on prohibition and woman suffrage, and there was a chance of suffrage going over until after the holidays, I thought that it ought to be entered in the RECORD to prevent possible loss or misplacement, and by inspecting it you will see that I had it addressed to the Speaker, and ended it with the following: "And we request that this agreement be printed in the RECORD."

And, Mr. Speaker, I want to offer this original pair for inspection of the Members to see that my name is signed in ink and that the other two gentlemen's names are signed in pencil, and that this request is in the pair—"and we request that this statement be printed in the RECORD."

The SPEAKER. Does the gentleman ask to print that statement in the RECORD?

Mr. BLANTON. Oh, no; that statement is in the agreement. I was just merely reading the agreement itself, where we three gentlemen requested the Speaker to insert that agreement in the RECORD.

So, when the gentleman from Oklahoma [Mr. CHANDLER] and myself went to the Speaker's desk, just after the vote on the Austrian war resolution had been concluded, I handed the agreement to the Speaker and requested that he have it printed in the RECORD. He handed it back to me and informed me that printing it was unnecessary, as all I had to do was to hand it to the pair clerk. I then went with the gentleman from Oklahoma [Mr. CHANDLER] to the pair clerk's desk and handed the agreement to Mr. Small and asked him if we could depend upon him to see that it was recorded when the vote was taken, so that we would not lose our vote, and he assured us both that he would give the matter careful attention, and see that it was properly entered. In a few minutes the House adjourned at 4.34 p. m., not to meet again until December 11. Hearing nothing from Colorado, I went to the gentleman from California [Mr. RAKER], who very kindly assured me that no advantage would be taken of me in my absence on bill H. R. No. 4431, which was a bill seeking to appropriate $5,000,000 to start the Government into the farming business, against which bill, as a member of the committee, I had filed a minority report, and the fight I made against it caused it to die a natural death within the past few days. I was against it, because I did not believe that the Government, through its employees, should compete with farmers on the farms. I went to Texas firmly believing that my vote was protected.

Here is the pair agreement, and as he did not make a very good job of rubbing his name off, it is still plainly discernible:

Mr. Speaker, we, the undersigned, have paired on the resolutions for the national prohibition amendment and the national woman's suffrage amendment, THOMAS L. BLANTON, of Texas, and T. A. CHANDLER, of Oklahoma, each voting both for national prohibition and national woman's suffrage, and JAMES C. WILSON, of Texas, voting against both of said resolutions, and we request that this agreement be printed in the RECORD.

(Signed) THOMAS L. BLANTON, *of Texas.*
T. A. CHANDLER, *of Oklahoma.*
JAMES C. WILSON, *of Texas.*

And I want you to note again that my signature is in ink and the other two are in pencil.

Mr. Speaker, the gentleman from Oklahoma [Mr. CHANDLER] is present, and I would like to call on him to state at this time to the House——

The SPEAKER. It is a very bad practice for one Member to call on another sitting in his seat. The Chair saw that done in the Senate once, but does not think it ought to be followed in the House.

Mr. BLANTON. Then may I have the privilege of yielding at this time to my colleague, Mr. CHANDLER, to ask me a question?

The SPEAKER. The gentleman from Oklahoma [Mr. CHANDLER] has not exhibited any disposition to ask any questions. [Laughter.]

Mr. BLANTON. Then I will state, Mr. Speaker and colleagues, that Mr. CHANDLER will corroborate every word that I have spoken on the floor of this House concerning transactions had with him.

On December 15 I received the following night message from the president of the Anti-Saloon League of Texas, which I will ask the Clerk to read.

The SPEAKER. Without objection, the Clerk will read.

The Clerk read as follows:

WASHINGTON, D. C., *December 14, 1917.*

Hon. THOMAS L. BLANTON,
Abilene, Tex.:

Vote on resolution for national prohibition Monday. Understand you are paired with Mr. WILSON. Wire Mr. KITCHIN to change pair to someone else, provided we can induce Mr. WILSON to vote for prohibition. Also wire me your reply.

A. J. BARTON.

Mr. BLANTON. I immediately complied with Dr. Barton's request by sending the following messages, which I will ask the Clerk to read.

The SPEAKER. Without objection, the Clerk will read.

The Clerk read as follows:

ABILENE, TEX., *December 15, 1917.*

Hon. CLAUDE KITCHIN,
Democratic House Leader, Washington, D. C.:

Am making three speeches a day in my district, embracing 58 counties, in effort to wipe out all disloyalty and force absolute support behind Government. If WILSON of Texas will support prohibition amendment, then change my pair to benefit cause, or if necessary I will return immediately.

THOMAS L. BLANTON.

ABILENE, TEX., *December 15, 1917.*

Dr. A. J. BARTON,
Care Edwin C. Dinwiddie, Washington, D. C.:

Have wired KITCHIN, as requested. In case WILSON will support amendment, this authorizes change of pair, or, if necessary to count his vote, I will come immediately. My district embraces 58 counties, from Mineral Wells to El Paso. Much socialistic pro-German sentiment; much existing because of ignorance of conditions. Am making three speeches a day in effort to force absolute loyalty to our Government, without which we can not win this war. I am using automobiles and driving sometimes over 100 miles a day. From poll made by me before I left, we had several votes to spare.

THOMAS L. BLANTON.

Mr. BLANTON. After speaking at Abilene before a big Red Cross meeting Saturday afternoon, December 15, I drove 50 miles to Hamlin, through freezing weather, speaking there that night to a large crowd, and after the speaking I got another auto and drove 25 miles to catch a train for Moran, where I spoke Sunday noon to a large crowd, and then drove to Albany. Understanding from Dr. Barton's telegram that the gentleman from Texas [Mr. WILSON] was favorably considering the idea of voting for prohibition yet was in a state of indecision, and thinking that I might help to influence him, and thinking possibly Mr. CHANDLER might have left Washington, after reaching Albany I sent the following telegram, which I will ask the Clerk to read.

The SPEAKER. Without objection, the Clerk will read.

The Clerk read as follows:

ALBANY, TEX., *December 16, 1917.*

Hon. JAMES C. WILSON,
House Office Building, Washington, D. C.:

As your colleague and particular friend since college days, I urgently implore and beseech you to give the States an opportunity to pass upon the prohibition question. If you are willing to make this sacrifice of your personal convictions by voting affirmatively you will be granting the sacred right of petition to several million loyal, patriotic American men and women, who are themselves now making every sacrifice to win the war. Pair CHANDLER and me with some other negative vote, and don't deny the States this privilege.

THOMAS L. BLANTON.

Mr. BLANTON. And as an extra precaution I sent the following message, which I will ask the Clerk to read.

The SPEAKER. Without objection, the Clerk will read.

The Clerk read as follows:

ALBANY, TEX., *December 16, 1917.*

Hon. E. Y. WEBB,
Chairman Judiciary Committee, Washington, D. C.:

Am paired with WILSON of Texas. If he will support resolution then pair me with some other negative vote. Please see that my vote counts for prohibition in a pair. Please wire me the result immediately after vote. I am eliminating an infernal undercurrent of seditious sentiment out of my district and am lining up my 58 counties solidly behind the Government.

THOMAS L. BLANTON.

Mr. BLANTON. Now, the gentleman from Texas [Mr. WILSON] says that while my telegram was in his office he did not see it until after the vote was taken, yet he says that it shows that he was considered by me released without condition because he says he has a period in it between the "If you will vote affirmatively" and "Pair CHANDLER and me," and he has written out the "period" in the message.

Now, Mr. Speaker, I submit from the Western Union Telegraph Co. a certified copy of the message, showing that there is no punctuation written out into it whatever [applause] and that the gentleman from Texas [Mr. WILSON] was absolutely without authority when he wrote into the message which he inserted in his extended remarks here the word "period."

Mr. WILSON of Texas. Mr. Speaker, here is the original, and I submit it to the jury down there.

The SPEAKER. Does the gentleman yield?

Mr. BLANTON. I want to be absolutely fair——

The SPEAKER. Does the gentleman from Texas yield?

Mr. BLANTON. I do, because I want to be fair.

Mr. WILSON of Texas. Well, here it is. It is the one delivered to me, and it has got the "period" in it.

Mr. BLANTON. Now, Mr. Speaker and my colleagues, the telegram which the gentleman from Texas [Mr. WILSON] has handed me is not the original message which was delivered to him, but a copy from the Western Union Telegraph Co. delivered since then. It is not the original message delivered to him on the 16th of December.

Mr. WILSON of Texas. BLANTON, you are mistaken about that. It is the only one I have.

The SPEAKER. The gentleman must not address his colleague by name or in the second person; it is against the rule.

Mr. WILSON of Texas. I want to state it is the only message I had delivered to me by the Western Union.

Mr. BLANTON. Now, it is well known that under the rules of the Western Union, no punctuation is transmitted in a message unless such punctuation is written out in the message. I submit to you the original carbon copy of this message which is the carbon of the original sent to the gentleman, and also another copy certified to be correct by the Western Union, and you will see that no punctuation is written out, and therefore I feel sure that it is not written out "period" in the original that was delivered to the gentleman. He admits that it was in his office. Who received it there?

The SPEAKER. The time of the gentleman has expired.

Mr. BLANTON. Mr. Speaker, I ask my colleagues for sufficient time to answer——

Mr. COX. Mr. Speaker, I object.

Mr. GALLIVAN. Mr. Speaker, I object.

The SPEAKER. Objection is made.

Mr. BLANTON. Mr. Speaker and my colleagues, in view of the fact that the extended-remarks statement made by the gentleman was extended in the RECORD without giving me a chance to answer, I ask unanimous consent of my colleagues to permit me to put the balance of this speech in the RECORD.

The SPEAKER. The gentleman asks unanimous consent to extend his remarks in the RECORD. Is there objection?

Mr. WILSON of Texas. Mr. Speaker, I want to reserve the right to object for I have no idea what is in that and I do not think anybody else can have any idea. If it were submitted to me I might agree to it.

Mr. BLANTON. There is nothing——

The SPEAKER. Is there objection?

Mr. WILSON of Texas. If it is no worse than what has already been stated, I am willing.

The SPEAKER. Is the gentleman objecting or not?

Mr. WILSON of Texas. I will for the present.

Mr. BLANTON. I did not object to the gentleman——

The SPEAKER. But the gentleman objects.

Mr. WILSON of Texas. Well, let it go in.

The SPEAKER. The gentleman withdraws his objection. Is there objection?

Mr. GALLIVAN. I object, Mr. Speaker.

The SPEAKER. The gentleman from Massachusetts objects.

LEAVE OF ABSENCE.

By unanimous consent Mr. BURROUGHS was granted leave of absence to-day on account of illness.

LEAVE TO ADDRESS THE HOUSE.

Mr. WILSON of Texas. Mr. Speaker, may I have half a minute by unanimous consent?

The SPEAKER. The gentleman from Texas asks unanimous consent for two minutes. Is there objection?

Mr. GALLIVAN. I object, Mr. Speaker.

Mr. WILSON of Texas. I ask for half a minute.

Mr. GALLIVAN. I withdraw my objection as to half a minute.

Mr. WILSON of Texas. I just wish to say that I have a statement here, that is already in the RECORD, and I would like unanimous consent for that statement to appear as of to-day instead of the 31st, so that this all can go together. It is my statement. Furthermore, I want to deny absolutely that I had two conversations with the gentleman from Texas [Mr. BLANTON] about this matter, but only had one, right back there, of about five minutes. That is all I wish to say.

Mr. BLANTON. Mr. Speaker, I object.

The SPEAKER. The gentleman from Texas [Mr. WILSON] asks unanimous consent——

Mr. BLANTON. I object unless all of mine goes in, too.

The SPEAKER. The other gentleman from Texas [Mr. BLANTON] objects. This is unanimous-consent day. The Clerk will report the first bill.

NATURALIZATION OF RESIDENT ALIENS.

The first business on the Calendar for Unanimous Consent was the bill (H. R. 3132) to amend section 2171 of the Revised Statutes of the United States relating to naturalization.

The SPEAKER. Is there objection to the consideration of the bill? [After a pause.] The Chair hears none. The Clerk will report the bill.

The Clerk read as follows:

A bill (H. R. 3132) to amend section 2171 of the Revised Statutes of the United States, relating to naturalization.

Be it enacted, etc., That section 2171 of the Revised Statutes of the United States be amended so when amended it shall read as follows:

"SEC. 2171. No alien who is a native citizen or subject, or a denizen of any country, State, or sovereignty with which the United States are at war at the time of his application, shall be then admitted to become a citizen of the United States; but persons resident within the United States or the Territories thereof on the 6th day of April, in the year 1917, who had before that day made a declaration according to law of their intentions to become citizens of the United States, or who, by the existing laws of the United States, were on that day entitled to become citizens without making such declaration, may be admitted to become citizens thereof, notwithstanding they shall be alien enemies at the times and in the manner prescribed by the laws heretofore passed on that subject: *Provided*, That nothing herein contained shall be taken or construed to interfere with or prevent the apprehension and removal, agreeably to law, of any alien enemy at any time previous to the actual naturalization of such alien."

Also, the following committee amendment was read:

Page 1, line 8, strike out the word "are" and insert the word "is."

Mr. STAFFORD. Will the gentleman from California yield?

Mr. RAKER. Yes; I yield to the gentleman.

Mr. STAFFORD. I understand that this is virtually reenacting existing law so as to extend to all alien enemies resident in this country who have declared their intention to become citizens prior to the declaration of war the right to qualify in full citizenship in case they can meet the qualifications?

Mr. RAKER. In case they can meet the qualifications, having taken out their first papers and having resided in the United States five years before the date fixed in the bill, and having passed a thorough inspection by the Department of Labor, the Bureau of Immigration, and also other departments of the Government. And if they meet them all the court shall admit them; otherwise not.

Mr. STAFFORD. Can the gentleman estimate as to the number of alien enemies resident in this country who made declaration of intention to become citizens prior to the declaration of war, and upon whom the declaration of war placed a ban as to their final papers for citizenship?

Mr. RAKER. I had a memorandum of that in my pocket, but I went down to a committee meeting this morning and have not been able to get my coat.

There are a number of thousands of them. I think there are many thousands that come under the gentleman's inquiry. But in this bill they must not only have made their application and taken out their first papers, but they must actually have been a resident for five years at the date of the declaration of war. And the present bill contains only two amendments. Some one on the committee thought that the word "are" should be changed to "is," and then we changed the words "June 18, 1912," to the "6th of April, 1917."

Mr. COX. Will the gentleman yield?

Mr. RAKER. I will.

Mr. COX. I am very much interested in the gentleman's bill, and I want to put this question to the gentleman in order to see whether or not the bill covers this particular case in my own town. A Lutheran minister in my town came to this country when he was 17 years of age. I will give the hypothetical facts.

He went to the State of Iowa, and moved into ex-Speaker Henderson's district, where he sought the Speaker's advice as to whether or not it would be necessary for him, who came here as a minor, to take out naturalization papers. It occurs to me that the Speaker told him there would be no necessity for it, as he would be a naturalized American citizen when he became 21 years of age. Soon thereafter the Spanish-American War broke out, and he volunteered as a private and went all through the war, after which he entered college. Roaming around for four or five years, at school, and preaching here and there, about six or seven years ago, or possibly five years ago, he learned he was not an American citizen. He promptly applied and took out his first papers. Now, about four months ago he sought to join the Army as a chaplain. Of course, he ran up against the Federal statute which prevented him not only from becoming a chaplain, but plainly stating that he was not an American citizen.

This man is as intensely patriotic as any other man in the United States. There is no controversy about that at all. Now, will the gentleman's bill take care of a man of this kind and permit him to take out his second papers and become an American citizen?

Mr. RAKER. That is the very purpose of this bill.

I want to illustrate another case. A young man, say, 26 years of age, a fine specimen of manhood, took out his first papers a number of years ago. He went to New Jersey and joined the National Guard and went down to the Mexican border, and was under the flag and in the service, and received an excellent discharge. He comes back to the town in which he lives, marries an American girl, and of course she becomes an alien. Now, since the declaration of war he has been compelled to leave the town and leave his wife, and go to some other place, when his whole heart and his whole soul is with this country. He wants to take out his second papers in order that he may enlist if the Government will not draft him, so that he can fight for this country.

And there is not only that case, but there are many others that have been called to my attention where men who have taken out their first papers desire to join the Army, to join the Navy, and to make a sacrifice of their lives, if desired, and their property for this country; and the purpose of this bill is to relieve those conditions.

Mr. MONDELL. Will the gentleman yield?

Mr. RAKER. I yield to the gentleman from Wyoming for a question.

Mr. MONDELL. Mr. Speaker——

Mr. STAFFORD. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore (Mr. SAUNDERS of Virginia). The gentleman will state it.

Mr. STAFFORD. This being a House bill and the gentleman having the floor and being in charge of the bill, is he entitled to an hour?

The SPEAKER pro tempore. He is. The statement to the contrary was an inadvertence on the part of the Chair. He asked the clerk at the desk, and the clerk said the gentleman's time had expired. Of course the gentleman is entitled to an hour.

Mr. MONDELL. Mr. Speaker, will the gentleman yield now?

The SPEAKER pro tempore. Does the gentleman from California yield to the gentleman from Wyoming?

Mr. RAKER. I yield for a question.

Mr. MONDELL. I thought I could give the gentleman an illustration that would interest him.

Mr. RAKER. I yield for that illustration.

Mr. MONDELL. Recently my attention was called to the case of an ordained minister of German birth who has lived in this country for 26 years. He made his declaration 20 years ago. He was under the impression that he had completed his citizenship. He is now about to be registered as an alien enemy.

There is not any more loyal citizen under the flag. He is a splendid man. He is in an exceedingly embarrassing position. There are many men in the country as loyal as any men who live in the country who are somewhat in that position, unable to become full-fledged citizens, and in the position of being registered as alien enemies—a position that ought to be overcome.

Mr. LENROOT. Mr. Speaker, will the gentleman yield?

Mr. RAKER. I yield to the gentleman from Wisconsin.

Mr. LENROOT. Does the gentleman think if this bill is passed it will relieve the case he speaks of, of a man who made the declaration 20 years ago?

Mr. MOORE of Pennsylvania. If the gentleman pleases, that has been settled in the Morena case, recently decided by the Supreme Court.

Mr. LENROOT. That is the reason why I am asking the question.

Mr. MONDELL. The man has been voting all that time, assuming that he had citizenship.

Mr. LENROOT. I want to ask the gentleman from California whether or not in his opinion this bill modifies or repeals, so far as alien enemies are concerned, the present law? Is there not a limitation in the present naturalization law?

Mr. RAKER. I do not quite catch the gentleman's question.

Mr. LENROOT. The gentleman knows that under the present naturalization law if the declarant does not take out his final papers within seven years after making the declaration, his declaration falls, and he is not entitled to become a citizen.

Mr. BURNETT. Yes; that is under a late decision.

Mr. MOORE of Pennsylvania. Yes. That is in the Morena case, recently decided by the Supreme Court.

Mr. LENROOT. I want to ask the gentleman this question: Under the language of the bill would it let in any of those whose right had expired by reason of the seven-year limit?

Mr. RAKER. As I view it, and as the committee went over its language, and taking it as we have from the act of 1813, that has been on the statute books over 100 years, we made only those two changes, changing the word "are" to "is" and changing the date from 1812 to 1917, the date of the declaration of war.

I want to make this distinction, that this would apply to those whose original applications were valid. That is the purpose of the bill, and that is my theory of it. Do I make myself plain?

Mr. LENROOT. Yes; I am not sure but what that is accomplished. But while the language in lines 8, 9, and 10, on page 2, recites "at the times and in the manner prescribed by the laws heretofore passed on that subject," and while, perhaps, that might be sufficient to save it, yet, on lines 2 and 3, is the language "who had before that day made a declaration according to law of their intentions to become citizens of the United States, or who, by the existing laws of the United States, were on that day entitled to become citizens, without making such declaration may be admitted to become citizens thereof," which may in itself be inconsistent with the saving clause in this section.

Mr. RAKER. If he made his application, the purpose of this bill is to take up valid applications pending, and if he has lived

here five years and has filed his application for citizenship, and the 90 days' notice is given, then the Bureau of Immigration sends out inspectors who make an analysis of this man's life from the time he comes to this country to the present time; who go to his neighbors and go to his friends and go to every place where he has been before and inquire as to his status and attitude, and who appear in court on the day here, so that if there are any suspicions against him it is for the Government officials to state them.

Mr. BURNETT. The committee did not have that purpose in view, I will state, at the time this bill was considered, and I doubt very much whether the bill as reported will cover the proposition as suggested by the gentleman. I do not know whether we ought to undertake the amendment. There are several other bills, I will state to the gentleman, one introduced by my good friend from Wisconsin [Mr. CARY], and another introduced by Judge SABATH, and others, for the purpose of enabling those whose time of seven years has expired to continue to prosecute and secure their final papers. I am a little afraid that it would possibly complicate matters to undertake to put this in this bill.

Mr. LENROOT. I am quite in sympathy with what the gentleman states, and I am in hopes that a curative bill, so far as the courts have erroneously held them properly subject to naturalization, will be passed. But does the gentleman think we ought to extend by this bill a privilege to alien enemies that would not be extended to aliens who are not enemies?

Mr. BURNETT. In reply to that I do not think it would be extended to the alien enemies. I think they would be cut off if more than seven years have expired since the filing of their first papers. I do not think it would be extended to them.

Mr. LENROOT. Not if this language is susceptible of the construction that may be given to it.

Mr. RAKER. As Judge BURNETT says, this was to cover solely the views existing in 1813 and was not intended to complicate it, so that there would be no application in the department and no application under the law. We reenact the same law that has been on the statute books for 115 years. The purpose was not to complicate any of the other matters.

Mr. LENROOT. May I make a suggestion that I think will clear it up?

Mr. RAKER. Yes.

Mr. LENROOT. In line 7, page 2, after the word "thereof," insert the words "but who are not entitled to citizenship solely because of the fact of being alien enemies." That would clear it up.

Mr. RAKER. How would it read if amended?

Mr. LENROOT. So that it would read:

Who had before that day made a declaration, according to law, of their intentions to become citizens of the United States—

Then, dropping down—

but who are not entitled to citizenship solely because of the fact of being alien enemies—

Or some appropriate language.

Mr. MOORE of Pennsylvania. Is not that anticipated by the language on lines 6, 7, and 8 of page 1?

Mr. RAKER. What does the gentleman from Alabama [Mr. BURNETT] think about the suggestion of the gentleman from Wisconsin [Mr. LENROOT]?

Mr. BURNETT. I did not quite catch the idea of my friend from Wisconsin.

Mr. LENROOT. The language in lines 1 to 4 of page 2 being absolute, that anyone who had at any time previous made a declaration should be entitled to citizenship, notwithstanding the fact of being an alien enemy, I am a little afraid that the closing language of the paragraph—

At the times and in the manner prescribed by the laws heretofore passed on that subject—

will not be sufficient to refer to the seven-year limitation.

Mr. BURNETT. I am perfectly willing to make that clear, because we did not have that decision in contemplation at all.

Mr. MOORE of Pennsylvania. I have had some correspondence with the Department of Labor on the question of validating certificates of naturalization issued in error by various courts; and in consequence thereof I have introduced a bill with the approval of the department, to correct those invalidated certificates. In my city alone there are between 3,000 and 4,000 men who obtained naturalization papers and who believe themselves to be properly naturalized, whose certificates are now invalid because of the decision of the Supreme Court in the case of Morena. I am informed that there are substantially 50,000 such invalid naturalization certificates held by people throughout the United States. The question with me is this: Do you by this bill propose to validate those certificates?

Mr. RAKER. No.

Mr. MOORE of Pennsylvania. Or permit the validation of those certificates?

Mr. RAKER. The validation of citizenship already granted?

Mr. MOORE of Pennsylvania. Yes.

Mr. RAKER. Absolutely not. This bill could not touch that, does not touch it, and relates only to allowing the court to hear the case of a man who has lived in the United States five years, who has filed his declaration of intention, and who from all the proof provided by the inspector of the Immigration Bureau, the two witnesses, the applicant himself and all neighbors, should be admitted to be an American citizen. If there is anything against him he should not be admitted; so, clearly, the case presented by the distinguished gentleman from Pennsylvania, long a member of the Committee on Immigration, does not apply to the certificates already issued, because I want to call attention to the statute on that subject, which now permits the Attorney General's Office, in section 15, page 10, of the regulations, to proceed to cancel any certificate improperly issued or issued through fraud or illegally procured.

Mr. MOORE of Pennsylvania. Will the gentleman yield further?

Mr. RAKER. Yes.

Mr. MOORE of Pennsylvania. This is a very important matter, a very serious one, affecting, I should say, hundreds of thousands of people in the United States, relatives and children of men who assume that they are citizens, but who hold invalid certificates of naturalization, made invalid by the action of the Supreme Court of the United States.

Mr. RAKER. I know, but this could not affect them and ought not to be permitted to affect them.

Mr. MOORE of Pennsylvania. I submit that it may, and I want to call attention to my reason for it. This bill in the first few lines of section 2171 cuts out, as I understand it, alien enemies while we are at war.

Mr. RAKER. All of them.

Mr. MOORE of Pennsylvania. Cuts them all out; so the question raised here a moment ago is, perhaps, answered by lines 6, 7, 8, and 9. No alien can avail himself of this privilege while we are at war with the country of which he was a citizen or subject. Therefore he is cut out.

Mr. RAKER. That is correct.

Mr. MOORE of Pennsylvania. Now, under this bill those residents in the United States who had before April 6, 1917, made a declaration according to law can become citizens. My point is this: The Supreme Court has decided that a man who has not made good within seven years after his declaration may not avail himself of the privilege of the certificate that he now holds. Is it not possible that having fixed a new date here—the 6th of April, 1917, which is more recent than that fixed by the Supreme Court, which is the expiration of the seven-year period from the passage of the act of 1906, to wit, 1913—is it not possible that those who made their first declaration within seven years of the later date may come in under the gentleman's bill?

Mr. RAKER. I think not. In other words, these applications are to be made at the times and in the manner prescribed by the laws heretofore passed on this subject. Therefore if a man makes an application for final hearing upon an application made more than seven years before, he can not be heard, and the court will deny the motion.

Mr. MOORE of Pennsylvania. Let me put a specific case. Suppose I have made a declaration of intention, and my application to perfect it comes after the seven-year limit. The Supreme Court now says that having made it beyond the seven-year limit, having permitted seven years to go by, I can not now avail myself of a certificate of naturalization which I hold and which was perfected after the seven-year limit. The gentleman in his bill states that I may become naturalized on a declaration of intention made according to law, which may have been seven years ago or some other time.

I think I could come in under the gentleman's bill. Whether that is what the gentleman intended or not I do not know.

Mr. RAKER. No; I think not.

Mr. TOWNER. Will the gentleman yield?

Mr. RAKER. Yes.

Mr. TOWNER. I would like to call the attention of the chairman, the gentleman from Alabama [Mr. BURNETT], and the gentleman from Wisconsin [Mr. LENROOT] to the fact that it is stated here as one of the requisites that they shall make a declaration according to law. If the word following that were the conjunctive "and" instead of the disjunctive "or," the difficulty that the gentleman suggests might arise. But under the language of this provision, as the bill now stands, if at the time the declaration was made it was made according to law, then the provision of the act would apply and allow them to become naturalized. The disjunctive "or" states another condition that may arise that it is not necessary to consider under the

suggestion made by the gentleman from Wisconsin. I think clearly that if these men who would be cut off by the seven-year provision made their declarations according to law they would be allowed to take advantage of the provision.

Mr. MOORE of Pennsylvania. That is the point I have been trying to make, but the gentleman from California does not agree.

Mr. DOWELL. Will the gentleman yield?

Mr. RAKER. Yes.

Mr. DOWELL. In regard to the decision of the Supreme Court, at the end of seven years does not the man remain in the same condition, so far as citizenship is concerned, as if he had never made an application at all? Does he not stand the same under that decision as if he had never made an application?

Mr. TOWNER. I think not, because this language is that if he makes a declaration according to law he shall have a right to take advantage of this act. That is within the power of the legislation to do. It can state how a man shall be admitted to citizenship, notwithstanding the Supreme Court says that a man can not become naturalized; Congress can say they may become naturalized if their first papers were taken out in accordance with law.

Mr. GREEN of Iowa. Will the gentleman yield?

Mr. RAKER. Yes.

Mr. GREEN of Iowa. On the first page, line 9, appear these words:

Shall be then admitted to become a citizen of the United States.

To what time or period does the word "then" refer to?

Mr. RAKER. That is a clear declaration which this does not affect at all.

Mr. GREEN of Iowa. The gentleman does not understand me. The word "then" must refer to some time. What time does it refer to?

Mr. RAKER. During the war. I want to say to the gentleman that has been the language for 120 years, and it has been workable and is workable now.

Mr. GREEN of Iowa. On page 2, lines 6, 7, and 8, it says:

Notwithstanding they shall be alien enemies at the time and in the manner prescribed by the laws heretofore passed—

And so forth.

Mr. RAKER. That relates back.

Mr. GREEN of Iowa. It seems to me that that involves a contradiction, to say "notwithstanding they shall be alien enemies" they shall be admitted.

Mr. RAKER. That language has been on the statute book for 120 years. It has not been changed at all, and I would not like to see it changed.

Mr. DOWELL. The point I desired to inquire about is this: I understand that the committee does not intend by this bill to include those who have filed their declaration longer than seven years but only to include those who have their declarations on file.

Mr. RAKER. In proper form and according to law, so if there was no war they could be naturalized.

Mr. DOWELL. And it declares that they may become citizens, except for the fact that they are alien enemies.

Mr. RAKER. The gentleman has correctly stated it.

Mr. DOWELL. In view of the controversy on that question—and I believe the chairman is correct about it—in view of the fact that it is controverted, should not an amendment be offered to make it clear?

Mr. RAKER. The gentleman from Wisconsin [Mr. LENROOT] has an amendment to cover it.

Mr. MONDELL. The gentleman from Wisconsin proposes an amendment intended to make it clear that those who made declarations more than seven years ago can not be naturalized. The gentleman from Iowa desires an amendment which will make it clear that they may be naturalized. The gentlemen are on opposite sides of the question. Am I correct?

Mr. DOWELL. What I was trying to get at is the intent of the committee in this bill. My interpretation is that it includes all who filed declarations longer than seven years ago.

Mr. LENROOT. My amendment will make that clear.

Mr. SLOAN. Will the gentleman yield?

Mr. RAKER. Yes.

Mr. SLOAN. Will the gentleman yield for the purpose of offering an amendment, as follows?—

Provided, That no alien who has heretofore or who shall prior to the passage and approval of the measure, being within the draft age, plead his alienage as a ground for exemption from military duty, shall ever be permitted to become a citizen of the United States.

I understand that a good many aliens have used that as a basis for exemption.

Mr. RAKER. I hope the gentleman will not offer that amendment now, as that would complicate this matter.

Mr. BURNETT. I want to say that you can not draft an alien enemy. This bill is intended to apply only to alien enemies. The gentleman's amendment would not be germane, to start with, because this applies to alien enemies. The gentleman from Wyoming spoke a while ago about a constituent of his believing for years that he was a citizen. If he was not an alien enemy, that man, under our existing law, could file an application, because the existing law provides for that kind of cases, and he can at once become naturalized; but these men may have gone on and had their time nearly matured. Six years and nine months may have expired. They have been good citizens, and under this bill they have to prove before they can get their final papers that they are good citizens, that they are in sympathy with this country, and this is merely for the purpose of providing that cases of that kind may be permitted to get their final papers. Some of the judges in some of the Western States have decided that the law was not intended to apply to these cases, and have permitted them to take their final naturalization papers. There is a lack of harmony among the decisions of the courts on this question, some holding they could do it and others holding they could not. For the purpose of curing all of that the idea of the committee was to allow those who had filed their first papers before the war to go on and perfect those papers.

Mr. MONDELL. And the bill should stand just as the committee has reported it?

Mr. BURNETT. Exactly, except with the amendment of the gentleman from Wisconsin [Mr. LENROOT], which makes it clear. We did not intend to go into the field of enabling those whose seven years have expired to take out their papers.

Mr. MONDELL. If the gentleman thinks that that is already clear, let the bill remain as it is.

Mr. BURNETT. We think so; and that was the intention of the committee; but there is no harm in clarifying it by the amendment of the gentleman from Wisconsin [Mr. LENROOT]. I hope the gentleman from Nebraska [Mr. SLOAN] will not undertake to complicate the matter by injecting the proposition to which he refers into it, because the committee has two or three bills of like character. The committee looks with a good deal of sympathy on cases of that kind, but that is a question that ought to be thrashed out very carefully, and we ought somehow to provide that those who by gross negligence have gone on and allowed their seven years' time to expire without perfecting their naturalization shall not be provided for. It is those innocent people who fall under the decision referred to, Morena case, who, without knowing of the seven-year limitation, have allowed the time to expire without securing their papers, that we should take care of. The committee usually looks into those things with very great care, and if we should undertake now to inject those things which have ostensible merit, but which have not been thoroughly examined, into a bill of this kind, we might involve the whole matter in trouble.

Mr. MONDELL. We have so much confidence in the gentleman's committee that we desire to have the bill remain as he reported it.

Mr. BURNETT. At the same time, however, the committee has confidence in the House, and wherever the House feels the committee has not made their meaning entirely clear the committee is willing to have that defect cured by an amendment such as the gentleman from Wisconsin [Mr. LENROOT] offers.

Mr. SLOAN. The gentleman from Alabama says this is not a matter of aliens but of alien enemies.

Mr. BURNETT. Yes.

Mr. SLOAN. I call the gentleman's attention to line 6 of the bill, where it speaks of an alien and not an alien enemy. What I seek to remedy is the case of where an alien voluntariiy pleaded his alienage as a reason for exemption—not that he was an alien enemy Where an alien, hereafter, before this bill goes into effect, pleads as a basis for exemption from military duty the fact that he is an alien—not an alien enemy—I think he should be forever barred from ever after becoming a citizen of the United States.

Mr. BURNETT. I think he is an alien enemy in that case.

Mr. SABATH. Answering the gentleman's question, I wish to say that the committee has reported such a bill that will take care of such cases as the gentleman has in mind.

Mr. BURNETT. Yes; the alien slacker.

Mr. SABATH. The so-called alien slacker bill.

Mr. RAKER. Mr. Speaker, I ask unanimous consent that the gentleman from Wisconsin [Mr. LENROOT] may be permitted in my time, without my losing the floor, to offer his amendment.

Mr. MOORE of Pennsylvania. Mr. Chairman, reserving the right to object, is the gentleman going to allow any debate upon this? I prefer to have the bill passed as it is.

Mr. RAKER. Let us dispose of the first committee amendment.

Mr. STAFFORD. May we have my colleague's amendment read for information?

Mr. RAKER. I ask that it be read for the information of the House.

The SPEAKER pro tempore. Without objection, the Clerk will read the amendment of the gentleman from Wisconsin, Mr. LENROOT.

The Clerk read as follows:

Page 2, line 7, after the word "thereof," insert the words "if otherwise entitled to admission."

Mr. RAKER. Mr. Speaker, let us dispose of the first committee amendment.

Mr. MONDELL. Will the gentleman yield some time in opposition to it?

Mr. RAKER. We will yield time on Mr. LENROOT's proposed amendment. Let us have the first committee amendment reported.

The Clerk read as follows:

Page 1, line 8, after the word "States," strike out the word "are" and insert the word "is."

The SPEAKER pro tempore. The question is on agreeing to the committee amendment.

Mr. GOOD. Mr. Speaker, I understood the gentleman to say that this provision had been on the statute books now for 100 years. My colleague, Judge GREEN, made inquiry with regard to the word "then," appearing in line 9, and it seems to me that ought to be stricken out. It does not mean anything.

Mr. LENROOT. That is in the old act.

Mr. RAKER. The gentleman suggested that the changing of "are" to "is" is grammatical construction.

Mr. GOOD. I know, but the other has been on the books for a hundred years, the gentleman says, and it has worked so admirably——

Mr. RAKER. Personally I would like to see it stand as "are."

Mr. GOOD. It ought to be changed, and in the other amendment the word "then" ought to be stricken out, and I hope the committee will strike it out. It means nothing.

Mr. LENROOT. The gentleman is wrong about it meaning nothing.

Mr. GOOD. What does it mean?

Mr. LENROOT. It means during the existence of the war, and if you strike out "then"——

Mr. GOOD. "Shall be then admitted."

Mr. LENROOT. During the existence of the war.

Mr. GOOD. The question of the existence of the war is not referred to.

Mr. RAKER. It is clear what it means there.

Mr. ROBBINS. It means the time he applies. What is the reason for changing the existing law at all?

Mr. DOWELL. I ask to have the amendment again read.

The SPEAKER pro tempore. Without objection, the amendment will be again reported.

The amendment was again reported.

The question was taken, and the Speaker announced the ayes appeared to have it.

Mr. ROBBINS. Division, Mr. Speaker; this changes existing law.

Mr. BURNETT. It is a question of grammar as to which is the better form, "are" or "is."

The SPEAKER pro tempore. That is not in order; a division has been called for.

Mr. MOORE of Pennsylvania. Mr. Speaker, a parliamentary question.

The SPEAKER pro tempore. The gentleman will state it.

Mr. MOORE of Pennsylvania. This country is a Nation, is it not?

Mr. RAKER. That is why the members of the committee suggested that the word "are" be changed to the word "is."

Mr. MOORE of Pennsylvania. This is one Nation, is it not—not a Nation in which we speak of ourselves in the plural but in which we stand as one. The United States "is." If you say the United States "are," you mean we are divided up.

The SPEAKER pro tempore. Those are not parliamentary inquiries. A division was called for. Does the gentleman insist on a division?

Mr. RAKER. I thought the matter had been disposed of and the amendment had been adopted.

The SPEAKER pro tempore. No; it has not been adopted. A division was called for and then a parliamentary inquiry which was not a parliamentary inquiry, and the Chair has disposed of that now.

Mr. RAKER. What is the matter before the House?

The SPEAKER pro tempore. The question of agreeing to the amendment.

The House divided; and there were—ayes 80, noes 7.

So the amendment was agreed to.

Mr. GOOD. Will the gentleman yield for a question?

Mr. RAKER. Let us dispose of the Lenroot amendment.

Mr. GOOD. But this will come before that. Will it not be better to strike out the words "be then" and insert "during the continuance of the war be"?

Mr. RAKER. I do not believe it will.

Mr. GOOD. That is what it does mean, as the only time referred to previously is the time of making application.

Mr. RAKER. Oh, no; this has not anything to do with applications here.

Mr. GOOD. I know it has not; but if it refers——

Mr. ROGERS. A parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. ROGERS. I do not understand the order in which we are proceeding, Mr. Speaker, and I desire to offer an amendment at the proper time, and I ask if this is the proper time.

The SPEAKER pro tempore. The Chair will state that this debate is not proceeding precisely in accordance with the rules of debate but under usage the House frequently indulges in. The exact parliamentary status is that the gentleman from California has the floor, and has an hour, and things have been proceeding informally, and the gentleman can move the previous question if he chooses.

Mr. ROGERS. I want to ask the gentleman from California to yield to me for an inquiry.

Mr. DOWELL. There is an amendment now pending.

The SPEAKER pro tempore. No; there is no amendment pending.

Mr. DOWELL. Is not the Lenroot amendment pending?

The SPEAKER pro tempore. That was read at the desk for information.

Mr. RAKER. Mr. Speaker, how much time have I?

The SPEAKER pro tempore. Fifteen minutes.

Mr. ROGERS. Will the gentleman yield for a question?

Mr. RAKER. I do.

Mr. ROGERS. At the top of page 2 is a limitation of time to the 6th day of April, 1917, which is the day we declared war.

Mr. RAKER. Yes.

Mr. ROGERS. Does not the gentleman think it would be proper to change that date to the date we broke off diplomatic relations, on the 2d day of February? In other words, does the gentleman think we ought to extend this privilege of citizenship in the United States to those who were inchoately enemies of the United States at that time, even though they were not in the fullest sense declared enemies of the United States?

Mr. RAKER. Well, the law having been on the statute books, to repeat again, for 125 years, I think it is good to keep it—to fix it from the date of the declaration of war.

Now, Mr. Speaker, I yield five minutes to the gentleman from Wisconsin [Mr. LENROOT] on the amendment that has been offered by unanimous consent.

Mr. KEARNS. Mr. Speaker——

The SPEAKER pro tempore. For what purpose does the gentleman rise?

Mr. KEARNS. To ask a question.

Mr. RAKER. I can not yield just now.

The SPEAKER pro tempore. The gentleman declines to yield.

Mr. KEARNS. A parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. KEARNS. Is the Lenroot amendment now pending?

The SPEAKER pro tempore. It was read for information.

Mr. LENROOT. I ask unanimous consent that I may offer that amendment.

Mr. MOORE of Pennsylvania. Mr. Speaker, reserving the right to object, I would like to discuss the amendment.

Mr. LENROOT. There will be time to discuss it. I am simply getting it before the House.

Mr. RAKER. I ask unanimous consent that I may yield to the gentleman to offer that amendment so that I will not lose the floor.

Mr. MOORE of Pennsylvania. Mr. Speaker, reserving the right to object, I want to inquire if there is to be any time for the discussion of this amendment.

Mr. RAKER. Shall I offer the amendment? Mr. Chairman, I offer the amendment.

Mr. MADDEN. The only question I wish to ask the gentleman is whether his time is limited to 15 minutes.

Mr. RAKER. Yes.

Mr. MADDEN. And at the end of that time I presume the gentleman is going to move the previous question?

Mr. RAKER. I will have to; we do not want to take another hour.

Mr. MADDEN. I think it is important that the amendment be discussed. I have no objection to discussing it, and I think time could be extended 10 minutes by unanimous consent.

Mr. RAKER. That will be all right.

Mr. MADDEN. Suppose the gentleman asks unanimous consent.

Mr. RAKER. Now, to avoid any complications, I will state when the time expires I will move the previous question. Mr. Speaker, I ask unanimous consent that my time be extended 10 minutes over the hour.

Mr. MADDEN. That will be all right.

The SPEAKER pro tempore. The gentleman from California——

Mr. ROGERS. Mr. Speaker, reserving the right to object, I want an opportunity to propose my amendment to change the date of April 6, 1917, to February 2, 1917.

Mr. RAKER. I will give the gentleman time to offer the amendment.

Mr. ROGERS. And give me two minutes in which to discuss it?

Mr. RAKER. Yes.

Mr. RUCKER. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. RUCKER. Will not this bill be read for amendment before it is passed?

The SPEAKER pro tempore. The gentleman from California [Mr. RAKER] within his hour can move the previous question.

Mr. RUCKER. Can the bill be passed without being read?

Mr. DOWELL. A parliamentary inquiry, Mr. Speaker.

The SPEAKER pro tempore. The gentleman will state it.

Mr. DOWELL. After the hour for general debate has expired——

The SPEAKER pro tempore. This is not an hour for general debate. The gentleman has an hour.

Mr. DOWELL. Is not time then given to offer amendments to the bill?

The SPEAKER pro tempore. If the gentleman from California does not move the previous question within the hour, or if he moves it and it is not agreed to by the House, why, of course, any gentleman who gets the floor will get an hour in his own right. That is the parliamentary status.

Mr. MADDEN. Now, Mr. Speaker, the gentleman from California has suggested that he will be willing to ask for an extension of the time for 10 minutes, and I suggest that the gentleman from Pennsylvania [Mr. MOORE] be given five minutes of the time.

Mr. RAKER. I will do that.

Mr. Speaker, I ask unanimous consent that my time be extended for 10 minutes beyond the hour, and that upon the expiration of that time the previous question be considered as ordered. And I will state to the gentleman from Wyoming [Mr. MONDELL] that I will yield to him five minutes, the gentleman from Wisconsin [Mr. LENROOT] five minutes, and to the gentleman from Massachusetts [Mr. ROGERS] two minutes, so that he can offer his amendment and the whole matter may be disposed of.

I will yield two minutes to the gentleman from Missouri to offer his amendment, and will reserve the balance of the time and distribute it among the Members as they may desire.

Mr. STAFFORD. Reserving the right to object, if the amendments that have not been read are to be offered at this time, without objection, and no opportunity is to be had to discuss them, I will have to object. I have no objection to allowing the time to be extended with a vote on the amendment to be proposed by the gentleman from Wisconsin.

Mr. RAKER. Let me make this suggestion: That those gentlemen now read their proposed amendments for information.

Mr. LENROOT. Let me make a suggestion.

Mr. RAKER. Yes.

Mr. LENROOT. This is a very short bill. Why not get unanimous consent to consider this bill in the House as in the Committee of the Whole under the five-minute rule? We will get through with it very rapidly.

Mr. RAKER. Can we not fix the time?

Mr. MADDEN. Make it 30 minutes. That will be satisfactory.

Mr. LENROOT. I think you will get through with it just about as quick.

Mr. RAKER. Mr. Speaker, I ask unanimous consent that the time be extended 20 minutes, and then we will yield the time.

The SPEAKER pro tempore. The gentleman from California asks unanimous consent that his time be extended 20 minutes and to have the same right with respect to the extent of time as he has with the hour he has now.

Mr. MADDEN. In other words, he may have the right to ask the previous question at the end of the extension of 20 minutes.

Mr. ROBBINS. Reserving the right to object, what time is that going to give to the consideration of this bill?

The SPEAKER pro tempore. Twenty minutes more.

Mr. KEARNS. Mr. Speaker——

The SPEAKER pro tempore. Just a moment. The gentleman from California asks unanimous consent for 20 minutes. He already has 6 minutes. That will make 26 additional minutes that he will control.

Mr. KEARNS. Reserving the right to object, I would like to ask the chairman whether he has parceled out all of his time?

Mr. RAKER. No; not yet.

Mr. KEARNS. Reserving the right to object, I would like to get a little of that time, in which to ask a question.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California? [After a pause.] The Chair hears none, and the time is extended 20 minutes.

Mr. RAKER. I yield five minutes to the gentleman from Wisconsin [Mr. LENROOT].

The SPEAKER pro tempore. The gentleman from California means to offer the amendment that was read?

Mr. LENROOT. He stated that he would offer it, but it has not formally been offered as yet.

The SPEAKER pro tempore. Does the gentleman from California offer the amendment?

Mr. RAKER. I offer the amendment.

The SPEAKER pro tempore. The gentleman from California offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. RAKER: Page 2, line 7, after the word "thereof," insert the following: "if otherwise entitled to admission."

Mr. LENROOT. Mr. Speaker, if the amendment that has just been read be adopted it will make it clear that the provisions of this bill only apply to the case of alien enemies under the circumstances set out in the bill. Now, the gentleman from Wyoming [Mr. MONDELL] desires the bill in its original form, because he thinks if it shall remain in that form alien enemies who took out their first papers 20 years ago will be entitled to full citizenship. That is exactly what the gentleman wants, and that is exactly what this House ought not to do, because while I am in full sympathy with legislation that will take care of those cases where through inadvertence the seven-year period was passed, they should be taken care of by separate legislation applying to all aliens. I do not believe that this House wants to enact legislation that will give a greater privilege to alien enemies than it would give to those aliens who are not enemies.

Mr. STAFFORD. Will the gentleman yield?

Mr. LENROOT. Yes.

Mr. STAFFORD. Should not the qualifying clause of the amendment be inserted after the word "United States," in line 4? We have here on this second page two conditions under which alien enemies may obtain their full citizenship. First, as stated in lines 2 to 4, those who had before that day made a declaration.

Mr. LENROOT. The gentleman is taking my five minutes. Ask your question.

Mr. STAFFORD. I am pointing it out.

Mr. LENROOT. I call the gentleman's attention to the fact that the phrase preceding my amendment, "may be admitted to become citizens thereof," covers both, those who filed their declaration——

Mr. STAFFORD. The second clause is limited to those "who, by the existing laws of the United States, were on that day entitled to become citizens." It is not necessary to limit that clause, but the first clause should be.

Mr. LENROOT. The language, "who are otherwise entitled to admission," will do no harm to the second clause.

Mr. STAFFORD. It is meaningless in a way to put it where it is.

Mr. LENROOT. I do not think it would make the slightest difference in the construction of the act as to at which place those words were inserted, because the second class provided for in the bill must also be otherwise entitled to admission, so that no possible harm could result from making it cover both classes.

Mr. SCOTT of Iowa. Mr. Speaker, will the gentleman yield for a moment?

Mr. LENROOT. Yes.

Mr. SCOTT of Iowa. I want to suggest another reason why it is necessary that the amendment be placed where the gentleman from Wisconsin has put it. As the bill now stands, the test is based upon qualifications in April, 1917, so that if the amendment of the gentleman from Wisconsin were not included the interval of time since then is eliminated, and a man who has lost those qualifications since April, 1917, would still under the bill be entitled to admission.

Mr. LENROOT. That is true; but the point I wanted to make is that this House ought not to give an alien enemy a greater right of citizenship than it proposes to give to aliens who are not enemies, and if the theory or the construction of the gentleman from Wyoming should prevail, and the amendment that I have proposed should not be adopted and that the seven-year limitation should not apply, then we would say to the alien of Germany, "You may become a citizen of the United States," when we would not allow a like privilege to a citizen of England or France, and so I think the amendment should be adopted.

Mr. NORTON. Mr. Speaker, will the gentleman yield?

Mr. LENROOT. Yes.

Mr. NORTON. Do you give a privilege to an alien enemy by the amendment that a nonalien does not have?

Mr. LENROOT. No.

Mr. NORTON. A nonalien now has the right to make a new application if he has made an application 10 or 20 years ago?

Mr. LENROOT. My amendment puts them in the same class, so far as the old declaration is concerned.

Mr. NORTON. But if a nonalien has made a declaration 15 years ago and has not acted upon it, he has the right to make a new declaration, but an alien has not?

Mr. LENROOT. That is true, during the war.

The SPEAKER pro tempore. The time of the gentleman from Wisconsin has expired.

Mr. RAKER. Mr. Speaker, I yield five minutes to the gentleman from Pennsylvania [Mr. MOORE].

The SPEAKER pro tempore. The gentleman from Pennsylvania is recognized for five minutes.

Mr. MOORE of Pennsylvania. Mr. Speaker, I would prefer, if this bill passes, to have it passed in its present form, without amendment. I do not believe the amendment of the gentleman from Wisconsin [Mr. LENROOT] makes it any clearer than it is. Indeed, I think the gentleman from Wisconsin rather confuses the bill by his amendment, so far as I understand his amendment and the purpose of it. He fears that unless the amendment is agreed to some preference will be given to the alien enemy over the other alien who is not an enemy, both seeking naturalization.

I call his attention and yours to the first three or four lines of this section 2171, which I think settle conclusively that question and show that the amendment of the gentleman from Wisconsin is mere surplusage. It says "no enemy who is a native citizen or a subject or a denizen of any country, State, or sovereignty with which the United States is at war at the time of his application shall be then admitted to become a citizen of the United States." Therefore the trouble he sees is anticipated and is covered by this bill. No alien enemy at a time of war can be considered for naturalization under this paragraph. Therefore there is no necessity for his amendment. The alien enemy is wiped out at the very outset.

Mr. WELTY. Mr. Speaker, will the gentleman yield?

The SPEAKER pro tempore. Does the gentleman from Pennsylvania yield to the gentleman from Ohio?

Mr. MOORE of Pennsylvania. Yes.

Mr. WELTY. Is not the proposed amendment included in the words "on that day entitled to become citizens"?

Mr. MOORE of Pennsylvania. Why, the alien enemy under the very opening section of the paragraph is prevented while his country is at war with us from obtaining naturalization.

Now, the gentleman says his amendment will make it clear if we insert after the word "thereof," on line 7, the words "may become citizens," and so forth, if otherwise entitled to admission. As to "if otherwise entitled to admission," the law covers that. The gentleman is a good lawyer, but instead of making this proposition clear he only confuses it, because where we come to that language which admits of an alien, not an enemy alien, becoming a citizen, it states that though you take them in as on or after April, 1917, the declaration must be "according to law." And it goes on to say as to that day they are "entitled to become citizens," they must do it "under the existing laws of the United States." Why must we make it clearer than that?

Mr. LENROOT. Mr. Speaker, will the gentleman yield?

Mr. MOORE of Pennsylvania. Yes.

Mr. LENROOT. The gentleman says when you come to the part referring to nonalien enemies, no portion of this bill refers to any aliens who are not alien enemies.

Mr. MOORE of Pennsylvania. The gentleman seems to make a distinction as a lawyer which I do not observe as a layman. I contend the gentleman's point is thoroughly well covered by requiring that every alien who comes forward must do so in accordance with the law then existing.

Mr. LENROOT. Only an alien enemy.

Mr. MOORE of Pennsylvania. The alien enemy is barred out by the first four lines of the section I have read and referred to several times.

Now, the gentleman should not prevent those aliens who have been denied the validity of the certificates of naturalization issued to them by the courts in accordance with the law as the courts understood it from obtaining the benefits of this act.

I should think that old alien, whose declaration has been filed for seven years and who in good faith has performed his part as a resident of this country, should have the opportunity to validate his naturalization if he is not an enemy. I feel if he can do it under this bill, perhaps it is a short cut to correcting some of the errors of the courts as they have been determined recently by the Supreme Court of the United States.

Mr. McKENZIE. Mr. Speaker, will the gentleman yield?

Mr. MOORE of Pennsylvania. Yes.

Mr. McKENZIE. Does not the gentleman from Pennsylvania believe that this law, if enacted, should be limited only to such aliens as could not obtain their naturalization papers before the declaration of war, and not to relate back to men who might have been naturalized if they had seen fit to take the opportunity?

The SPEAKER pro tempore. The time of the gentleman from Pennsylvania has expired.

Mr. RAKER. Mr. Speaker, I yield two minutes to the gentleman from Ohio [Mr. KEARNS].

The SPEAKER pro tempore. The gentleman from Ohio is recognized for two minutes.

Mr. KEARNS. I want to ask the chairman a question. I want to know what class of persons would be covered by this phrase:

Or who, by the existing laws of the United States, were on that day entitled to become citizens without making such declaration.

Mr. RAKER. I have not the concrete cases right here——

Mr. KEARNS. Does not everyone have to make a declaration?

Mr. FESS. No.

Mr. BURNETT. The general law now provides that one who has for years labored under the misapprehension that he was a citizen will not be relegated to the long time and tedious process that he would undergo after now filing a declaration of intention, but may file his application and become a citizen at once. Now, if there be cases of that kind, of alien enemies who have believed they were citizens and who for years have been voting, like the case my friend from Wyoming [Mr. MONDELL] spoke of, they may become naturalized under the general law, and this is to take care of cases of that kind.

Mr. KEARNS. Without making a declaration of citizenship?

Mr. RAKER. Make the application and eo instanti become citizens.

Mr. KEARNS. But your bill says:

Or who, by the existing laws of the United States, were on that day entitled to become citizens without making such declaration.

What classes of persons can become citizens of the United States without making some declaration?

Mr. BURNETT. This has reference to the declaration of intention, when a man "takes out his first papers." There is a declaration of intention to start the matter. Then there is the final application for admission to citizenship. Now, instead of making that first declaration, if there be those who have been laboring under the misapprehension for years that they were citizens, they may come up and make application for citizenship, if they see fit to do so, without making the first formal declaration of intention, and then be naturalized at once.

Mr. RAKER. I yield two minutes to the gentleman from Massachusetts [Mr. ROGERS].

Mr. MONDELL. The gentleman had promised to yield five minutes to me.

Mr. RAKER. I yield two minutes to the gentleman from Massachusetts [Mr. ROGERS] first.

Mr. ROGERS. Mr. Speaker, a parliamentary inquiry before the two minutes begins.

The SPEAKER pro tempore. The gentleman will state it.

Mr. ROGERS. I want to offer another amendment. I should much prefer to offer my amendment and have my two minutes thereon after the Lenroot amendment has been disposed of. Is that practicable under the parliamentary situation?

The SPEAKER pro tempore. If the gentleman from California [Mr. RAKER] will yield the gentleman time a little later.

Mr. ROGERS. If the gentleman from California would be willing to give me my two minutes to offer a further amendment after the Lenroot amendment has been disposed of——

Mr. RAKER. I am afraid that time will never arrive, because when the Lenroot amendment has been disposed of the previous

question will be ordered by unanimous consent, and we will go right into the disposition of the bill. But I will yield to the gentleman from Wyoming [Mr. MONDELL] first, and then the gentleman can follow him. I yield first to the gentleman from Wyoming [Mr. MONDELL].

Mr. MONDELL. Mr. Speaker, the gentleman from Wisconsin [Mr. LENROOT], who offered the amendment, stated that my position was that the bill as it now stands would permit—not compel but permit—Judges of United States courts to grant citizenship papers to those coming under the purview of the bill, even though their original declaration was made more than seven years ago; and he further said that I desired to have that sort of a situation established and provided for. The gentleman is right. That is my view of the bill and my desire, for this reason: The gentleman says we would be granting a privilege to an alien enemy that we do not grant to any other alien. The gentleman from North Dakota [Mr. NORTON] very clearly indicated the difference between the two classes of cases. Any other alien may at any time come forward and make his declaration. But once you bar an alien enemy, he is barred for all time, and he can not therefore make his declaration, for there is nothing in this bill authorizing him to make that declaration. It only brings in a man whose declaration we accept, and an alien enemy could not therefore make a declaration, so we would keep him out.

Mr. LENROOT. Will the gentleman yield?

Mr. MONDELL. In just a moment. We have in our country to-day many men classed as alien enemies who made their first applications for citizenship more than seven years ago, some of whom have believed they were citizens and have been exercising the duties and responsibilities of citizenship; these men, good citizens who now find themselves regarded as alien enemies, denied the opportunity to go about over the country to attend to their business, to perform their duties, to mingle freely with their fellow citizens, have the stigma upon them of being registered as alien enemies.

The act is permissive. No judge is compelled to grant citizenship under it to anyone; and where a man shows every qualification for good citizenship, even though he made his declaration more than seven years ago, he ought to be relieved from the stigma that now rests upon him.

Mr. LENROOT. Will the gentleman yield?

Mr. MONDELL. I yield to the gentleman from Wisconsin.

Mr. LENROOT. The gentleman made a statement that was incorrect. I am sure he does not want to do that.

Mr. MONDELL. No; I do not.

Mr. LENROOT. He stated that I would bar an alien enemy for all time from making a declaration.

Mr. MONDELL. For all time during the war.

Mr. LENROOT. But why does not the gentleman say that?

Mr. MONDELL. "For the war" is for all time, so far as the matters we are discussing are concerned. After the war is over this question is no longer with us, and therefore it is "all time" as far as this bill is concerned. I am correct in regard to the statement I made. This act is only permissive; the judge decides whether a man is worthy of citizenship. I believe that a man who is so unfortunate as to be registered as an alien enemy, but who is a good, loyal man, and who the court believes ought to be made a citizen and relieved from the stigma of being an alien enemy, should be given the opportunity to become a citizen, even though this first declaration of intention was made more than seven years ago. Therefore I am not in favor of any amendment of the bill.

Mr. RAKER. I yield two minutes to the gentleman from Iowa [Mr. GREEN].

Mr. GREEN of Iowa. Mr. Speaker, I am unable to agree with my friend, the gentleman from Wisconsin [Mr. LENROOT] as to the construction of this bill as it now stands. The reference to those who have heretofore filed their declarations of intention, as I understand the gentleman from Wisconsin to contend, is an absolute one, requiring the courts, if this bill is passed, to admit all such persons who have so filed their declarations. I do not think the law has been so construed.

Mr. LENROOT. That conclusion does not follow.

Mr. GREEN of Iowa. Whether the gentleman concedes that that follows from the argument or not, I think it does show it; and I think it is not the correct construction to place upon the law, which has been upon the statute books for a long time. If that were the rule, then if some anarchist or criminal came forward who had heretofore filed his declaration he would have to be admitted by the court passing upon that declaration. Such, however, I think, will not be the construction that anyone will place upon the statute. The meaning of the statute is that those may be admitted who are otherwise qualified. A man must have all the qualifications otherwise provided by the naturalization law, and in that event the fact that he is an alien enemy will not, if this bill is passed, prevent his being admitted, provided he has filed his declaration within the time required by the other statute. And if that is the rule with reference to one matter—if he must be qualified with reference to one matter, such as being a man of good character, a man who is not a criminal, a man who can speak the English language, as is ordinarily required by the judges, then he must be qualified in other respects. One of these matters required by the decision of the Supreme Court is that his declaration must have been filed within not more than seven years. So I think this amendment is not necessary.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. RAKER. I yield two minutes to the gentleman from Massachusetts [Mr. ROGERS].

Mr. ROGERS. Mr. Speaker, this bill cares for Germans who declared their intention to become citizens prior to the 6th day of April, 1917, the date when we declared war. The amendment which I propose simply substitutes the date of February 2, 1917, when we broke off diplomatic relations with Germany. Why should that change be made? I think we should agree that the only risk incurred in passing this bill is that it may be taken advantage of by men who are seeking, under the cloak of citizenship, the accomplishment of purposes not friendly to the United States. From the moment when we broke off relations with Germany we were at least an inchoate enemy of Germany and Germany of us; to all practical intents and purposes we were hostile countries after that date. A man who desired to clothe himself as far as he could with the status of an American citizen so that he might utilize his declaration of intention to become a citizen for his own sinister purposes would naturally have proceeded to do so after February 2 and before April 6.

Mr. RAKER. Will the gentleman yield?

Mr. ROGERS. Yes.

Mr. RAKER. No man who filed an application at any time between February 7 and the 6th of April could ever be naturalized under this bill.

Mr. ROGERS. Why?

Mr. RAKER. They all must have had their applications on file two years before.

Mr. ROGERS. Then why not have the date put in the bill as February 2? There could be no objection to it, and on the gentleman's own statement there is every reason in logic and patriotism for the change.

Mr. RAKER. Mr. Speaker, I yield two minutes to the gentleman from Missouri [Mr. RUCKER].

Mr. RUCKER. Mr. Speaker, the whole purpose of this legislation, as I understand it, is to enable final naturalization papers to be issued in proper cases which now, in view of the ruling of the courts, can not be issued without the passage of this bill. In connection with the amendment offered by the gentleman from Wisconsin [Mr. LENROOT] I think there should be another amendment in order to make clear what I think is the intention of the committee and the purpose of this bill. In other words, the committee's intention is to allow those who, prior to April 6, 1917, filed declarations of intention to prosecute them to final action and secure naturalization.

Suppose declaration was filed six years before April 6, 1917, nearly a year has already expired since the war began, and, as existing law is construed, that time would be charged against the citizen who is seeking naturalization; therefore I think an amendment like this should be engrafted upon the bill: At the end of line 2, page 2, insert "within seven years next," so as to make it read "who had within seven years next before that day made declarations of intention," and so forth.

Mr. RAKER. The chairman and myself do not see any objection to that amendment, but we do not think it necessary.

Mr. RUCKER. It makes it clear that the time since the war shall not be charged up against the one seeking naturalization, and does not detract anything from the bill. Mr. Speaker, I offer the amendment which I have quoted.

Mr. STAFFORD. Will the gentleman yield?

Mr. RUCKER. Yes.

Mr. STAFFORD. I assume that the gentleman's amendment purposes the object that was sought after by the gentleman from Wisconsin in his amendment.

Mr. RUCKER. I think the same thing.

The SPEAKER pro tempore (Mr. SAUNDERS of Virginia). The time of the gentleman from Missouri has expired.

Mr. STAFFORD. Mr. Speaker, the gentleman from California [Mr. RAKER], having yielded to the gentleman from Missouri for the purpose of offering an amendment, is not the gentleman from Missouri entitled to an hour?

Mr. RAKER. I only yielded the gentleman two minutes.

Mr. RUCKER. If I have any such time, I yield it back.

Mr. STAFFORD. I would like to know the status of the situation. Has an amendment been offered by the gentleman from Missouri?

The SPEAKER pro tempore. The amendment is not before the House.

Mr. RAKER. Mr. Speaker, I ask unanimous consent that the amendment of the gentleman from Massachusetts and the amendment of the gentleman from Missouri may be considered as pending and lose no rights by the parliamentary situation.

The SPEAKER pro tempore. The gentleman from California asks unanimous consent that an amendment offered by the gentleman from Missouri [Mr. RUCKER] and the gentleman from Massachusetts [Mr. ROGERS] may be considered as pending without prejudice by the present parliamentary status. Is there objection?

There was no objection.

Mr. SNYDER. May I ask the gentleman a question?

Mr. RAKER. Yes.

Mr. SNYDER. I would like to know if the bill covers the case of a German alien who is now interned in Panama, who nine years ago took out his first papers but failed to take out second papers.

Mr. RAKER. I do not think it would.

Mr. SNYDER. Some of my colleagues on this side of the Chamber think that the bill covers that case. I would like an opinion on that before I am asked to vote.

The SPEAKER pro tempore. The Clerk will report the amendment.

The Clerk read as follows:

Amendment by Mr. ROGERS: Page 2, line 1, after the second "the," strike out the words "6th day of April" and insert in lieu thereof "the 2d day of February."

Amendment by Mr. RUCKER: Page 2, line 2, after the word "had," insert "within seven years next."

Mr. SLOAN. Mr. Speaker, I presented an amendment calculated to prevent aliens, not alien enemies, but aliens, who have heretofore or may before the passage and approval of this measure, plead their alienage as exemption against military service from ever becoming citizens of the United States. I learn that there is a bill pending, with the recommendation of the committee behind it, House bill 5657, which will come up Wednesday next, in which the terms of my amendment are included, with the prestige of the committee's indorsement. I am pleased to withdraw the amendment I had to be considered when the other case is called up on Wednesday.

Mr. BURNETT. And I hope everybody will be here to help pass the alien-slacker bill and see that it does not go over again.

Mr. RAKER. Mr. Speaker, I yield to the gentleman from Illinois [Mr. SABATH].

Mr. SABATH. Mr. Speaker, this bill will not permit the naturalization of such people as the gentleman from Pennsylvania had in mind, because the court would not permit the naturalization of any man guilty of treason or of any crime against the United States.

Mr. SNYDER. That is not the case I put at all. This man is not guilty of any crime or treason, he is simply interned.

Mr. RAKER. Mr. Speaker, has the previous question been ordered?

The SPEAKER pro tempore. No; the gentleman had better move it.

Mr. RAKER. Mr. Speaker, I move the previous question on the bill and amendments to final passage.

The previous question was ordered.

The SPEAKER pro tempore. The Clerk will report the amendments.

The Clerk read as follows:

Amendment by Mr. RAKER: Page 2, line 7, after the word "thereof," insert the following: "If otherwise entitled to admission."

The SPEAKER pro tempore. The question is on agreeing to the amendment.

The question was taken; and on a division (demanded by Mr. MONDELL) there were—ayes 29, noes, 19.

So the amendment was agreed to.

The Clerk read as follows:

Amendment offered by Mr. ROGERS: Page 2, line 1, after the word "the," strike out the following: "6th day of April" and insert in lieu thereof "2d day of February."

The SPEAKER pro tempore. The question is on agreeing to the amendment.

The question was taken; and on a division (demanded by Mr. ROGERS) there were—ayes 29, noes 32.

So the amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. RUCKER: Page 2, line 2, after the word "had," insert "within seven years next."

The SPEAKER pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill as amended.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. RAKER, a motion to reconsider the vote by which the bill was passed was laid on the table.

DRAFTING ALIENS INTO UNITED STATES ARMY.

The next business on the Calendar for Unanimous Consent was House joint resolution 115, requesting the Secretary of State to open diplomatic negotiations with certain Governments with a view to obtaining their approval and sanction for action by the United States permitting the inclusion in the armed forces of the United States of such citizens of the countries of such Governments as are within the United States.

The SPEAKER pro tempore. Is there objection?

Mr. ROGERS. Mr. Speaker, because of the fact that the Secretary of State has already notified the Congress that he is engaged in completing such treaties, and because of the further fact that the gentleman from Alabama [Mr. BURNETT] proposed to bring up a bill on Wednesday next which deals with this same question, I ask unanimous consent that this resolution be stricken from the Calendar for Unanimous Consent.

The SPEAKER pro tempore. The gentleman from Massachusetts asks unanimous consent that the resolution be stricken from the calendar. Is there objection?

There was no objection.

POWER TO DETAIL NAVY AND MARINE CORPS FOR SERVICE IN DOMINICAN REPUBLIC.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 6975) to authorize and empower officers and enlisted men in the Navy and Marine Corps to serve under the Government of the Dominican Republic, and for other purposes.

The SPEAKER pro tempore. Is there objection?

Mr. STAFFORD. Reserving the right to object, I do not see the chairman of the Committee on Naval Affairs in the Chamber at this moment.

Mr. FOSTER. He was here until just a moment ago.

Mr. STAFFORD. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

Mr. FOSTER. I suggest that the gentleman modify his request by providing that it be passed over temporarily.

The SPEAKER pro tempore. Does the gentleman so modify his request?

Mr. STAFFORD. I will be glad to accept the suggestion.

The SPEAKER pro tempore. The gentleman from Wisconsin asks unanimous consent that the bill may be passed over temporarily without prejudice. Is there objection?

There was no objection.

RESERVE OF PUBLIC HEALTH SERVICE.

The next business on the Calendar for Unanimous Consent was Senate joint resolution 63, to establish a reserve of the Public Health Service.

The SPEAKER pro tempore. Is there objection?

Mr. COADY. Mr. Speaker, I ask unanimous consent that the resolution be passed over without prejudice.

The SPEAKER pro tempore. Is there objection?

There was no objection.

BRIDGE ACROSS MISSOURI RIVER, MO.

The next business on the Calendar for Unanimous Consent was the bill (S. 2688) to extend the time for constructing a bridge across the Missouri River near Kansas City, Mo., authorized by an act approved June 17, 1914.

The SPEAKER pro tempore. Is there objection?

Mr. STAFFORD. Mr. Speaker, reserving the right to object, I would like to inquire of the gentleman from Missouri [Mr. ALEXANDER] whether this is not a similar proposition to a House bill that was objected to some months ago?

Mr. ALEXANDER. I can not say about that. I do not recall being present if such a bill was up for consideration. This is a Senate bill, and the purpose is to extend the time to construct the bridge across the Missouri River near Kansas City, Mo., which was authorized by an act approved June 17, 1914. The site of the bridge is between Jackson County, Mo., and Clay County, Mo. Jackson County is in the district of my colleague [Mr. BORLAND] and Clay County is in my district. We have no objection to the time being extended.

Mr. STAFFORD. Has any work whatsoever been done under this authorization?

Mr. ALEXANDER. I think not.

Mr. STAFFORD. As I recall, it has been extended once before for three years.

Mr. ALEXANDER. I think twice.

Mr. STAFFORD. What is the need of giving authorization here to keep in existence some paper corporation which is not going ahead with the work of construction?

Mr. ALEXANDER. I did not introduce the original bill in this case, and I did not introduce either of the bills to extend the time, but I have no objection to the time being extended. I will be glad to have them construct the bridge, but if they do not do it very soon——

Mr. ANTHONY. Mr. Speaker, if the gentleman will permit, I know a little something about this project. I think if the gentleman will investigate he will find that the reason no work has been done has been on account of the financial stringency the railroads have been in in the last three years. Is not that true?

Mr. ALEXANDER. Well, I could not say——

Mr. ANTHONY. The project embraces an ambitious proposition for giving one or two roads new entrances into Kansas City and they were unable to carry them out in the last three years on account of the war.

Mr. STAFFORD. Mr. Speaker, I think a railroad corporation that has had the privilege since 1914 of building a bridge and has not manifested any ability in any way whatsoever to carry out the original intention should not be coming to Congress every two or three years asking for an extension, and therefore I object.

The SPEAKER pro tempore. Objection is heard, and the bill will be stricken from the calendar.

SERVICE OF OFFICERS AND ENLISTED MEN, ETC., IN THE DOMINICAN REPUBLIC.

Mr. PADGETT. Mr. Speaker, I ask unanimous consent to return to calendar No. 40 (H. R. 6975), which the members of the committee kindly passed over a few moments ago temporarily.

The SPEAKER pro tempore. The gentleman from Tennessee asks unanimous consent to return to the bill indicated, which was passed over temporarily. Is there objection? [After a pause.] The Chair hears none.

Mr. STAFFORD. There is a reservation of point of order as to consideration of the bill.

The Clerk read as follows:

Be it enacted, etc., That the President of the United States be, and he is hereby, authorized, in his discretion, to detail to assist the Dominican Republic officers and enlisted men of the United States Navy and the United States Marine Corps: *Provided*, That officers and enlisted men so detailed be, and they are hereby, authorized to accept from the Government of the Dominican Republic offices under said Government with compensation and emoluments from the said Dominican Republic, subject to the approval of the President of the United States: *Provided further*, That while so detailed such officers and enlisted men shall receive, in addition to the compensation and emoluments allowed them by the Dominican Republic, the pay and allowances of their rank or rating in the United States Navy or United States Marine Corps, as the case may be, and they shall be entitled to the same credit, while so serving, for longevity, retirement, foreign-service pay, and for all other purposes that they would receive if they were serving with the United States Navy or Marine Corps in said Dominican Republic.

The SPEAKER pro tempore. There is a reservation of the right to object.

Mr. PADGETT. Mr. Speaker, the Senate has passed a bill in identical words with the bill on the calendar, and I ask that Senate bill 3006 may be considered in lieu of the House bill.

Mr. STAFFORD. Mr. Speaker, temporarily I object until we can get some information as to the reason for the passage of this bill. I take it no one has objection to authorizing the President, as provided in the first paragraph, to depute our officers and enlisted men for service in the Dominican Republic, but the proposal as embodied in the proviso whether we shall allow our officers who are detailed there to accept from the Government of the Dominican Republic compensation for their services in addition to the pay that they are receiving from the United States should be considered.

Mr. PADGETT. This is identical with the bill we passed in the preceding Congress for Haiti, a part of the same island, and which we are administering under like conditions. It is identical with the bill which was passed in the last Congress.

Mr. STAFFORD. Well, can the gentleman, in view of that statement, give the House any advice as to how much money the Haitian Republic is paying to our naval officers or other officers in the performance of outside work on that island?

Mr. PADGETT. It is a small amount; I do not know; but we undertook to reorganize the government of Haiti altogether and to establish a gendarmerie or constabulary force and to officer that force. Conditions there, the gentleman knows, are not at all pleasant or agreeable, and it is all under the jurisdiction of the President, has to meet his approval, and the language and provisions are the same as we provided for Haiti.

Mr. STAFFORD. We send officers to the Philippines, and perhaps the service there is not as agreeable as on our coasts here in continental United States, and yet we do not pay them any additional amount except 10 per cent for foreign service.

Mr. PADGETT. We pay 10 per cent additional.

Mr. STAFFORD. And why should we permit these to receive additional compensation over that which they are receiving on the pay roll of the United States?

Mr. PADGETT. The conditions down there are different, and the conditions are so unfavorable they have to deny themselves many things that they are justly entitled to such additional compensation as the Government there is willing to pay and the President is willing for them to receive. It is working splendidly in the Haitian Republic.

Mr. STAFFORD. Well, how many naval officers have been delegated to Haiti?

Mr. PADGETT. It is a small number; I do not remember. Gen. Cole was there for one, and Col. Butler, son of our Representative from Pennsylvania, and I should say, just guessing, something like 15 or 20, or maybe 25, on the whole island.

Mr. STAFFORD. And how much additional compensation are they receiving, or is anyone receiving, so we may have some facts on which to base an understanding of the policy of allowing foreign governments to contribute to the compensation of our own officers when performing work in a foreign land?

Mr. PADGETT. I could not give the gentleman that. That was arranged by the State Department and the President, and I do not know the amount, but it is a small amount in the aggregate as compared with the value of the services they are rendering. It is very important that we should have this legislation.

Mr. STAFFORD. I do not question the policy of deputing to the President the right to send officers there to carry out treaty arrangements, to collect fiscal revenue, and so forth, but I think it is questionable whether our Government should attempt the policy of allowing foreign governments to pay for their services when they are receiving their full compensation as officers of the United States.

Mr. PADGETT. Well, it is true they are receiving that, but considering the conditions under which they are laboring and the denials they have to submit to I think it is equitable.

Mr. STAFFORD. What additional services are they obliged to perform in addition to their regular duties?

Mr. PADGETT. Well, they have the whole administration of that government there. They are organizing a constabulary there, looking after the civil administration. They have taken over absolutely the Government of Santo Domingo; they have displaced the legislative body, all of their civil officers resigned, and the President placed Admiral Knapp in charge there as naval governor, and we have the whole administration of the island and the Republic of Santo Domingo.

Mr. STAFFORD. Is it not possible under the stress and strain of the existing conditions that the naval officers who are deputed for service there should be assigned to service in other parts of the world in connection with the war and civilians used in their places? The gentleman says there are 12 or 15 in Haiti.

Mr. FARR. About 25.

Mr. PADGETT. I said 20 or 25.

Mr. STAFFORD. About 25 in Haiti. Now, suppose a like number of officers are to be sent to Santo Domingo for collection purposes and administrative purposes——

Mr. PADGETT. But you could not administer the government down there at the time they took it in the revolution with civil officers.

Mr. STAFFORD. I am putting the question whether it is not possible at present, because we are dealing with the present and not with past conditions.

Mr. PADGETT. I think not; no, sir, I think not.

Mr. FARR. I will make this statement to the gentleman and give a concrete instance of the splendid work they are doing down there. A year ago there was about $15,000 in the treasury of Santo Domingo, and under the administration of our officers there is $1,250,000 there.

Mr. STAFFORD. Will the gentleman answer why that work has not been performed by civilians rather than by naval officers?

Mr. FARR. I would doubt the wisdom of that. Civilians would not have the power, influence, or the respect that the naval officers have; and, in justice to these officers, every one of them wants to go to France, but they are doing such excellent and needed work there that that desire on their part is

put aside by the Navy Department. I am sure if the gentleman had visited those places or could get information from any member of the House Committee on Naval Affairs who recently was there, there would be no hesitancy on his part in having this bill made a law. The men have assumed a tremendous additional responsibility. If I was ever proud of the representatives of our Navy and our Army—and I have a high regard for their ability, integrity, and patriotism—it was when I saw the work they were doing so magnificently at Santo Domingo, Port au Prince, and other places visited by the members of the Committee on Naval Affairs.

Mr. ROBBINS. Who is it, may I ask the chairman of the committee, that is to fix this compensation that is to be paid to our naval officers in addition to the regular salary?

Mr. PADGETT. The President of the United States.

Mr. ROBBINS. I understood a moment ago that our young officers in charge had taken over the entire administration of this island?

Mr. PADGETT. Under the direction of the President of the United States.

Mr. ROBBINS. And to supplant the legislature and the police and the military power they had there, as well as the civil government?

Mr. PADGETT. We are administering the whole Government of Santo Domingo.

The SPEAKER pro tempore. Is there objection?

Mr. ROBBINS. Wait a moment, please. Then our own people would fix the compensation they are to be paid out of the treasury of the island? Does not that seem to be a one-sided proposition? What do the natives says about that?

Mr. PADGETT. The condition in Haiti was a little different. In Haiti a treaty was made, because there was a government in force there, but the revolution in Santo Domingo came on in such circumstances that we took absolute control, and there is no government in Santo Domingo except the government which the United States is administering. And they have to do that.

Mr. DOWELL. Regular order!

The SPEAKER pro tempore. The regular order is, Is there objection? [After a pause.] The Chair hears none.

Mr. PADGETT. Mr. Speaker, I ask that the bill S. 3006 be considered in lieu of the House bill. It is identical in language.

The SPEAKER pro tempore. The gentleman from Tennessee asks unanimous consent that the bill S. 3006 be considered in lieu of the House bill. Is there objection? [After a pause.] The Chair hears none, and the Clerk will report the Senate bill.

The Clerk read as follows:

An act (S. 3006) to authorize and empower officers and enlisted men of the Navy and Marine Corps to serve under the Government of the Dominican Republic, and for other purposes.

Be it enacted, etc., That the President of the United States be, and he is hereby, authorized, in his discretion, to detail to assist the Dominican Republic, officers and enlisted men of the United States Navy and the United States Marine Corps: *Provided*, That officers and enlisted men so detailed be, and they are hereby, authorized to accept from the Government of the Dominican Republic offices under said Government with compensation and emoluments from the said Dominican Republic, subject to the approval of the President of the United States: *Provided further*, That while so detailed such officers and enlisted men shall receive, in addition to the compensation and emoluments allowed them by the Dominican Republic, the pay and allowances of their rank or rating in the United States Navy or United States Marine Corps, as the case may be, and they shall be entitled to the same credit while so serving, for longevity, retirement, foreign-service pay, and for all other purposes that they would receive if they were serving with the United States Navy or Marine Corps in said Dominican Republic.

Mr. PADGETT. Mr. Speaker, I ask for a vote.

The SPEAKER pro tempore. The question is on the third reading of the bill.

The bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. PADGETT, a motion to reconsider the vote by which the bill was passed was laid on the table; and, also, the House bill, of similar tenor, was ordered to lie on the table.

EXTENSION OF REMARKS.

Mr. BLANTON. Mr. Speaker, I renew my request for unanimous consent to revise and extend my remarks in the RECORD.

The SPEAKER pro tempore. The gentleman from Texas asks unanimous consent to extend his remarks in the RECORD. Is there objection?

Mr. MADDEN. Reserving the right to object, does the gentleman intend to put anything into what he says under leave to print that he has not said upon the floor?

Mr. BLANTON. Nothing; only to finish the remarks I intended in answering the charges made. There will be nothing that will violate the rules of the House.

Mr. MADDEN. I just wanted to have the gentleman confine himself——

Mr. BLANTON. It will be to finish answering the charges that have been made.

The SPEAKER pro tempore. Is there objection?

Mr. COX. I object, Mr. Speaker.

The SPEAKER pro tempore. The gentleman from Indiana objects.

The Clerk will report the next bill.

JUDICIAL DISTRICTS IN OKLAHOMA.

The next business on the Calendar for Unanimous Consent was the bill H. R. 5558, to amend section 101 of the Judicial Code.

The SPEAKER pro tempore. Is there objection to the consideration of the bill? [After a pause.] The Chair hears none. The Clerk will report the bill.

The Clerk read as follows:

A bill (H. R. 5558) to amend section 101 of the Judicial Code.

Be it enacted, etc., That section 101 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved May 3, 1911, as amended by the act approved February 20, 1917, be, and the same is hereby, amended to read as follows:

"SEC. 101. That the State of Oklahoma is divided into two judicial districts, to be known as the eastern and western districts of Oklahoma. The eastern district shall include the territory embraced on the 1st day of July, 1916, in the counties of Adair, Atoka, Bryan, Craig, Cherokee, Creek, Choctaw, Coal, Carter, Delaware, Garvin, Grady, Haskell, Hughes, Jefferson, Johnston, Latimer, Le Flore, Love, McClain, Mayes, Muskogee, McIntosh, McCurtain, Murray, Marshall, Nowata, Ottawa, Okmulgee, Okfuskee, Pittsburg, Pushmataha, Pontotoc, Rogers, Stephens, Sequoyah, Seminole, Tulsa, Washington, and Wagoner. Terms of the district court for the eastern district shall be held at Muskogee on the first Monday in January, at Vinita on the first Monday in March, at Tulsa on the first Monday in April, at South McAlester on the first Monday in June, at Ardmore on the first Monday in October, and at Chickasha on the first Monday in November of each year. The western district shall include the territory embraced on the 1st day of July, 1916, in the counties of Alfalfa, Beaver, Beckham, Blaine, Caddo, Canadian, Cimarron, Cleveland, Comanche, Cotton, Custer, Dewey, Ellis, Garfield, Grant, Greer, Harmon, Harper, Jackson, Kay, Kingfisher, Kiowa, Lincoln, Logan, Major, Noble, Oklahoma, Osage, Pawnee, Payne, Pottawatomie, Roger Mills, Texas, Tillman, Washita, Woods, and Woodward. Terms of the district court for the western district shall be held at Oklahoma City on the first Monday in January, at Enid on the first Monday in March, at Guthrie on the first Monday in May, at Lawton on the first Monday in September, and at Woodward on the second Monday in November: *Provided*, That suitable rooms and accommodations for holding court at Woodward are furnished free of expense to the United States. The clerk of the district court for the eastern district shall keep his office at Muskogee and the clerk for the western district at Guthrie, and shall maintain an office in charge of himself or a deputy at Oklahoma City."

Mr. MOORE of Pennsylvania. Mr. Speaker, no word of explanation has been given about this bill. I see the gentleman from Oklahoma [Mr. MORGAN] here.

The SPEAKER pro tempore. The gentleman from Oklahoma is recognized for one hour.

Mr. MORGAN. Mr. Speaker, I will be glad to answer any questions that anybody has to ask me.

Mr. MOORE of Pennsylvania. Mr. Speaker——

Mr. DYER. Just make a statement of what the bill is.

Mr. MORGAN. I will make a statement, Mr. Speaker.

There are two United States court districts in Oklahoma, the eastern and the western and there is nothing in this bill which affects the eastern district. All the changes are made in the western district. The only changes made there are in the district of my colleague, Mr. THOMPSON, and in my district. The bill amends the present law in two particulars, viz, the times or dates for holding court in the various court towns, and adds Cotton County in the law, which is on the west side of the State, but was inadvertently or by some error omitted from the statutes naming the counties constituting the western United States court district.

Mr. MADDEN. Does the gentleman want the time changed?

Mr. MORGAN. For instance, under the present arrangement the court is held at Enid in June. Now, in June the farmers there are busy in their wheat harvest. That is a wheat country, and on account of the harvesting they are very busy. The judge says that it is a hardship, an inconvenience, to the farmers to be called on for jury duty or as witnesses up in that section of the State at that time of the year. So the Enid term is changed from June to March. And this change would tend to make it more convenient for the farmers. There is a change of term of court at Woodward. Under the existing law court is held at Woodward, beginning the Monday in November which date comes the day before election on election years. This has a tendency to keep court officers, attorneys, jurymen, and witnesses away from the polls on election day, so it is changed to the second Monday of November.

Mr. MOORE of Pennsylvania. Mr. Speaker, I am the only gentleman who has addressed the Chair for some time.

The SPEAKER pro tempore. The gentleman from Oklahoma has control of the time.

Mr. MOORE of Pennsylvania. I had addressed the Chair several times, and other gentlemen who did not address the Chair were recognized.

The SPEAKER pro tempore. The Chair has not recognized anybody. The Chair asked the gentleman from Oklahoma to whom he yielded. He controls the time.

Mr. MOORE of Pennsylvania. I recognize the rules provide that a gentleman who desires to present an interrogatory should rise and address the Chair and say "Mr. Speaker."

The SPEAKER pro tempore. The Chair asked the gentleman from Oklahoma if he yielded, and to whom, and that is all the Chair can do.

Mr. KEARNS. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. KEARNS. Does all this come out of the gentleman's one hour of time? [Laughter.]

The SPEAKER pro tempore. To whom does the gentleman from Oklahoma yield?

Mr. MORGAN. I will yield to the gentleman from Pennsylvania [Mr. MOORE].

Mr. MOORE of Pennsylvania. Does one judge cover these judicial districts now?

Mr. MORGAN. No, sir; two judges.

Mr. MOORE of Pennsylvania. There are two judges?

Mr. MORGAN. Yes.

Mr. MOORE of Pennsylvania. This bill does not contemplate the appointment of a new judge?

Mr. MORGAN. No, sir.

Mr. MOORE of Pennsylvania. Nor is it leading up to the creation of a new judgeship?

Mr. MORGAN. No.

Mr. MOORE of Pennsylvania. That was the question that seemed to be agitating the minds of certain gentlemen on this side.

Mr. ROBBINS. Mr. Speaker, will the gentleman yield for a question?

The SPEAKER pro tempore. Does the gentleman from Oklahoma yield to the gentleman from Pennsylvania?

Mr. MORGAN. Yes.

Mr. ROBBINS. Does this establish any new places of holding court?

Mr. MORGAN. It does not.

Mr. ROBBINS. Does this bill grant authority for building half a dozen public buildings out there next year?

Mr. MORGAN. No, sir. We have already public buildings authorized or constructed in all the court towns.

Mr. ROBBINS. It says here, "Suitable rooms must be provided without expense to the United States Government."

Mr. MORGAN. That is at Woodward. That provision was in the original act. Since that time Congress has authorized the expenditure of $110,000 for erecting a building at Woodward, and a part of the money has been appropriated.

Mr. THOMPSON. Mr. Speaker, will my colleague yield?

Mr. MORGAN. Yes

Mr. THOMPSON. That is the reenactment of the present statute.

Mr. ROBBINS. This is a provision for holding court at Woodward free of expense to the Government?

Mr. THOMPSON. Yes.

Mr. MORGAN. That was put in the law establishing Woodward as a court town.

Mr. ROBBINS. Does the gentleman say there has been an appropriation for the erection of a Federal building there?

Mr. MORGAN. Yes; it has been authorized, and I think $35,000 has been appropriated.

Mr. TILSON. Mr. Speaker, will the gentleman yield?

Mr. MORGAN. Yes.

Mr. TILSON. The gentleman has answered that no new judges are required and no new courthouses are to be built. Are there any new clerks required to conduct this court that are not already provided?

Mr. MORGAN. No more.

Mr. DOWELL. Mr. Speaker, will the gentleman yield?

Mr. MORGAN. Yes.

Mr. DOWELL. Does this transfer any county from one judicial district to another?

Mr. MORGAN. It does not. The only change made in the counties is this: In the amendment to the law some two years ago Cotton County was omitted. So under the present law there is some question whether the United States court has jurisdiction over Cotton County. So we simply put in that county, which was left out before by inadvertence.

Mr. DOWELL. Then, do I understand that the intention of this bill is merely to change the day of holding court for some of the divisions in this district?

Mr. MORGAN. Yes; at Oklahoma City, Guthrie, Enid, and Woodward. It makes no change at Lawton.

Mr. DOWELL. That is the only purpose of the bill?

Mr. MORGAN. That is the only purpose of the bill, except to put in Cotton County, which was left out by inadvertence from the other bill.

Mr. SMITH of Michigan. Mr. Speaker, will the gentleman yield?

Mr. MORGAN. Yes.

Mr. SMITH of Michigan. Does not the judge already have the right to fix the time of holding his court without this bill?

Mr. MORGAN. No. The law says the court shall be held in each town and fixes the day court convenes, but it does not say how long the court shall last.

The SPEAKER pro tempore. Is there objection to the consideration of this bill?

There was no objection.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. MORGAN, a motion to reconsider the vote whereby the bill was passed was laid on the table.

The SPEAKER pro tempore. The Clerk will call the next bill.

LEGAL SERVICES TO CREEK NATION.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 906) making an appropriation to Stuart, Lewis, Gordon & Rutherford in payment of legal services rendered by them to the Creek Nation.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection?

Mr. STAFFORD. I object.

The SPEAKER pro tempore. Objection is heard. The bill will be stricken from the calendar. The Clerk will report the next bill.

Mr. HASTINGS. Mr. Speaker, will the gentleman reserve his objection for a moment?

Mr. STAFFORD. I will reserve my objection.

Mr. HASTINGS. Mr. Speaker, I want to say, in explanation of this bill, that it was passed by the last Congress in exactly the same language as the present bill. It is in payment of the legal services rendered by the firm of Stuart, Lewis, Gordon & Rutherford to the Creek Tribe of Indians.

The Creek Tribe of Indians was one of the Five Civilized Tribes in Oklahoma, and prior to the enactment of the Curtis Act, approved June 28, 1898, this tribe or nation of Indians had the right to enact its own laws, expend its own money, and employ its own attorneys, just the same as any State of the Union. On January 7, 1898, when it had this right, under an act of its legislature this firm of attorneys was employed to represent the Creek Tribe. They rendered the services, extending over a period of some two or three years.

In October, 1900, they passed an appropriation act to pay for these services rendered, but in the meantime, between the time of the employment of the firm and the act making the appropriation for the payment of these services, Congress passed an act requiring all acts of the Five Civilized Tribes to be approved by the President of the United States.

There is no question but that these services were rendered. The Creek national council, I believe, unanimously, or almost so, passed this act appropriating $7,000 for the payment of these services.

Mr. STAFFORD. Will the gentleman yield for a question in that particular?

Mr. HASTINGS. I will.

Mr. STAFFORD. Secretary of the Interior Hitchcock, in a report dated November 7, 1900, addressed to the President, as appears on page 6 of the report, called his attention to the fact that these attorneys performed services for this nation without complying with the requirement of section 2103 of the Revised Statutes, which provided that no contract with an Indian nation shall be valid until approved by the Secretary of the Interior. That act in the Revised Statutes has been in existence and on the statute books since 1870. These attorneys did not comply with the law, and for that reason the Secretary of the Interior advised the President to reject the claim, and the President did reject the claim.

Mr. HASTINGS. Let me say to the gentleman that the Secretary of the Interior was in error in making that report. If you read the Secretary's report you will note that it was received that day, and on the same day that it was received it was recommended to the President for disapproval. Let me say that section 2103 does not apply to contracts with the Five Civilized Tribes, and for 75 years prior to the passage of the

Curtis Act, on June 28, 1898, the Creek Tribe of Indians, the Cherokee Tribe of Indians, and the other Five Civilized Tribes passed their own appropriation acts, employed their own attorneys, paid them without any supervision whatever by the Government of the United States, and expended untold millions of dollars.

Mr. STAFFORD. Will the gentleman yield for a question?

Mr. HASTINGS. I will.

Mr. STAFFORD. The gentleman has stated that section 2103, containing these restrictions, does not apply to the Five Civilized Tribes.

Mr. HASTINGS. It never applied to any of the Five Civilized Tribes.

Mr. STAFFORD. I have the section before me, and I ask the gentleman to show wherein there is any qualification of this general language in the opening paragraph—

> No agreement shall be made by any person with any tribe of Indians or individual Indians not citizens of the United States for the payment or delivery of any money or thing of value, in present or in prospective, or for the granting or procuring of any privilege—

Which exempts the Five Civilized Tribes from that section.

Mr. HASTINGS. I want to say to the gentleman that I was the attorney for the Cherokee Tribe of Indians for some 25 years, and I say without any qualification that the Five Civilized Tribes, to my own knowledge, for 75 years prior to the passage of the Curtis Act, enacted legislation affecting their several tribes, made their own appropriations, elected their own officers, employed their own counsel, and that those contracts of employment were never submitted under section 2103 to the Secretary of the Interior for approval, and that during the course of those 75 years they appropriated untold millions of dollars. I want to say that the employment of these attorneys on January 7, 1898, was a legal employment; that they had a right to employ these attorneys, and they employed the best firm of attorneys, or as good a firm of attorneys, as there was in the old Indian Territory, which is now eastern Oklahoma.

Mr. MONDELL. Does the gentleman from Wisconsin intend to insist on the point of order?

Mr. STAFFORD. I intend to insist on my objection.

Mr. MONDELL. Then, Mr. Speaker, there is no purpose in this discussion at this time.

Mr. HASTINGS. I will say that this matter was up last year, and the minority leader [Mr. MANN] examined it very closely——

Mr. MONDELL. The gentleman knows that if the objection is made the bill will go off the calendar. Why waste time? Let me suggest to the gentleman that his bill is on the wrong calendar anyway. It is a private bill and belongs on the Private Calendar. Whenever objection is made it will go to the Private Calendar. It occurs to me that if the gentleman desires consideration of the bill, as he undoubtedly does—and I think the bill has a considerable amount of merit—it ought to be placed on the Private Calendar and considered when private bills are considered, as it will eventually have to be.

Mr. CARTER of Oklahoma. If the gentleman will yield to me——

The SPEAKER pro tempore. Is there objection?

Mr. HASTINGS. I should like to yield to my colleague from Oklahoma [Mr. CARTER].

Mr. MONDELL. I shall have to object if there is to be any considerable discussion.

Mr. CARTER of Oklahoma. I only wish to make a short statement. In addition to what the gentleman from Oklahoma [Mr. HASTINGS] has said, the members of the Five Civilized Tribes are citizens of the United States. My colleague [Mr. HASTINGS] told you of conditions with reference to the Five Civilized Tribes previous to the passage of the act of June 28, 1898, but I do not believe the House caught the force of that statement quite clearly. Here was the situation: Prior to this time the governments of each of the five tribes was an entity unto itself. They were separate sovereignties, each having a chief, a council, judicial tribunals, schools, treasurers, accounting officials, and other fiscal officers. The official acts of these tribal officers as such did not come under the jurisdiction of any branch of the United States Government, but they were accountable to the tribal councils and tribal courts, not to Congress and the departments, as is the case now.

Their authority, their power to act, emanated not directly from the Federal Government but from the tribunals of the tribe. Therefore, the sections of the Revised Statutes referred to by the gentleman from Wisconsin, while containing no specific language of exemption, did not at that time apply to the Five Civilized Tribes, and the courts have so held.

Mr. STAFFORD. Has the gentleman given consideration also to the recommendation of the present Secretary of the Interior in his letter addressed to the former chairman of the Committee on Indian Affairs under date of March 8, 1916, which he closes with these words?—

> In view of the record of disapproval by the President on November 17, 1900, of the claim as then presented by said attorneys, and as 15 years have elapsed since the disapproval without any further action being taken by said attorneys to renew the claims, which seem to be without merit, and I recommend that no further action be had on H. R. 10872.

Mr. CARTER of Oklahoma. The answer to that is that when the Secretary made that statement he was not fully advised of the facts in connection with this matter, as sometimes does occur. Let me just state that one of the gentlemen who was a party to this contract was at one time a Federal judge.

Mr. HASTINGS. Two of them.

Mr. CARTER of Oklahoma. Yes; two of them were Federal judges and resigned their positions to resume the practice of law. Certainly two gentlemen who had risen to that high estate would not submit a contract of this character to come before Congress that had no merit in it.

The SPEAKER pro tempore. Is there objection?

Mr. STAFFORD. I object.

The SPEAKER pro tempore. Objection is heard. The bill will be stricken from the calendar.

LOYAL CREEK INDIANS.

Mr. IGOE. Mr. Speaker, I ask unanimous consent to call up No. 53 on this calendar, and I would like to state——

The SPEAKER pro tempore. The gentleman asks unanimous consent to take up a bill out of its order. Is there objection?

Mr. LENROOT. Mr. Speaker, I object.

The SPEAKER pro tempore. Objection is made. The Clerk will report the next bill.

The Clerk read the title of the bill (H. R. 3568) to pay the balance due the loyal Creek Indians on the award made by the Senate on the 16th day of February, 1903.

The SPEAKER pro tempore. Is there objection?

Mr. STAFFORD. I object.

The SPEAKER pro tempore. Objection is made. The bill will be stricken from the calendar. The Clerk will call the next bill.

UNITED STATES COURT FOR THE EASTERN DISTRICT OF MISSOURI.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 294) to provide for the appointment of an additional judge of the district court of the United States for the eastern district of Missouri.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

Mr. STAFFORD. Reserving the right to object——

Mr. COX. Reserving the right to object, what is the necessity for this additional judge?

Mr. IGOE. Mr. Speaker, I understand there is going to be objection to this bill, so I will ask unanimous consent that it be passed over without prejudice.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. IGOE. Now, Mr. Speaker, in view of that fact I ask that I be permitted to call up the other bill, extending the time for the completion of the bridge, which is very important to St. Louis, as the time expires on the 15th of this month, and there will not be another unanimous-consent day before that time.

The SPEAKER pro tempore. The gentleman from Missouri asks unanimous consent to call up the bill referred to. Is there objection?

Mr. STAFFORD. Reserving the right to object, it is the fifth bill on the calendar; has the gentleman any admonition that we are not going to continue to consider bills on the Unanimous Consent Calendar.

Mr. IGOE. In view of the fact that it took two hours for the first bill, I am apprehensive that we will not reach it.

The SPEAKER pro tempore. Is there objection?

Mr. MONDELL. I object.

The SPEAKER pro tempore. The Clerk will call the next bill.

ADDITIONAL JUDGES, SUPREME COURT, DISTRICT OF COLUMBIA.

The next business on the Calendar for Unanimous Consent was the bill (S. 2489) to create two additional associate judges of the Supreme Court of the District of Columbia.

The SPEAKER pro tempore. This bill is on the Union Calendar.

Mr. ROBBINS. Mr. Speaker, reserving the right to object, who has charge of the bill? This is to create two additional judges, and I would like to have some explanation of the necessity for it.

Mr. WEBB. This is a Senate bill, and I am ready to make any explanation. It is the same bill that passed the House by unanimous consent a year ago. It increases the District judges by two. For 38 years there has been no increase whatever in the number of judges for that court. In the city of Washington the population since that time has increased 70 or 80 per cent, and the business before the court has increased 200 or 300 per cent. The civil calendar is now 1,000 cases behind. These judges work two on the law side, two in equity, and two on the criminal work. There is not a calendar in the United States of any Federal court that is so deplorably congested as this court here in Washington. I have made some investigation as to how much these judges work. All of them begin court at 10 o'clock in the morning, sit until 12, with 30 minutes for lunch, and they sit on many days until 6 and 8 o'clock in the evening. It is a hard-working bench. Justices Gould and Stafford have worked 14 years in this court, and by the hardest and most painstaking labor they have not been able to keep with the calendar, and year by year it increased until now, as I say, they are 1,000 cases behind on the civil docket. If you go down to-morrow to caveat a will or with a civil suit it will take two years before you can get a trial by jury.

The bar, the people, and the judges regard the situation as almost a public denial of justice. Many defendants who appeal to that court have to wait two years, until their cases are almost forgotten.

Mr. COX. Will the gentleman yield?

Mr. WEBB. Certainly.

Mr. COX. This is to increase the number of associate judges of the Supreme Court of the District?

Mr. WEBB. Yes.

Mr. COX. Does this court consider cases on appeal?

Mr. WEBB. Yes; that is a small part of their business. Those are only court cases appealed from police-court justices, where a man is imprisoned for more than a year. This court has the widest jurisdiction of any court in America.

Mr. COX. It has two jurisdictions.

Mr. WEBB. Yes.

Mr. COX. Original and appellate.

Mr. WEBB. Yes.

Mr. COX. On the civil side what is the original jurisdiction?

Mr. WEBB. Anything in excess of $500.

Mr. COX. What is the jurisdiction in criminal cases?

Mr. WEBB. Where the punishment is anything over a year.

Mr. COX. What is the appellate jurisdiction in civil cases?

Mr. WEBB. Anything between $5 and $500.

Mr. COX. How many judges are on the bench now?

Mr. WEBB. Six; the chief justice and five associate justices.

Mr. COX. And the number has never been increased?

Mr. WEBB. Not for 38 years.

Mr. COX. Mr. Speaker, this increase might be needed, and yet it is a hard matter to make up my mind what we ought to do. In my opinion if we had Judge Anderson from Indiana down here, you would not need anybody, except possibly one other man. I might say that the State of Indiana has not had an increase in the number of Federal judges since it was a State.

I am not here to pass any eulogy upon Judge Anderson; but, as far as work is concerned, the lawyers know that they are in a court room when they get in there. In the last five or six years, with a population of nearly 3,000,000 in the State of Indiana, with as large criminal cases as has ever been tried in the United States, cases that involve from four weeks to three months in preparing them, he not only disposed of those hundreds of cases in Indiana, but has had plenty of time to go to the city of Chicago and try cases there.

How did he do it? He did it by work. I speak authoritatively because I have been in his court. When he adjourns to convene to-morrow at 8.30, it means that the lawyers and the witnesses must be there at 8.30. When he adjourns at 12 o'clock for one hour for lunch, it means that court comes in at that time, and he sits until 6 and 8 o'clock in the evening.

Among the cases that he has tried in the last three or four years were the Terra Haute cases, where 120 men were sent to the penitentiary. That ran for about 10 weeks. The great national dynamite cases took over three months, and he recently closed out a lot of cases involving a trial of 10 weeks, and yet his docket is up.

Mr. FESS. Will the gentleman yield?

Mr. COX. Yes.

Mr. FESS. I think the gentleman's statement is very informing and important on this particular occasion. I wondered if this is not the same court to which our friend, Judge Covington, was appointed?

Mr. WEBB. The same court.

Mr. FESS. If the work is so pressing, how could he afford to take another position under the Government?

Mr. WEBB. He has not entered upon any other position; he has taken this place at the request of the President to act with the commission in an advisory capacity.

The only way it has affected his judicial duties is that he does not take a case for a time—for a week or two. He is sitting on the bench now, and he confers with the other members of the commission in an advisory capacity. I want to say further that these judges have less vacation than any judges that I know of in America. That court is always open. They are practically the governors of the District of Columbia. They have every kind of jurisdiction in that court; they have habeas corpus cases, will cases, all kinds of cases against the heads of these departments, all civil and criminal suits. As I said, I do not know of any court in America that works harder. I wish we had all Judge Andersons down there, but I know that Mr. Justice McCoy worked until he got sick, and I know that Justice Gould did the same thing. He is to-day suffering from an attack of bronchial pneumonia. He worked himself until he could hardly resist it. I would not ask this judgeship unless I was firmly convinced, after thorough investigation, that it is needed. The Committee on the Judiciary unanimously reported this, and it was unanimously passed by the House last Congress, and the condition has been gradually getting worse in proportion, as it has been for the last 10 years.

Mr. FESS. Mr. Speaker, I do not want to put a captious question, nor a facetious one, but if this court is so pressed why should one of the judges be appointed to go to Arizona to settle a matter, as was the case not long ago?

Mr. COX. Did he not also go to California?

Mr. FESS. It seems to me that is a leading question—to know why this is done—if this work is so pressing in this court.

The SPEAKER pro tempore. Is there objection?

Mr. COX. Mr. Speaker, I object.

The SPEAKER pro tempore. The gentleman from Indiana objects, and the bill is stricken off the calendar.

OREGON & CALIFORNIA RAILROAD CO.

The next bill on the Calendar for Unanimous Consent was the bill (H. R. 5489) to authorize the Secretary of the Interior to exchange for lands in private ownership lands formerly embraced in the grant to the Oregon & California Railroad Co.

The SPEAKER. Is there objection?

Mr. STAFFORD. Mr. Speaker, reserving the right to object, I believe this bill applies to many thousands of acres of timberlands that were formerly included in the Central Pacific Railroad grant.

Mr. HAWLEY. Mr. Speaker, the purpose of the bill is to enable the Government to consolidate the holdings it has in the Oregon & California land grant by an exchange in equal value for private lands. For instance, in one section of that country there are operating companies cutting timber off their own land, and all of the even-numbered sections are practically now in private ownership. These operating companies have constructed their roads and are removing the timber from their own land. That will leave the Government land 40 acres here, 160 acres there, and sometimes a whole section in another place entirely isolated, so that the timber becomes practically valueless upon it. There is not enough left to pay any other company for going in there and constructing miles of railroad out to these areas and cutting the timber off them. Furthermore, when they remove the timber from the privately owned land, leaving a forty or an eighty or another area exposed to the winds, the wind blows down the trees, and they litter the ground and subject the section to the danger of fire, and after a very short time the trees blown down become valueless.

Mr. MONDELL. Mr. Speaker, will the gentleman yield?

Mr. HAWLEY. Yes.

Mr. MONDELL. This is, as I understand it, legislation suggested by the Interior Department, to enable them to administer those lands in a proper way?

Mr. HAWLEY. Yes. The Government lands have all been appraised under the act providing for the disposition of the land, and the Government knows exactly the value of every 40 acres in the tract. It is proposed that they shall exchange these tracts for exactly the same value of privately owned lands, to be determined by the Government what is the value of their own land and what is the value of the privately owned land, and it will increase the salability of the Government lands and also the price the Government gets for the timber.

Mr. STAFFORD. Will the gentleman inform the House what is the purpose of the committee amendment as found in the first

proviso, on page 2, lines 14 and 15, after the word "lands," inserting the words "and timber," so that it reads:

Provided, That all lands and timber secured by virtue of such exchange shall be disposed of in accordance with the terms and provisions of said act of revestment.

Mr. HAWLEY. Because under the law disposing of the grant land the timber is to be sold separate from the land. The timber is to be sold and the land is to be sold after the timber is removed, and this gives the Government the same authority over the lands acquired by exchange as it has now over the lands acquired from the Oregon & California Railroad Co.

Mr. STAFFORD. Mr. Speaker, I withdraw my objection.

The SPEAKER. Is there objection?

Mr. FOSTER. Mr. Speaker, reserving the right to object, is this the bill in which a few years ago we gave the proceeds of the timber to the State of Oregon, practically all of it?

Mr. LENROOT. Fifty per cent.

Mr. HAWLEY. Fifty per cent.

Mr. FOSTER. And only about 10 per cent of it went to the Federal Treasury?

Mr. HAWLEY. Yes.

Mr. FOSTER. I think we ought to pass it, because we have given it all away, anyhow.

Mr. HAWLEY. If the gentleman will yield, this will increase the value of the timber and increase the proportion which will go to the Treasury of the United States.

Mr. FOSTER. The Federal Government gets practically nothing out of it now, and I think we ought to give it all to them.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. This bill is on the Union Calendar.

Mr. FERRIS. Mr. Speaker, I ask unanimous consent to consider the bill in the House as in the Committee of the Whole House on the state of the Union.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Interior, in the administration of the act of June 9, 1916 (39 Stat. L., p. 218), is hereby authorized and empowered, in his discretion, to exchange lands formerly embraced within the grant to the Oregon & California Railroad Co. and revested in the United States by said act for other lands of approximately equal aggregate value held in private ownership, either within or contiguous to the former limits of said grant, when by such action he will be enabled thereby to consolidate the holding of timberlands by the United States: *Provided*, That all lands secured by virtue of such exchange shall be disposed of in accordance with the terms and provisions of said act of revestment.

SEC. 2. That the Secretary of the Interior is hereby authorized to perform any and all acts and to make such rules and regulations as may be necessary and proper for the purpose of carrying the provisions of this act into full force and effect.

Mr. DOWELL. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. DOWELL. I desire to offer an amendment to section 1.

The SPEAKER. Wait until the Clerk completes the reading of the bill.

The committee amendments were read as follows:

Page 1, line 4, after the word "sixteen," insert the following: "entitled 'An act to alter and amend an act entitled "An act granting lands to aid in the construction of a railroad and telegraph line from the Central Pacific Railroad, in California, to Portland, in Oregon," approved July 25, 1866, as amended by the acts of 1868 and 1869, and to alter and amend an act entitled 'An act granting land to aid in the construction of a railroad and telegraph line from Portland to Astoria and McMinnville, in the State of Oregon,' approved May 4, 1870, and for other purposes.'"

Page 2, line 14, after the word "lands," insert the words "and timber."

The question was taken, and the amendments were agreed to.

Mr. DOWELL. Mr. Speaker, I desire to offer an amendment.

Mr. FERRIS. Mr. Speaker, before the gentleman offers the amendment I want to say a word or two about the bill regarding the matters developed in general debate. This bill I introduced at the suggestion of the Interior Department. It was drawn and framed by them and dropped in the basket. This has to do with exchange of land, part of which was recovered from the Oregon and California land grant about a year ago. Fifty years ago Congress made a grant of land to the Oregon and California Land Grant Co. on certain conditions. The company never complied with the law. The Committee on Public Lands last year brought into the House a bill for the recovery of about $50,000,000 worth of land and the bill passed the House and Senate and became a law and is the law. The gentleman from Illinois [Mr. FOSTER] says that we gave it all away. We were pretty generous to the State of Oregon. I thought so then and I think so now, but the fact remains that we did put about $20,000,000 into the reclamation fund, we did put about $5,000,000 in the Treasury, or it will be done when this land and timber is all sold and completed, so that the legislation then accomplished was not altogether an idle thing to do nor altogether an empty thing to do. Of course, the State of Oregon, I think, shared very bountifully in the disposition of the proceeds of the land, but it was part of the public land and Oregon had been denied the privilege of taxes on the land and the Federal Government has recouped the expenditure. This gives Oregon 50 per cent, amounting to about $25,000,000, when it is closed, and 40 per cent to the reclamation fund, or $20,000,000 and 10 per cent to the Government, which will be about $5,000,000——

Mr. FOSTER. Did not the original bill provide that all those back taxes should be paid to the State of Oregon?

Mr. FERRIS. Out of the proceeds, but not out of the Government part. The Government gets 10 per cent. I want to say about this immediate provision that the Secretary of the Interior says it is a burning necessity that this exchange be made, and it is great hindrance and encumbrance to the Government in the sale of the timber and the sale of the land if it is not made, and in order that the record may not in any way mislead the House I want to read what the Secretary says:

The scattered holdings of timberlands by the United States will seriously interfere with the advantageous disposition thereof, for the reason that the lands are for the greater part exceedingly rough and mountainous, involving heavy initial outlay before successful logging operations can be set on foot, as well as a corresponding expenditure to maintain such operations. It follows, as a matter of course, that successful logging operations in this region call for the ownership of timberlands in large bodies, and that prices paid for timberlands will be, to a large degree, affected by the possibilities of thus blocking them up for future operations.

The House will recall the Oregon and California land grant was made of alternate sections, and the recovery is on alternate sections, so there are interspersed, spotted pieces of ground owned by private individuals. This exchange must be of equal value. It is of advantage to the Government, and I presume will be of advantage to the logging companies that make the exchange. It is as the department desires it. The committee considered it carefully and we were unanimous in reporting it.

Mr. DOWELL. Mr. Speaker, carrying out the suggestion of the gentleman from Oklahoma, I desire to offer an amendment by adding, after the word "hereby," in line 13, the word "advantageously."

Mr. FERRIS. I did not catch what the gentleman wants.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Page 2, line 13, right after the word "hereby," insert the word "advantageously."

Mr. FERRIS. Of course, it is already in his discretion whether to make the trade at all.

Mr. DOWELL. That is true; but if the word "advantageously" is here, it means it has to be for the benefit of the Government in the exchange.

Mr. FERRIS. Unless some member of the committee has some objection, I have not.

Mr. HAWLEY. The whole bill is for the advantage of the Government, and I do not see any objection to it.

Mr. DOWELL. Then there can be no objection to this amendment, because it is to the advantage of the Government.

The question was taken, and the amendment was agreed to.

The bill as amended was ordered to be engrossed and read the third time, was read the third time, and passed.

On motion of Mr. HAWLEY, a motion to reconsider the vote by which the bill was passed was laid on the table.

QUARTERS FOR VOCATIONAL EDUCATION BOARD

The next business in order on the Calendar for Unanimous Consent was (S. J. Res. 110) to amend an act entitled "An act to provide for the promotion of vocational education," approved February 23, 1917.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. STAFFORD. Mr. Speaker, reserving the right to object, the subject of the rental of quarters for the Vocational Education Board has been under consideration by the Committee on Appropriations. The chairman of the Committee on Appropriations desires to be present when this resolution is considered, and I ask unanimous consent that the resolution be passed without prejudice.

The SPEAKER. The gentleman from Wisconsin asks unanimous consent to pass the resolution without prejudice. Is there objection? [After a pause.] The Chair hears none.

AMENDING POSTAL LAWS.

The next business in order on the Calendar for Unanimous Consent was the bill (H. R. 7230) to amend the postal laws.

The Clerk read the title of the bill.

Mr. RANDALL. Mr. Speaker, I ask unanimous consent that this bill be passed on the calendar without prejudice.

The SPEAKER. The gentleman from California asks unanimous consent to pass the bill over without prejudice. Is there objection? [After a pause.] The Chair hears none.

BRIDGE ACROSS MISSISSIPPI RIVER AT ST. LOUIS.

The next business on the Calendar for Unanimous Consent was the bill (S. 3081) to extend the time for the completion of the municipal bridge approaches and extensions or additions thereto, by the city of St. Louis, within the States of Illinois and Missouri.

The SPEAKER. Is there objection?

Mr. MONDELL and Mr. STAFFORD rose.

The SPEAKER. The gentleman from Wyoming [Mr. MONDELL] is recognized.

Mr. MONDELL. Mr. Speaker, I should like to have some explanation of the purpose of the bill.

Mr. IGOE. Mr. Speaker, I will say to the gentleman that this bridge has been in process of construction and building since 1906. There have been several extensions of the time by Congress. At the present time the city has spent about $6,000,000, and the bridge over the river and on the Missouri side has been completed, and a large part of the work on the Illinois side has been completed. In Illinois, however, the city of St. Louis has no right of condemnation except under the authority of the act of Congress. At the time that the bridge was started the city was denied by the State of Illinois the right of condemnation, and so the act of Congress was relied upon. The courts have sustained that power under the act of Congress. Now, the purpose of this is to give the time for the completion of the bridge, more particularly upon the east side of the river.

Mr. MONDELL. The gentleman states the purpose of the bill is to give additional time. That is evidently an important purpose and there seem to be also other purposes. On lines 4 and 5 of the bill there is added additional legislation in the words "and also extensions or additions thereto."

Mr. IGOE. I will say to the gentleman that that relates to the approach. As I stated, the only power we have to condemn on the other side of the river comes from the Congress. If we undertook to acquire an additional foot of ground after what we have now we might be cut off with the contention that the land we have there now has exhausted our power, inasmuch as the authority we have now expires in a few days. And in order to safeguard, this has been put in there.

It is not intended to build another bridge and we must rely, if we need additional land and can not secure it by purchase from the owners on that side of the river, on the powers given to us in this legislation, which have been sustained by the courts. I will say to the gentleman that every step in the construction of this bridge has been fought from some direction. When it was sought to get the property on the east side of the river the property owners contested the right of the city. I am not saying who instigated it, but the whole power of the city was contested all the way through.

Mr. MONDELL. The section also contains some additional language, evidently intended to extend the authority granted in that section to these additions and extensions. There are certain words omitted from the bill as printed that occur in the present law. After the words "United States," at the end of section 2, the words "and of said States, respectively," are in the present law. Those words are omitted. What was the purpose of omitting those?

Mr. IGOE. May I ask the gentleman from what he is reading now?

Mr. MONDELL. From the bill I have.

Mr. IGOE. In what line?

Mr. MONDELL. The last line, at the end of the bill. The present provisions with relation to this bill are to the effect that the city may acquire by lawful appropriation, condemnation in the States of Illinois and Missouri by making proper compensation therefor, and so forth, and shall have all the authority necessary and proper for construction, maintenance, and operation of the bridge consistent with the laws of the United States and of the States, respectively. Those last words are omitted from the present bill.

Mr. IGOE. I have no objection to incorporating those words. I think, however, it is covered in line 5, where it provides that it is to be ascertained according to the laws of the States within which the same is located.

Mr. MONDELL. That has reference to the location and condemnation.

Mr. IGOE. Exactly, and that is all this has reference to, "consistent with the laws of the United States."

Mr. MONDELL. Has reference to the construction, maintenance, and operation?

Mr. IGOE. Well, we are going to use it.

Mr. MONDELL. Was there no purpose in the omission of the language I have referred to?

Mr. IGOE. I will say to the gentleman, none that I am aware of. We just want the right to continue the construction of this bridge and the right to condemn which we had originally from Congress. That is all we wish.

Mr. LENROOT. Reserving the right to object, what purpose does the gentleman think is accomplished in section 1 by including the words "extensions or additions thereto"?

Mr. IGOE. I will say to the gentleman this, that there has been a great controversy about the location of the approach to the bridge, as to whether it should be in one place or another. At the present time the city has acquired the right of way and some of the railroads now contend that in order that they may use it other connections must be made, and the purpose of putting that in is to take care of the question, if it should be raised, that the particular land that has been acquired now is the only land that we may be permitted to use. There are railroads coming from different directions, as the gentleman knows, on the east side of the river, and we are hopeful, especially in the present emergency, since the bridge has been or can be taken over by the Government, that if it is necessary to acquire additional land, and the city must acquire it, we may proceed to secure it.

Mr. LENROOT. That is true as far as section 2 is concerned, but it has no relation to section 1. The original act is silent on the question of extensions or additions, and all that section 1 does is to extend the time for the completion of something so far as extensions and additions are concerned that was not authorized in the original act.

Mr. IGOE. As I see it, it is put in there so that we are not confined absolutely to the very land that we have now acquired by purchase or condemnation.

Mr. LENROOT. But so far as section 1 is concerned, let me suggest to the gentleman that you are not given any more leeway than you had under the original act.

Mr. IGOE. Well, that may be true if that is so.

Mr. LENROOT. And it simply complicates and renders ambiguous the language of the section when in that section you include something.

Mr. IGOE. I think perhaps it makes it clear. It says "approaches." Now, they may have several of them. I do not see that the language injures anything, and it may be of service to us in acquiring this land. The city has expended, as I say, $6,000,000, and we have had a time fighting to get this thing completed.

Mr. STAFFORD. Mr. Speaker, I did not grasp the explanation that the gentleman gave as to the reason for eliminating from the original law the phraseology "and of said States, respectively."

Mr. IGOE. I have no objection to that going in.

Mr. STAFFORD. It is very questionable authority, indeed, to grant to a municipality the right to condemn and operate in an adjoining State without proceeding in consonance with the law of that State.

Mr. IGOE. This is a municipal bridge. It is not a private corporation. All the rights we have to operate come from the act of Congress. The State of Illinois has given us nothing.

Mr. STAFFORD. You recognize that in condemning you must proceed in accordance with the laws of the State of Illinois?

Mr. IGOE. That is provided for in the bill. There is no question about that. In lines 2, 3, 4, and 5 it is provided that it shall be condemned according to the laws of the State.

Mr. STAFFORD. You intend, also, so far as maintenance and operation are concerned, to comply with the laws of the State?

Mr. IGOE. That may be a very serious question. I would not want to go into that. Suppose the State of Illinois should want to hamper an instrument of interstate commerce. We might debate for a day or for days the wisdom of it. All we want now, I will say to the gentleman, is the extension of this time and permission to go ahead as we have been going.

Mr. STAFFORD. Does the gentleman want to offer an amendment?

Mr. IGOE. We have but a few days, and the matter has been considered by the committee, and the engineers have not raised any question about that, nor has the War Department. I would like to see the bill go through. Personally I have no objection, but there is so much involved in it for the city of St. Louis that I would like very much to see it go through.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The Clerk will read the bill.

The Clerk read as follows:

Be it enacted, etc., That the time for the construction and completion of the municipal bridge approaches and also extensions or additions thereto, which said construction and completion was authorized by an act entitled "An act to authorize the city of St. Louis, a corporation organized under the laws of the State of Missouri, to construct a bridge across the Mississippi River," approved June 25, 1906, be, and the same is hereby, extended for the period of three years from the date of the passage of this act.

SEC. 2. That for the purpose of carrying into effect the objects of this act the city of St. Louis may receive, purchase, and also acquire by lawful appropriation and condemnation in the States of Illinois and Missouri upon making proper compensation therefor, to be ascertained according to the laws of the State within which the same is located, real and personal property and rights of property, and in order to facilitate and support interstate commerce, may make any and every use of the same necessary and proper for the acquirement, construction, maintenance, and operation of said municipal bridge approaches, and extensions or additions thereto, consistent with the laws of the United States.

SEC. 3. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The SPEAKER. The question is on the third reading of the Senate bill.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. IGOE, a motion to reconsider the vote whereby the bill was passed was laid on the table.

HARRY GRAHAM.

The SPEAKER. The gentleman from Kentucky [Mr. FIELDS] is recognized.

Mr. FIELDS. Mr. Speaker, I move to suspend the rules and pass Senate bill 1418.

The SPEAKER. The gentleman from Kentucky moves to suspend the rules and pass the bill which the Clerk will report.

The Clerk read the title of the bill, as follows:

A bill (S. 1418) to authorize the President of the United States to appoint Harry Graham captain of Infantry.

Mr. STAFFORD. Mr. Speaker, will the gentleman yield?

Mr. FIELDS. Yes.

Mr. STAFFORD. I do not know, in my service, of a Member receiving recognition to suspend the rules on a private bill.

The SPEAKER. This is a kind of war matter, to get a soldier into the Army.

Mr. STAFFORD. I recognize that there is a power in the Speaker to entertain that motion. I have stated to gentlemen who have asked me about this bill to-day that I did not intend to make any objection to it. But I think, for the sake of consistency of practice, it is better to have the gentleman make a request for unanimous consent to have the bill considered, and not make a precedent of calling up private bills under suspension of the rules.

Mr. FIELDS. This does not break a precedent. I will do that.

Mr. STAFFORD. We have never suspended the rules to pass a private bill, so far as I know.

The SPEAKER. The gentleman from Kentucky [Mr. FIELDS] asks unanimous consent for the present consideration of the bill, which the Clerk will report.

The Clerk read as follows:

Be it enacted, etc., That the President of the United States, in his discretion, be, and he is hereby, authorized to appoint, by and with the advice and consent of the Senate, Harry Graham, formerly a captain of Infantry, a captain of Infantry, to take rank at the foot of the list of captains of Infantry; and that no back pay or allowances shall accrue as a result of the passage of this act, and there shall be no increase in the total number of captains of Infantry now authorized by law by reason of the passage of this act.

The SPEAKER. Is there objection?

Mr. GREEN of Iowa. Reserving the right to object, Mr. Speaker, I would like to have the gentleman explain the necessity of the bill.

Mr. FIELDS. Mr. Speaker, this man, who had served 18 years in the Army, went to the Army service school at Fort Leavenworth, Kans., for a year's training, from which he was to be graduated in the spring of 1916. He had passed all of a series of examinations except one prior to May 10, 1917. On that date the last examination was given.

The question upon which students were examined on that day was the sketching of a certain area of land. After they had turned in their sketches the academic board thought they had discovered evidences of cheating in some of the sketches turned in. Two of the students charged with cheating admitted their guilt. The only complaint against the sketch of this man was that two contours in his sketch, of 900 and 1,000 feet, respectively, bore indications of having been traced from an original map, or in some respects were so perfect that they looked as though they might have been traced, which was not authorized and which was a violation of the rules. When questioned as to whether or not he had traced the original map, Capt. Graham said that he had not. They then asked him if he would be willing to resketch the area and take his grade on his second sketch. He said, "Yes; if necessary." They then directed him to make a second sketch, and he did; and as to the grade on that, the officer under whose charge he made this sketch reported that it was worth about B, which was between 90 and 95 per cent, which showed the ability of the man, especially in view of the fact that the last sketch was made in less time than the first one and under unfavorable atmospheric conditions. It rained a part of the time while he was making the second sketch.

But the next morning the board told him that they would not graduate him, because they believed he had traced these two lines. He said: "I will not leave this school in disgrace. I am not guilty of the charge, and if you do not graduate me I will demand a court-martial." They refused to graduate him, and he did demand a court-martial. The court-martial found him guilty, not by any evidence, not by any man's knowledge of his guilt, but, apparently, because in the opinion of one officer of the school two lines in his sketch bore evidence of having been traced from the original map. But the testimony showed that the two lines in question did not coincide with the two original contours in their entirety. Now, it stands to reason that if I lay a paper down over a map and trace a line or two lines from the lines in the original map the traced lines will coincide with the lines in the original map in their entirety.

Yet the gentleman who made the complaint admitted on the witness stand, as shown by the testimony, that the lines in the sketch did not coincide with the lines in the original map in their entirety; but they found him guilty, and under the law the only sentence that could be imposed was dismissal from the Army.

He is a valuable officer. Up to the time that he went to this service school he had as good a record as a flier as had been made by any officer at that time. After his dismissal Gen. Squier recommended his appointment as a major in the Signal Corps to fill one of the 425 vacancies created by Congress some time last June, I believe, and recommended him in the highest terms, as will be shown by Gen. Squier's letter which is printed in the report on the bill. In view of all the facts which are set out in the report on the bill your committee was of the opinion that this man should be restored to the service. First the Senate committee held hearings, and that committee unanimously recommended the passage of the bill. It passed the Senate without opposition. It came to the House Military Committee, and the House committee made a thorough investigation, and that committee unanimously recommended the passage of the bill.

Mr. McKENZIE. Will my colleague yield?

Mr. FIELDS. I will.

Mr. McKENZIE. I wish my colleague would state to the Members of the House that there was no motive for this so-called tracing, because he would not have got any higher grade or any further promotion.

Mr. FIELDS. I was just coming to that point. It is fair to assume that back of any wrong there must be a motive. This man had no motive, could have had no motive, for cheating in this examination. In the other branches on which he had passed examination he had a general average of 83.9 per cent; 75 per cent was sufficient to graduate him. The grades in these examinations were posted on the school bulletin board every morning after they were made; therefore every student knew his grade and knew his relative class standing. This man, Capt. Graham, knew his grade. He knew where he stood in his class. If he had made 100 per cent in this last examination, it would not have promoted him above the student next above him in class standing. If he had made zero, it would not have put him below the student next below him. Therefore he had nothing to gain by cheating. It could not help him in his class standing. It would not help in his graduation, because he would be graduated anyhow. Therefore, Mr. Speaker, there was no motive, and the prosecution did not attempt to show any motive. It is just a case of this kind: That an Army officer said in his opinion a certain thing had happened, and because one of the faculty said it was his opinion the other fellows took it for granted that it was so.

Mr. GREEN of Iowa. Will the gentleman yield further?

Mr. FIELDS. I will.

Mr. GREEN of Iowa. Mr. Speaker, this seems to be a very peculiar case, and I would ask the gentleman if the findings of the court-martial against him were unanimous?

Mr. FIELDS. The findings of the court-martial were unanimous. The members of the court were all members of the school

faculty, and all but two of them recommended a lesser penalty than was inflicted; but as I understand under the law they could not give it to him.

Mr. GREEN of Iowa. As a general thing, I presume the gentleman would not recommend that we review the findings of a court-martial, because we are very apt to hear only one side? In these hearings that were had by the Senate committee, were the officers who sat on the court-martial given a hearing? Were they present at all?

Mr. FIELDS. I did not read the Senate hearings, except the Senate report, but I did read the record of the trial.

Mr. GREEN of Iowa. The gentleman does not know then that the other side of the case was represented by the parties who had made this finding?

Mr. FIELDS. I do not know that they were here in person. Of course, they had the records of the court.

Mr. SLAYDEN. Will the gentleman permit a question?

Mr. FIELDS. I yield to the gentleman.

Mr. SLAYDEN. Is it not true that certain responsible officials in the War Department have so far revised their opinion about the case of Capt. Graham as to recommend him for a commission in the Signal Corps?

Mr. FIELDS. It is true that he has been recommended, and he has on his uniform to-day; but it is only a temporary appointment. He talked with me and with the gentleman from Ohio [Mr. FESS] this afternoon and was in his uniform. He was recommended by Gen. Squier.

Mr. FESS. Under whom he served.

Mr. FIELDS. Yes. Under whom he served.

Mr. SLAYDEN. And he would not have been recommended unless he had a good character and was a man of ability.

Mr. LENROOT. Will the gentleman yield?

Mr. FIELDS. Yes.

Mr. LENROOT. The gentleman states that the court-martial that found Mr. Graham guilty had no evidence other than the map. Was Mr. Graham represented by counsel?

Mr. FIELDS. Yes.

Mr. LENROOT. Did he testify himself?

Mr. FIELDS. He did.

Mr. LENROOT. Was there any other testimony?

Mr. FIELDS. No other testimony except the testimony of this officer, who testified that in his opinion the map had been traced, and two other officers who looked at it and acquiesced in the opinion of the other officer who thought it had been traced.

Mr. LENROOT. Was this case reviewed by the Secretary of War?

Mr. FIELDS. I presume so.

Mr. LENROOT. Does not the gentleman know?

Mr. FIELDS. It was approved by the Secretary of War.

Mr. LENROOT. Does the Secretary of War recommend the passage of this bill?

Mr. FIELDS. We have had no report from the Secretary of War on the bill.

Mr. LENROOT. Has there been no report from the War Department on the bill?

Mr. FIELDS. There has not?

Mr. LENROOT. Is not that quite unusual?

Mr. FIELDS. The case was gone into thoroughly by the committee. We had the records of the court-martial, which the committee thought was sufficient.

Mr. LENROOT. Do I understand that the Committee on Military Affairs in an important matter of this kind will recommend a bill to this House without asking for a report, either from the War Department or without having any representatives of the War Department before the committee with reference to it?

Mr. FIELDS. That is what the committee did.

Mr. LENROOT. I am surprised.

Mr. SHALLENBERGER. Let me say that the Chief Signal Officer of the Army, who recommended this man, appeared before us by letter and requested that he be commissioned.

Mr. FIELDS. Yes; and I will say that the Chief Signal Officer, under whom this man served, recommended his appointment and said that he was morally fit for the position.

Mr. ROBBINS. Will the gentleman yield?

Mr. FIELDS. First, I will ask that the Clerk read the letter of Gen. Squier recommending the reappointment of this officer.

The Clerk read as follows:

NOVEMBER 20, 1917.

From: The Chief Signal Officer.
To: The Adjutant General.
Subject: Commission.

1. It is recommended that Harry Graham be given a temporary commission as major, Signal Corps, United States Army, under the provisions of the act approved July 24, 1917.

2. Mr. Graham is mentally, morally, and physically qualified to perform the duties of the office for which he is recommended. He is a citizen of the United States, born February 16, 1874, at Newark, Ohio, is 44 years of age, and his address is Hotel Ebbitt, Washington, D. C.

3. The services of Mr. Graham are required for immediate duty with troops, and to fill one of the 425 vacancies in the grade of major existing under the authority of letter of Chief of Staff, dated August 13, 1917. (File W. C. D. 9556-27, 321.9 Misc. Div.)

4. Mr. Graham was formerly an officer in the United States Army and was dismissed on account of sentence of general court-martial, which was published in General Orders, 12, War Department, series 1917.

GEORGE O. SQUIER,
Major General, Chief Signal Officer.

Mr. ROBBINS. Will the gentleman yield?

Mr. FIELDS. I will.

Mr. ROBBINS. I notice the recommendation which has been read refers to a temporary position, a commission in the Signal Corps. The bill proposes to give him a permanent position as a captain of Infantry. Why is that, if you rely on the recommendation of Gen. Squier, which is only for a temporary commission?

Mr. GREEN of Iowa. Will the gentleman yield?

Mr. FIELDS. Yes.

Mr. GREEN of Iowa. If this man had passed the examination, would he be entitled to the position provided for by this bill?

Mr. FERRIS. He would. He was a captain then. In fact, he has lost many marks by this dismissal. If it had not been for this the man would probably have been a major or a lieutenant colonel by now.

Mr. MILLER of Minnesota. Will the gentleman yield?

Mr. FIELDS. I will.

Mr. MILLER of Minnesota. In the judgment of Gen. Squier this man is worthy of occupying a position in the Army during this war. Is it too much to presume that he might fill the duties of that position in a time of peace?

Mr. FIELDS. Certainly not.

Mr. HUDDLESTON. Will the gentleman yield?

Mr. FIELDS. Yes.

Mr. HUDDLESTON. As I understand, he is now a captain in the Army?

Mr. SHALLENBERGER. He has a temporary position.

Mr. HUDDLESTON. This is to put him in the Regular Army, so that he will have a position for life.

Mr. FIELDS. To place him where he was before he was railroaded out of the service.

Mr. HUDDLESTON. The position he would have been in if he had remained in.

Mr. FIELDS. No; he was a captain and had served 18 years.

Mr. HUDDLESTON. I understood he was a cadet.

Mr. FIELDS. No; he was in the Spanish War. He was in the National Guard when the war broke out and afterwards, when the war was over he volunteered in the Regular Army, and by his own efforts he rose to a captaincy, and he was a captain at the time this charge was preferred against him.

Mr. HUDDLESTON. He was taking the examination at the officers' school?

Mr. FIELDS. Yes.

Mr. HUDDLESTON. Can the gentleman point out any difference between this and that of any other case of an officer cashiered under court-martial? A regular court-martial was held here, and very frequently they are held, and men are being constantly dismissed as officers of the Army. Are we to go back of these judgments of courts-martial and undertake to try these cases before committees of Congress and try to do justice here? If so, why shall we not go back of the courts-martial in the cases of private soldiers who are tried and executed? Are we to establish a precedent in Congress of reopening these courts-martial and trying the cases ex parte before committees?

Mr. FIELDS. Let me say to the gentleman that no man in this House or elsewhere will go further to uphold the hands of the Military Establishment in the proper discharge of its duties than I; but there are men in the Military Establishment as there are in civil life who fail to realize that with every right there goes a corresponding duty, and with each power there goes a corresponding responsibility. This does not occur often, I admit, but when it does occur the Congress of the United States can not afford to close its eyes to its own responsibility.

Mr. HUDDLESTON. Are there any precedents for this?

Mr. FIELDS. Wait until I finish my statement. If there ever was a time in the history of the country when the Army officers should realize that they are expected to measure up to their full responsibilties, it is now. We are calling the bloom of the manhood of the Nation under this draft, and if we are going to say that all military men are creatures of perfection, that they could not possibly make a mistake, and thereby issue to them a license to cashier men out of the Army arbitrarily,

we are doing an injustice to the men of the Nation upon whom we have imposed the draft, and I for one am unwilling to do it.

Mr. HUDDLESTON. Mr. Speaker, will the gentleman yield?

Mr. FIELDS. Yes.

Mr. HUDDLESTON. Has the Congress of the United States ever passed a special bill in such a case as this?

Mr. FIELDS. I think many of them.

Mr. HUDDLESTON. Will the gentleman state one.

Mr. FIELDS. I have not the precedents at hand.

Mr. SNYDER. Will the gentleman give me the date of the court-martial?

Mr. FIELDS. The 5th day of July, 1916, as I remember, and the order was carried into effect in January, 1917.

Mr. LENROOT. The Secretary of War has had it fully within his power to reinstate this man, has he not?

Mr. FIELDS. I suppose the Secretary of War could reinstate the man.

Mr. LENROOT. This House then is asked to do this, so far as I know, unprecedented action because the Secretary of War refuses to do justice to this man. Is that it?

Mr. FIELDS. It is the principle involved.

Mr. LENROOT. It is the same principle involved in the House that is involved with the Secretary of War.

Mr. FIELDS. And Congress can not shirk its responsibility. This case would not stand a minute in any civil court in the United States. Congress creates the Military Establishment. If the Military Establishment does not properly discharge its duties, it is the duty of Congress to see that it is done.

Mr. LENROOT. It is the position of the gentleman that the Secretary of War has not properly discharged his duty in this case?

Mr. FIELDS. I say this man should not have been dismissed from the Army, let the responsibility fall where it may.

Mr. MILLER of Minnesota. Mr. Speaker, will the gentleman yield?

Mr. FIELDS. Yes.

Mr. MILLER of Minnesota. I am not certain as to how these proceedings go, but my understanding is that the findings of a court-martial first go to the Judge Advocate General in Washington, and if he approves them that is practically all there is to it.

Mr. FIELDS. Certainly.

Mr. MILLER of Minnesota. And the Secretary is seldom, if ever, called upon to pass independently on the subject. I do not know whether this was passed on by the Secretary.

Mr. SNYDER. The gentleman stated that the Secretary did approve these findings.

Mr. FIELDS. They were approved officially, in a formal way.

Mr. SLOAN. Does the gentleman mean to state that the Secretary of War could reinstate this man, if he saw fit, under his power as Secretary of War?

Mr. FIELDS. He could have disapproved the findings.

Mr. SLOAN. But not now? He can not go back now and reinstate a man at this time?

Mr. FIELDS. No; I think not.

Mr. SLOAN. I am in full harmony with the proposition of the gentleman, and I think it is very important that this Congress exercise its privilege and power and right some of these wrongs. I know it is the practice to ask the Secretary of War to do these things, but he refuses to do it, and a number of injustices are done some of the best men of America right now. I have one in mind, because the Secretary of War would not do——

Mr. MILLER of Minnesota. Is this just the situation, that the Secretary, having approved the finding, might have done so in a perfectly pro forma manner without a knowledge of the facts?

Mr. FIELDS. We know it is impossible for him to look into all the details of the many, many cases of this character.

Mr. MILLER of Minnesota. And undoubtedly that was the case. But having done that, it is out of his jurisdiction, and he could not reinstate the man, and the President of the United States could not.

Mr. LENROOT. But the Secretary of War could have made a report to this Congress.

Mr. FIELDS. The report would have been that the man had been dismissed by order of a general court-martial, and we already had that fact before us and a record of the trial.

Mr. MILLER of Minnesota. The President himself can not do it. The only body on earth that can reinstate the man is the Congress of the United States.

Mr. KEARNS. Will the gentleman yield?

Mr. FIELDS. I will.

Mr. KEARNS. As I understand the statement, there was no evidence brought against this man at all?

Mr. FIELDS. There was absolutely no evidence against him, except the opinion of one man, and that opinion was acquiesced in by two other men.

Mr. KEARNS. And that was that the two maps looked so much alike that one might be a tracing. I understand he made two drawings.

Mr. FIELDS. No; there was an original map covering an area of about 2½ miles.

Mr. KEARNS. And they thought that had been copied?

Mr. FIELDS. They thought one line of 900 feet and the other of 1,000 feet had been copied.

Mr. KEARNS. And he made another drawing. Did the second correspond with the first drawing?

Mr. FIELDS. He was graded between 90 and 95 per cent on the second drawing.

Mr. GARRETT of Texas. Mr. Speaker, regular order.

Mr. FIELDS. I hope this bill may be passed.

The SPEAKER. Is there objection?

Mr. FESS. Will the House permit me for half a minute?

The SPEAKER. The regular order has been demanded.

Mr. FIELDS. Mr. Speaker, I ask unanimous consent that the gentleman from Ohio be permitted to proceed not to exceed five minutes.

Mr. FESS. I just want one minute.

Mr. FIELDS. Just one minute I will make it.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. FESS. Mr. Speaker, and Members of the House, I have gone over this very carefully, have avoided saying anything because the gentleman from Kentucky was making a full statement and an accurate one. The only evidence against Capt. Graham in this entire matter is that the map drawing was so well done that those who examined it, or the one who examined it, said that it could not have been done without having been traced. There was no other evidence. It was a case in which a professor did not believe a person under him sent out to do a piece of work could have done it so perfectly and at the same time fairly, and after he had made the recommendation those associated with him would not turn it down. Now, I can appreciate the situation of a man who has charge of any sort of work where he sends somebody to do a responsible piece of work that there is an ability that is found here. And I further state that not only in map drawing but in many other lines of life there is a sort of genius in which men or women will do work so perfect that those who can not do it so well say that it could not have been done fairly. I think that is really the situation here, and I do not think that this officer should be punished.

The SPEAKER. The time of the gentleman has expired. Is there objection? [After a pause.] The Chair hears none.

The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the President of the United States, in his discretion, be, and he is hereby, authorized to appoint, by and with the advice and consent of the Senate, Harry Graham, formerly a captain of Infantry, a captain of Infantry, to take rank at the foot of the list of captains of Infantry; and that no back pay or allowances shall accrue as a result of the passage of this act, and there shall be no increase in the total number of captains of Infantry now authorized by law by reason of the passage of this act.

Mr. LENROOT. Mr. Speaker, I only desire to take about two minutes on this proposition. I did not object to the unanimous consent for the consideration of this bill, although I realize there is grave danger of a very dangerous precedent being made in giving unanimous consent for the consideration of any bill to set aside the findings of a court-martial; but I only want to say that while I am on the floor of this House it must not be taken as a precedent for the giving of unanimous consent for the consideration of bills of this character where the Committee on Military Affairs has not referred the bill to the Secretary of War or has not given the Government an opportunity to appear before it and present its side of the case.

The SPEAKER. The question is on the third reading of the Senate bill.

The bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. FIELDS, a motion to reconsider the vote by which the bill was passed was laid on the table.

AN EDITORIAL BY MARTIN H. GLYNN.

Mr. FERRIS. Mr. Speaker, I want to ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. The gentleman from Oklahoma asks unanimous consent to extend his remarks in the RECORD. Is there objection? [After a pause.] The Chair hears none.

Mr. FERRIS extended his remarks by inserting the following:

IT BECOMETH AND BEHOOVETH MR. WADSWORTH, MR. LODGE, MR. CHAMBERLAIN, MR. ROOSEVELT, AND ALL THEIR PHONOGRAPHIC CULT TO CHIRP LIKE A CRICKET, NOT ROAR LIKE A LION.

[An editorial by former Gov. Martin H. Glynn, of New York, in the Times-Union, Albany, N. Y., Jan. 28, 1918.]

To-day the people of this country can be divided into two camps.

Those who wanted war at any price.

And those who hoped for peace, if peace could be maintained without the sacrifice of national honor.

Now we are at war, and we have the astonishing anomaly of the leaders of the "war buzzards" trying to gnaw the vitals out of our Commander in Chief, while the great majority of those who stood for peace while peace spelled honor are upholding the President's hands as Aaron and Hur upheld the hands of Moses in his battle with Amalek.

The present volcanic attack against the war policies of President Wilson is no haphazard incident. It is a well-laid plot, nicely trained and strategically timed. Its purpose, no matter how secretive its sponsors, how insinuating its methods, how seductive its arguments, is to give the Republican Party a majority in the next House of Representatives and to pave the way for a Republican President in 1920. From a political point of view this may be tolerable; from a patriotic aspect, in a national crisis like this, it is odious and detestable.

The business of the Nation to-day is to win the war, and the political leaders, who for party gain or personal aim lay the slightest obstacle in the way of the happy consummation of this business, clothe themselves in a diabolical livery and surround their political machinations with a brimstone scent, a sulphurous odor offensive to people who revere patriotism in politics but abhor politics in patriotism.

For months Col. Roosevelt has been injecting politics into the war through his articles in the Kansas City Star and Metropolitan Magazine. With craft and caution he has planted a bomb, intended to blow President Wilson out of political existence, and in this "Guy Fawkes" plot he has had the unctious assistance of Senator LODGE, of Massachusetts, and the crafty support of Senator WADSWORTH, of New York. But cunning and unctiousness can not win a contest like this. The mountain of truth is too big to be discolored by such daubing brushes, the facts too potent to be minimized by impish dissimulation or distorted by cunning castigation.

The Bible says he who draws the sword shall perish by the sword. Well, Roosevelt and his followers first drew the political sword in this dispute, and with their assumptive valor they should not cry for quarter before the blade of their own rapier.

For 16 years before the present Democratic administration the Republican Party was the custodian of the welfare of this Nation, and in all these 16 years it did but little to put this country on a basis of adequate preparation for war. Grover Cleveland started the American Navy on its way to imperial strength, but Theodore Roosevelt, as President of the United States, inaugurated a naval program that curtailed the Cleveland policy. Great as our Navy is to-day, it would be far greater still if the policy of Cleveland had prevailed and the plans of Roosevelt buried in the bottom of the sea. And as it was with the Navy, so was it with the Army, for Theodore Roosevelt left the Army of the United States weaker than he had found it seven years before.

No sooner, however, had Woodrow Wilson, with his panoramic view of the history of the world in peace time and in war time, his thorough knowledge of Democratic aspirations and economic possibilities, his sympathy with the masses and his consideration of the classes—no sooner had he become President of the United States than the wheels of progress were set in motion to equip this Nation as years before she should have been equipped for the solution of pressing national problems and the handling of contingencies of an international nature.

The rehearsal of all the legislation of President Wilson to carry out this progressive program would be superfluous here. The world knows it by heart. It insures him a splendid place in the annals of statesmanship. It is the unmistakable triumph of the democratic yearning with which the heart of mankind throbs and pulses to-day. And it carried Woodrow Wilson to wonderful victory in 1916 against an avalanche of money and a labyrinth of intrigue.

His Federal reserve bank law, which Mulhall, the famous English economist, said was of more worth to the world than the Panama Canal, saved this country, with the advent of the war, from the most stupendous panic in history and enabled us to ride the tumultous waters of "world-war" finance with hardly a squeak or a tremor of our old ship of state. Without this Federal reserve bank to-day the United States would be grinding and pounding on the rocks of disaster.

Nor is this all.

From a vision almost prophetic came the Federal revenue bill which wring a lordly portion of governmental revenue from internal taxes instead of from tariff imposts which under the baneful influence of war dwindled to a sum insufficient to provide lubrication for our gears of Government, let alone provide fuel for the Treasury boiler that makes the wheels of national life go round.

Our national experience since the war started must carry conviction to every fair-minded American that for these two measures alone we owe an ineffable debt of gratitude to the wisdom and statesmanship of Woodrow Wilson.

And of our military realm we have the self-same tale.

Theodore Roosevelt may indulge himself in all the weird juggling of language that pleases his fancy; he may insensate himself in such inspirational riot of emotional frenzy as may give fire to his tongue and flare to his imagination; but the fact remains undeniable, ineffaceable, irremovable, that in two years of ante bellum days Woodrow Wilson did more to put our Army and our Navy on a footing of war than both William Howard Taft and Theodore Roosevelt did in the whole 11 years of their supine reign.

During these two years preparedness for a possible war was pushed by President Wilson as fast as the sentiment of the country would permit and quite as fast as even the most violent of his present-day critics then deemed expedient or politic.

Suddenly, however, conditions created by the autocratic dogmatism of Germany disregarding treaties and throwing promises to the winds, hurled us into the seething whirlpool of war. Then the very men who had been at the helm of the ship of state for 16 years, the men whose policies had weakened the Army and stunted the Navy, began to howl because we could not equip a million men over night and put them in the trenches of France in a day. They forgot the experience of England; they forgot the experience of France; they forgot their own neglect of our martial strength; they forgot everything but their own personal advertisement and their own political advancement.

Mythology tells us that Minerva sprang full-armed from the mind of Jupiter, and despite the fact that the age for mythological miracles has passed, these acrimonious critics demanded that the United States whittle rifles out of the air and by some sort of prestidigitorial art transform a million civilians into full-trained soldiers between the sinking and the rising of the sun. What these critics had failed to do in 16 years, they insist that Woodrow Wilson should do in 16 days. The wind listeth in the night, the dew falls, the stars come out, the moon works her magic charm, and behold at dawn a full-grown mushroom whitens the lawn where at sunset only an embryonic stalk snuggled in the grass. This is the kind of marvel, this the kind of impossible legerdemain that Col. Roosevelt and his school demand should be duplicated in our military world. They demand that an invincible army be created overnight out of wind and dew, starlight and moonshine. But they fail to provide the Aladdin's lamp with which to work the miracle; they fail to furnish the necromantic art wherewith to ram into a night the task of a decade.

And this miracle, too, they demand in the teeth of the hoary-headed truth that from the days of Washington, Franklin, and Adams this Nation has set its face against a militaristic policy. A large Army, a potential Military Establishment, has been the ghost that has given this country sleepless nights for 140 years—a factitious whost, perhaps; but nevertheless a ghost hypnotic in its influence and awesome in its sway. And the Navy, too, has been hampered by a short-sighted sentiment of the great interior part of the country whose congressional Representatives persistently opposed large naval appropriations from fear of retrenchment against the "home-town" projects of their own native heaths. For this ingrained repugnance to a big army, an adequate navy, neither the Republicans of to-day or the Democrats of to-day are to blame. The fault lies at the door of the predominant sentiment of the Nation since 1776. And as we have sown; so to-day we reap.

Gen. Winfield Scott, one of the world's greatest soldiers, compressed an historic situation in a nutshell when he said, "Republics are never prepared for war."

The business of republics is peace; the business of autocracies is war.

Autocracy lives by the sword. The father and grandfather of Frederick the Great said so; Frederick himself said so; and so saith the Kaiser, and the Crown Prince, too.

A love and a craving for peace, however, form the very genesis of a republic. To this genesis republics are true; from this genesis republics depart only at the call of honor or the command of necessity.

Hence it is, though critics may forget, the people remember, that in eight months of war the United States, under the leadership of Woodrow Wilson, has done twice as much, and even more, than England and France did in the corresponding period of time. The accusations, the exaggerations, the fabrications, the distortions of supercilious censors and envious-fanged contemners of the Wilsonian policies wear such a flimsy gossamer covering as to expose this political plot in all its naked hideousness.

We make no claim that the administration has created sunbeams out of cucumbers or performed feats beyond the pale of human possibility, but we do maintain that its efforts have been amazing, its accomplishments beyond compare in the history of modern warfare.

We have not whipped the Kaiser yet, but we will whip him if calumniating critics do not dampen the fires of enthusiasm or grease the tracks whereon must ride our national chariots of war. We have more men in France to-day than Roosevelt knows or Germany suspects, and a million more are waiting for the ships.

We have an Army so well cared for that the death rate in our ranks for the four months ending January 1, 1918, averaged only 7.5 per thousand—a death rate, mind you, less than the death rate for men of a like age in peaceful avocations at home. Compare this with the death rate of 20.14 per thousand under the good old Republican rule of the days of the Spanish-American War. Compare these figures, and then applaud the Roosevelt charges, if you can!

True, we have made some mistakes, but in the magnitude of our undertaking some mistakes were inevitable, unavoidable. In balance though with the wondrous achievements these mistakes have been trivial and not worthy of the attention of the men who minimize their talents by trying to magnify molehills into mountains.

And furthermore, unlike the Spanish-American War, in which Mr. Roosevelt was a king-pin:

We have no Army contract scandals.

We have no embalmed-beef horrors.

We have no fat, old generals going to war in carriages and leading battle charges from easy rocking chairs.

We have no unpleasant gossip about the appointment of political generals and society admirals.

We have no round-robin letters from presumptious and inferior officers demoralizing discipline and exalting self.

In the face of these facts the wild rantings of Roosevelt and his fellow-political conspirators are boomerangs, pestilential to the ears and revolting to the sensibilities of others, but harmful only to the men who hurl them. On the estimation of thoughtful people these critics make no indelible impression. They may ruffle the surface of the pool of comment, but they stir not the depths of public opinion. And with Roosevelt, Lodge, and Wadsworth as the chief creators of this curtain of camouflage political fire, fed by the tissues of ambitious misrepresentation, fanned by the sinister winds of political oratory, there stalks forth from memory's closet the skeleton of Alger's embalmed beef with its concomitant stench; there looms into view the commander of the United States forces in Cuba, too fat to ride a horse, going into battle in a carriage, and lolloping in a portable bathtub while our soldiers had no medicines to conquer tropic ills; there looms into view this self-same commander of the United States forces in Cuba fighting his battles from the sensuous folds of a soporific hammock, while through the stupidity and carelessness of an inefficient military medical force our soldier boys found typhoid fever more deadly than bullets from the Spanish guns.

And so, in view of these verities which no political manipulation can snatch from history's page; in view of the official funereal-hued glories and the official scarlet-tinged scandals of the Spanish-American War; in view of Alger's embalmed beef of odoriferous memory; in view of inferior ships purchased by the Government at superior prices; in view of the stigma and disgrace that typhoid fever killed more of our soldiers than Spanish bullets sent to their graves; in view of the cable which Dewey cut to save the Navy from the malefic influence of Republican politics at Washington; in view of Army contracts which brought a blush to the cheek and rage to the heart of the Nation; in view of

the attempt to deprive Schley of his share of glory in the Santiago victory; in view of the papier-mâché generals created as a sort of "iron-cross" reward for services rendered the good old Republican Party on many a bloodless field of politics; in view, in fine, of the bathos and the pathos of flagrant Republican mismanagement in the Spanish-American War, it becometh and behooveth Mr. WADSWORTH, Mr. LODGE, Mr. CHAMBERLAIN, Mr. Roosevelt, and all their phonographic cult to chirp like a cricket, not roar like a lion.

MARTIN H. GLYNN.

Mr. BLANTON. Mr. Speaker, I renew my request to revise and extend my remarks.

The SPEAKER. The gentleman from Texas asks unanimous consent to revise and extend his remarks. Is there objection? [After a pause.] The Chair hears none.

Mr. WILSON. Mr. Speaker, I wish to make objection to that.

The SPEAKER. Is the gentleman objecting?

Mr. WILSON of Texas. Yes, sir.

The SPEAKER. The gentleman from Texas [Mr. WILSON] objects.

Mr. BLANTON. It is too late, Mr. Speaker.

The SPEAKER. No; it is not.

STATUE OF JAMES BUCHANAN.

Mr. LINTHICUM. Mr. Speaker, I move to suspend the rules and pass House joint resolution No. 70, authorizing the erection on public grounds in the city of Washington, D. C., of a statue of James Buchanan, a former President of the United States.

Mr. STAFFORD. Mr. Speaker, I make a point of order there is no quorum present.

The SPEAKER. The gentleman from Wisconsin makes the point of no quorum. Evidently there is none.

ADJOURNMENT.

Mr. FOSTER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 50 minutes p. m.) the House adjourned until to-morrow, Tuesday, February 5, 1918, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the president of the Washington Gas Light Co., transmitting detailed statement of the business of the Washington Gas Light Co., with a list of its stockholders, for the year ending December 31, 1917 (H. Doc. No. 899); to the Committee on the District of Columbia and ordered to be printed.

2. A letter from the Secretary of the Treasury, transmitting copy of a communication from the Secretary of War submitting a supplemental estimate of appropriation required for the support of an interallied institute for the restoration and reeducation of crippled soldiers (H. Doc. No. 900); to the Committee on Appropriations and ordered to be printed.

3. A letter from the Acting Secretary of the Treasury, transmitting copy of communication from the Attorney General submitting a supplemental estimate of appropriation required by the Department of Justice for the detection and prosecution of crimes, fiscal year 1918 (H. Doc. No. 903); to the Committee on Appropriations and ordered to be printed.

4. A letter from the Secretary of the Treasury, transmitting copy of communication of the Alien Property Custodian, submitting an estimate of appropriation to pay outstanding bills for supplies and equipment and to maintain his organization to carry out the provisions of the trading-with-the-enemy act during the remainder of the fiscal year 1918 (H. Doc. No. 904); to the Committee on Appropriations and ordered to be printed.

5. A letter from the Acting Secretary of the Treasury, transmitting copy of a communication submitting a supplemental estimate of appropriation required by the Postal Service for wrapping twine and tieing devices, office of Fourth Assistant Postmaster General, for the fiscal year 1918, payable from postal revenues (H. Doc. No. 905); to the Committee on Appropriations and ordered to be printed.

6. A letter from the Acting Secretary of the Treasury, transmitting copy of a communication from the Secretary of War submitting deficiency estimates of appropriation required by the War Department for reimbursement to certain disbursing officers of the Army for the fiscal year 1915 and for prior years (H. Doc. No. 906); to the Committee on Appropriations and ordered to be printed.

7. A letter from the Secretary of the Interior, transmitting copy of a letter from the Commissioner of the General Land Office transmitting report of the withdrawals and restorations contemplated by the statutes approved June 25, 1910 (H. Doc. No. 907); to the Committee on the Public Lands and ordered to be printed.

8. A letter from the Acting Secretary of the Treasury, transmitting copy of a communication from the Secretary of War submitting proposed clauses of legislation authorizing accounting officers of the Treasury to allow credits in the accounts of certain disbursing officers of the Army (H. Doc. No. 908); to the Committee on Claims and ordered to be printed.

9. A letter from the Secretary of the Treasury, transmitting copy of a communication from the Secretary of the Navy submitting supplemental estimate of appropriations required by the Navy Department for the fiscal year 1918 (H. Doc. No. 909); to the Committee on Appropriations and ordered to be printed.

10. A letter from the Secretary of the Treasury, transmitting estimate of an urgent deficiency appropriation required for the United States Public Health Service for the current fiscal year (H. Doc. No. 910); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. KEY of Ohio, from the Committee on Pensions, to which was referred the bill (H. R. 9506) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Amy and Navy and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors, reported the same without amendment, accompanied by a report (No. 282), which said bill and report were referred to the Private Calendar.

Mr. ALEXANDER, from the Committee on the Merchant Marine and Fisheries, to which was referred the bill (S. 3389) to authorize and empower the United States Shipping Board Emergency Fleet Corporation to purchase, lease, requisition, or otherwise acquire improved or unimproved land, houses, buildings, and for other purposes, reported the same with amendment, accompanied by a report (No. 283), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 7779) granting an increase of pension to William E. Kirkpatrick; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 7954) granting an increase of pension to Orville H. Mills; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. KITCHIN: A bill (H. R. 9499) to provide further for the national security and defense and, for the purpose of assisting in the prosecution of the war, to provide credits for industries and enterprises in the United States necessary or contributory to the prosecution of the war, and for other purposes; to the Committee on Ways and Means.

By Mr. ASWELL: A bill (H. R. 9500) to amend the act of Congress approved March 4, 1913 (37 Stats., p. 869), to increase the limit of cost for the enlargement, extension, remodeling, rebuilding, reconstruction, or improvement of the post office and courthouse at Alexandria, La.; to the Committee on Public Buildings and Grounds.

By Mr. EVANS: A bill (H. R. 9501) to provide funds for indigent farmers to purchase wheat for spring planting; to the Committee on Appropriations.

By Mr. HUDDLESTON: A bill (H. R. 9502) providing for an examination of the Tombigbee and Black Warrior Rivers with a view to further improving the same so as to afford a minimum navigable depth of 8 feet; to the Committee on Rivers and Harbors.

By Mr. HOWARD: A bill (H. R. 9503) to revise and amend the provisions of sections 3242, 3258, 3279, 3281, and 3450 of the Revised Statutes in so far as concerns the punishment imposed for the violation of said sections; to the Committee on the Judiciary.

By Mr. WEBB: A bill (H. R. 9504) to amend section 4067 of the Revised Statutes by extending its scope to include women; to the Committee on the Judiciary.

By Mr. FARR: A bill (H. R. 9505) for the relief of retired commissioned warrant officers detailed on active duty; to the Committee on Naval Affairs.

By Mr. KEY of Ohio: A bill (H. R. 9506) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors; committed to the Committee of the Whole House.

By Mr. CARY: A bill (H. R. 9507) for the erection of a public building at Milwaukee, Wis.; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 9508) to establish a fish hatchery and fish station in the fourth congressional district of Wisconsin; to the Committee on the Merchant Marine and Fisheries.

By Mr. HOUSTON: A bill (H. R. 9509) relating to marriage among the uncivilized native tribes of Alaska; to the Committee on the Territories.

By Mr. LEA of California: A bill (H. R. 9510) authorizing an adjustment of the boundaries of the California National Forest, in the State of California; to the Committee on the Public Lands.

By Mr. MILLER of Minnesota: Resolution (H. Res. 242) to require the Committee on Public Information to furnish information relative to work of propaganda; to the Committee on Foreign Affairs.

By Mr. SIMS: Joint resolution (H. J. Res. 235) granting to certain persons in active war service an extension of time within which applications for insurance may be made under section 401 of the act entitled "An act to authorize the establishment of a Bureau of War-Risk Insurance in the Treasury Department," approved September 2, 1914, as amended by the act approved October 6, 1917; to the Committee on Interstate and Foreign Commerce.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. AUSTIN: A bill (H. R. 9511) granting an increase of pension to John P. Newton; to the Committee on Pensions.

Also, a bill (H. R. 9512) granting an increase of pension to Malinda McClanahan; to the Committee on Pensions.

Also, a bill (H. R. 9513) granting an increase of pension to William H. Scott; to the Committee on Pensions.

By Mr. AYRES: A bill (H. R. 9514) granting an increase of pension to Francis M. Belt; to the Committee on Invalid Pensions.

By Mr. BLAND: A bill (H. R. 9515) granting a pension to James M. Vint; to the Committee on Pensions.

By Mr. BRUMBAUGH: A bill (H. R. 9516) granting an increase of pension to Moses Goldstein; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9517) granting a pension to Henry Blankenship; to the Committee on Pensions.

By Mr. CANTRILL: A bill (H. R. 9518) granting an increase of pension to Jackson Cornett; to the Committee on Pensions.

Also, a bill (H. R. 9519) granting a pension to George Bunch; to the Committee on Pensions.

By Mr. CLARK of Missouri: A bill (H. R. 9520) for the relief of George Killeen; to the Committee on Claims.

By Mr. DECKER: A bill (H. R. 9521) granting a pension to Elmer D. Hopper; to the Committee on Pensions.

Also, a bill (H. R. 9522) granting a pension to William J. Walker; to the Committee on Pensions.

Also, a bill (H. R. 9523) granting a pension to John E. Tingley; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9524) granting a pension to William Collins; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9525) granting an increase of pension to Elba A. Love; to the Committee on Pensions.

Also, a bill (H. R. 9526) granting an increase of pension to Henry J. Olmsted; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9527) granting an increase of pension to Daniel E. Alexander; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9528) granting an increase of pension to Lucius S. Hitchcock; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9529) granting an increase of pension to David Miller; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9530) for the relief of Thomas E. Coleman; to the Committee on Military Affairs.

By Mr. DILLON: A bill (H. R. 9531) Granting a pension to Arabella A. Dean; to the Committee on Invalid Pensions.

By Mr. FULLER of Illinois: A bill (H. R. 9532) granting an increase of pension to Lucius F. Renne; to the Committee on Invalid Pensions.

By Mr. FULLER of Massachusetts: A bill (H. R. 9533) granting a pension to Luella M. Peterson; to the Committee on Invalid Pensions.

By Mr. GALLIVAN: A bill (H. R. 9534) granting a pension to Edward P. Rae; to the Committee on Invalid Pensions.

By Mr. GODWIN of North Carolina: A bill (H. R. 9535) for the relief of Josie N. Styron; to the Committee on Claims.

By Mr. HAMLIN: A bill (H. R. 9536) granting an increase of pension to Mary F. Kenaday; to the Committee on Pensions.

Also, a bill (H. R. 9537) granting a pension to Sarah Haggord; to the Committee on Invalid Pensions.

By Mr. HELVERING: A bill (H. R. 9538) for the relief of William H. Dooley; to the Committee on Military Affairs.

By Mr. HOWARD: A bill (H. R. 9539) granting a pension to John F. Brannam; to the Committee on Pensions.

Also, a bill (H. R. 9540) granting a pension to John A. Ford, alias John Adams; to the Committee on Pensions.

By Mr. HUDDLESTON: A bill (H. R. 9541) to correct the military record of George Openshaw; to the Committee on Military Affairs.

By Mr. KIESS of Pennsylvania: A bill (H. R. 9542) granting a pension to Uriah Adams; to the Committee on Invalid Pensions.

By Mr. LANGLEY: A bill (H. R. 9543) granting an increase of pension to William H. Nesbitt; to the Committee on Invalid Pensions.

By Mr. LITTLEPAGE: A bill (H. R. 9544) granting an increase of pension to Nancy Ollis; to the Committee on Invalid Pensions.

By Mr. McARTHUR: A bill (H. R. 9545) granting a pension to Lou Patriquin; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9546) granting a pension to Robert H. Sheaffer; to the Committee on Pensions.

By Mr. MERRITT: A bill (H. R. 9547) granting a pension to Adaline A. Perry; to the Committee on Invalid Pensions.

By Mr. ROBBINS: A bill (H. R. 9548) granting an increase of pension to Nicholas Long; to the Committee on Invalid Pensions.

By Mr. RUBEY: A bill (H. R. 9549) granting a pension to Nancy J. Jones; to the Committee on Invalid Pensions.

By Mr. RUSSELL: A bill (H. R. 9550) granting an increase of pension to Joseph Brewer; to the Committee on Invalid Pensions.

By Mr. SHOUSE: A bill (H. R. 9551) granting an increase of pension to Elisha Driscol; to the Committee on Invalid Pensions.

By Mr. SINNOTT: A bill (H. R. 9552) granting a pension to Edyth C. Dideon, widow of Otto E. Dideon; to the Committee on Invalid Pensions.

By Mr. SLEMP: A bill (H. R. 9553) granting a pension to Hiram P. Sloan; to the Committee on Pensions.

By Mr. STEPHENS of Nebraska: A bill (H. R. 9554) granting an increase of pension to Squire Grissom; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9555) granting a pension to Jennie V. Leap; to the Committee on Invalid Pensions.

By Mr. STERLING of Illinois: A bill (H. R. 9556) granting a pension to Alexander Kightlinger; to the Committee on Invalid Pensions.

By Mr. TINKHAM: A bill (H. R. 9557) for the relief of the trustees and parties who are now or who may hereafter become interested in the estate of James A. Chamberlain under the terms of his will; to the Committee on Claims.

By Mr. VAN DYKE: A bill (H. R. 9558) granting an increase of pension to Thomas Horan; to the Committee on Pensions.

By Mr. WHITE of Maine: A bill (H. R. 9559) granting an increase of pension to Charles R. Mansfield; to the Committee on Invalid Pensions.

By Mr. WILLIAMS: A bill (H. R. 9560) granting an increase of pension to Edward A. Bentz; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9561) granting a pension to Joseph K. Bellemey; to the Committee on Pensions.

By Mr. WILSON of Illinois: A bill (H. R. 9562) granting a pension to Frank Jankowski; to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Declaration of loyalty by the National Coffee Roasters' Association; to the Committee on the Judiciary.

Also (by request), a resolution of the New York Bureau of Legal First Aid, asking for investigations of recent constitutional violations, mob violence, oppressive censorship, and into the working of the draft law, especially in New York; to the Committee on the Judiciary.

Also (by request), a resolution of the American Liberty Defense League, demanding investigations of recent constitutional violations, mob violence, oppressive censorship, and into the working of the draft law, especially in New York; to the Committee on the Judiciary.

Also (by request), a resolution of the New York State Bar Association, objecting to the prohibition amendment in its present form; to the Committee on the Judiciary.

Also (by request), resolution of the National Association of Bedding Manufacturers, urging that price regulation be extended to cotton; to the Committee on Agriculture.

Also (by request), resolution of the Federation of Lithuanians of Chicago, asking that the political independence of Lithuania be recognized; to the Committee on Foreign Affairs.

Also (by request), resolution of security holders of the Boston & Maine Railroad, relative to effect of Federal control upon their interests; to the Committee on Interstate and Foreign Commerce.

Also (by request), memorial of the American Medical Association, praying for the repeal of section 209, war-revenue act; to the Committee on Ways and Means.

Also (by request), petition of H. A. Clarke, Washington, D. C., demanding suffrage "as a whole" for the District of Columbia; to the Committee on the District of Columbia.

By Mr. BLAND: Evidence in the case of James M. Vint, special pension bill; to the Committee on Pensions.

By Mr. CARY: Resolution of the Association of Lithuanian Patriots of America, commending the President's war-aims message, and asking for the freedom and independence of Lithuania; to the Committee on Foreign Affairs.

Also, resolutions of the Indiana Republican Editorial Association, favoring a war cabinet, director of munitions, opposing Government ownership of utilities, and favoring legislation to end profiteering; to the Committee on Military Affairs.

Also, resolution of the security holders of the Boston & Maine Railroad, relative to the effect of Federal control; to the Committee on Interstate and Foreign Commerce.

By Mr. CLARK of Pennsylvania: Petition of M. E. Peck, A. B. Stevens, and H. W. Church, praying for the passage of House bill 7995, for the preservation of the *Niagara*, Commodore Perry's flagship in the Battle of Lake Erie; to the Committee on Naval Affairs.

By Mr. CURRY: Petition of six rural carriers of the third California district, asking for an increase in salary and giving reasons therefor; to the Committee on the Post Office and Post Roads.

By Mr. DALE of New York: Resolution adopted at a mass meeting at the New Star Casino, New York City, favoring the Rankin resolution to acknowledge political independence of Ireland; to the Committee on Foreign Affairs.

Also, petition of Borden's Condensed Milk Co., favoring the daylight-saving plan; also resolutions, adopted at a meeting of the security holders of the Boston & Maine Railroad, relative to effect of Federal control upon interests of security holders in that railroad; to the Committee on Interstate and Foreign Commerce.

Also, petition of Burton F. White, chairman of coal committee, Hotel Association of New York City, urging legislation providing for a survey of the disused canals from the anthracite region of Pennsylvania to tidewater, with a view to use in getting coal to New York, Boston, and other industrial centers; to the Committee on Rivers and Harbors.

By Mr. DENISON: Petition of the following-named citizens urging repeal of zone rate system: A. J. Doughty, Thompsonville; Charles Gogue, Pittsburg; Ben Grant, Pittsburg; Luther Morefield, route No. 1, Pittsburg; Charles Wright, Thompsonville, route No. 1; C. H. Burr, R. F. D., Thompsonville; A. Jochim, route No. 1, Pittsburg; Roy Doughty, R. F. D., Thompsonville; S. A. Doughty, R. F. D., Thompsonville; W. H. Holland, R. F. D., Thompsonville; J. E. Fireash, R. F. D., Thompsonville; D. H. Blue, route No. 1, Thompsonville; J. Davis, route No. 1, Pittsburg; E. B. Doughty, Thompsonville; Raymond O. Smith, R. F. D., Carrier Mills; Walter Malone, R. F. D., Thompsonville; and Dallie Malone, R. F. D., Thompsonville, all in the State of Illinois; to the Committee on the Post Office and Post Roads.

By Mr. FULLER of Massachusetts: Petition of Luella M. Peterson, to have her name restored to the pension roll; to the Committee on Invalid Pensions.

By Mr. HAMLIN: Papers to accompany H. R. 8585, granting a pension to Eugene V. Wayne; to the Committee on Pensions.

By Mr. HILLIARD: Petition of Nathan Wallace, of Denver, Colo., urging the adoption of legislation creating a corps of podiatrists in the Army; to the Committee on Military Affairs.

Also, memorial adopted by Great Council of Colorado, Improved Order of Red Men, pledging their support to the Government and urging the formation of a league of nations to enforce peace at the conclusion of the present war; to the Committee on Foreign Affairs.

Also, papers to accompany H. R. 8319, granting a pension to Arthur F. Sewell; to the Committee on Pensions.

By Mr. KIESS of Pennsylvania: Petition of citizens of the fifteenth Pennsylvania district, favoring universal military training; to the Committee on Military Affairs.

By Mr. LEA of California: Resolution unanimously adopted by a county convention of representatives of various churches, unions, and leagues of Humboldt County, favoring war prohibition; to the Committee on the Judiciary.

By Mr. LINTHICUM: Memorial of the Marine Engineers' Beneficial Association, No. 5, asking support for House bill 7913; to the Committee on Rivers and Harbors.

By Mr. LONGWORTH: Petition of many residents of Cincinnati, Ohio, and vicinity, for the establishment of a pharmaceutical corps in the United States Army; to the Committee on Military Affairs.

By Mr. MOORE of Pennsylvania: Petition of the City Council of Erie, Pa., and of members of the Pennsylvania Soldiers and Sailors' Home, Erie, Pa., for the preservation, etc., of the restored naval brig *Niagara;* to the Committee on Naval Affairs.

By Mr. RAINEY: Petition of J. E. Thompson and other citizens of Manchester County, Ill., favoring a Federal tax on dogs; to the Committee on Ways and Means.

Also, loyalty declaration of the National Coffee Roasters' Association; to the Committee on the Judiciary.

By Mr. ROGERS: Evidence to accompany House bill 9489, for pension to George F. Cook; to the Committee on Invalid Pensions.

By Mr. SHERWOOD: Memorial of Toledo Printing Pressmen's Union, No. 55, Toledo, Ohio, urging that war profits be taxed to pay laborers for enforced idleness under the fuel order, and protesting against the Chamberlain compulsory training law; also a resolution of the International Association of Machinists, Lodge No. 105, Toledo, Ohio, protesting against any form of compulsory or universal military training; to the Committee on Military Affairs.

By Mr. VARE: Memorial of Civic Club, of Philadelphia, on pending postal legislation; to the Committee on the Post Office and Post Roads.

SENATE.

TUESDAY, *February 5, 1918.*

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, we know that beneath the flow of our human thought and purpose and desire runs the current of Thine own unchanging law, and Thy law makes for righteousness. We seek to bring our policies and ideals into conformity with Thy revealed will, and we can only accomplish this through Thy presence and inspiration. So at the beginning of another day's session of this Senate we turn our hearts to Thee and ask for inspiration and guidance in the work of the day. For Christ's sake. Amen.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. THOMAS and by unanimous consent, the further reading was dispensed with and the Journal was approved.

WITHDRAWAL OF PUBLIC LANDS (H. DOC. NO. 907).

The VICE PRESIDENT laid before the Senate a communication from the Secretary of the Interior, transmitting, pursuant to law, a report from the Commissioner of the General Land Office relative to withdrawal and restoration of public lands, which, with the accompanying paper, was referred to the Committee on Public Lands and ordered to be printed.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by G. F. Turner, one of its clerks, announced that the House had passed the following bills:

S. 1418. An act to authorize the President of the United States to appoint Harry Graham captain of Infantry;

S. 3006. An act to authorize and empower officers and enlisted men of the Navy and Marine Corps to serve under the Government of the Dominican Republic, and for other purposes; and

S. 3081. An act to extend the time for the completion of the municipal bridge approaches, and extensions or additions thereto, by the city of St. Louis, within the States of Illinois and Missouri.

The message also announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H. R. 3132. An act to amend section 2171 of the Revised Statutes of the United States relating to naturalization; and

H. R. 5558. An act to amend section 101 of the Judicial Code.

WAR POWERS OF THE PRESIDENT.

Mr. THOMAS. Mr. President, apropos of the debate yesterday concerning the war powers of the President and the constitutionality of the bill proposing the establishment of a war council, I desire to read into the RECORD a short extract from the address delivered by Hon. Charles E. Hughes before the American Bar Association on September 5 last. Referring to this identical subject on that occasion, Mr. Hughes said:

> The war powers under the Constitution are carefully distributed. To Congress is given the power "to declare war." The proposal to add "to make peace" found no favor, as this was deemed to belong to the treaty-making power vested in the President and Senate. To the President was given the direction of war as the Commander in Chief of the Army and the Navy. It was not in the contemplation of the Constitution that the command of forces and the conduct of campaigns should be in charge of a council or that as to this there should be a division of authority and responsibility. The prosecution of war demands in the highest degree the promptness, directness, and unity of action in military operations which alone can proceed from the Executive. This exclusive power to command the Army and the Navy and thus to direct and control campaigns exhibits not autocracy but democracy fighting effectively through its chosen instruments and in accordance with the established organic law.

PETITIONS AND MEMORIALS.

Mr. MYERS. I present resolutions in the nature of a petition in favor of certain legislation, which I ask may be printed in the RECORD.

There being no objection, the resolutions were ordered to be printed in the RECORD, as follows:

Resolutions of Farmers' Convention of Montana in support of Senate bill 3439.

Whereas it has been called to the attention of the delegation members of the Farmers' Convention of the State of Montana, duly assembled at Bozeman, Mont., that Senator MYERS did, on the 9th day of January, introduce in the Senate of the United States a certain bill known as Senate bill 3439, known as a bill for the relief of certain homestead and desert-land entrymen; and

Whereas such legislation is of vital importance to the farmers of this State, in that it provides that any valid homesteader who has made entry for not more than 320 acres of public land, including entrymen on ceded Indian land, may at any time after the passage of such legislation, within 90 days after the date of such passage, file in the local land office the required notice of intention to make final proof and thereupon be accorded to the right to make such proof and secure patent for the land so entered, provided that such entryman has resided upon his entry for a period of at least seven months; and

Whereas it is the belief of this assembly that such special legislation as is proposed by Senator MYERS's bill will be of great aid to a struggling homesteader, and will assist the farmers of this State in increasing their crops, thereby materially assisting our country in its world struggle for democracy: Now, therefore, be it

Resolved, That this convention, duly assembled, go on record as approving the bill introduced by Senator MYERS and heartily indorse and approve the interest shown by Lieut. Gov. McDowell in his efforts on behalf of the farmers and homesteaders of this State and Nation in attempting to secure the passage of such needed legislation as Senate bill 3439; and be it further

Resolved, That a copy of this resolution be spread upon the minutes of our meeting, a copy forwarded to Secretary Lane, of Washington; a copy sent to Senator MYERS and Senator WALSH at Washington, D. C.; and that the press of Montana be asked to lend all aid possible in securing the passage of Senator MYERS's bill for the relief of homesteaders.

Dated this 25th day of January, 1918.

FARMERS' CONVENTION,
By W. L. BEERS, *Chairman*.
C. E. POTTER, *Secretary*.

Mr. GRONNA. I have here two telegrams from a trainmen's organization in my State, one from Dickinson and the other from Grand Forks. They are very brief, and I ask that they be printed in the RECORD.

Mr. SMITH of Arizona. Are those private telegrams?

Mr. GRONNA. No, sir; they are not private telegrams. They are from a railroad organization.

There being no objection, the telegrams were ordered to be printed in the RECORD, as follows:

DICKINSON, N. DAK., *February 3, 1918.*

Senator A. J. GRONNA,
Washington, D. C.:

Trainmen oppose any Federal employees' compensation act. Request you to use your influence to defeat such and support any employers' liability act.

F. L. FLANAGAN,
Secretary B. R. T. No. 779.

GRAND FORKS, N. DAK., *February 4, 1918.*

A. J. GRONNA,
Washington, D. C.:

We urge your cooperation in defeating section 9 of bills H. R. 8172 and S. 3385, now pending, or any form of workmen's compensation law which may be introduced in Congress, and will appreciate your support in helping strengthen the present employers' liability law.

L. F. ELY,
President B. of R. T. No. 463.

Mr. GRONNA. I present resolutions adopted by the Woman's Club of Mayville, N. Dak., favoring the repeal of the law increasing the rates on second-class mail matter. I move that the resolutions be referred to the Committee on Post Offices and Post Roads.

The motion was agreed to.

Mr. SHERMAN. I present a petition on woman suffrage from citizens of Normal, Ill., which I ask may be referred to the Committee on Woman Suffrage. It is one of very many that I have received. I do not present the others, but I submit this as a fair sample of those I have received.

The VICE PRESIDENT. The petition will be referred to the Committee on Woman Suffrage.

Mr. JONES of Washington. I have a telegram from D. C. Imrie, president of Federal Employees' Union No. 9, of Tacoma, Wash., protesting against the eight-hour rider to the Agricultural appropriation bill. I move that it be referred to the Committee on Agriculture and Forestry.

The motion was agreed to.

Mr. JONES of Washington. I also present a telegram from W. W. Wolcott, of Seattle, Wash., general chairman of the Milwaukee Railroad, representing the Brotherhood of Railroad Trainmen, opposing any proposed workmen's compensation law, but urging that the employers' liability act be strengthened. I move that it be referred to the Committee on Interstate Commerce.

The motion was agreed to.

Mr. SMITH of Arizona. I take this occasion to congratulate the Senator in sending these matters to the committee without having them printed in the RECORD. We are very short of paper now and are paying a good price for it, and anything that burdens the RECORD except what occurs on the floor the Committee on Printing is very anxious to suppress.

The VICE PRESIDENT. The Chair takes occasion to say, though the opinion of the Chair may not amount to anything, that if the rules of the Senate were changed and we returned to the ancient method of presenting petitions to the Senate of the United States we would accomplish the purpose in the mind of every Senator.

Mr. SMITH of Arizona. There is a rule on the subject.

Mr. JOHNSON of South Dakota. I have received a telegram from the Southern Clark County Branch of the American Defense Society, of South Dakota, which I ask to have printed in the RECORD.

There being no objection, the telegram was ordered to be printed in the RECORD, as follows:

WILLOW LAKE, S. DAK., *February 2, 1918.*

Senator EDWIN S. JOHNSON,
Senate Chamber, Washington, D. C.:

The Southern Clark County Branch of the American Defense Society passed a resolution especially urging you to support the bill for a war cabinet as a wise and patriotic measure.

W. J. BENNER, *Secretary.*

Mr. JONES of New Mexico. I present resolutions adopted at a meeting of the Democrats and citizens of the city of Roswell, N. Mex., in mass meeting assembled, expressing hearty approval of and indorsing the administration of President Wilson. I ask that the resolutions be printed in the RECORD.

There being no objection, the resolutions were ordered to be printed in the RECORD, as follows:

ROSWELL, N. MEX., *January 23, 1918.*

We, the Democrats and citizens of the city of Roswell, N. Mex., in mass meeting assembled, adopt the following resolutions:

Resolved, That speaking for ourselves more as American citizens than as Democrats, and speaking by these resolutions, as we believe, the almost unanimous voice of the people of eastern New Mexico, we commend with whole-hearted approval and indorsement the administration of Woodrow Wilson, who blends in his splendid manhood and unequal statesmanship the great qualities of Washington and Lincoln, and particularly do we commend and indorse, as above words of praise, his war administration in the midst of difficulties that would have appalled a less gifted leader.

Resolved, That we also commend with heartiest approval and indorsement the administration of the war office by Secretary Baker, and pledge to him and to the President our continued and patriotic support and devotion.

Resolved, That particularly we denounce the Chamberlain bill to create a war cabinet as a Pandora's box of infinite and endless evils, and if insisted upon as certain to bring about great public excitement, division, and confusion.

Resolved, That our Senators and Representative in Congress are hereby instructed to hold up the hands of the constituted head of the Nation and his advisers in this great life-and-death struggle for demo-

cratic free government, and to vote against and do all in their power to defeat the bill to establish a war council and virtually supersede the President in the conduct of the war.

Resolved, That copies of these resolutions be sent by the secretary of this meeting, duly signed by the chairman and attested by the secretary, one to each the President, the Secretary of War, our Senators and Representative in Congress, and that the Hon. A. A. JONES and Hon. WILLIAM B. WALTON be, and they are hereby, requested to lay these resolutions respectively before the United States Senate and United States House of Representatives.

JOHN T. MCCLURE, *Chairman*.
H. A. POORBAUGH, *Secretary*.

Mr. HALE. I present resolutions adopted by the Chamber of Commerce of Portland, Me., which I ask to have printed in the RECORD.

There being no objection, the resolutions were ordered to be printed in the RECORD, as follows:

Resolutions.

Whereas the repeated and apparently increasing number of attempts to destroy property in various sections of the United States, accompanied in many instances by loss of life, warrants the most drastic treatment of those found guilty of such actions, whether successful or unsuccessful: Be it

Resolved by the Chamber of Commerce of Portland, Me., That we urgently invoke the United States Government and the Department of Justice thereof to bend every effort to investigate the causes of these outrages, and, wherever the same can be traced to the action of alien enemies or of citizens aiding and abetting such alien enemies, that the extreme penalty provided by law for actions of treason be rigidly enforced, to the end that law and order may prevail in this country and thereby facilitate the expeditious and successful prosecution of this war; and be it further

Resolved, That a copy of these resolutions be transmitted to the governor of Maine, our Representatives in Congress, the Department of Justice, and the Chamber of Commerce of the United States, with a request that similar action be taken.

This is to certify that the above is a true copy of the resolution unanimously adopted by the board of managers of the Chamber of Commerce of Portland, Me., in session Tuesday, January 22, 1918.

Attest: W. B. MOODY,
Executive Secretary.

Mr. WADSWORTH presented resolutions adopted by the State Board of the Christian Woman's Board of Missions, of New York; of the West Side Woman's Christian Temperance Union, of Buffalo, N. Y.; and of sundry citizens of West Barre, N. Y., favoring national prohibition, which were ordered to lie on the table.

He also presented a petition of Beacon Hill Grange No. 828, Patrons of Husbandry, of Saratoga County, N. Y., praying for the continuation of the present system of rural free delivery and also for an increase in the salaries of rural letter carriers, which was referred to the Committee on Post Offices and Post Roads.

He also presented petitions of sundry citizens of the State of New York, praying for the adoption of an amendment to the Constitution to prohibit polygamy, which were referred to the Committee on the Judiciary.

He also presented a petition of the Home Defense Company, of Elmira, N. Y., praying for the repair, preservation, care, and future maintenance of the brig *Niagara*, which was referred to the Committee on Naval Affairs.

Mr. MCLEAN presented a petition of sundry citizens of New Haven, Conn., praying for the emancipation and self-government of Lithuania, etc., which was referred to the Committee on Foreign Relations.

He also presented a petition from the Past Exalted Rulers' Association, Benevolent Protective Order of Elks, of Connecticut, praying for the establishment of a league of nations to safeguard an enduring peace, etc., which was referred to the Committee on Foreign Relations.

He also presented a petition of sundry citizens of Hebron and Columbia, in the State of Connecticut, praying for the submission of a Federal suffrage amendment to the legislatures of the several States, which was ordered to lie on the table.

INCOME-TAX PRIMER.

Mr. SMITH of Arizona. From the Committee on Printing I report back, with amendments, House concurrent resolution 33, providing for the publication of what is known as the Income-Tax Primer. The committee has amended the resolution as to the number to be printed, and I ask unanimous consent for its present consideration.

The Senate, by unanimous consent, proceeded to consider the concurrent resolution.

The amendments were, before the word "thousand" in line 3 to strike out "five hundred" and insert "three hundred and fifty"; before the word "thousand" in line 5 to strike out the words "and fifty"; and before the word "hundred" in line 6 to strike out "three" and insert "two," so as to make the concurrent resolution read:

Resolved by the House of Representatives (the Senate concurring), That there shall be printed 350,000 extra copies of the Income-Tax Primer, prepared by the Bureau of Internal Revenue for the information and assistance of taxpayers, 100,000 copies for the use of the Senate, 250,000 copies for the use of the House of Representatives, the same to be distributed through the folding rooms.

The amendments were agreed to.

The concurrent resolution as amended was agreed to.

AMERICAN INSTRUCTORS OF THE DEAF (H. DOC. NO. 172).

Mr. SMITH of Arizona, from the Committee on Printing, to whom the subject was referred, reported the following resolution (S. Res. 199), which was considered by unanimous consent and agreed to:

Resolved, That the proceedings of the twenty-first meeting of the Convention of American Instructors of the Deaf, held at Hartford, Conn., June 29 to July 4, 1917, transmitted to the Senate as provided for in an act approved January 26, 1897, be printed as a Senate Document, with illustrations, and that 500 additional copies be printed and bound for the use of said convention.

CRIPPLED SOLDIERS AND SAILORS (H. DOC. NO. 173).

Mr. SMOOT. Mr. President, the Surgeon General, complying with the order of the Secretary of War, transmitted, in response to a Senate resolution of January 31, 1918, information upon the rehabilitation and vocational reeducation of crippled soldiers and sailors. Included in it are three illustrations, and in order that the Public Printer may print them, there must be an order of the Senate. I ask that the illustrations may be printed to accompany the document.

The VICE PRESIDENT. Without objection, it is so ordered.

The order was reduced to writing, as follows:

Ordered, That the illustrations accompanying the letter of the Secretary of War, transmitting a report of the Surgeon General upon the rehabilitation and vocational reeducation of crippled soldiers and sailors, be printed to accompany the said document.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. HOLLIS:

A bill (S. 3730) to amend the war-revenue act in relation to taxation of legacies and inheritances, and for other purposes; to the Committee on Finance.

By Mr. CULBERSON:

A bill (S. 3731) to amend section 4067 of the Revised Statutes by extending its scope to include women; to the Committee on the Judiciary.

By Mr. MCKELLAR:

A bill (S. 3732) to authorize the reinstatement of honorably discharged soldiers and sailors to former positions in Government service and restoration to eligible register of the names of honorably discharged soldiers and sailors; to the Committee on Military Affairs.

By Mr. JONES of Washington:

A bill (S. 3733) granting an increase of pension to James H. Allen (with accompanying papers); and

A bill (S. 3734) granting an increase of pension to Edwin Doan; to the Committee on Pensions.

By Mr. CHAMBERLAIN:

A bill (S. 3735) to provide for enlistments in the National Guard of the District of Columbia, and for other purposes; and

A bill (S. 3736) to provide for the payment of six months' pay to the widow, children, or other designated dependent relative of any officer or enlisted man of the Regular Army whose death results from wounds or disease not the result of his own misconduct; to the Committee on Military Affairs.

By Mr. WEEKS:

A bill (S. 3737) granting a pension to John H. Amrock; to the Committee on Pensions.

By Mr. PENROSE:

Abill (S. 3738) for the relief of Rose McIlwain; to the Committee on Claims.

A bill (S. 3739) for the relief of Jacob Metzinger (with accompanying papers); to the Committee on Military Affairs.

A bill (S. 3740) granting an increase of pension to Theodore L. Aney;

A bill (S. 3741) granting an increase of pension to James M. P. Brookens;

A bill (S. 3742) granting a pension to Alice M. Waters;

A bill (S. 3743) granting a pension to Charles V. Harris;

A bill (S. 3744) granting an increase of pension to Harry V. Hafner;

A bill (S. 3745) granting an increase of pension to Thomas H. Birnley; and

A bill (S. 3746) granting a pension to Bradford S. Donahugh; to the Committee on Pensions.

By Mr. THOMPSON:

A bill (S. 3747) granting an increase of pension to Evan T. Jay (with accompanying papers); to the Committee on Pensions.

By Mr. OWEN:

A bill (S. 3748) fixing the grades of the commissioned officers of the Medical Corps and of the Medical Reserve Corps of the United States Army, on active duty, and for other purposes; to the Committee on Military Affairs.

By Mr. TILLMAN:

A bill (S. 3749) to reorganize the Dental Corps of the Navy, and for other purposes; to the Committee on Naval Affairs.

By Mr. HALE:

A bill (S. 3750) granting a pension to Samuel Bond (with accompanying papers); and

A bill (S. 3751) granting an increase of pension to Cyrus Wood (with accompanying papers); to the Committee on Pensions.

By Mr. SMITH of South Carolina:

A bill (S. 3752) to provide for the operation of transportation systems while under Federal control, for the just compensation of their owners, and for other purposes; to the Committee on Interstate Commerce.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. JONES of Washington submitted an amendment proposing to appropriate $46,750.27 to pay to the county of Ferry, State of Washington, that part of the local taxation for which the lands allotted to the Colville Indians in that county are equitably responsible, during the period they were held in trust from 1900 to 1914, inclusive, intended to be proposed by him to the Indian appropriation bill, which was referred to the Committee on Indian Affairs and ordered to be printed.

He also submitted an amendment proposing to appropriate $22,761.11 to pay to the county of Stevens, State of Washington, that part of the local taxation for which the lands allotted to the Colville Indians in that county are equitably responsible, during the period they were held in trust from 1900 to 1914, inclusive, intended to be proposed by him to the Indian appropriation bill, which was referred to the Committee on Indian Affairs and ordered to be printed.

Mr. POMERENE submitted an amendment proposing that the Postmaster General shall have authority to investigate conditions arising from contracts for supplies with a view to adjusting compensation and adjust the same in cases where the facts disclose the necessity for such adjustment, intended to be proposed by him to the Post Office appropriation bill, which was referred to the Committee on Post Offices and Post Roads and ordered to be printed.

ALLOWANCES TO SOLDIERS' FAMILIES.

Mr. HITCHCOCK. I send to the desk and ask to have read a resolution, after which I shall ask for its consideration.

The resolution (S. Res. 200) was read, as follows:

Resolved, That the Secretary of the Treasury be, and he is hereby, directed to inform the Senate to what extent, if any, allowances to soldiers' families for the month of November, 1917, have been paid; also to what extent they have been paid for the month of December, 1917, and also for the month of January, 1918.

Mr. HITCHCOCK. Mr. President, the reason for making the inquiry is that we have widespread complaint in the West that allowances for soldiers' families have not been paid in many cases from the very start. I think the Senate ought to have this information.

The resolution was considered by unanimous consent and agreed to.

CALLING OF THE ROLL.

Mr. TOWNSEND. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Hollis	Nelson	Smith, S. C.
Beckham	James	New	Smoot
Chamberlain	Johnson, Cal.	Norris	Sterling
Colt	Johnson, S. Dak.	Nugent	Stone
Culberson	Jones, N. Mex.	Overman	Sutherland
Cummins	Jones, Wash.	Penrose	Swanson
Curtis	Kenyon	Pittman	Thomas
Dillingham	King	Poindexter	Thompson
Fernald	Kirby	Reed	Townsend
Frelinghuysen	Knox	Shafroth	Trammell
Gallinger	Lodge	Sheppard	Vardaman
Gronna	McCumber	Sherman	Wadsworth
Hale	McKellar	Shields	Warren
Harding	McLean	Simmons	Watson
Hardwick	McNary	Smith, Ariz.	Weeks
Henderson	Martin	Smith, Ga.	Wolcott
Hitchcock	Myers	Smith, Mich.	

Mr. GRONNA. I wish to state that the senior Senator from Wisconsin [Mr. LA FOLLETTE] is absent, due to illness in his family. I ask that this announcement may stand for the day.

Mr. MYERS. On account of the state of health of my colleague [Mr. WALSH] he is still detained from attendance upon the Senate.

Mr. KIRBY. I desire to announce that my colleague, the senior Senator from Arkansas [Mr. ROBINSON], is detained by illness.

Mr. WOLCOTT. I wish to announce that my colleague [Mr. SAULSBURY] is detained from the Senate by illness.

The VICE PRESIDENT. Sixty-seven Senators have answered to the roll call. There is a quorum present.

IMPORTS OF MERCHANDISE.

Mr. GALLINGER. Mr. President, I ask unanimous consent to have inserted in the RECORD tables showing the importation of merchandise and agricultural products into this country during the quarters ending September 30, 1915 and 1916, December 31, 1915 and 1916, and March 31, 1916 and 1917, under the Underwood-Simmons tariff law, as compared with similar periods in 1912 under the Payne-Aldrich tariff law. The figures were prepared by the Hosiery Manufacturers' legislative committee, of New York City, and are accurate.

The VICE PRESIDENT. Is there any objection? The Chair hears none.

The tables referred to are as follows:

Imports of merchandise and agricultural products during the quarter ending Sept. 30, 1916 and 1915, under the Underwood law, and same quarter in 1912 under the Payne law, using for comparison products having the most extreme foreign competition.

[Minus mark (—) denotes decrease.

THE FUEL SITUATION.

Mr. MYERS. Mr. President, I observe from the morning newspapers that the fuel situation in this part of the country is again acute. I have received a telegram upon that situation which I shall read. It is as follows:

FROMBERG, MONT., *February 2, 1918.*

Hon. H. L. MYERS,
United States Senate, Washington, D. C.:

Miners employed here will work four Sundays in February and donate amount earned to Red Cross. I will give one-seventh net earning for month to same fund. Similar plan adopted by miners and mine owners in every State would increase tonnage and help finance Red Cross for this year.

J. C. MCCARTHY.

The signer of this telegram is the most extensive mine owner in Montana. If the patriotic course indicated in the telegram should be followed by the mine owners and miners of the country generally it would contribute a great deal of benefit to the Red Cross and to the improvement of the fuel situation.

Mr. SMITH of Arizona. Mr. President, because of the confusion in the Chamber, I did not hear what the Senator from Montana read, but I rise to a parliamentary inquiry. Is it not proper, as a point of order, during the morning hour for a Senator to object to another Senator reading any telegram, except by unanimous consent of the Senate?

The VICE PRESIDENT. The Chair is of the opinion that, under the order of the presentation of petitions and memorials, nothing can be done except to present a petition or a memorial, and that if a Senator proceeds to make a speech or to read a document during that time it is subject to a point of order.

Mr. SMITH of Arizona. I want to give notice that I shall hereafter make such point of order. I do not like to make my friend from Montana an example, but I have a very unpleasant duty placed upon me by the Committee on Printing of attempting to save as much as I can of the expense of printing. While it is very unpleasant to me, especially with a friend as dear to me as is the Senator from Montana, I want to give notice that hereafter I, or some other member of the Committee on Printing who may be present, will in the morning hour object to the reading of telegrams, editorials, or like matter into the CONGRESSIONAL RECORD.

Mr. MYERS. Mr. President, I was making a few remarks in the Senate; I had the floor in my own right, and was speaking on a subject that is of vital importance to the people of this country. Whenever I may feel so disposed I shall always in the future take the floor when I can get recognition and make remarks on matters which I consider pertinent to the welfare of the country. Of course, it is the privilege of any Senator on the floor to rebuke me for doing so if he sees fit.

Mr. SMITH of Arizona. Mr. President, I am amazed, in view of the very temperate and sweet-humored way in which I handled my friend from Montana that he should feel that any criticism was directed at him; it is a little surprising.

I want, however, to now give notice to the Senate that nothing else will be read into the RECORD, if I am in the Chamber during the morning hour, except by unanimous consent.

Mr. SMOOT. Mr. President, I think it is worth while for the Senate to know that we have not enough paper on hand to print the permanent RECORD. If we undertook to print the permanent RECORD to-day according to law, we should not have print paper enough to print the daily RECORD.

Mr. SMITH of Michigan. How about the Official Bulletin? Is there enough paper for that?

Mr. SMOOT. It does not require the same kind of paper to print that publication.

Mr. SMITH of Michigan. It is white paper.

Mr. MYERS. Mr. President, whenever I get recognition to to make any remarks in this body I shall read as a part of my remarks whatever I may see fit, whether or not it may meet with the approval of any other Member of this body.

HOUSE BILLS REFERRED.

H. R. 3132. An act to amend section 2171 of the Revised Statutes of the United States relating to naturalization, was read twice by its title and referred to the Committee on Immigration.

H. R. 5558. An act to amend section 101 of the Judicial Code, was read twice by its title and referred to the Committee on the Judiciary.

The VICE PRESIDENT. Morning business is closed.

WAR CABINET.

Mr. WADSWORTH. Mr. President, pursuant to a notice which I gave a few days ago, I ask the privilege of addressing the Senate upon a topic of great importance and one which I approach with a considerable degree of humility.

We are living in grave times, Senators. History is being written in gigantic characters, and events are transpiring of such tremendous importance and of such significance as to stagger, I may say, even the imaginations of men. I doubt very much whether any one man can correctly analyze what is going on in the world to-day or prophesy with any great degree of accuracy what its outcome will be. Suffice it to say that we

Senators realize that the future of civilization is at stake; that the outcome of the tremendous struggle now going on will, without any doubt, affect the peoples of the world and their Governments for centuries to come. We realize, I am sure, also that the outcome of this great contest must necessarily have a most profound effect upon the future of this great Republic.

Questions are presented before us which can not be trifled with. There is no room or ground for levity. This is no time or place for any man to indulge in personalities or to give way to his prejudices, if he may have prejudices. I take it that this is a time in the history of our country when we should approach the discussion of these topics in the broadest possible way and in the fairest possible spirit, and, if I may be permitted to do so, let me venture the hope that in such discussion as takes place in this Chamber personalities be omitted and that Senators here forget the words "Republican" or "Democrat" and think only of our country.

In the first week of February, 1917—12 months ago—the German ambassador was handed his passports as a result of Germany's announcement that she intended to prosecute ruthless submarine warfare against our merchant shipping in those great zones she had marked out upon the ocean. Although two months elapsed before the Congress declared, in the first week of April, 1917, that a state of war existed between the United States and the Imperial German Government, the date of the dismissal of the German ambassador must rightfully mark the commencement of our preparation for war. And the fact is that in February and March of 1917 our Government did inaugurate certain measures in the War and Navy Departments, calculated to anticipate the inevitable. Our condition of unpreparedness—and let us be entirely frank about this matter as we proceed—with respect to the Army at least, was pathetic in the extreme, when one considers the man power and the resources of the United States. We had a mere handful of men, for the most part ill equipped and organized along obsolete lines. Even for that small force there was no reserve of supplies worthy of the name. Indeed, Senators, we were so blind as to permit one of our Government rifle factories to operate much below its capacity all through the year 1916, and the other Government rifle factory to cease altogether making rifles during that period. The condition in these two factories in that period is but one example of the result of our neglect. In the broader field of industrial preparation little, if anything, of an effective nature was done. It is true that some statistics and inventories of our industrial resources had been prepared in 1916 by the advisory commission of the Council of National Defense, but that commission was without power to lay down any plan to which the Government might adhere, and, indeed, there was no department of the Government authorized by statute or otherwise to take up such work in an authoritative, definite, and constructive way. Thus, so far as the mobilization and control of industry and the creation and supplying of an Army were concerned, we were forced to start de novo.

Senators, as we look back now, we have learned, I hope, a great lesson; a lesson learned at the expense of many, many lives and millions of dollars. I am sure that we have learned that our failure to see beyond the ends of our noses has prolonged this ghastly war and postponed that day when mankind shall be released from its terrors and the future of this beloved Republic made absolutely secure. What a blessing it would have been had America possessed a merchant marine, a reserve supply of weapons and equipment, and a body of citizens trained as soldiers and sailors to use them. Let us hope that we shall never be caught this way again.

Starting with nothing, or next to nothing, we embarked at a moment's notice upon a tremendous effort, which the Committee on Military Affairs, in its hearings during the last seven weeks, has been tracing and analyzing. We have been able to cover the ground in part only. In fact, were the committee to endeavor to cover all the activities which might justify an inquiry, it could not finish its work during this session of Congress. I think no member of the committee underestimates the task which confronted the Government and the people in the spring of 1917. It was stupendous—the more so, because we had not even laid a foundation prior to that time. That great things have been done during these 12 months can not be denied—things that we can all be proud of.

Mr. President, from time to time in public statements various Government officials have pointed out some of those things which are to our credit. Perhaps I may be permitted at this time to give credit to the War Department and the Government generally for two or three of the most conspicuously creditable things, for I think this discussion should be absolutely fair and that we should analyze correctly what has been done and, if necessary, what has not been done. When one considers the mental attitude and psychological condition of the American people at the time we went into this war, then considers the revolutionary character of the selective-draft law, and then follows down and traces the operation of that law, I think one will gladly admit that the operation of that law and the working of its machinery have been a remarkable and conspicuous success, far beyond the expectations and hopes, I think, of a great majority of the men who sit in this Chamber.

It is true, as has been said by the Secretary of War, that we have collected in our cantonments and divisional encampments approximately 1,500,000 men, a great portion of them through the selective-draft system and the remainder through a volunteer system. My recollection of the last figures is—and this is something to the credit of American industry and enterprise—that the first 800,000 of those men were transported over our railroads without the loss of a life. What the record has been as regards the remaining number of the 1,500,000 men I do not know; but, in any event, taking the Army in the aggregate, the record of troop transportation, so far as the avoidance of accident and the loss of life is concerned, is one that has been remarkable.

Another thing, Mr. President, that we ought to remember at this time is that the American Army has been fed as well as, if not better than, any other army on the face of the earth during this period; and the credit for that great task, the training of soldier cooks in the quartermaster's cooking schools and in putting them to work in the cantonments in time to serve a hot meal—their first meal—to the soldiers as they arrived—the credit for that should not be denied. It is one of the things in which foresight and organizing ability were shown; and we ought to be grateful for it, and I am glad to pay tribute to the officers and men who accomplished that great feat.

That other great things have been left undone must be admitted. The credit for the things accomplished can be assigned to several individuals. The blame for the shortcomings ought not, in my judgment, to be laid upon any individual. Criticism should be directed against our system or, rather, the lack of any cohesive system.

The Committee on Military Affairs commenced its labors by an inquiry into the management and operations of some of the bureaus of the War Department. We first took up the Ordnance Bureau and endeavored to take stock, as it were, of our ordnance supplies and the progress being made toward an adequate supply.

Next we conducted an inquiry into the Quartermaster General's office. With respect to the supplies which must come as a result of the operation of the Ordnance Bureau and the Quartermaster Bureau the committee, in my judgment, discovered a distressing state of affairs. Grave differences of opinion exist upon some of the points brought out. I shall not at this time indulge in a discussion of the rifle controversy or the machine-gun controversy or the artillery program or the general shortage of ordnance supplies as brought out by our investigation into the Ordnance Bureau; nor do I intend to discuss the question of clothing supply or collateral subjects as brought out by our inquiry into the Quartermaster Bureau. The Senate and the country are reasonably familiar with the details of these matters. There were other matters, too, which were discussed in executive session—matters of the greatest importance, but of such a nature as to forbid their discussion in public.

As we proceeded, however, those of us who attended the hearings every day and listened to all the testimony became deeply impressed with the conviction that purchase and production and initial distribution of the vast amount of supplies must be essentially an industrial operation and that military men, no matter how distinguished and capable in their profession, are, with very rare exceptions, inexperienced in such matters and therefore incapable of bringing about the best results in the shortest possible time. We found also that in addition to this fundamental handicap, these supply bureaus were further handicapped, and very seriously, by a condition which springs from years of routine operation, regulated and checked, down to the last crossing of a "t" and dotting of an "i," which condition is popularly described as due to "red tape." The military channels through which a matter must proceed are so long and so tortuous, and so numerous and so minute are the formalities and departmental customs which must be followed, that exceedingly grave delays have occurred. Some of the incidents might be regarded as uproariously funny were the situation less serious. In a word, we found the machinery slow and creaking and in some important instances the engine "stalled."

The President of the United States, in a statement issued several days ago, expressed the opinion, as I remember it, that

were the Congress to repeal some of the restrictive legislation, or words to that effect, the machinery of the War Department might be liberated from unnecessary restraints. As one member of the Committee on Military Affairs, Mr. President, I hope that the administration, at the earliest possible moment, will inform the committee just what laws stand in the way of effective operation in the War Department. If there are some such laws, if there are too many checks and balances due to the existence of statutes, if they do impede our progress and make it the more difficult for us to wage this war, we should be told about them.

It is impossible for an individual Senator or a committee of the Senate to search out these matters without the guidance and assistance of the men who are endeavoring to operate under the statutes, and I take this occasion to express the hope that if such laws are now upon the statute books and are restricting our operations we shall be promptly informed, so that the Congress can come to the help of the War Department, for the Congress wants to help the War Department; and if they will point the way, we will do it.

In addition to the Army officers who appeared before us, we obtained exceedingly valuable testimony from representatives of some of our great manufacturing plants, which have received orders from the supply bureaus and are expected to turn out the weapons and equipment of the soldier in tremendous quantities. Their testimony, I believe, broadened our view of the situation and painted more vividly the great picture of industrial effort; and from it we gathered the deep impression that there was lack of comprehension of the manufacturer's problems on the part of official Washington; lack of coordination; an inability to reach prompt decisions. Many, many instances were recited to our committee, Senators, which illustrated the extreme difficulty that the manufacturer encounters when dealing with officers of the Government—instances citing the change in specifications of a given article over and over again, often by wire to the manufacturer who has already started to tool his plant to turn out the article, and apparently without any comprehension on the part of the officer who sent the telegram as to what effect that telegram changing the specifications had upon the output.

In one instance a contract had been placed for frames of motor trucks, a comparatively simple article to manufacture. The order was given, the contract made, for 2,500 of them. The manufacturer went home and started work on them. His plant was equipped for it. Within the following six weeks 36 changes were made, by telegraph or mail, in the specifications of so simple a thing as the frame of a motor truck, and the manufacturer, as I remember, testified that those changes in specifications set him back at least those six weeks and cost the concern $100,000.

Instances of that sort bear out the statement I have already made, that there is a lack of comprehension of manufacturing difficulties here in Washington in the departments of the Government, largely manned, as they were and are, by military men.

Then we had before us some of the exceedingly able civilians who were summoned to Washington just before or soon after our entrance into the war and who have devoted their time and efforts in helping the Government. Senators are acquainted with a large number of them. These men have lived close to the problem for many months; they have watched the working of the machinery at close range; they are thoroughly informed upon the situation; and they have told us about it not only in open session, but in executive session. Each and every one of them has pointed out and explained the defects which the members of the committee had begun to suspect before they appeared before us. Each of them has suggested one or more remedies, one or more improvements, and all their suggestions are in the same direction, to wit, the proper centralization of authority—an authority established preferably by statute, an authority whose decisions may be promptly reached and accepted as final.

Comment was made on the floor of the Senate yesterday afternoon as to the nature and character of the bills which the Committee on Military Affairs has in one instance reported to the calendar, and in the other instance ordered introduced, and subsequently reported. One Senator described that legislation as "stupid." I might say to that Senator and others who heard him that that legislation springs quite largely from the testimony given to the Committee on Military Affairs by men who can not be described by that Senator or any other Senator as stupid men.

We have had before us in open session Mr. Daniel Willard, the president of the Baltimore & Ohio Railroad, and at the time of his appearance the chairman of the War Industries Board. In discussing the organization of the Government for war-making purposes as existing at the time of his appearance, he expressed the hope that they would get along all right, but he pointed out what he termed a fundamental weakness—lack of authority to compel coordination.

Mr. Baruch appeared before the Committee on Military Affairs in open session; and he, too, in the most explicit terms—and he is a member of the advisory commission of the Council of National Defense—stated that we must have centralization of authority in order to compel coordination amongst the different parts of our war-making machinery.

Mr. Gifford, the director of the Council of National Defense, who probably is more familiar with this problem than any other man in Washington, and across whose desk comes all these things, for he is the director and manager of the office of the advisory commission as well as of the Council of National Defense, most explicitly stated that what we needed was a centralized authority, some authority armed by the statute.

We had before that committee the chairman of the war committee of the Chamber of Commerce of the United States, Mr. Catchings. Mr. Catchings had been the first assistant to Mr. Stettinius during the time that Mr. Stettinius was managing the purchases for Great Britain. He assisted Mr. Stettinius in that work, and they purchased something like $3,000,000,000 worth of goods in this country for Great Britain. They did it under a centralized authority. They made a tremendous success of it. It is astounding to hear him say how simple it all was, when properly organized. Mr. Catchings stated most explicitly before our committee that he and his war committee of the United States Chamber of Commerce have been working for six or seven months here in Washington—and they represent all the chambers of commerce of the United States, a large number of boards of trade and business men's organizations, aggregating 7,000 of the most prominent and successful business men of the country. For six or seven months, Senators, Mr. Catchings and his committee have been endeavoring to persuade the officials here in Washington that something must be done to centralize control and authority, and they have had conference after conference, always insisting upon that one thing in order to make America effective.

Mr. Howard Coffin, now chairman of the Aircraft Board, appeared before us and gave us a most illuminating discussion of the general industrial problem. He, too, urges centralization, particularly in planning the utilization of industry.

Senators, I submit that these men are not stupid men. I submit that they know more about this problem than any Senator on this floor. I submit that they know more about it as business men than the average Government official. They have been trained in it, and they have been watching it at close quarters for months and months; and I think I am not far from the truth, Mr. President, when I say that the legislation which the Military Affairs Committee has proposed springs in large measure from that expert testimony, from men who are utterly disinterested and have only one thought in view—the mobilization of America's industries, in support of the President and of the Government for the winning of the war.

So much for the character of the testimony that we heard; and there was much of it, some of it given in executive session which I am not at liberty to repeat, but which was exceedingly interesting.

It is apparent that these last 12 months might be properly defined as the formative period of our efforts. This great American giant has been stumbling and groping, exerting his tremendous strength, without always knowing what he was doing or where he was going. Perforce, we have had to experiment, and we have had to endure endless conferences and references from one department to another, from one official to another. We have known some of the things we have wanted to do, and we have tried to do them. We have forgotten some of the things equally important that we ought to have done, and it has been nobody's business to think of them. We have had in Washington a large number of able advisers; many of them have thought of the things which have not yet been done, but none of them have been clothed with power to do them, and few of them have been able to find an agency of the Government where a decision could be had and the work started. Several groups of distinguished men, official and unofficial, have endeavored to plan things out in advance, but it has often been the case that the plans of one group did not coordinate with the plans of another group, and there was no place in Washington where the needs of the situation and the plans to meet them could be brought together, coordinated, and settled upon. I realize full well, Senators, that some may contend that the President of the United States, the Commander in Chief of the Army and the Navy, the leader of the Nation in this war, can make all these decisions, and that there is, therefore, no need for any additional element in our war-time machinery. My contention is that, be he ever so able,

no President—no human being—can perform such a task. It is utterly impossible for one man to examine into all these intricate questions. The days and the nights are not long enough to permit of his doing such a thing. He carries, even in time of peace, a terrific burden, and to ask him to assume the task of studying and planning these tremendous, intricate, industrial, social, economic, and military undertakings is to ask the impossible.

I have described the period through which we have just passed as formative and experimental in its character. I would be content that this same state of affairs continue for a short time were I convinced that the war would end in a short time. We could probably proceed for a little while longer, and if a satisfactory end were surely in sight we would not need to concern ourselves very much with our war-making machinery. But I entertain the deep conviction that the end is not in sight; that we shall have to travel a long, hard road before we reach the goal. I feel certain that the strain will grow more and more severe as the months go by. America's effort must constantly expand; we must send more and more troops abroad; we must build more and more ships to carry them; we must grow more and more food to feed them and to feed our allies also; we must make use of an ever-increasing percentage of our mines, transportation facilities, and manufacturing facilities in order that these men may be armed to a degree surpassing the armament of our enemies; that they may be fed and clothed and cared for.

In my judgment the only way to beat the German Army is to put against it a force so superior not only in numbers, esprit, and morale, but in artillery and all the equipments of war as to eventually crush it, and there is a long, hard road for us to travel before we reach that stage. We can do it, but we must have the machinery here at home for doing it. Indeed, as I view this situation, we are only upon the threshold of this tremendous undertaking, and as time goes on it will demand of the country and absorb from the country more and more of its man power and its resources. Convinced as I am that this prospect is surely before us, I am not satisfied that we have the kind of organization and machinery that can stand the strain.

That is the only thought I have in mind upon this question—can America perform this task? I know that she can, provided we have the organization that will stand the strain.

Now, let us go back for a moment and discuss the machinery that we now have. I took the liberty a few days ago of having hung upon the walls of this Chamber some charts. I regret exceedingly that they are too small to permit of their letters being read at a distance. Perhaps I can discuss the organization as depicted on those charts in such a way as to make it reasonably plain.

In the first place, the Chart I is the chart showing the organization of the War Department itself when we went into the war and as it continued to operate during the summer and the autumn. That organization, you will see, resulted in the supply bureaus of the War Department, headed, respectively, by the Quartermaster General, the Chief of Ordnance, the Chief Signal Officer, the Chief of Engineers, and the Medical Department reporting direct to the Secretary of War and not through the General Staff. It was possible, therefore, for the five different supply bureaus in the War Department to report over the heads of the Chief of Staff and go direct to the Secretary of War and, if possible, persuade him to do what anyone of those individuals thought ought to be done. I congratulate, and the committee I think congratulates, the Secretary of War for having changed that organization and endeavored to organize the interior machinery of the War Department upon modern military lines.

The reorganization is depicted in the Chart II, which shows the War Department's bureaus divided into two groups, one group the supply bureaus and the other group the administrative bureaus, each reporting to an assistant, and those assistants reporting through the Chief of Staff to the Secretary of War. That is the organization of the War Department as it exists to-day. You will see that the five supply bureaus—Quartermaster, Ordnance, Engineers, Signal Corps, Medical Department—report to an assistant, as it is termed.

The Secretary of War explained to the committee how that was to operate. He said that Col. Pierce was to be placed in the position of assistant to compel the coordination of the five purchasing bureaus. Col. Pierce, of course, as the Senator from Nebraska [Mr. HITCHCOCK] said yesterday, is outranked by the five major generals who respectively command the five supply bureaus under him. The Secretary of War said they could easily avoid that handicap by making Col. Pierce a major general forthwith. In the press recently we have been informed that Mr. Stettinius has been appointed in some capacity to assist in the coordination of the purchasing of the War Department. It is difficult to understand just where he comes in. Probably his authority is advisory. Under the law and under military usage he can not have any authority except of an advisory nature, and it is possible and, indeed, probable, that he is the assistant of Col. Pierce.

That brings up the question of how an individual from civil life, an expert in his business, can help out the military supply operations without having authority definite and absolute. I have never had the pleasure of meeting Mr. Stettinius, have only heard of him, but if he takes advice from one humble individual he will decline to put on a uniform; for the instant he does it the consciousness of relative rank must invade his mind. He will be subject to the orders of some one else, and once again the great talents of the business man will not be exerted to their full efficiency.

The Committee on Military Affairs has proposed in the bill creating a department of munitions to have it headed by a civilian not subject to the orders of any military officer, a man who can grasp great business problems, a man clothed with authority to go out and do things and furnish the different branches of the Government with the needed supplies.

The interior reorganization of the War Department without question constituted a great improvement upon the organization that existed prior to December, but it does not meet, in my humble judgment, the real point at issue in this discussion. It affects only the War Department, and such civilians as they have summoned to assist it have not been clothed with authority to act. They are very largely performing an advisory function.

Now, the Secretary of War explained to us with a chart the general organization of the war-making machinery of the Government, not only the War Department, but all the other departments, bureaus, and commissions that have something to do with helping us win the war.

As everyone knows, at the head of the entire organization stands the President of the United States, under the Constitution and the laws our Commander in Chief. No one in his senses would propose that any other office be created to take away from the President the power that the Constitution confides in him. It can not be done. It is unthinkable.

Under him are several departments or agencies of the Government operating in compliance with the old-time statutes or through Executive orders more recently authorized by acts of Congress. Let us see what they are. I confine the list to those departments and agencies which may be properly classified as belonging to the war-making machinery. We find the War Department, the Navy Department, the Aircraft Board, the Shipping Board, the Food Administration, the Fuel Administration, the Railway Administration, the War Trade Board, and the Treasury Department, coupled with the Federal Reserve Bank System, charged with financing the war. These departments, boards, and commissions have been created in conformance with statutes enacted by the Congress. In addition, we have the Council of National Defense, composed of six Cabinet officers, with the Secretary of War as chairman, charged with the general planning and coordination of all our agencies, but utterly lacking in power to enforce its decrees. Under the Council of National Defense we have the advisory commission, composed of leaders of industry and finance, but possessing no power and performing no function but that of giving advice. We have a large number of committees and subcommittees of the advisory commission, each charged with the mobilization and organization of a particular industry, but without any power or function except that of giving advice. Out of the Council of National Defense and the advisory commission and its multitudinous committees has grown the body known as the War Industries Board, whose effort is directed toward mobilizing, organizing, and coordinating all of the resources and industries of the country for the supply of our forces on land and sea. The War Industries Board lacks power to enforce any of its arrangements. It, with all its subcommittees—and there are several—simply gives advice. Then there is a commission regulating the purchases of the allies; it, too, is without definite power. It may be that I have forgotten some of the statutory agencies and some of the advisory agencies which go to make up this vast and complicated machine. In any event, the list, as recited, is long enough. It must be apparent to every sensible man that it is utterly impossible to get any teamwork out of this conglomeration of ambitious and scattered agencies, official and unofficial, unless we create some agency that shall guide and control them all in those matters in which teamwork is essential for the accomplishment of great results.

There is not a business corporation on earth that could do business for one year's time with such an organization as we have in our war-making machinery to-day. Ask any business man; ask any man versed in the usages and customs of industry.

This war, Senators, is a great industrial effort. It is a great conflict between industries, the marshaled industries of America and her allies against the marshaled industries of the Teutonic powers. Ask any man accustomed to handling great industrial problems if the organization as depicted upon this Chart III, the organization of the war-making machinery of the United States Government to-day, is a proper and efficient organization, and he is compelled to answer in the negative. It can not be done. It will do some things, of course. It will do some things well. It will do some great things, but it can not do all the things at the time when they ought to be done; it is impossible.

Now, let us see how it works or how it endeavors to work at this time. And mind you, Senators, my criticism is not directed against any individual, against any one department. This question is not one of persons. It is not one of individual bureaus or departments. It is one of organization.

The Army needs vast amounts of supplies. It purchases them through five purchasing bureaus. The Navy needs vast amounts of supplies. It purchases its supplies largely through one bureau. The Shipping Board needs a tremendous amount of material. The allies need a tremendous amount of material. The chart No. III is an exact copy of the chart given to the Committee on Military Affairs by the Secretary of War. On it are recited the War Department and its bureaus, the Navy Department and its bureaus, the Ship-Building Board, and the allied purchases. That was the picture given to us by the Secretary of War. But, Senators, the Food Administration has been forgotten, and so has the Railway Administration, each of them purchasing enormous quantities of supplies. They, too, must be coordinated. According to the system now in vogue when any one of those purchasing agents, and there are something over a dozen, makes up its mind that it wants to buy some article it proceeds to the office of the War Industries Board, and is there referred to the committee on clearances, which consists of half a dozen gentlemen who advise the purchasing officers, as they arrive, where they can buy the goods and at what price. They advise them. Then those officers go back to their respective departments and the whole effort of placing the orders and making the purchases, speeding up the industries, disciplining industry, mobilizing industry, taking care of the transportation, planning them out in advance, is scattered down through at least a dozen different governmental agencies.

Senators, you know that it can not be coordinated under any such system. When those officers reach that point where they are advised as to the place they can get their supplies and what price they shall pay, there should be the authority to compel them to take that advice. There is no centralized agency that will discipline and organize the industries of America, and discipline is part of this effort. A dozen or more purchasing agencies of the Government can not do it. They each go out

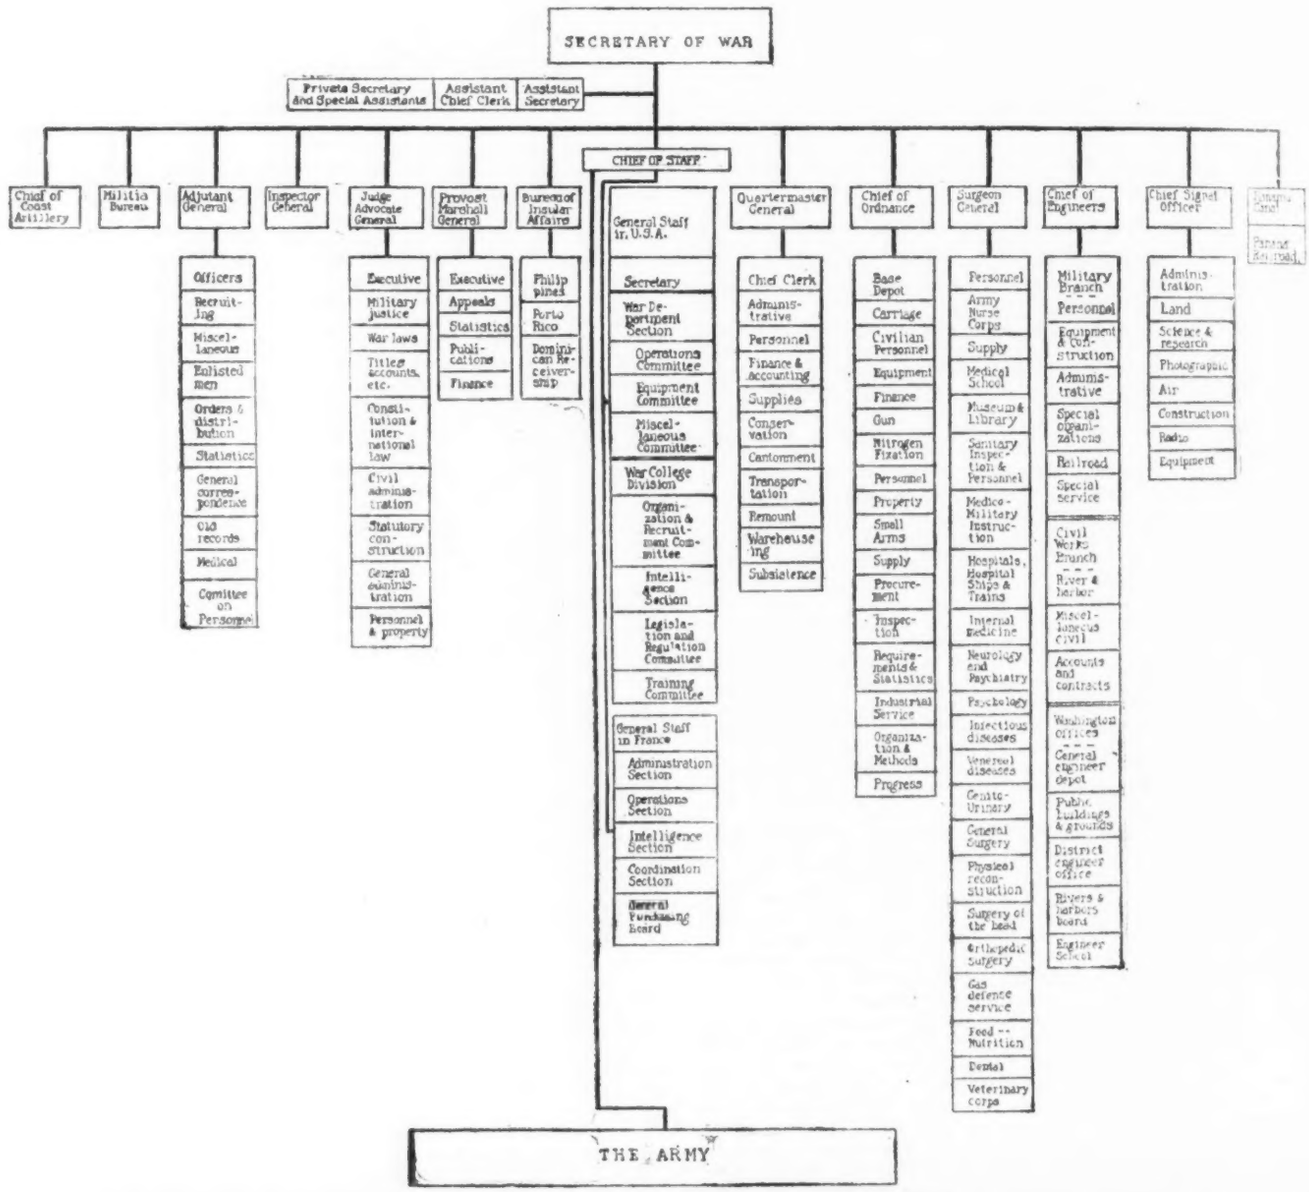

CHART I.—WAR DEPARTMENT, OLD REORGANIZATION.

and do the best they can, and they are working day and night, but there is no system to it. It is apparent to any man who looks at that chart that there is no system there.

Now, what is the proposal of the Committee on Military Affairs? Is it a new and strange proposal? Is it an experiment in government? Not at all, Mr. President. England had a purchasing system approximately like the one depicted on that chart. She had to come to a ministry of munitions. She did it in the early part of 1915. Why? Because without it she did not have the organization, she did not have the centralized authority that would make it possible for English industries to respond to the needs of the British Army and the British Navy. (See Chart IV.)

Canada at the very beginning of the war in like manner was compelled to establish a department of munitions, where authority could be centralized. I have had the pleasure of having a talk with the gentleman who organized the Canadian department of munitions. He was in Washington during the early part of the summer advising with the officials of our Government how to organize this great task of production. I am informed that he has been summoned back to Washington, and is here now. They want his advice again after an interval of several months' time. He can point out to any man who will listen the necessity for centralized authority in the mobilization of industry.

France had to come to it. They established a ministry of munitions for exactly the same reason, in order to attain efficient organization.

Senators, during the last seven or eight months this Government of ours and this people of ours have been going through exactly the same experience that the peoples of France, of England, and of Canada went through when they first went into this war. So there is nothing strange in the proposal, there is nothing revolutionary, there is nothing disturbing about it. If it is adopted in whole or in part it will not set back the wheels of machinery one day.

Now, what is the proposal? We all know that the Army needs a vast amount of steel for forgings for heavy artillery. We know that the Navy needs a vast amount of steel. We know that the Shipping Board needs a vast amount of steel. We know that the allies purchasing in this country need a vast amount of steel. The proposal of the committee, not expressed in so many words, is that in such a case the purchase of the steel for those four agencies shall be centralized in one department, so that the steel-producing industry of the country can be organized for one great purpose—can de disciplined, as it were. Is it not sensible? These departments are all buying the same thing. Why not have one man buy it and give him the authority to speed up the production, to make the proportionate allotment of the contracts in the different steel mills? The truth of the situation is to-day, there being no plan for allotting contracts and for placing Government orders, that it has been done very unevenly. Some parts of the country are overloaded with Government orders and other parts of the country have not any, and they could have had them had there been any centralized authority to plan out the distribution of the orders.

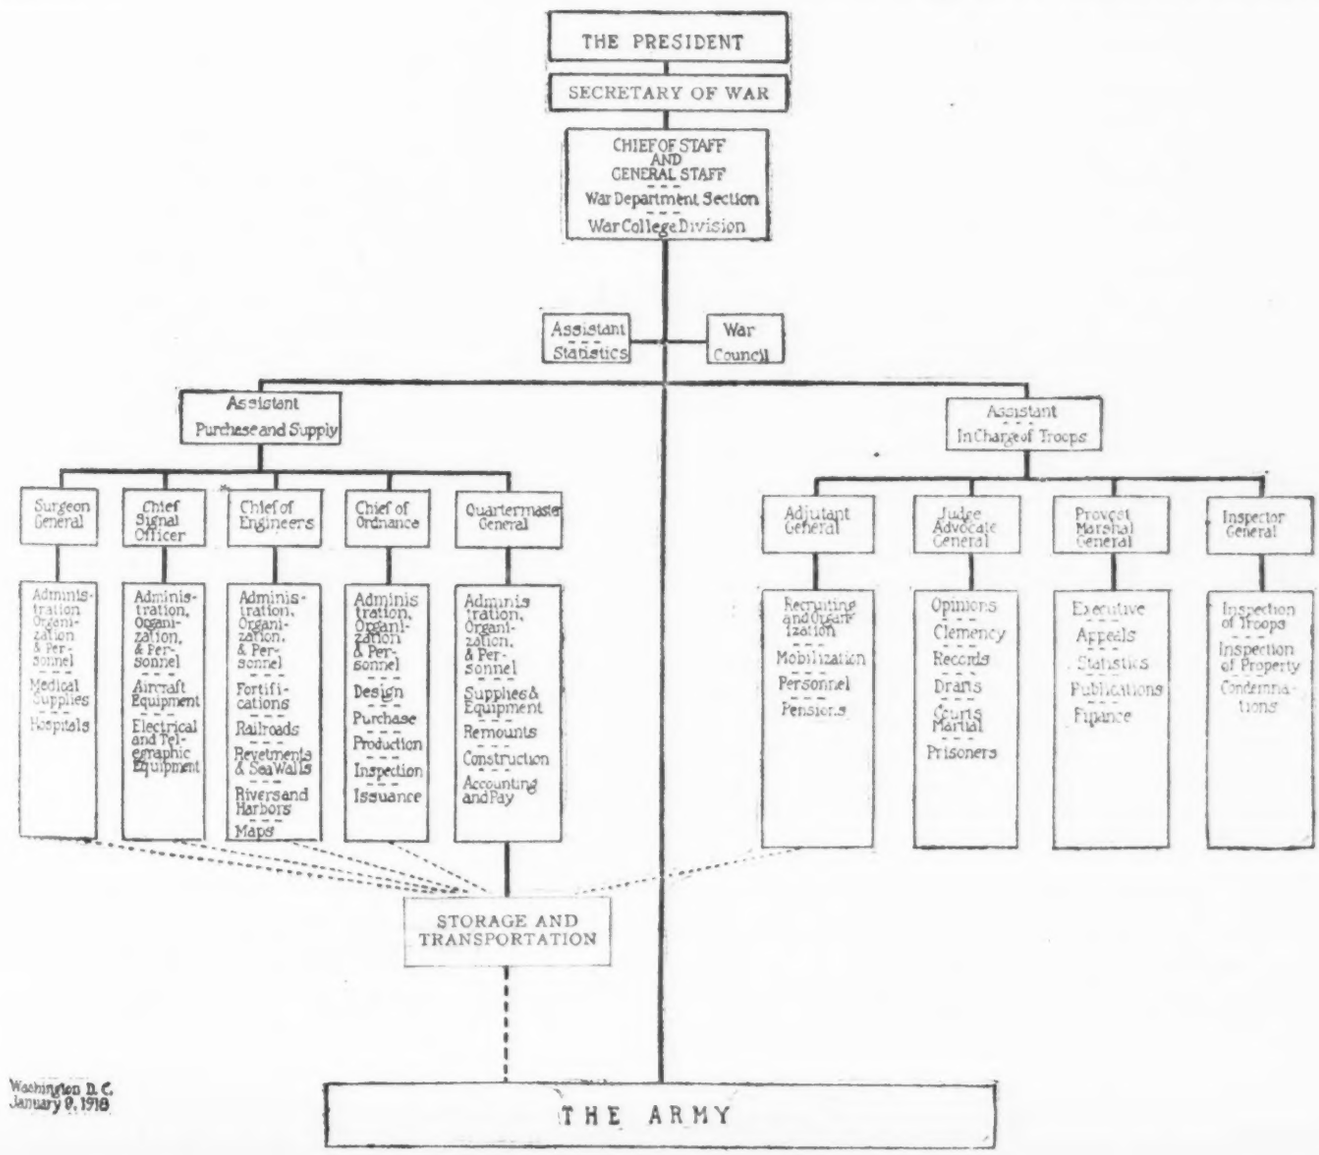

CHART II.—WAR DEPARTMENT REORGANIZATION.

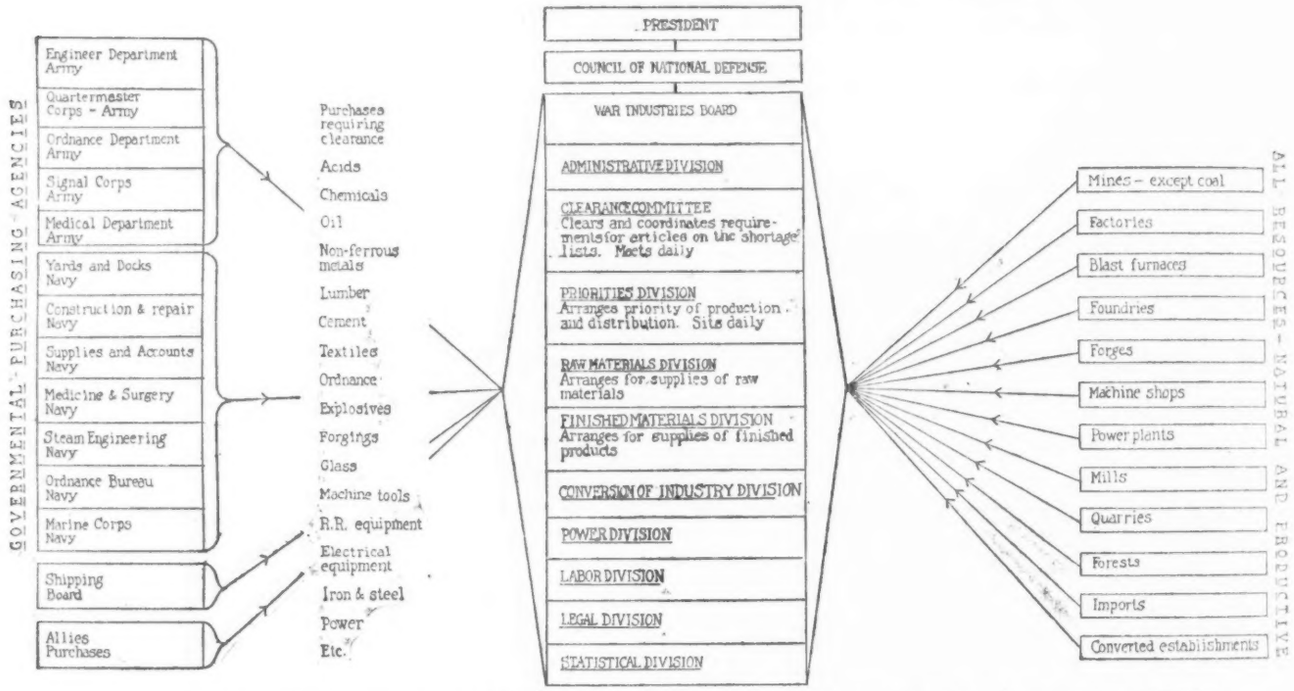
Take the question of lumber. The War Department purchases an enormous amount of lumber with which to build the cantonments; the Shipping Board purchases a tremendous amount of lumber for use in the shipyards and in the building of wooden ships. I have no doubt the allies purchase lumber. I know that the Aircraft Board purchases vast amounts of lumber. Why not have the lumber purchased by one agency? Why scatter the effort? Why not organize and discipline and coordinate the lumber production? Would that set back the wheels of machinery one day if it were done? Senators, it would speed it up. We have too many agencies, all trying to do the same thing.

Take cement. The Army uses an enormous amount of cement. The Engineer Corps buys it; the Quartermaster's Department buys it; I have no doubt the Signal Corps buys cement for building operations. Undoubtedly the Shipping Board buys cement; undoubtedly the Navy buys cement; and it is probable that the allies purchase cement. Why not have one man buy it all? Is there any answer to that? Would you organize a corporation upon any other ground? I think not. So one can go all through a long list of what might be termed the principal articles, the chief articles, which we need in this great effort of war.

What does the bill propose to do? It proposes to create an agency to be known as the director of munitions, to be appointed by the President, by and with the advice and consent of the Senate. I will read just one paragraph from this bill, which will illustrate its spirit and what it means, and the reading of it is an answer to some of the criticisms that have been made against it. The bill provides for a director of munitions:



who, under the President, shall have and shall exercise, either directly or through any other agents or agencies of the Government that the President may designate for the purpose—

There is nothing compulsory about it, Senators—

full power to purchase and to provide for, supervise, and control the procurement, manufacture, transportation, and distribution of such munitions of war as the President, in furtherance of the purposes of this act, shall designate from time to time.

The bill leaves it entirely in the hands of the President to say just how far centralized purchasing shall go.

ORGANIZATION AND FUNCTIONS OF WAR INDUSTRIES BOARD

NOTE: A "war industry" is construed to mean any industry which cannot meet the war-time needs without abnormal expansion or conversion of facilities

CHART III.—PRESENT ORGANIZATION OF WAR-MAKING MACHINERY.

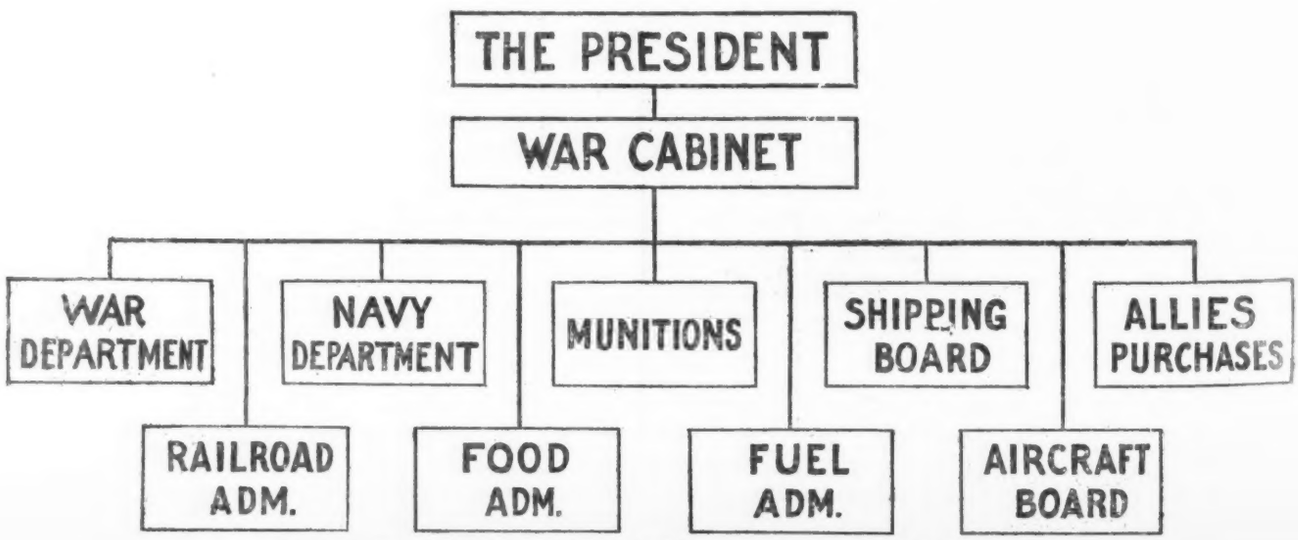


CHART IV.—PROPOSED ORGANIZATION OF WAR-MAKING MACHINERY.

The argument has been raised upon the floor of the Senate that the naval purchasing system must not be interfered with; that it is a splendid system. So it is; we all admit it. There is nothing in this bill that interferes with the Navy purchasing system, unless the President, in his wisdom, shall decide that some of the things purchased by the Navy might better be purchased by the director of munitions. Can we not trust the Secretary of the Navy and the President to see to it that the efficiency of the Navy is not injured in a matter of this kind?

There have been some rather interesting developments of this question of munition buying in other countries. The most elaborate and perhaps the most successful effort has been made in England. I do not pretend to be familiar with all of its operations by any means. I refer to the British ministry of munitions. I have learned some exceedingly interesting things about it. They established such a munitions ministry in the early part of 1915. No Englishman in his senses would advocate its abolition. Senators, it saved the British Army, because it enabled the British industries to turn out the guns and the shells for the use of that army in Flanders and in France; it enabled the British industries to supply the equipment that the British soldiers were sadly lacking; in some respects lacking just as our soldiers lack them to-day. They have gone very far in that development.

They do not purchase, as I understand, everything used by the army and the navy; they purchase the things which they can most advantageously purchase under a centralized authority; and they follow those purchases down to the last detail. I am informed that in London they have a great building filled with samples of things purchased by the British ministry of munitions; everything that is purchased has a sample or model deposited in that museum. If one implement, we will say, is purchased in two different designs, closely approximating each other, the proper official in that museum will ask, "Why are you not purchasing this thing in a uniform design instead of in two different designs?" And promptly the design is made uniform. The manufacturers can go to that museum and see before their eyes just what the Government wants; can see the article itself. They can copy it; they can discuss with the officer in charge whether or not they can make that article. It is not always sufficient to send a manufacturer some blue print of the thing you want him to make. Very often he can not tell from the blue print, except after long deliberation, whether or not his factory can turn out that article; but when he can see the article itself on the counter, as it were, and the parts of that article laid out around it, showing how it is put together, then he can tell whether or not he can make it. That is what ought to be done in the United States, and it can not be done unless you have a department of munitions. We ought to have some central place where manufacturers can go and sit down and talk business; where they can find out what is expected of them, take the orders from the Government, and go back and fill the orders. We have not anything like that to-day.

Now, let us analyze, if we can, some of the things that have happened in this country as the result of the lack of centralized planning power and the lack of a business organization. The purchasing bureaus of the Army—Ordnance, Quartermaster, Engineers, Signal Corps, and Coast Artillery—have gone out into the market and placed orders for large quantities of material. I am speaking now of things as they have occurred during the last 10 months, and really we ought to call it 12 months, because we started placing orders in February or March, 1917. The Navy Department has done the same. The commission having charge, informally, of the allies' purchases have done likewise. The Food Administration has purchased great quantities of food for shipment overseas. The Aircraft Board has purchased and shipped a large amount of finished and semifinished material. The Shipping Board has purchased vast quantities of steel and timber. The Fuel Administration has been actively in the field, with results painfully familiar to us all. Purchasing officers of these departments and bureaus have decreed priority in shipment for these goods in thousands and thousands of instances—no one of these officials having any regard for what the other officials were doing along the same line. In the eastern part of the country it has actually occurred that the goods shipped under Government priority orders vastly exceeded in amount the goods shipped for normal purposes without such orders. On one railroad line in the eastern district, for one month, 86 per cent of all the freight carried was labeled with the Government blue-tag priority order. The railways, while they remained under private control and even since they have come under governmental control have had no means of planning in advance for this tremendous traffic. There is no place in Washington for them to go to get the plan. Shipments have been crisscrossed across the country on Government blue-tag orders without the slightest regard for convenience or even for necessity. Each official, of course, was doing his best, but necessarily was running blind. An eastern railway, for example, which taps the anthracite region of Pennsylvania, has been ordered to ship a carload of anthracite coal under Government priority order to an Indian agency in Wyoming, regardless of the fact that Wyoming has its own coal fields. Pine lumber has been ordered shipped from Tonawanda, in western New York, on the banks of the Niagara River, to the Carolinas, the home of the pine tree. These are but examples, and one could multiply them almost indefinitely. Mind you, I am not attacking the individuals who did these things; in most cases they could not help it; they had no plan to go by, and they have no plan to go by this very day.

What has been the result? A hopeless jam and congestion of our railway facilities. Something has been said about the tonnage now piled up at our Atlantic coast docks. The Senator from Nebraska [Mr. HITCHCOCK] stated that 2,000,000 tons were thus piled up. The testimony that has come to me through most authoritative channels is that, of the aggregate tonnage mentioned by the Senator, 1,300,000 tons belong to France and Italy alone. Every Senator on this floor knows how France and Italy want that material; every Senator on this floor knows the conditions, particularly in Italy. Some of these supplies have been on those docks for over six months; some of them are deteriorating, and it would not be surprising if some of that material was actually out of date by this time. That is a serious thing; that is not a little, laughable incident, Senators; it is an exceedingly serious thing. The channel of supply for Italy has been blocked to that extent, and she can not fight without supplies. Why is the channel blocked? Because no one planned to keep it open. There is nobody here in Washington, as I see it, charged with the duty and the authority to plan. That is the kind of thing that has come to the Military Affairs Committee in testimony in open session and in executive session. The docks at some of our Atlantic seaports have become warehouses and a great stream of manufactured goods has overflowed the docks. In some places locomotive boilers and great piles of shells and other important material have been dumped out upon the ground and lie rusting in the winter weather. We have seen photographs of those things in the Sunday editions of the newspapers.

Thousands of cars are being used for storage purposes; they can not be handled; they are indefinitely withdrawn from the transportation systems of the country. Is any one man or any one department of the Government to blame? Not at all. The blame rests with our failure to systematize the effort. We have manufactured and shipped millions of tons of goods to the seaboard, helter-skelter, pell-mell, with little or no thought as to how we could find the dockage or the ships to transport them across the ocean. Is it strange that the railway transportation system has broken down? The use of the expression "breakdown" has been criticized, but I leave it to the frank judgment of the Senate if the transportation system of the United States has not broken down.

Let us take as a further and more specific example the coal situation. We have plenty of coal in the mines of the United States. The great problem is to distribute it to those who need it—the industries, the public utilities, the municipalities, the householders. Early in the summer of 1917 the question of the regulation of the price of coal came up. Prices at that time were exceedingly high, $5 and $6 a ton for new contracts. A prominent Cabinet officer, realizing that the price situation might become unbearable both for the Government and the public, gathered together a great meeting of coal producers. At that meeting, after a thorough discussion, in which men who had been in the business all their lives and who knew it from top to bottom participated, an agreement was reached to the effect that coal would be sold at the mouth of the mine for $3 a ton.

Mr. LODGE. For not more than $3 a ton?

Mr. WADSWORTH. For not more than $3 a ton. This price would have permitted all of the mines of the country to continue to operate; some with large profits, others with small profits.

May I digress just for a moment to discuss in a few sentences this matter of large profits in time of war as contrasted with what we are pleased to term small or reasonable profits? Apparently there is a school of thought which insists that the price of an article, if it is to be fixed by the Government, shall be fixed at such a level as to permit average or reasonable profits to be made. The men who adhere to that school of thought seem to forget, as in the case of coal mines, that some mines find it much more expensive to mine their coal than other mines,

and that if the Government attempts to establish an average price, based upon the average cost of producing coal, those mines whose cost is above the average cost of production will close down. That is as plain as can be. The men who adhere to the same school of thought say, "Yes; but we must not, and will not, permit the coal mine which produces coal at the lowest cost to make exorbitant profits out of a price fixed on a level sufficiently high to protect a mine that produces at the highest cost." That is called extortion, and great flaring headlines are put in the newspapers as to what they are going to do to the coal barons, the men who indulge in extortionate robbery of the public. "We are going to put the price down where the coal barons' profits will be reasonable," but when they do it they drive out the little coal mine from production.

What is the remedy of the Government? The excess-profits tax, of course. It is perfectly plain. The price should be fixed at a level high enough to keep the small mine in operation. That price, of course, will give the big mine a profit deemed too large. But along comes the excess-profits tax and takes away from the owner of the big mine the excess part of his profits and puts the money into the Treasury. The people get the money back again; it helps pay for the war, and all the coal mines continue to operate.

Now, that was not done. Nobody planned it.

Mr. HITCHCOCK and Mr. SHERMAN addressed the Chair.

The PRESIDING OFFICER (Mr. FRELINGHUYSEN in the chair). Does the Senator from New York yield, and to whom?

Mr. WADSWORTH. I yield to the Senator from Nebraska.

Mr. HITCHCOCK. I will say to the Senator from New York that another very admirable plan was presented to the Secretary of War by one of the distinguished and very successful business men who have been brought to Washington, and had that plan been accepted and put into effect by Mr. Garfield, the Administrator of Fuel, undoubtedly a much improved condition would have resulted. If the Senator will permit me, I will outline it.

Mr. WADSWORTH. I shall be very glad if the Senator will do so.

Mr. HITCHCOCK. He proposed to the Secretary of War that the Government, in the case of bituminous coal especially, establish a price slightly above the cost, so as to permit a reasonable or a small profit, and take from the coal producers 25 per cent of their coal at that price, that coal to be used by the Government in Government operations, to be distributed to churches and charities, and to be used in domestic consumption by poor people who require only a few tons during the winter. He proposed that for the other 75 per cent of the product of the mines the mines be permitted to charge what the supply and demand would justify.

If that plan had been adopted all of the coal mines of the country would have been in operation, the production would have been stimulated to its utmost, the poor people would have been permitted to buy coal at the lowest price; the Government would have received its coal at the lowest price—as low, at least, as at present—and industries operating at a considerable profit alone would have been compelled to pay the price called for by supply and demand.

I fully agree with my friend the Senator from New York that the excess-profits tax is a remedy by which the unreasonable profits or the excess profits can be taken from mines making a large profit and given to the Government; but I maintain also that this other plan which was presented to the Secretary of War, if it had been carried out, would have guaranteed to the great mass of the American people who are poor the lowest possible price and an abundant supply of coal. But that plan was not accepted. It received very little attention.

Mr. THOMAS. Mr. President, may I ask the Senator from Nebraska a question?

Mr. WADSWORTH. Mr. President, I will yield to the Senator from Colorado; but in doing so let me say that I do not want to prolong my occupancy of the floor. I want to finish as soon as I get a chance.

Mr. THOMAS. If it interrupts the Senator unduly, I will not insist. I simply wanted to ask the Senator from Nebraska whether the plan which he has just outlined also included transportation and distribution?

Mr. HITCHCOCK. I am not prepared to speak on that point. It fixed the price at the mines and would have guaranteed cheap coal to the poor people and to the Government. I suppose it contemplated transportation under Government orders.

I thank the Senator.

Mr. SHERMAN. Mr. President——

Mr. WADSWORTH. I yield to the Senator from Illinois.

Mr. SHERMAN. If it will not interrupt the continuity of the Senator's remarks, I will interpolate that in one of the principal coal-producing areas of the western country—I think as a direct result of the order that was made—30 per cent of the entire number of miners have been idle. That was before the Fuel Administration's order came to shut down.

Mr. WADSWORTH. Mr. President, I departed from my own argument a moment ago to discuss the remedy which the people have against what are termed extortionate prices, namely, the excess-profits tax, and the failure apparently on the part of some people in public life to realize that the supreme thing to be achieved in all this war effort is production. The matter of price is not so important as to have the goods. It does very little good to have eggs selling at 12 cents a dozen if there are not any eggs. It does no good to have coal at $2 a ton at the mouth of the mine if there is not enough coal; that is all.

Now, let me continue sketching what happened with respect to the coal situation.

I have said that at that meeting, attended by the coal operators, in which men participated who have been in the business all their lives and who knew it from top to bottom, an agreement was reached to the effect that coal would be sold at the mouth of the mine for not more than $3 a ton. This price would have permitted all of the mines of the country to continue to operate; some with large profits, others with small profits. The matter seemed to have been settled, and the public rejoiced at the reduction from $5 or $6 per ton down to $3 per ton. Within a few hours, however, literally within a day or two, other departments of the Government, mind you, showing the lack of coordination, speaking through their administrative heads, stepped in and announced that that price would not do; that it was excessive and extortionate; and the whole agreement was cast to the winds. Incidentally, the whole coal trade was thrown into confusion. No operator could tell what the Government intended to do with him; thousands of consumers of coal made up their minds that they were going to get coal cheaper than upon the basis of $3 per ton at the mine and postponed buying their winter supply.

That is human nature. Charts have been shown to the Committee on Military Affairs depicting the production of coal week by week and month by month through last summer and last autumn, and the charts show a distinct and severe falling off in the production of coal on the day following the refusal of the Secretary of War to agree to the $3 price. Downhill it went for weeks; and it was only later, when other measures were taken to relieve the situation, that the line on the chart showed an upward tendency. We lost that much coal at a time when it could have been transported. This condition of uncertainty existed for weeks, seriously affecting the production of coal in the United States from week to week and month by month. The production of coal sharply declined immediately following the upsetting of the $3 per ton price agreement. The small mines, hundreds of them, could not produce profitably and curtailed their operations. Later on the Fuel Administration was established, in compliance with the statute of the Congress, and there ensued long deliberation and considerable haggling over the price to be fixed by that administration. Finally it was fixed at $2 per ton, and in some instances at figures slightly in excess of that amount, and more mines closed. By that time the autumn season had overtaken us. Thousands of individuals and business concerns had postponed putting in their winter supply of coal. Coal production has decreased, and when actual winter overtook us the prices fixed by the Fuel Administration were made more liberal, and a desperate effort was made to mine and transport the coal to the points where it was needed for the winter. And, of course, the effort failed—it is failing to-day, Senators—for it is absolutely impossible for the railroads of the United States to transport, together with their other business, a sufficient amount of coal from day to day through the winter months to supply the great industrial and coal-consuming centers, such as the cities of New York, Boston, Philadelphia, and the industrial centers of New England and the Middle Atlantic States. The storms and blizzards of the winter are bound to make it impossible, and every coal operator and every railroad man has known this for years and years.

Hundreds of cars of coal strike the Jersey shore of New York Harbor, transported from the coal fields. When the coal arrives there much of it is frozen in one solid chunk in the cars, and it can not be unloaded. That is what happens in the wintertime. It has to be thawed out by steam, and you have to burn coal in order to thaw coal. It is a condition, of course, that should have been planned against. I do not blame any one man for not planning for it. You can not lay all the blame on the Fuel Administration. You can not lay it all on the Secretary of War. You can not lay it on the railroads, headed as they are now by Mr. McAdoo. Possibly we could not have evolved a machinery of

government which could have planned that early in the game; but I cite this as an illustration of what may happen to the country later on in some other matter, if we do not have some authority here in Washington to plan out the broad problems that will confront us, to help us prepare ourselves to meet the emergencies that may overtake us.

It is absolutely essential that a great proportion of the winter's coal supply be transported and put in the bins of the consumers during the summer and autumn season. There were instances where that was done. Large manufacturing plants put in thousands of tons of coal, as they have always done and as they must do in order to tide them through the winter. What kind of reception did they get when that fact became known? Great headlines in the newspapers saying, "Such-and-such a corporation is hoarding coal"; veiled threats from the Government here in Washington that that kind of practice must stop; that it was robbery of the people; when, as a matter of fact, it was really a simple precaution practiced every year for generations, a precaution that must be practiced by every great consumer of coal, or else his plant can not run through the winter.

As a result of this lack of planning—and that is all it is, a lack of planning, Senators, planning which should have been done in June, July, and August—we have great communities in the East and North starving for coal and an order issued by the Fuel Administration closing down thousands of factories and throwing out of work hundreds of thousands of men and women, costing millions of dollars in wages and delayed product, and crippling for the time being those very activities upon which we must depend for the winning of the war.

Again, on this question of planning, just let us remember how this order was put out. I am not going to discuss whether it was a wise order or not. The officers of the Aircraft Production Board testified to the Military Affairs Committee last week that they never heard of that order of the Fuel Administrator, which would close down every factory that burned coal, until the night it was published. Can you conceive of such a system, or such a lack of system, continuing in this country with any hope of being effective in war time?

Mr. President, let us picture to ourselves a great department of the Government like the Aircraft Board and the Signal Corps of the Army, working together and also with the Navy on this tremendous aviation program, involving the operation of some 450 manufacturing establishments. Without the slightest notice to that department, another department of the Government issues an order that closes all the establishments. Can we endure such a system? Can it be possible that anyone will deny that it is essentially a faulty system that permits such a thing to occur? That order was issued without the slightest notice to the gentlemen who are purchasing goods for our allies in this country; and several of the factories manufacturing goods for Great Britain and our other allies were closed down. They had no notice in advance, and it took them two or three days to get it straightened out. It took the Aircraft Board a couple of days to get it straightened out. There was no planning, no place in Washingon, apparently, where those things could be thought out on a sound basis, and instructions given to the different departments and different commissions to work together; no teamwork. The situation must have been somewhat desperate, Senators, because the Official Bulletin, published by the department presided over by Mr. Creel, in its issue of January 19, published to the people and to the world a list of all the munition factories in the United States that had been made exempt under that order; and when something is said upon the floor of the Senate about giving information useful to the enemy, it might be well to suggest that the censor of the United States be censored!

Mr. President, I insist that this painful situation has resulted from an utter lack of planning, from a lack of vision. The plain fact is that we have no agency in our war Government to-day charged with the duty of projecting its vision far into the future, anticipating the emergencies which may arise, and laying the plans by which we can meet and overcome those emergencies. I have cited the coal situation as an illustration of the penalty we must pay unless we reorganize this great effort along business lines, unless we centralize somewhere in our Government the authority and power to compel coordination between all those departments, commissions, boards, and bureaus.

We can not tell to-day just what the future may hold for us. Other emergencies will overtake us, and if we are wise and prudent and farsighted we shall establish some agency in our Government, whether it be called a war cabinet or by some other name, and it matters not at all to me whether you call it a war cabinet or not. I do not even insist that it be the result of the passage of an act of Congress. If it can be done without the passage of a bill, well and good. I do not care so very much how many men are placed on it. I do not care how they are defined in the Executive order that places them on it, or how they may be defined and described in the bill establishing such a board. My only plea is that something of that sort be done, and done soon.

I think I am safe in saying that the Committee on Military Affairs have no overweening pride of authorship about this particular bill. We have listened to this testimony. We have had before us some of the most distinguished gentlemen in the United States, men who know what they are talking about.

These men have come before us and told us what was in their hearts. In many respects they expressed alarm at the present situation, not that anyone was failing to do his duty, not that anyone was unwilling to work hard day and night, but simply that the organization under which we are endeavoring to carry on the greatest industrial effort that the world has ever seen was such as to threaten failure. That is all.

I want some agency to coordinate these great efforts, some men who can sit around a council table every day, morning, noon, and night, and devote their whole time and their every ability for planning out in advance the methods of meeting and overcoming the emergencies which will confront us in the future. If we do not do this we are more than likely to have another breakdown. It may come, Senators, in some other direction; I do not know; you do not know. We know something of the breakdown to-day with respect to coal and transportation. We know what the penalty is; we know how we are suffering; we know how our efforts in this war have been handicapped, cruelly so. There were 150 ships in New York Harbor two weeks ago unable to sail because they did not have coal. Is not that a penalty? We ought to take every means within our power to prevent a repetition of any such penalty being inflicted upon us.

Senators, if we are to win this war, and we have got to win it, we can not afford to have any breakdown anywhere. The situation is always difficult. We shall always make some mistakes. We shall always be perplexed here and there. No one would minimize that possibility. We must not be blind to the possibility. We must arm ourselves against its dangers, and the nation that is forearmed against danger is the nation that will repel danger.

Mr. SMOOT. May I suggest to the Senator from New York that he ask that the diagrams be put in the RECORD in connection with his speech, because I think his speech could hardly be understood without the diagrams.

Mr. WADSWORTH. I shall endeavor to have that done.

Mr. SMOOT. Will the Senator ask unanimous consent for that purpose?

Mr. WADSWORTH. I ask unanimous consent, then, in response to the suggestion, that the diagrams upon the wall may be reproduced in the RECORD.

The PRESIDING OFFICER. Is there objection? There being none, that will be the order.

During the delivery of Mr. WADSWORTH's speech,

The PRESIDING OFFICER. The Senator from New York will suspend for a moment. The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business, which will be stated by the Secretary.

The SECRETARY. A bill (H. R. 6361) to extend protection to the civil rights of members of the Military and Naval Establishments of the United States engaged in the present war.

Mr. OVERMAN. I ask unanimous consent that the unfinished business be temporarily laid aside.

The PRESIDING OFFICER. If there is no objection, that will be the order.

After the conclusion of Mr. WADSWORTH's speech,

Mr. THOMAS. Mr. President, on Friday morning, after the close of the morning business, I will submit to the Senate some remarks upon the bill which has been under discussion by the Senator from New York

In view of the temporary absence from the Chamber of the Senator from North Carolina [Mr. OVERMAN], having charge of the unfinished business, I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum is suggested. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Bankhead	Gore	Jones, Wash.	Nelson
Beckham	Hale	Kenyon	New
Chamberlain	Hardwick	King	Norris
Culberson	Henderson	Kirby	Overman
Cummins	Hitchcock	Knox	Penrose
Curtis	Hollis	Lodge	Pittman
Fletcher	James	McCumber	Poindexter
France	Johnson, Cal.	McKellar	Pomerene
Frelinghuysen	Johnson, S. Dak.	McNary	Ransdell
Gerry	Jones, N. Mex.	Myers	Shafroth

Sheppard	Smith, Ga.	Thomas	Underwood
Sherman	Smith, S. C.	Thompson	Vardaman
Shields	Smoot	Tillman	Williams
Simmons	Stone	Townsend	Wolcott
Smith, Ariz.	Sutherland	Trammell	

Mr. CURTIS. I desire to announce the absence of the Senator from Arizona [Mr. ASHURST], the Senator from North Dakota [Mr. GRONNA], the Senator from South Dakota [Mr. JOHNSON], and the Senator from Idaho [Mr. NUGENT] on official business.

Mr. KIRBY. I wish to announce the absence of my colleague [Mr. ROBINSON], on account of illness.

The PRESIDING OFFICER (Mr. NEW in the chair). Fifty-nine Senators have answered to their names. There is a quorum present.

SOLDIERS AND SAILORS' CIVIL RELIEF.

Mr. OVERMAN. I ask that the Senate proceed to the consideration of the unfinished business, House bill 6361.

The Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 6361) to extend protection to the civil rights of members of the Military and Naval Establishments of the United States engaged in the present war, which had been reported from the Committee on the Judiciary with amendments.

Mr. OVERMAN. I ask that the formal reading of the bill be dispensed with and that the amendments of the committee be acted upon as they are reached in the reading.

The PRESIDING OFFICER. If there be no objection, such will be the order of the Senate. The Chair hears none.

The Secretary proceeded to read the bill.

The first amendment of the Committee on the Judiciary was, on page 1, line 8, before the word "military," to strike out "the," so as to make the section read:

SEC. 100. That for the purpose of enabling the United States the more successfully to prosecute and carry on the war in which it is at present engaged, protection is hereby extended to persons in military service of the United States in order to prevent prejudice or injury to their civil rights during their term of service and to enable them to devote their entire energy to the military needs of the Nation, and to this end the following provisions are made for the temporary suspension of legal proceedings and transactions which may prejudice the civil rights of persons in such service during the continuance of the present war.

The amendment was agreed to.

The next amendment was, on page 3, line 1, after the words "Nurse Corps," to strike out "field clerks who have taken the oath as members of the military forces of the United States" and insert "Army field clerks; field clerks, Quartermaster Corps; civilian clerks and employees on duty with the military forces or detailed for service abroad in accordance with provisions of existing law," so as to read:

SEC. 101. (1) That the term "persons in military service," as used in this act, shall include the following persons and no others: All officers and enlisted men of the Regular Army, the Regular Army Reserve, the Officers' Reserve Corps, and the Enlisted Reserve Corps; all officers and enlisted men of the National Guard and National Guard Reserve recognized by the Militia Bureau of the War Department; all forces raised under the act entitled "An act to authorize the President to increase temporarily the Military Establishment of the United States," approved May 18, 1917; all officers and enlisted men of the Navy, the Marine Corps, and the Coast Guard; all officers and enlisted men of the Naval Militia, Naval Reserve force, Marine Corps Reserve, and National Naval Volunteers recognized by the Navy Department; all officers of the Public Health Service detailed by the Secretary of the Treasury for duty either with the Army or the Navy; any of the personnel of the Lighthouse Service and of the Coast and Geodetic Survey transferred by the President to the service and jurisdiction of the War Department or of the Navy Department; members of the Nurse Corps; Army field clerks; field clerks, Quartermaster Corps; civilian clerks and employees on duty with the military forces or detailed for service abroad in accordance with provisions of existing law; and members of any other body who have heretofore or may hereafter become a part of the military or naval forces of the United States.

The amendment was agreed to.

The next amendment was, on page 4, line 3, after the words "military service," to insert "or with reference to a person secondarily liable under such right"; so as to make the clause read:

(3) The term "person," as used in this act, with reference to the holder of any right alleged to exist against a person in military service or with reference to a person secondarily liable under such right, shall include individuals, partnerships, corporations, and any other forms of business association.

Mr. WOLCOTT. I ask that this amendment may be passed over.

Mr. OVERMAN. I have no objection, Mr. President.

The PRESIDING OFFICER. No objection having been offered, the amendment will be passed over.

The next amendment was, on page 4, after line 23, to insert:

SEC. 103. Whenever, pursuant to any provision of this act, the enforcement of any payment or the performance of any act is stayed, postponed, or suspended, or the entry or enforcement of any judgment or determination is stayed, postponed, or suspended, or liable to be set aside, then, with respect to the obligation or liability of any person who may be secondarily liable by reason of such contract or obligation, including guarantors, sureties, and indorsers, during the time of such stay, postponement, or suspension, or while such judgment or determination can be set aside, on the application of the person thus secondarily liable, by leave of court, such contract or obligation shall be construed as if such payment were not due or the time for the performance of such act had not arrived, provided that any interest falling due in the meantime be paid.

Mr. WOLCOTT. I ask that this amendment may be passed over.

Mr. OVERMAN. All right.

The PRESIDING OFFICER. No objection having been offered, the amendment will be passed over.

The next amendment was, under the subhead "General relief," on page 6, line 2, after the words "made if," to insert "it appears by the affidavit filed that," so as to read:

SEC. 200. That in any action or proceeding commenced in any court if there shall be a default of an appearance by the defendant the plaintiff before entering judgment shall file in the court an affidavit setting forth facts showing that the defendant is not in military service. If unable to file such affidavit plaintiff shall in lieu thereof file an affidavit setting forth either that the defendant is in the military service or that plaintiff is not able to determine whether or not defendant is in such service. If an affidavit is not filed showing that the defendant is not in the military service, no judgment shall be entered without first securing an order of court directing such entry, and no such order shall be made if it appears by the affidavit filed that the defendant is in such service until after the court shall have appointed an attorney to represent defendant and protect his interest and the court shall on application make such appointment.

The amendment was agreed to.

The next amendment was, on page 8, line 1, after the words "defendant to," to strike out "comply with the judgment or order sought" and insert "conduct his defense," so as to make the section read:

SEC. 201. That at any stage thereof any action or proceeding commenced in any court against a person in military service during the period of such service or within 60 days thereafter may, in the discretion of the court in which it is pending, on its own motion, and shall, on application to it by such person or some person on his behalf, be stayed as provided in this act, unless, in the opinion of the court, the ability of the defendant to conduct his defense is not materially affected by reason of his military service.

The amendment was agreed to.

The next amendment was, on page 9, line 15, after the word "others," to insert: "Where the person in military service is sued as a principal or as primarily obligated for any debt or damages, along with others who are sued as surety or as secondarily liable for such debt or damages, then such others not in military service may be proceeded against to final judgment if it shall be made to appear to the court that such person primarily liable has been adjudicated a bankrupt prior to the commencement of his military service," so as to make the section read:

SEC. 204. That any stay of any action, proceeding, attachment, or execution ordered by any court under the provisions of this act may, except as otherwise provided, be ordered for the period of military service and three months thereafter or any part of such period, and subject to such terms as may be just, whether as to payment in installments of such amounts and at such times as the court may fix or otherwise. Where the person in military service is a codefendant with others the plaintiff may nevertheless by leave of court proceed against the others. Where the person in military service is sued as a principal or as primarily obligated for any debt or damages, along with others who are sued as surety or as secondarily liable for such debt or damages, then such others not in military service may be proceeded against to final judgment if it shall be made to appear to the court that such person primarily liable has been adjudicated a bankrupt prior to the commencement of his military service.

Mr. OVERMAN. I ask that this amendment may be passed over, as a similar amendment went over on the request of the Senator from Delaware [Mr. WOLCOTT].

The PRESIDING OFFICER. Without objection, it is so ordered.

The next amendment was, under the subhead "Rent, installment contracts, mortgages," on page 10, line 13, after the word "occupied," to insert "solely," and in line 16, after the word "action," to insert "or proceeding," so as to make the clause read:

SEC. 300. (1) That no eviction or distress shall be made during the period of military service in respect of any premises for which the agreed rent does not exceed $50 per month, occupied solely for dwelling purposes by the wife, children, or other dependents of a person in military service, except upon leave of court granted upon application therefor or granted in an action or proceeding affecting the right of possession.

The amendment was agreed to.

The next amendment was, under the subhead "Insurance," on page 14, line 18, before the word "interest," to strike out "a vested" and insert "an," and in line 23, after the word "this," to strike out "act" and insert "article," so as to make the clause read:

SEC. 401. That the benefits of this article shall apply to any person in military service who is the holder of a policy of life insurance, when such holder shall apply for such benefits on a form prepared in accordance with regulations which shall be prescribed by the Secretary of the Treasury, and in all cases where under the terms of the contract of insurance any person other than the insured has an interest therein the consent of such other person shall be included in such application. Such form shall set forth particularly that the

application therein made is a consent to such modification of the terms of the original contract of insurance as are made necessary by the provisions of this article and by receiving and filing the same the insurer shall be deemed to have assented thereto, to the extent, if any, to which the policy on which the application is made is within the provisions of this article. The original of such application shall be sent by the insured to the insurer, and a copy thereof to the Bureau of War-Risk Insurance.

The amendment was agreed to.

The next amendment was, on page 15, line 5, before the word "Bureau," to strike "Second. That the" and insert "The"; in line 6, after the word "shall," to strike out "send to every person in the military service" and to insert "issue through suitable military and naval channels"; in line 7, after the word "explaining," to strike out "in simple language"; in line 8, after the word "and," to strike out "inclosing" and insert "shall furnish"; and in line 9, after the word "forms," to strike out "for the making of applications" and insert "to be distributed to those desiring to make application," so as to make the clause read:

The Bureau of War-Risk Insurance shall issue through suitable military and naval channels a notice explaining the provisions of this article and shall furnish forms to be distributed to those desiring to make application for its benefits.

The amendment was agreed to.

The next amendment was, in section 402, on page 15, line 12, after the word "any," to strike out "person" and insert "insured"; in the same line, after the words "respect of," to strike out "contracts of insurance" and insert "policies"; in line 15, after the word "policies," to strike out "held by," and insert "insuring"; in line 16, after the word "such," to strike out "contracts" and insert "policies"; in line 17, after the word "were," to strike out "made" and insert "issued"; and in line 22, after the word "made," to insert "or in respect of any policy on which there is outstanding a policy loan or other indebtedness equal to or greater than 50 per cent of the cash surrender value of the policy," so as to make the section read:

SEC. 402. That the benefits of this act shall be available to any insured in military service in respect of policies in force under their terms up to but not exceeding a face value of $5,000, irrespective of the number of policies insuring such person whether in one or more companies, when such policies were issued and a premium was paid thereon before September 1, 1917; but in no event shall the provisions of this article apply to any policy on which premiums are due and unpaid for a period of more than one year at the time when application for the benefits of this article is made or in respect of any policy on which there is outstanding a policy loan or other indebtedness equal to or greater than 50 per cent of the cash surrender value of the policy.

The amendment was agreed to.

The next amendment was, in section 403, on page 16, line 9, after the words "respect of," to strike out "contracts of insurance" and insert "policies," so as to make the section read:

SEC. 403. That the Bureau of War Risk Insurance shall, subject to regulations, which shall be prescribed by the Secretary of the Treasury, compile and maintain a list of such persons in military service as have made application for the benefits of this article, and shall (1) reject any applications for such benefits made by persons who are not persons in military service; (2) reject any applications for such benefits in excess of the amount permitted by section 402; and (3) reject any applications in respect of policies otherwise not entitled to the benefits of this article. Said bureau shall immediately notify the insurer and the insured in writing of every rejection or approval.

The amendment was agreed to.

The next amendment was, in section 404, on page 16, line 18, after the word "companies," to strike out "the Bureau of War Risk Insurance shall, in its discretion, select which of such applications shall be rejected, and where necessary for bringing" and insert "and the insured shall not in his application indicate an order of preference, the Bureau of War Risk Insurance shall reject such policies as have the inferior cash surrender value, so as to reduce"; in line 25, before the word "shall," to insert "and where necessary for this purpose," so as to make the section read:

SEC. 404. That when one or more applications are made under this article by any one person in military service in respect of insurance exceeding a total face value of $5,000, whether on one or more policies or in one or more companies, and the insured shall not in his application indicate an order of preference, the Bureau of War-Risk Insurance shall reject such policies as have the inferior cash surrender value, so as to reduce the total benefits conferred within the face value of $5,000, and where necessary for this purpose shall direct the insurer to divide any policy into two separate policies. The said bureau shall immediately notify the insurer and the insured in writing of such selection.

The amendment was agreed to.

The next amendment was, in section 405, on page 17, line 4, after the word "policy," to strike out "of insurance"; in line 6, after the word "and," to strike out "to"; in line 7, after the word "which," to insert "has been brought within"; and in the same line, after the word "article," to strike out "have been extended," so as to make the section read:

SEC. 405. That no policy which has not lapsed for the nonpayment of premium before the commencement of the period of military service of the insured, and which has been brought within the benefits of this article, shall lapse or be forfeited for the nonpayment of premium during the period of such service or during one year after the expiration of such period: *Provided*, That in no case shall this prohibition extend for more than one year after the termination of the war.

The amendment was agreed to.

The next amendment was, in section 408, page 19, line 3, after the name "United States," to strike out "in" and to insert "to"; in line 4, before the word "amount," to strike out "nearest"; and in the same line, after the word "of," to strike out "round figures" and to insert "that multiple of $100 nearest," so as to read:

SEC. 408. That the Secretary of the Treasury shall, within 10 days thereafter, deliver each month to the proper officer of each insurer, bonds of the United States to the amount of that multiple of $100 nearest to the monthly difference certified in respect of each insurer.

The amendment was agreed to.

The next amendment was, in section 409, page 19, line 21, after the word "upon," to strike out the words "the value of"; and in line 22, after the word "article," to insert "subject only to any lien existing at the time the policy became subject to this act," so as to make the section read:

SEC. 409. That the bonds so delivered shall be held by the respective insurers as security for the payment of the defaulted premiums with interest. To idemnify it against loss, the United States shall have a first lien upon any policy receiving the benefits of this article, subject only to any lien existing at the time the policy became subject to this act, and no loan or settlement shall be made by the insurer on such policy which may prejudice the security of such lien.

The amendment was agreed to.

The next amendment was, in section 603, page 27, line 24, after the word "thereafter," to insert:

Provided, That wherever under any section or provision of this act a proceeding, remedy, privilege, stay, limitation, accounting, or other transaction has been authorized or provided, the due exercise or enjoyment of which may extend beyond the period herein fixed for the termination of this act, such section or provision shall be deemed to continue in full force and effect so long as may be necessary to the exercise or enjoyment of the proceeding, remedy, privilege, stay, limitation, accounting, or transaction aforesaid.

The amendment was agreed to.

The next amendment was, in section 604, page 28, line 10, before the word "act," to strike out "rights" and to insert "relief," so as to make the section read:

SEC. 604. That this act may be cited as the soldiers' and sailors' civil relief act.

The amendment was agreed to.

Mr. OVERMAN. Mr. President, several Senators have advised me they would like to have this bill go over until to-morrow, not having had time to examine it. The reading of the bill having been concluded, I ask unanimous consent that it may be temporarily laid aside and that it remain the unfinished business.

The PRESIDING OFFICER. It is so ordered, without objection.

THE CALENDAR.

Mr. SMOOT. I ask unanimous consent that the Senate proceed to the consideration of the calendar under Rule VIII, and consider bills only to which there is no objection.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

BILLS PASSED OVER.

The bill (S. 1786) to amend certain sections of the act entitled "An act for making further and more effectual provision for the national defense, and for other purposes," approved June 3, 1916, and for other purposes, was announced as first in order.

Mr. SMOOT. Mr. President, at the request of a Senator who is absent I ask that that bill go over.

The PRESIDING OFFICER. The bill will go over.

The joint resolution (S. J. Res. 39) to appropriate $3,000,000 to enable the Secretary of Agriculture to prosecute the work of eradicating the southern cattle tick was announced as next in order.

Mr. SMOOT. Let that resolution go over.

The PRESIDING OFFICER. The joint resolution will go over.

The joint resolution (S. J. Res. 53) authorizing the President to appoint two additional Assistant Secretaries of Agriculture, and for other purposes, was announced as next in order.

Mr. SMOOT. Mr. President, the chairman of the Committee on Agriculture and Forestry is not present, and I understand that there is an amendment intended to be offered to this joint resolution. I therefore ask that the joint resolution may go over.

The PRESIDING OFFICER. The joint resolution will go over.

Mr. SMOOT. In order that the Senate may understand, Mr. President, that we are considering bills on the calendar, I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum is suggested. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Beckham	Johnson, Cal.	Penrose	Sutherland
Chamberlain	Jones, N. Mex.	Poindexter	Thomas
Culberson	Jones, Wash.	Pomerene	Townsend
Cummins	Kenyon	Reed	Trammell
Curtis	Kirby	Shafroth	Underwood
Dillingham	Knox	Sheppard	Vardaman
France	McKellar	Sherman	Wadsworth
Gerry	McNary	Shields	Warren
Hale	Martin	Smith, Ariz.	Watson
Hardwick	New	Smith, Ga.	Williams
Hollis	Norris	Smith, S. C.	
Henderson	Overman	Smoot	

The PRESIDING OFFICER. Forty-six Senators having answered to their names, there is not a quorum present. The Secretary will call the roll of absentees.

The Secretary called the names of the absent Senators, and Mr. RANSDELL, Mr. STONE, Mr. THOMPSON, and Mr. WOLCOTT answered to their names when called.

Mr. PITTMAN, Mr. JAMES, Mr. BANKHEAD, Mr. STERLING, Mr. TILLMAN, and Mr. MCCUMBER entered the Chamber, and answered to their names.

The PRESIDING OFFICER. Fifty-six Senators having answered to their names, there is a quorum present.

CESSIONS OF TERRITORY BY WISCONSIN AND MINNESOTA.

The bill (S. 2180) to approve mutual cessions of territory by the States of Wisconsin and Minnesota and the consequent changes in the boundary line between said States was considered as in Committee of the Whole, and read, as follows:

Be it enacted, etc., That Congress hereby consents to and approves of the cession by the State of Wisconsin to the State of Minnesota of the following-described territory, to wit:

All that territory formerly a part of the town of Buffalo, in the county of Buffalo and State of Wisconsin, which lies northerly and westerly of the following-described line, to wit: Commencing at the point in the center line of the main channel of the Mississippi River above Island No. 72, where the center line of the channel running between Island No. 72 and Island No. 71 intersects the center line of said main channel, and running thence easterly and southeasterly along the center line of the channel between said islands and between said Island No. 72 and the main Wisconsin shore to the center line of the main channel of said river, being lot No. 3 in section No. 1, township No. 18 north, of range No. 11 west of the fourth principal meridian, and commonly known and described as Island No. 72 in the Mississippi River, duly made by the act of the Legislature of the State of Wisconsin, known as chapter 64 of the session laws of 1917, approved April 9, 1917, and assented to and accepted by the State of Minnesota by act of its legislature, known as chapter 116 of the session laws of 1917, approved March 26, 1917, an authenticated copy of which act has been duly filed in the office of the secretary of state of the State of Wisconsin, and by the written acceptance of the governor of the State of Minnesota filed in the office of the secretary of state of the State of Wisconsin on the 24th day of April, 1917; and the boundary line between the said States at the location of said cession is hereby described and declared to be as follows, to wit: Commencing at the point of intersection of the center line of the main channel of the Mississippi River with the center line of the channel running between Island No. 72 and Island No. 71 and running thence easterly and southeasterly along the center line of the channel between said islands and between said Island No. 72 and the main Wisconsin shore to the center line of the main channel of said river.

SEC. 2. That Congress hereby consents to, and approves of, the cession by the State of Minnesota to the State of Wisconsin of the following-described territory, to wit:

All that territory formerly a part of the town of La Crescent, in the county of Houston and State of Minnesota, which lies easterly of the following-described line, to wit: Commencing in the northeast quarter of section No. 11, township No. 104 north, range No. 4 west of the fifth principal meridian, at the point of intersection of the center line of the west channel of the Mississippi River with the center line of the main east channel of said river and running thence southeasterly along the center line of said west channel to its intersection with the center line of said east channel of said river in the easterly part of section No. 24 in said township and range, duly made by the act of the Legislature of the State of Minnesota known as chapter 116 of the session laws of 1917, approved March 26, 1917, and assented to and accepted by the State of Wisconsin by act of its legislature known as chapter 64 of the session laws of 1917, approved April 9, 1917, an authenticated copy of which act has been duly filed in the office of the secretary of state of the State of Minnesota, and by the written acceptance of the governor of the State of Wisconsin, filed in the office of the secretary of state of the State of Minnesota on April 17, 1917; and the boundary line between the said States at the location of said cession is hereby described and declared to be the center line of the west channel of the Mississippi River beginning at the point of intersection of said center line with the center line of the main east channel of said river, in the northeast quarter of section No. 11, township No. 104 north, range No. 4 west of the fifth principal meridian, and running thence southeasterly to the point of intersection of the said center line of said west channel with the center line of the main east channel of said river, in the easterly part of section No. 24, in said township and range.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

REGISTRATION REGULATIONS.

The concurrent resolution (H. Con. Res. 9) authorizing the printing in one document the act to increase temporarily the Military Establishment, the registration regulations, and the proclamations of the President fixing June 5, 1917, as date of registration was announced as next in order.

Mr. SMITH of Arizona. Mr. President, I do not think that resolution ought to remain longer on the calendar. The time has passed when the printing of the documents covered by the resolution would be of any value. I do not see the necessity of expending any money in that direction now, and I therefore move that the concurrent resolution be indefinitely postponed.

The motion was agreed to.

RETIREMENT SYSTEM IN LIGHTHOUSE SERVICE.

The bill (S. 1004) to provide for the retirement of officers and employees of the Bureau of Lighthouses and the Lighthouse Service was considered as in Committee of the Whole.

The bill had been reported from the Committee on Commerce with an amendment to strike out all after the enacting clause and insert:

That hereafter all officers and employees engaged in the field service or on vessels of the Lighthouse Service who shall have reached the age of 65 years, after having been 30 years in the active service of the Government, may, at their option, be retired from further performance of duty; and all such officers and employees who shall have reached the age of 70 years shall be compulsorily retired from further performance of duty: *Provided*, That the annual compensation of persons so retired shall be a sum equal to one-fortieth of the last annual pay received for each year of active service in the Lighthouse Service, or in a department or branch of the Government having a retirement system, not to exceed in any case thirty-fortieths of the last annual pay received: *Provided further*, That such retirement pay shall not include any amount on account of subsistence or other allowance.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to provide for a retirement system in the Lighthouse Service."

SALARIES OF LIGHTHOUSE KEEPERS.

The bill (S. 1005) to regulate the salaries of keepers of lighthouses was considered as in Committee of the Whole.

The bill had been reported from the Committee on Commerce with an amendment, in line 10, after the word "average," to insert the word "of," and in the same line, after the numerals "$700," to insert the words "per annum," so as to make the bill read:

Be it enacted, etc., That section 4673 of the Revised Statutes of the United States be amended to read as follows:

"SEC. 4673. The Secretary of Commerce is authorized to regulate the salaries of the respective keepers of lighthouses in such manner as he deems just and proper, but the whole sum allowed for such salaries shall not exceed an average of $700 per annum to each keeper; and the authority herein granted to regulate the salaries of keepers of lighthouses shall not be abridged or limited by the provisions of section 7 of the general deficiency appropriation act approved August 26, 1912, as amended by section 4 of the legislative, executive, and judicial appropriation act approved March 4, 1913."

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

AIDS TO NAVIGATION.

The bill (S. 993) to authorize aids to navigation and for other works in the Lighthouse Service, and for other purposes, was considered as in Committee of the Whole.

The bill had been reported from the Committee on Commerce with amendments.

The first amendment was, in section 1, page 1, line 11, after the name "John," to strike out "Rogers" and insert "Rodgers," so as to make the section read:

That the Secretary of Commerce is hereby authorized to establish, provide, or improve the following aids to navigation and other works in the Lighthouse Service, under the Department of Commerce, in accordance with the respective limits of cost hereinafter respectively set forth, which shall in no case be exceeded:

THIRD LIGHTHOUSE DISTRICT.

Constructing or purchasing and equipping a lighthouse tender to replace the tender *John Rodgers*, worn out in service in the third lighthouse district, or in the Lighthouse Service generally, $180,000.

The amendment was agreed to.

The next amendment was, in section 4, page 3, before the word "furnishing," to strike out "That for" and insert "For," so as to make the section read:

SEC. 4. For furnishing the principal isolated light stations with telegraph, telephone, or radio communication systems, so far as funds permit, to be expended in cooperation with the Treasury Department, in connection with the coast communication system of the Coast Guard, $100,000.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

BUSINESS PASSED OVER.

The bill (S. 1725) to stimulate the production of food upon private and public lands within reclamation projects, and for other purposes, was announced as next in order.

Mr. SMOOT. Let that bill go over.

The PRESIDING OFFICER. It is so ordered.

The resolution (S. Res. 91) extending the authority of and provision for the committee appointed under Senate resolution 92, Sixty-third Congress, first session, to investigate the charges of alleged attempts to influence legislation was announced as next in order.

Mr. SMOOT. Let that go over.

The PRESIDING OFFICER. The resolution will be passed over.

The resolution (S. Res. 101) directing the Secretary of the Navy to furnish copies of the official dispatches upon which was based the statement of the chairman of the Committee on Public Information in regard to the encounter of the American fleet with submarines, together with other information about said Committee on Public Information, was announced as next in order.

Mr. SWANSON. Let that resolution go over.

The PRESIDING OFFICER. It is so ordered.

The joint resolution (S. J. Res. 25) providing for the appointment of a joint committee to be known as the joint committee on the conduct of the war was announced as next in order.

Mr. OVERMAN. Let that joint resolution go over.

The PRESIDING OFFICER. It is so ordered.

The concurrent resolution (S. Con. Res. 10) authorizing the appointment of a joint committee to investigate the causes of the recent riots in East St. Louis, Ill., and to report thereon was announced as next in order.

Mr. KENYON. Let that go over.

The PRESIDING OFFICER. It is so ordered.

The bill (S. 2717) prescribing rules for the government and regulation of the land and naval forces during the period of the existing war with Germany was announced as next in order.

Mr. HARDWICK. Let that bill go over.

The PRESIDING OFFICER. It is so ordered.

The joint resolution (S. J. Res. 2) proposing an amendment to the Constitution of the United States conferring upon women the right of suffrage was announced as next in order.

Mr. SMOOT. Let the joint resolution go over.

The PRESIDING OFFICER. It is so ordered.

The bill (S. 2854) to amend the naturalization laws was announced as next in order.

Mr. HARDWICK. May I inquire if that is the bill introduced by the Senator from New York [Mr. CALDER]?

The PRESIDING OFFICER. It is.

Mr. HARDWICK. I should not like to have that bill passed in his absence, and I therefore ask that it go over.

The PRESIDING OFFICER. The bill will be passed over.

MINING ON INDIAN RESERVATIONS.

The bill (S. 385) to authorize mining for metalliferous minerals on Indian reservations was announced as next in order.

Mr. SMOOT. Let that go over.

Mr. SMITH of Arizona. I hope the Senator from Utah will not insist on that bill going over.

Mr. SMOOT. I suggest that the bill go over, and I will confer with the Senator about it.

Mr. SMITH of Arizona. I do not know when we will take up the calendar again.

Mr. SMOOT. I have no doubt there will be ample opportunity to take up the calendar again.

Mr. SMITH of Arizona. I am extremely anxious that that bill shall pass, and, if I can do so without trespassing upon the time of the Senate, I should like to say just a word in regard to it. Perhaps the Senate is not aware that nearly 50 per cent of the land in the State of Arizona is held in reserves. This bill gives the right to mine the valuable metals on such reservations, and the benefit of it to a great extent will go to the Indians themselves. It seems perfect folly to withhold from some sort of enterprise and development these great resources that are lying unused and will lie unused for the next hundred years if some such action as this is not taken. I appeal to the Senator from Utah on the next call of the calendar not to object to the consideration of this bill. I will consent to its going over now, although I should very much like to have the bill acted upon immediately.

Mr. SMOOT. I will say to the Senator from Arizona that he is familiar with the grounds of my objection to this class of legislation. Between now and the time when the calendar is again called I will consult with the Senator and see if some kind of an amendment can not be framed upon which we can agree that will make the bill more specific, so that if it should ever be attempted in the future to point to the bill as a precedent, the bill itself will show that it could not be so considered.

Mr. SMITH of Arizona. I am in hearty sympathy with the Senator's objection to establishing a precedent looking in the direction of the leasing of the public lands of the United States, but the very title and purpose of this bill, in my opinion, take it entirely out of that line of proposed legislation.

The PRESIDING OFFICER. Objection being made, the bill will go over.

JOHN FLANIGAN.

The bill (S. 387) for the relief of John Flanigan was considered as in Committee of the Whole. It directs the Secretary of the Treasury to pay to John Flanigan $300 for a team of horses lost and destroyed in a flood in 1914 while they were being used by the employees of the Indian Bureau in the survey of Indian lands in Arizona.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

ALFRED CLUFF AND OTHERS.

The bill (S. 388) for the relief of Alfred Cluff, Orson Cluff, Henry E. Norton, William B. Ballard, Elijah Hancock, Mrs. Susan R. Saline, Oscar Mann, Celia Thayne, William E. Cox, Theodore Farley, Adelaide Laxton, Clara L. Tenney, George M. Adams, Charlotte Jensen, Sophia Huff, Peter H. McBride, and David Edward Adams was announced as next in order.

Mr. OVERMAN. I think that bill had better go over until the Senator who introduced it or some member of the committee is present to explain it.

The PRESIDING OFFICER. The bill will be passed over.

Mr. OVERMAN subsequently said: Mr. President, I understand that a bill similar to Senate bill 388 has heretofore passed the Senate, and I withdraw my objection to the consideration of the bill.

The PRESIDING OFFICER. Is there objection to the present consideration of Senate bill 388?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Indian Affairs with amendments, on page 2, line 11, before the word "to," to strike out "and," and on the same page, line 12, after the numerals "$7,500," to insert "to Mrs. M. J. Ellsworth, of Mesa City, Ariz., $2,500, and to the heirs of J. H. Frisby, late of Provo, Utah, $3,000," so as to make the bill read:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury of the United States not otherwise appropriated, to Alfred Cluff, of Mesa, Ariz., $2,500; to Orson Cluff, of Mesa, Ariz., $3,000; to Henry E. Norton, of Pima, Ariz., $5,000; to William B. Ballard, of Pima, Ariz., $3,500; to Elijah Hancock, of Eden, Ariz., $6,000; to Mrs. Susan R. Saline, of Pima, Ariz., $6,000; to Oscar Mann, of Provo Bench, Utah, $2,500; to Celia Thayne, of Orangeville, Utah, $5,000; to William E. Cox, of Union, Utah, $2,500; to Theodore Farley, of Provo Bench, Utah, $2,500; to Adelaide Laxton, of Show Low, Ariz., $1,000; to Clara L. Tenney, of Taylor, Ariz., $5,000; to George M. Adams, of Show Low, Ariz., $3,000; to Charlotte Jensen, of Eagar, Ariz., $5,000; to Sophia Huff, of Bluewater, N. Mex., $1,500; to Peter H. McBride, of Pima, Ariz., $5,000; to David Edward Adams, of Central, Ariz., $7,500; to Mrs. M. J. Ellsworth, of Mesa City, Ariz., $2,500, and to the heirs of J. H. Frisby, late of Provo, Utah, $3,000, in full compensation for loss and damage sustained by reason of the eviction and expulsion of the persons aforesaid from lands at the place known as Forest Dale, in Apache County, Ariz., which were settled and cultivated by the parties aforesaid as part of the public domain in the year 1878, which said lands so settled upon and improved were, at the time of settlement thereon by said persons hereinbefore set out, part and parcel of the public domain and public lands of the United States of America, but thereafter, and to wit, during the year 1882, the northern boundary line of the White Mountain or San Carlos Indian Reservation was removed and extended north about 10 miles, more or less, the result of which said extension of said boundary line did cause said lands theretofore settled upon by the persons herein above mentioned and said settlement of Forest Dale to be included within and made a part and parcel of said Indian reservation, and by reason of said inclusion of said lands aforesaid and said settlement of Forest Dale aforesaid, within said Indian reservation, the persons hereinbefore mentioned were evicted; and said sums aforesaid are hereby appropriated to be used and utilized for the purpose of reimbursing the persons aforesaid for their improvements, crops, personal property, and value of appurtenances incident to the homestead rights of said persons aforesaid seized, taken, and destroyed: *Provided, however*, That the Secretary of the Treasury shall make no payment to any of the above-named persons, or to their personal representatives, for any of said losses and damages sustained by reason of the eviction and expulsion of said persons from said lands until and unless the Secretary of the Interior shall have ascertained and determined that in his opinion and judgment the amounts proposed to be paid to the said above-named persons for such loss and damage aforementioned are fair, just, equitable, and in proportion to the losses and damages sustained by the

above named persons: *Provided further*, That none of the moneys proposed to be paid by this act shall be paid to any person other than the claimant named herein or his or her personal representative, and that no lien of any kind or nature shall be recognized by the Secretary of the Interior in making payment hereunder, and that no attorney's lien shall attach to any amount of money appropriated under this act.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill for the relief of Alfred Cluff, Orson Cluff, Henry E. Norton, William B. Ballard, Elijah Hancock, Mrs. Susan R. Saline, Oscar Mann, Celia Thayne, William E. Cox, Theodore Farley, Adelaide Laxton, Clara L. Tenney, George M. Adams, Charlotte Jensen, Sophia Huff, Peter H. McBride, David Edward Adams, Mrs. M. J. Ellsworth, and the heirs of J. H. Frisby."

SUSPENSION OF PAYMENTS ON PUBLIC-LAND ENTRIES.

The bill (S. 2865) for the suspension of payments on public lands by entrymen in the military or naval service of the United States was considered as in Committee of the Whole.

The bill was read, as follows:

Be it enacted, etc., That if any person has made entry prior to July 1, 1917, under any of the public-land laws of the United States upon which payments are required, including the entry of ceded Indian lands, shall have enlisted or shall have been drafted into the military or naval service of the United States the time within which such payments are required shall be suspended during the period of such military or naval service.

Mr. SMOOT. I see the Senator from Montana [Mr. MYERS] is present in the Chamber, and I should like to ask the Senator if we did not pass similar legislation to this at the last session of Congress?

Mr. MYERS. No bill for this purpose has become a law. This measure was drawn by the department, and sent down with the request that it be introduced.

Mr. SMOOT. I know it is a department bill, and I am quite sure we passed a similar bill; but I am not positive whether the House passed it or whether it became a law.

Mr. MYERS. I am sure it has not become a law.

Mr. SMOOT. I presume it will not hurt to pass it again.

Mr. MYERS. The department drew the bill and asked that it be introduced; that is all I know about it.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

FLATHEAD INDIAN RESERVATION, MONT.

The bill (S. 932) to provide for stock-watering privileges on certain unallotted lands on the Flathead Indian Reservation, Mont., was considered as in Committee of the Whole. It proposes to amend the act of April 23, 1904 (33 Stat. L., 302), entitled "An act for the survey and allotment of lands now embraced within the limits of the Flathead Indian Reservation, in the State of Montana," and all amendments thereto, by adding thereto the following section:

SEC. 26. That the Secretary of the Interior be, and he hereby is, authorized and directed to designate as valuable for stock-watering purposes such of the unallotted and unreserved lands of the Flathead Indian Reservation which border on streams as may be subject to settlement and disposal under sections 9 and 13 of this act. Lands so designated shall be disposed of under the terms of this act, subject to the condition, which shall be expressed in all patents issued for lands so designated, that existing trails crossing said lands shall be kept open to the extent necessary to provide access for live stock to streams adjacent to said lands. The Secretary of the Interior is authorized and directed to perform all acts necessary to the enforcement of this condition.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

SELECTION OF LIEU LANDS.

The bill (S. 934) authorizing the State of Montana to select other lands in lieu of lands in section 16, township 2 north, range 30 east, within the limits of the Huntley irrigation project and the ceded portion of Crow Indian Reservation in said State, was considered as in Committee of the Whole. It authorizes the State of Montana to select, in lieu of lands in section 16, township 2 north, range 30 east, within the limits of the lands withdrawn for the Huntley irrigation project and formerly within the ceded portion of the Crow Indian Reservation in Montana, other unappropriated surveyed nonmineral public lands of equal area situated within the limits of that State in the manner provided in the act approved February 28, 1891 (26 Stat. L., 796), entitled "An act to amend sections 2275 and 2276 of the Revised Statutes of the United States providing for the selection of lands for educational purposes in lieu of those appropriated for other purposes"; but such selection of lands by the State shall be a waiver of its right to the lands in section 16; and the homestead entries heretofore erroneously allowed for a portion of section 16 shall become valid, subject to future compliance with the law applicable thereto.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

CITY OF BOZEMAN, MONT.

The bill (S. 936) to authorize the Secretary of the Treasury to convey to the city of Bozeman, Mont., certain land for alley purposes was considered as in Committee of the Whole. It authorizes the Secretary of the Treasury to convey, by quitclaim deed, to the city of Bozeman, Mont., for the purpose of a public alley, and for no other purpose, all the right, title, and interest of the United States in and to a strip of land 10 feet in width off of the rear of the Federal building site in the city of Bozeman; but the adjacent and abutting property owners shall also quitclaim to the city a strip of land of sufficient width to create a 17½-foot alley; and the city of Bozeman shall open the alley and improve and maintain it as other public alleys of the city are improved and maintained.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

CULTIVATION OF HOMESTEADS.

The bill (S. 937) to amend an act entitled "An act to amend sections 2291 and 2297 of the Revised Statutes of the United States, relating to homesteads," was considered as in Committee of the Whole. It proposes to amend the provisions pertaining to cultivation by entrymen of homestead lands as set forth in the section of the act approved June 6, 1912, entitled "An act to amend section 2291 and section 2297 of the Revised Statutes of the United States, relating to homesteads," so as to read as follows:

Provided further, That the entryman shall, in order to comply with the requirements of cultivation herein provided for, cultivate not less than one-sixteenth of the area of his entry, beginning with the second year of the entry, and not less than one-eighth, beginning with the third year of the entry, and until final proof, except that in the case of entries under section 6 of the enlarged homestead law double the area of cultivation herein provided shall be required: *And provided further*, That whenever the lands entered are covered with a growth of poles, brush, and scrub timber the entryman in lieu of cultivation required herein may make improvements upon his entry by slashing, clearing, or in any other way preparing the land for cultivation, said improvements to aggregate an amount of not less than $150: *And provided further*, That the above provision as to cultivation shall not apply to entries under the act of April 28, 1904, commonly known as the Kinkaid Act, or entries under the act of June 17, 1902, commonly known as the reclamation act, and that the provisions of this section relative to the homestead period shall apply to all unperfected entries as well as entries hereafter made upon which residence is required.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILL PASSED OVER.

The bill (S. 939) relating to the duties of registers of United States land offices and the publication in newspapers of official land-office notices was announced as next in order.

Mr. SMOOT. Let that bill go over.

Mr. MYERS. Mr. President, I should just like to say that that bill has passed the Senate twice in exactly the same form, once during the last Congress.

Mr. SMOOT. I know it has.

The PRESIDING OFFICER. The bill will be passed over.

FORT PECK INDIAN RESERVATION, MONT.

The bill (S. 955) providing for noncontiguous homestead entries within the former Fort Peck Indian Reservation, Mont., of land of the character described in the enlarged homestead act of February 19, 1909, was considered as in Committee of the Whole. It proposes that any person who has made or shall make homestead entry subject to the provisions of the act approved May 30, 1908 (35 Stats., p. 558), entitled "An act for the survey and allotment of lands now embraced within the limits of the Fort Peck Indian Reservation, in the State of Montana," etc., of land of the character provided by the enlarged homestead act approved February 19, 1909 (35 Stats., p. 639), and who is unable, because there is no vacant land of like character contiguous to his original entry, to enter additional land, may be permitted to make an additional entry, also subject to said act of May 30, 1908, of noncontiguous land of the character described in the enlarged homestead act, above cited, which shall not, together with the original entry, exceed 320 acres; such additional entry to be in reasonably compact form and subject to the general provisions of the homestead laws relating to improvements, cultivation, and final proof, provided that the land originally entered and that covered by the additional entry shall have first been designated under the aforesaid enlarged homestead act.

Mr. SMOOT. Mr. President, I want to ask the Senator from Montana if this is not a bill to which there is an objection on the part of the department?

Mr. MYERS. No, Mr. President; the department has no objection to this bill. The bill was passed by the Senate during the last Congress. The department has no objection to it. It has never passed the House, but it passed the Senate during the last Congress.

Mr. SMOOT. I may be mistaken, Mr. President, but I understood that there was an objection by the department to the passage of this bill; and I call the Senator's attention to the fact that there is no report from the department in regard to it.

Mr. MYERS. It was reported on at the last Congress.

Mr. SMOOT. Does the Senator say that this identical bill passed at the last session of Congress?

Mr. MYERS. Oh, yes; it passed at the last session of Congress.

The PRESIDING OFFICER. If there be no amendment to be proposed, the bill will be reported to the Senate.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

COCONINO AND TUSAYAN NATIONAL FORESTS, ARIZ.

The bill (S. 389) to extend the time for cutting timber on the Coconino and Tusayan National Forests, Ariz., was considered as in Committee of the Whole. It proposes to extend the rights of the Saginaw & Manistee Lumber Co., and its successors in interest, to cut and remove the timber from such of the lands within the Coconino and Tusayan National Forests as were reconveyed to the United States, subject to outstanding timber right contracts held by said company, under the rules, regulations, and conditions imposed by the Secretary of the Interior at the time of said reconveyance, to and until the 31st day of December, anno Domini 1950, provided that said company executes and enters into an agreement with the Secretary of Agriculture to comply with such additional requirements as may be mutually agreed upon to promote forest-fire protection, reforestation, and forestry administration; but the act shall not be construed to confer upon said company any other rights in addition to those held by the company at the time of said reconveyance, and in the absence of the execution of such an agreement, the act shall neither extend nor restrict the present rights of said company.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

LANDS IN MONTANA.

The joint resolution (S. J. Res. 24) to permit of the disposition of certain lands in Montana ceded by the Crow Indians, was considered as in Committee of the Whole.

The Secretary read the joint resolution, as follows:

Resolved, etc., That nothing contained in section 31 of the act of March 3, 1891, entitled "An act making appropriations for the current and contingent expenses of the Indian department, and for fulfilling treaty stipulations with various Indian tribes, for the year ending June 30, 1892, and for other purposes," shall hereafter be so construed as to prohibit the offering at public sale of any tract of land affected thereby, which is otherwise subject to such offering, under the provisions of section 2455, United States Revised Statutes, as amended by the act of March 28, 1912 (37 Stat. L., p. 77): *Provided*, That in no order for an offering of such lands shall a minimum price be fixed less than the price therefor fixed by existing laws.

SEC. 2. That all lands not otherwise reserved that have been withdrawn or classified as coal lands, or are valuable for coal, restored to entry under the authority of the act approved April 27, 1904 (33 Stats., p. 352), entitled "An act to ratify and amend an agreement with the Indians of the Crow Reservation in Montana, and making appropriations to carry the same into effect," shall be subject to disposal in the same manner and under such terms and conditions as have been or may be provided for the disposition of nonmineral lands opened to entry or sale by the aforesaid act: *Provided*, That such disposals and the lands affected thereby shall be subject to all the provisions of the act approved June 22, 1910 (36 Stats., p. 583), entitled "An act to provide for agricultural entries on coal lands," hereby extended thereto.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILL PASSED OVER.

The bill (S. 950) to provide for the nonmineral entry of lands withdrawn, classified, or reported as containing coal, phosphate, nitrate, potash, oil, gas, or asphaltic minerals in Alaska was announced as next in order.

Mr. SMOOT. Let that bill go over, Mr. President.

The PRESIDING OFFICER. The bill will be passed over.

RIGHTS TO SETTLERS ON RECLAMATION PROJECTS.

The bill (S. 44) granting additional rights to settlers on reclamation projects was considered as in Committee of the Whole.

The Secretary read the bill, as follows:

Be it enacted, etc., That any person otherwise qualified to enter a homestead under the laws of the United States who shall have made entry of a tract less than 160 acres within or under any reclamation project, or who, having made an entry of any area under such project, has been required to release or surrender a part thereof, that the same may conform in extent to the farm unit prescribed for such project or the part thereof embracing the land so entered by him, may make an additional homestead entry of so much land open to such entry, and not within or under any reclamation project or withdrawn in anticipation of the initiation of such, as with the land which he theretofore entered or was permitted to retain, as shall amount to 160 acres.

SEC. 2. That any person otherwise qualified to enter a homestead under the laws of the United States who shall have made entry of a tract of less than 160 acres outside of a reclamation project may make an additional entry of a farm unit subject to entry within a reclamation project of such area as added to his original entry will not exceed 160 acres.

SEC. 3. That all laws in relation to homesteads shall be applicable to such additional entries.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

TIMBER FOR MINING PURPOSES.

The bill (S. 26) authorizing the cutting of timber for mining purposes by corporations organized in one State and conducting mining operations in another was considered as in Committee of the Whole. It proposes that section 1 of an act entitled "An act authorizing the citizens of Colorado, Nevada, and the Territories to fell and remove timber on the public domain for mining and domestic purposes," approved June 3, 1878, chapter 150, page 88, volume 20, United States Statutes at Large, and section 8 of an act entitled "An act to repeal timber-culture laws, and for other purposes," approved March 3, 1891, as amended by an act approved March 3, 1891, chapter 559, page 1093, volume 26, United States Statutes at Large, and the several acts amendatory thereof, be extended so that it shall be lawful for the Secretary of the Interior to grant permits to corporations incorporated under a Federal law of the United States or incorporated under the laws of a State or Territory of the United States, other than the State in which the privilege is requested, said permits to confer the same rights and benefits upon such corporations as are conferred by the aforesaid acts upon corporations incorporated in the State in which the privilege is to be exercised, provided that all such corporations shall first have complied with the laws of that State so as to entitle them to do business therein; but nothing herein shall operate to enlarge the rights of any railway company to cut timber on the public domain.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILL PASSED OVER.

The bill (S. 23) granting to the State of Nevada 7,000,000 acres of land in said State for the use and benefit of the public schools of Nevada and the State university of the State of Nevada was announced as next in order.

Mr. SMOOT. Let that go over, Mr. President.

The PRESIDING OFFICER. The bill will be passed over.

ROCKY MOUNTAIN NATIONAL PARK.

The bill (S. 1555) to repeal the last proviso of section 4 of an act to establish the Rocky Mountain National Park, in the State of Colorado, and for other purposes, approved January 26, 1915, was announced as next in order.

Mr. SMOOT. I think that bill had better go over.

Mr. SHAFROTH. Mr. President, I hope the Senator will not object to the consideration of the bill. It passed the Senate at the last Congress, and the provision repealed is one that is not proper in a bill of this kind. The passage of the bill is recommended by the Secretary of the Interior, and it seems to me we ought to pass it.

Mr. SMOOT. I shall not object, although I will say to the Senator that I am not in favor of this legislation, because in the act creating the park there is a limitation of a certain amount on the sum which may be expended annually for the maintenance of the park. This bill simply repeals the limitation, so that hereafter the appropriations can be $100,000 annually, or any other sum, instead of $10,000. But I am not going to object, the Senate having passed the bill.

Mr. SHAFROTH. Mr. President, in answer to the remarks of the Senator from Utah I will say that this limitation of $10,000 is perfectly ridiculous in this case. A limitation of $10,000 in the case of a park that gets more visitors than any other three national parks in the entire United States is not sufficient, as a matter of fact, to pay for patrolling the park, let alone the various other expenditures that are necessary. The question of appropriations for the park will come before the Appropriations Committee when they are needed, but it seems to me the bill ought to pass.

Mr. SMOOT. In answer to the Senator I will say that the bill establishing the park would not have passed originally if it had provided for an annual expenditure of more than $10,000. The presence of that limitation in the bill was one of the reasons for its passage. As I say, however, I am not going to object to the consideration of the bill at this time, it having passed the Senate once before.

The Senate, as in Committee of the Whole, proceeded to consider the bill. It repeals the last proviso of section 4 of an act entitled "An act to establish the Rocky Mountain National Park, in the State of Colorado, and for other purposes," approved January 26, 1915, which is as follows:

Provided, That no appropriation for the maintenance, supervision, or improvement of said park in excess of $10,000 annually shall be made unless the same shall have first been expressly authorized by law.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

CONSOLIDATION OF NATIONAL FOREST LANDS.

The bill (S. 93) to consolidate national forest lands, was announced as next in order.

Mr. POINDEXTER. Let that bill go over, Mr. President.

Mr. MYERS. Mr. President, I appeal to the Senator who objected to the consideration of the bill to let it be read and see if there is any objection to it. It is greatly needed, I think.

Mr. SMOOT. Mr. President, I will say that the bill was sent to me by the Secretary of the Interior with the request that I introduce it. I introduced it at the last session of Congress, and it was passed. The object of the bill is to allow the consolidation of lands within forest reserves, so that the administration of the forests will be better attended to than it has been in the past, and it will do away with the many individual bills for the transfer of lands within forest reserves for the same purpose.

Mr. MYERS. The bill was very fully considered in committee, and I hope the objection will be withdrawn.

Mr. STERLING. Mr. President, in looking over the report of the committee in regard to this bill I find a letter from the Secretary of the Interior recommending certain amendments. I will ask the Senator from Utah if that suggestion of the Secretary of the Interior has been followed?

Mr. SMOOT. I will say to the Senator that the letter from the Secretary of the Interior was dated May 18, 1916, and the clerk of the committee has put in that letter without noting that the amendments suggested were made in the bill as it has been reported.

Mr. MYERS. The amendments were made. I called attention to them myself and had them made.

Mr. POINDEXTER. Mr. President, I will say that the letter from the Secretary of the Interior set out in the report states that he sees no reason for the passage of the bill, so evidently he is not very much interested in it. I will look into it, however, and take it up at another time.

Mr. SMOOT. He asks that the bill be referred to the Secretary of Agriculture, as of course the forest reserves are under that department, and if the Senator will turn over the page he will find a letter from the Acting Secretary of Agriculture stating that the department would approve the passage of the bill.

Mr. POINDEXTER. I have examined it.

The PRESIDING OFFICER. Does the Senator from Washington insist upon his objection?

Mr. POINDEXTER. I do.

The PRESIDING OFFICER. The bill will be passed over.

AGRICULTURAL ENTRIES ON ALASKAN COAL LANDS.

The bill (S. 95) to provide for agricultural entries on coal lands in Alaska was considered as in Committee of the Whole.

The Secretary read the bill, as follows:

Be it enacted, etc., That from and after the passage of this act homestead claims may be initiated by actual settlers for public lands of the United States in Alaska known to contain workable coal, oil, or gas deposits, or that may be valuable for the coal, oil, or gas contained therein, and which are not otherwise reserved or withdrawn, whenever such claim shall be initiated with a view of obtaining or passing title with a reservation to the United States of the coal, oil, or gas in such lands, and of the right to prospect for, mine, and remove the same; and any settler who has initiated a homestead claim in good faith on lands containing workable deposits of coal, oil, or gas, or that may be valuable for the coal, oil, or gas contained therein, may perfect the same under the provisions of the laws under which the claim was initiated, but shall receive the limited patent provided for in this act: *Provided, however*, That should it be discovered at any time prior to the issuance of a final certificate on any claim initiated for unreserved lands in Alaska that the lands are coal, oil, or gas in character, the patent issued on such entry shall contain the reservation required by this act.

SEC. 2. That upon satisfactory proof of full compliance with the provisions of the laws under which the entry is made and of this act the entryman shall be entitled to a patent to the lands entered by him, which patent shall contain a reservation to the United States of all the coal, oil, or gas in the land so patented, together with the right to prospect for, mine, and remove the same. The coal, oil, or gas deposits so reserved shall be subject to disposal by the United States in accordance with the provisions of the laws applicable to coal, oil, or gas deposits or coal, oil, or gas lands in Alaska in force at the time of such disposal. Any person qualified to acquire coal, oil, or gas deposits, or the right to mine and remove the coal or to drill for and remove the oil or gas under the laws of the United States, shall have the right at all times to enter upon the lands entered or patented, as provided by the provisions of this act, for the purpose of prospecting for coal, oil, or gas therein, upon the approval by the Secretary of the Interior of a bond or undertaking to be filed with him as security for the payment of all damages to the crops and improvements on such lands by reason of such prospecting. Any person who has acquired from the United States the coal, oil, or gas deposits in any such land, or the right to mine, drill for, or remove the same, may reenter and occupy so much of the surface thereof as may be required for all purposes reasonably incident to the mining and removal of the coal, oil, or gas therefrom, and mine and remove the coal or drill for and remove the oil or gas upon payment of the damages caused thereby to the owner thereof, or upon giving a good and sufficient bond or undertaking in an action instituted in any competent court to ascertain and fix said damages: *Provided*, That the owner under such limited patent shall have the right to mine the coal for use on the land for domestic purposes at any time prior to the disposal by the United States of the coal deposits: *Provided further*, That nothing in this act shall be construed as authorizing the exploration upon or entry of any coal deposits withdrawn from such exploration and purchase: *And provided further*, That nothing herein contained shall be held or construed to authorize the entry or disposition of withdrawn or classified coal lands or lands valuable for coal, oil, or gas under section 2306, United States Revised Statutes, or acts amendatory thereof or supplemental thereto, commonly known as soldiers' homestead law.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

REGISTERS AND RECEIVERS OF DISTRICT LAND OFFICES.

The bill (S. 102) relating to the temporary filling of vacancies occurring in the offices of register and receiver of district land offices was considered as in Committee of the Whole. It authorizes the Secretary of the Interior, in case of the death, resignation, or refusal or inability to act of any register or receiver of any distict land office, to designate some employee of his department to perform the duties of such officer until the disability of such officer is removed or his successor is appointed and qualified, provided that the person so designated shall receive the same compensation as would be allowed to a regularly appointed register or receiver while so acting.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PENSIONS TO MEMBERS OF FORMER LIFE-SAVING SERVICE.

The bill (S. 352) granting pensions to certain members of the former Life-Saving Service was considered as in Committee of the Whole. It provides that any person who served in the former Life-Saving Service of the United States as a keeper or surfman, and who, on account of disability due to a wound or injury received or disease contracted in said Life-Saving Service in line of duty, has been or is entitled to be carried on the pay rolls for a period of one year or more under the provisions of section 7 of the act approved May 4, 1882, and who ceased to be a member of said service on account of such disability, and whose disability still continues, shall, upon making due proof of such facts according to such rules and regulations as the Secretary of the Interior may prescribe, be placed on the pension roll of the United States and be entitled to receive a pension, provided that the rate, commencement, and duration of such pension shall be governed by the provisions and limitations of the general pension laws, and for the purpose of this act the rank of a surfman and keeper shall be held to be equivalent to that of a seaman and warrant officer of the United States Navy, respectively; provided further that no person shall receive a pension under any other law at the same time or for the same period that he is receiving a pension under the provisions of this act.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

EXTENSION OF WORK OF PUBLIC HEALTH SERVICE.

The bill (S. 994) extending the benefits of care and treatment by the Public Health Service to seamen on vessels used in the service of the United States was considered as in Committee of the Whole. It provides that the seamen on all vessels belonging to and used in the service of the United States, or any department or branch thereof, whose care and medical treatment are not otherwise provided for by the Government, shall be entitled to such privileges of care and treatment by the Public Health Service as are now accorded to the seamen on documented vessels of the United States.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PORT WASHINGTON PIERHEAD LIGHT STATION, WIS.

The bill (S. 1462) to establish a fog signal at the Port Washington Pierhead Light Station, Wis., was considered as in Committee of the Whole. It authorizes the Secretary of Commerce to establish a fog signal at the Port Washington Pierhead Light Station, Wis., at a cost not to exceed $4,000, which sum is appropriated by the bill out of any money in the Treasury not otherwise appropriated.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

AIDS TO NAVIGATION.

The bill (S. 1463) to establish aids to navigation at Fond du Lac Harbor, Wis., was considered as in Committee of the Whole. It authorizes the Secretary of Commerce to establish aids to navigation at Fond du Lac Harbor, Wis., at a cost not to exceed $5,000, which sum is appropriated by the bill out of any money in the Treasury not otherwise appropriated.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

EIGHT-YEAR LIMITATION ON RATIFICATION OF CONSTITUTIONAL AMENDMENTS.

The joint resolution (S. J. Res. 90) proposing an amendment to the Constitution of the United States was announced as next in order.

Mr. STERLING. Let that go over.

The PRESIDING OFFICER. The joint resolution will be passed over.

HOMESTEAD ENTRIES BY MINORS.

The bill (S. 1849) permitting minors of the age of 18 years or over to make homestead entry of the public lands of the United States, was considered as in Committee of the Whole. It proposes that any minor of the age of 18 years or over, and otherwise qualified under the public-land laws, shall be permitted to make homestead entry, under and subject to the homestead laws of the United States, provided that no minor shall be permitted to make final proof upon such an entry or receive patent therefor until he or she shall have attained the age of 21 years; and provided further that such entryman shall comply with all the requirements of the homestead laws as to cultivation and improvement of the land entered.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILL PASSED OVER.

The bill (S. 3388) to amend the emergency shipping-fund provisions of the urgent deficiency appropriation act approved June 30, 1917, so as to empower the President and his designated agents to take over certain transportation systems for the transportation of shipyard and plant employees, and for other purposes, was announced as next in order.

Mr. SMOOT. I will ask that that bill go over.

The PRESIDING OFFICER. The bill will be passed over.

SIGNING OF OFFICIAL PAPERS OF INTERIOR DEPARTMENT.

The joint resolution (S. J. Res. 104) authorizing the assistant to the Secretary of the Interior to sign official papers and documents was considered as in Committee of the Whole. It authorizes the assistant to the Secretary of the Interior to sign such official papers and documents as the Secretary may direct.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

FLATHEAD INDIAN RESERVATION, MONT.

The bill (S. 940) to provide for the payment for certain lands within the former Flathead Indian Reservation, in the State of Montana, was considered as in Committee of the Whole.

The Secretary read the bill, as follows:

Be it enacted, etc., That in all cases where lands within the former Flathead Indian Reservation which were classified and appraised during the years 1912 and 1913 by the commission appointed for that purpose under authority of the act of June 25, 1910, have been appraised at an amount in excess of the amount at which similar lands were appraised by the Flathead Commission of 1907 and 1908, persons who have between August 26, 1910 and June 14, 1911, settled upon, or between said dates filed applications to enter, such lands, and which applications have been or may hereafter be allowed, shall not be required to pay more for the lands so settled upon or entered by them than the highest amount specified by the Flathead Commission of 1907 and 1908 for lands of like character and similar classification.

SEC. 2. That in all cases where patents shall be issued for land paid for under the foregoing sections of this act there shall be transferred, from any funds belonging to the United States not otherwise appropriated, to the credit of the Indians for whose benefit such lands are disposed of, such an amount as shall equal the difference between the amount so paid under said sections and the amount at which the lands so paid for have been appraised or reappraised by the commission of 1912 and 1913.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

ALBERT O. BROWN.

The bill (S. 2886) for the relief of Albert O. Brown was considered as in Committee of the Whole. It authorizes and directs the Secretary of the Interior to allow the homestead application of Albert O. Brown, Phoenix 033,328, for the southeast quarter section 17, township 1 south, range 2 east, Gila and Salt River meridian, subject to the reclamation law, and to allow said entryman, in complying with the requirements of the homestead laws, credit for his residence upon and cultivation of said land prior to the date of the passage of the bill.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

J. G. SEUPELT.

The bill (S. 1084) for the relief of J. G. Seupelt was considered as in Committee of the Whole.

The bill had been reported from the Committee on Public Lands, with amendments, on page 1, line 5, after the word "price," to strike out "to be determined in such manner as the Secretary of the Interior may prescribe," and, on page 2, line 6, after the words "after the," to strike out "date of the approval of this act or within 90 days after appraisal if not appraised prior to the passage of this act," and insert "execution and acceptance of the survey of the island," so as to make the bill read:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized to permit one J. G. Seupelt to enter under the homestead laws, at the appraised price a certain unsurveyed island in the Colville Indian Reservation, Wash., known as "Hog Island," containing about 152 acres, located in the Columbia River, and within sections 26 and 35, township 30 north, range 36 east, of the Willamette meridian, in the State of Washington: *Provided*, That proceeds arising hereunder shall be subject to the provisions of section 6 of the act of March 22, 1906, volume 34, United States Statutes at Large, page 81: *Provided further*, That the right of entry by the said Seupelt shall be exercised within 90 days after the execution and acceptance of the survey of the island: *And provided further*, That the land hereby disposed of shall be subject to all the laws of the United States prohibiting the introduction of intoxicants into the Indian country, until otherwise provided by Congress.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

FRANCES MACK MANN.

The bill (S. 2487) permitting Frances Mack Mann to purchase certain public lands, was considered as in Committee of the Whole.

The bill had been reported from the Committee on Public Lands with an amendment, on page 1, line 12, after the word "acres," to insert "in the State of Colorado," so as to make the bill read:

Be it enacted, etc., That Frances Mack Mann be permitted to purchase lot 11, comprising 3.71 acres; lot 12, comprising 1.58 acres; lot 13, comprising 28.38 acres; lot 16, comprising 39.67 acres, all situate in the east half of the northwest quarter of section 6, township 2 south, range 72 west of the sixth principal meridian, containing 73.33 acres, in the State of Colorado, at $1.50 per acre.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

BILL PASSED OVER.

The bill (S. 3311) to increase and expedite the supply of munitions of war was announced as next in order.

Mr. MARTIN. Let that go over, Mr. President.

The PRESIDING OFFICER. The bill will be passed over.

AMENDMENT OF CRIMINAL CODE.

The bill (S. 3470) to amend section 35 of the Criminal Code of the United States was considered as in Committee of the Whole. It proposes to amend section 35 of the Criminal Code of the United States, to read as follows:

SEC. 35. And whoever shall purchase, or receive in pledge, from any person any arms, equipment, ammunition, clothing, military stores, or other property furnished by the United States, under a clothing allowance or otherwise, to any soldier, sailor, officer, cadet, or midshipman in the military or naval service of the United States or of the National Guard or Naval Militia, or to any person accompanying, serving, or retained with the land or naval forces and subject to military or naval law, shall be fined not more than $500 and imprisoned not more than two years.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

FURLOUGHS TO ENLISTED MEN OF THE ARMY.

The bill (S. 3471) to authorize the Secretary of War to grant furloughs without pay and allowances to enlisted men of the Army of the United States was considered as in Committee of the Whole.

The bill had been reported from the Committee on Military Affairs with an amendment, on page 1, line 3, after the word "whenever," to insert "during the continuance of the present war," so as to make the bill read:

Be it enacted, etc., That, whenever during the continuance of the present war, in the opinion of the Secretary of War the interests of the service or the national security and defense render it necessary or desirable, the Secretary of War be, and he hereby is, authorized to grant furloughs to enlisted men of the Army of the United States with or without pay and allowances or with partial pay and allowances, and, for such periods as he may designate, to permit said enlisted men to engage in civil occupations and pursuits.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

DISTINCTIVE BADGES FOR EXEMPTED MEN.

The bill (S. 3472) to authorize the Secretary of War to provide and issue distinctive buttons or badges to men drafted or volunteering for enlistment in the military forces who are exempted or rejected, and to provide a penalty for unlawfully wearing, procuring, or manufacturing the same, was considered as in Committee of the Whole.

The bill had been reported from the Committee on Military Affairs with amendments, on page 1, line 4, after the word "issue," to insert "upon payment of a reasonable charge therefor"; on page 2, line 6, after the word "persons," to strike out "without charge therefor" and insert "upon payment of a like charge"; in line 11, after the word "issued," to strike out "and" and insert "said charge being intended"; and in line 12, after the word "same," to strike out "out of any appropriations heretofore or hereafter made for expenses incident to or necessary for the registration, selection, or draft of persons available for military service," so as to make the bill read:

Be it enacted, etc., That the Secretary of War be, and he hereby is, authorized and directed to provide and issue, upon payment of a reasonable charge therefor, to all men who, under the provisions of an act to authorize the President to increase temporarily the Military Establishment of the United States, approved May 18, 1917, or of any law hereafter enacted, have heretofore been or shall hereafter be, drafted into the military service but subsequently exempted therefrom, or who heretofore or hereafter having volunteered for military service shall have been or shall be rejected for any cause, a distinctive button or badge of such design, size, and composition as he shall determine and adopt, and to cause a new button or badge to be issued to such persons upon payment of a like charge whenever during the present emergency the button or badge originally issued shall have been lost, destroyed, or rendered unfit for use without fault upon the part of the person to whom it was issued, said charge being intended to meet the cost of procuring, providing, and distributing the same.

SEC. 2. That it shall be unlawful for any person other than the one who has been drafted and exempted or who has volunteered and been rejected, as aforesaid, to wear said button or badge, or other button or badge approximating the design thereof, or for any person by misrepresentation to procure the issuance of either an original or substitute button or badge, or for any person, partnership, association, or corporation without the authority of the Secretary of War therefor to manufacture said button or badge or other button or badge approximating the design thereof; and any person, partnership, association, or corporation who shall violate the provisions of this section shall be deemed guilty of a misdemeanor and upon conviction thereof shall be punished by a fine of not more than $500 or by imprisonment for not more than six months, or by both such fine and imprisonment.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

AMENDMENT OF NATIONAL-DEFENSE ACT.

The bill (S. 3526) to amend section 11 of an act entitled "An act for making further and more effectual provision for the national defense, and for other purposes," approved June 3, 1916, was considered as in Committee of the Whole.

The Secretary read the bill, as follows:

Be it enacted, etc., That the first paragraph of section 11 of chapter 134, 39th Statutes, page 173, be, and the same hereby is, amended to read as follows:

"The Corps of Engineers shall consist of 1 Chief of Engineers, with the rank of brigadier general; 23 colonels; 30 lieutenant colonels; 72 majors; 152 captains; 148 first lieutenants; 79 second lieutenants; and the enlisted men hereinafter enumerated. The Engineer troops of the Corps of Engineers shall consists of seven regiments and two mounted battalions."

SEC. 2. That the second paragraph of section 11 of chapter 134, 39th Statutes, page 173, be, and the same hereby is, amended to read as follows:

"Each regiment of Engineers shall consist of 1 colonel; 1 lieutenant colonel; 2 majors; 11 captains; 12 first lieutenants; 6 second lieutenants; 2 master engineers, senior grade; 1 regimental sergeant major; 2 regimental supply sergeants; 2 color sergeants; 1 sergeant bugler; 1 cook; 1 wagoner for each authorized wagon of the field and combat train; 1 band; and 2 battalions."

SEC. 3. That the fourth paragraph of section 11 of chapter 134, 39th Statutes, page 174, be, and the same hereby is, amended to read as follows:

"Each band of a regiment of Engineers shall consist of 1 band leader; 1 assistant band leader; 1 first sergeant (drum major); 2 band sergeants; 4 band corporals; 2 musicians, first class; 4 musicians, second class; 13 musicians, third class; and 2 cooks."

Mr. CHAMBERLAIN. Mr. President, I desire to suggest two amendments to this bill. They are indicated in a copy of the bill which I am sending to the desk, so that the Secretary will be able to note what the amendments are. I found out, after the committee had reported the bill, that it overlooked an amendment to the statutes which was made in the war-risk insurance bill. The proposed amendments are to make the bill conform to the law as it now stands.

The PRESIDING OFFICER. The amendments will be stated.

The SECRETARY. On page 1, line 3, before the word "first," it is proposed to insert the words "last sentence of the," so that, if amended, it will read:

That the last sentence of the first paragraph,

The amendment was agreed to.

The SECRETARY. It is also proposed to strike out, on page 1, lines 7, 8, 9, and 10, and on page 2, lines 1, 2, 3, and 4, down to and including the word "enumerated," in the following words:

The Corps of Engineers shall consist of 1 Chief of Engineers, with the rank of brigadier general; 23 colonels; 30 lieutenant colonels; 72 majors; 152 captains; 148 first lieutenants; 79 second lieutenants; and the enlisted men hereinafter enumerated,

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

JOINT RESOLUTION PASSED OVER.

The joint resolution (S. J. Res. 49) authorizing the erection on the public grounds in the city of Washington, D. C., of a statue of James Buchanan, a former President of the United States, was announced as next in order.

Mr. SMOOT. Let that go over, Mr. President.

The PRESIDING OFFICER. The bill will be passed over.

LANDS IN MONTANA.

The bill (S. 935) for the relief of settlers on certain railroad lands in Montana, was considered as in Committee of the Whole.

The bill had been reported from the Committee on Public Lands with an amendment, on page 2, line 7, before the words "public lands" to insert the word "surveyed," so as to make the bill read:

Be it enacted, etc., That in the adjustment of the grants to the Northern Pacific Railroad Co., if any of the lands within the indemnity limits of said grants through that portion of the former reservation for the Gros Ventre, Piegan, Blood, Blackfoot, and River Crow Indians lying south of the Missouri River in the State of Montana be found in possession of an actual bona fide qualified settler under the homestead laws of the United States who has made substantial improvements thereon and such land has been adjudged by the Secretary of the Interior to inure to the Northern Pacific Railway Co. under the grants made to its predecessor in interest, the Northern Pacific Railroad Co., the Northern Pacific Railway Co. upon request of the Secretary of the Interior may file a relinquishment of said lands in favor of the settler and shall then be entitled to select an equal quantity of other lands in lieu thereof from any of the surveyed public lands within the State of Montana, not mineral and not otherwise appropriated at the date of selection, to which it shall receive title the same as though originally granted: *Provided, however*, That lands withdrawn or classified as coal lands may be selected by said company, and as to such lands it shall receive a restricted patent as provided by the act of June 22, 1910.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

CONDEMNED CANNON FOR EVERETT, WASH.

The bill (S. 302) authorizing the Secretary of the Navy to make donation of condemned naval guns and cannon balls to the John Wannebo Camp, No. 9, United Spanish War Veterans, Everett, Wash., to be placed in public parks, was considered as in Committee of the Whole, and was read as follows:

Be it enacted, etc., That the Secretary of the Navy is hereby authorized to supply to John Wannebo Camp, No. 9, United Spanish War Veterans, Everett, Wash., two condemned naval guns formerly in use on board a vessel under the command of Admiral Dewey engaged in the Battle of Manila Bay, together with an assortment of cannon balls, same to be placed in a public park of the said city of Everett.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PAYMENTS TO ADMIRAL CAPERTON AND OTHERS.

The bill (S. 3446) to amend an act entitled "An act making appropriations for the naval service for the fiscal year ending June 30, 1918, and for other purposes," approved March 4, 1917, was considered as in Committee of the Whole, and was read as follows:

Be it enacted, etc., That the Secretary of the Navy be, and he is hereby, authorized to pay out of the appropriation "Pay, miscellaneous," in the "Act making appropriations for the naval service for the fiscal year ending June 30, 1918, and for other purposes," approved March 4, 1917, to the following-named officers, the officers at the time the expenses were incurred having the designated ranks, the amounts set opposite their respective names, said sums being the amounts expended by these officers for quarters and subsistence while absent from their ships on special temporary duty under proper orders in connection with the salvage operations of the United States ships *H-3* and *Milwaukee*: Admiral William B. Caperton, United States Navy, $32; Pay Inspector Joseph Fyffe, United States Navy, $32; Maj. Richard M. Cutts, United States Marine Corps, $7; Lieut. Augustin T. Beauregard, United States Navy, $32; Lieut. (Junior Grade) Howard M. Lammers, United States Navy, $31.50.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

FRED C. KONRAD.

The bill (S. 179) to correct the naval record of Fred C. Konrad was considered as in Committee of the Whole.

The bill was reported from the Committee on Naval Affairs with an amendment, to strike out all after the enacting clause and insert:

That Fred C. Konrad, formerly an electrician, first class, in the United States Navy, shall receive the benefits conferred by section 1754 of the Revised Statutes of the United States, relative to preference for appointment to civil offices, in the same manner and to the same extent as if he had been honorably discharged from the naval service by reason of sickness incurred in the line of duty.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill for the relief of Fred C. Konrad."

ADJUDICATION OF PRIVATE CLAIMS.

The bill (S. 1795) to relieve Congress from the adjudication of private claims against the Government was announced as next in order.

Mr. GALLINGER. Let the bill go over.

The PRESIDING OFFICER. Objection being made, the bill goes over.

LANDS AT M'MINNVILLE, OREG.

The bill (S. 2784) to authorize the purchase by the city of McMinnville, Oreg., of certain lands formerly embraced in the grant to the Oregon & California Railroad Co. and revested in the United States by the act approved June 9, 1916, was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

OREGON NATIONAL FOREST.

The bill (S. 3225) to reserve as a part of the Oregon National Forest certain lands that were revested in the United States pursuant to the decision of the Supreme Court of the United States in the case of the Oregon & California Railroad Co. against the United States, was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That all of the land contained within the grant by the United States to the Oregon & California Railroad Co. that was revested in the United States pursuant to the decision of the Supreme Court of the United States in the case of Oregon & California Railroad Co. *v.* United States (238 U. S., 393), and an act of Congress approved June 9, 1916, that lies within that part of the Oregon National Forest that is described in the proclamation of the President under date of June 17, 1892, and designated as Bull Run National Forest, be, and the same hereby is, reserved and set aside as a part of the Oregon National Forest.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

DESERT-LAND ENTRIES.

The bill (S. 2315) to extend the time within which final proof is required to be submitted upon any lawful pending desert-land entry made prior to July 1, 1915, such extension not to exceed three years from the date of allowance thereof, was considered as in Committee of the Whole.

The bill was reported from the Committee on the Public Lands with an amendment, on page 2, line 3, before the word "act," to strike out "the" and insert "this," so as to make the bill read:

Be it enacted, etc., That the provisions of the last three paragraphs of section 5 of the act of March 4, 1915, entitled "An act making appropriations to supply deficiencies in appropriations for the fiscal year 1915, and for prior years, and for other purposes," be, and the same are hereby, extended and made applicable to any lawful pending desert-land entry made prior to March 4, 1915: *Provided*, That in cases where such entries have been assigned prior to the date of this act the assignees shall, if otherwise qualified, be entitled to the benefits hereof.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

EXCHANGE OF LANDS IN UTAH.

The bill (S. 97) authorizing the exchange of certain lands in the State of Utah for the protection of the water supply of Salt Lake City was considered as in Committee of the Whole, and it was read, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized to issue patent to the Gray Trust Co., incorporated under the laws of the State of Utah, for the following described lands: West half northwest quarter, southeast quarter northwest quarter, southwest quarter, west half northeast quarter, west half southeast quarter, section 22, township 1 north, range 2 east, Salt Lake meridian, containing 440 acres, upon the transfer by the said Gray Trust Co. to the United States of the southeast quarter, east half southwest quarter, southwest quarter southwest quarter, section 36, township 1 north, range 2 east, and northeast quarter, section 2, township 1 south, range 2 east, Salt Lake meridian, containing 440 acres: *Provided*, That the Attorney General of the United States shall certify that a good and sufficient title to the reconveyed lands will vest in the Government: *Provided further*, That the lands reconveyed to the United States shall forthwith become a part of the Wasatch National Forest.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

IRRIGATION AND RECLAMATION.

The bill (S. 94) to amend section 3 of an act entitled "An act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1902, and for other purposes," approved March 3, 1901 (31 Stat. L., p. 1133), was considered as in Committee of the Whole, and the bill was read, as follows:

Be it enacted, etc., That section 3 of the act of Congress approved March 3, 1901 (31 Stat. L., p. 1133), be, and the same is hereby, amended to read as follows:

"That section 4 of the act of August 18, 1894, entitled 'An act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1895, and for other purposes,' be, and the same is hereby, amended so that the 10-year period within which any State shall cause the lands applied for under said act to be irrigated and reclaimed, as provided in said section, as amended by the act of June 11, 1896, shall begin to run from the date of approval by the Secretary of the Interior of the State's application for the segregation of such lands; and if actual construction of reclamation works is not begun within three years after the segregation of the lands or within such further period as shall be allowed by the Secretary of the Interior, the said Secretary of the Interior in his discretion may restore such lands to the public domain; and if the State fails, within 10 years from the date of such segregation, to cause the whole or any part of the lands so segregated to be so irrigated and reclaimed, the Secretary of the Interior may in his discretion continue said segregation for a period not exceeding five years, or may, in his discretion, restore such lands to the public domain upon the expiration of the 10-year period, or of any extension thereof."

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

E. D. PARTRIDGE.

The bill (S. 92) to authorize the Secretary of the Interior to issue patent for certain lands in the State of Utah to E. D. Partridge was considered as in Committee of the Whole. It proposes, upon the payment of $1.25 per acre, to cause patent to issue to E. D. Partridge for the following-described lands in the State of Utah: The northwest quarter of the southeast quarter, the east half of the southwest quarter, and the northwest quarter of the southwest quarter, section 5, township 6 south, range 3 east, Salt Lake meridian.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

SEVIER NATIONAL FOREST LANDS.

The bill (S. 2931) for the relief of Thomas Sevy was considered as in Committee of the Whole, and the bill was read, as follows:

Be it enacted, etc., That the Secretary of the Interior is hereby authorized, in his discretion, to accept title to the following described lands, either in whole or in part, upon certification by the Secretary of Agriculture that the lands are chiefly valuable for national forest purposes and approximately equal in value to the lands to be given in exchange therefor: The east half of section 32; the north half of the

northwest quarter and the south half of the southwest quarter of section 32, township 35 south, range 4 west of Salt Lake base and meridian, situate in the Sevier National Forest; and to issue to Thomas Sevy in lieu thereof patents to the following-described areas, or to such parts thereof as are found by the Secretary of Agriculture to be approximately equal in value to the lands conveyed: The northeast quarter, the north half of the southeast quarter, the southwest quarter of the southeast quarter, the southeast quarter of the northwest quarter, and the southwest quarter of section 31, township 37 south, range 5 west of Salt Lake base and meridian: *Provided*, That the lands conveyed to the Government shall thereupon become parts of the Sevier National Forest and subject to all laws and regulations applicable thereto; *Provided further*, That the Secretary of the Interior and the Secretary of Agriculture shall jointly report to Congress, in detail, the factors upon which the valuations were made.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

CYRENA E. YOUNG.

The bill (S. 100) to authorize the Secretary of the Interior to issue patent for certain lands in the State of Utah to Cyrena E. Young was announced as next in order.

Mr. POINDEXTER. Let that bill go over.

The PRESIDING OFFICER. It is so ordered.

SEVIER NATIONAL FOREST LANDS.

The bill (S. 972) to authorize an exchange of lands with Henry Blackburn was considered as in Committee of the Whole.

The bill was reported from the Committee on Public Lands with an amendment to strike out in line 6 the word "east" and insert "west," so as to make the bill read:

Be it enacted, etc., That the Secretary of the Interior is hereby authorized to accept title to the southwest quarter of the southeast quarter of section 19, township 39 south, range 6 west, Salt Lake meridian, and to convey in exchange therefor to Henry Blackburn, of Orderville, Utah, title to the northeast quarter of the northeast quarter of section 30, township 39 south, range six west, Salt Lake meridian, and upon reconveyance the land deeded to the United States shall thereupon become part of the Sevier National Forest and subject to all laws and regulations applicable thereto.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

CONSOLIDATION OF LANDS.

The bill (S. 101) to authorize the consolidation of Government lands and of privately owned lands, and for other purposes was considered as in Committee of the Whole.

The bill was reported from the Committee on Public Lands with an amendment, on page 1, line 6, to strike out the words "public domain including," so as to make the bill read:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and empowered in cases where privately owned lands are situate in noncontiguous bodies or areas within the reservations, or within oil, coal, or other withdrawals, made under the act of June 25, 1910 (36 Stat. L., p. 847), to exchange public lands of the United States either within or without such reservations or withdrawals for such privately owned lands, to the end and with the object that as nearly as practicable the lands in private ownership and those held by the Government shall each form single and compact bodies: *Provided*, That the lands so exchanged shall be of approximately equal character and value and the exchange shall only be made in the event the public interests are benefited thereby. The land to be conveyed to the United States by any one landowner under such exchange shall be so conveyed by a single act or instrument of conveyance, and the lands to be conveyed to the private owners in exchange therefor by the United States shall be described in a single list or schedule and conveyed by a single patent.

SEC. 2. That in estimating and determining the value of lands to be given in exchange pursuant to this act, the Secretary of the Interior may consider and give effect to all factors contributing to or affecting such land, including any added or special value which will be possessed by the lands to be conveyed by the private owners as a consequence of relation to other lands owned by said private owners.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

ENLISTED MEN OF NAVY AND MARINE CORPS.

The bill (S. 3128) to authorize additional pay for enlisted men of the Navy and Marine Corps detained beyond the expiration of their terms of enlistment was considered as in Committee of the Whole.

The bill was reported from the Committee on Naval Affairs with an amendment, to insert after the enacting clause the words "That section 1422 of the Revised Statutes of the United States be, and is hereby, amended to read as follows," so as to make the bill read:

Be it enacted, etc., That section 1422 of the Revised Statutes of the United States be, and is hereby, amended to read as follows:

"SEC. 1422. That it shall be the duty of the commanding officer of any fleet, force, squadron, or vessel acting singly, and of the commanding officer of any shore command beyond the continental limits of the United States, to send to the United States, in some public or other vessel as he may deem for the best interests of both the men and the Government, for discharge at the expiration of their terms of enlistment, all enlisted men of the Navy and Marine Corps entitled to discharge and desiring to go there, unless in his opinion the detention of such men for a longer period is essential to the public interests, in which case he may detain them, or any of them, so long as the public interests demand: *Provided*, That no such enlisted man shall be held, under the provisions of this section, for more than 30 days after arrival at a United States port. All such enlisted men sent to the United States, or detained in accordance with the provisions of this act shall be entitled in all respects to the laws and regulations for the government of the Navy until their arrival in the United States and their regular discharge. And any enlisted man of the Navy or Marine Corps held beyond the expiration of his completed term of enlistment for any cause other than the investigation of charges or for punishment, shall receive, for the time he is so held, in addition to the sum of all pay he was receiving at the time of expiration of the term beyond which he is so held, an amount equal to one-fourth thereof: *Provided further*, That the shipping articles shall hereafter contain the substance of this section."

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read, "A bill to amend section 1422 of the Revised Statutes authorizing additional pay for enlisted men of the Navy and Marine Corps detained beyond the expiration of their terms of enlistment."

AMENDMENT OF ESPIONAGE ACT.

The bill (S. 3522) to amend an act entitled "An act to punish acts of interference with the foreign relations, the neutrality, and the foreign commerce of the United States, to punish espionage, and better to enforce the criminal laws of the United States, and for other purposes," approved June 15, 1917, was announced as next in order.

Mr. SMOOT. Let that bill go over.

The PRESIDING OFFICER. The bill will go over.

SAN DIEGO WATER SUPPLY.

The bill (S. 3646) to grant rights of way over Government lands for reservoir purposes for the conservation and storage of water to be used by the city of San Diego, Cal., and adjacent communities, was announced as next in order.

Mr. MYERS. I object to the consideration of that bill.

The PRESIDING OFFICER. It will go over.

ADDITIONAL JUDGE IN FLORIDA.

The bill (S. 1735) to create an additional judge in the southern district of Florida was announced as next in order.

Mr. SMOOT. I notice that there is on the calendar a bill of similar character providing for an additional judge in the district of Arizona. I should like to ask the Senator from North Carolina if the committee in reporting those two bills were unanimous?

Mr. OVERMAN. I heard the discussion in the committee, but I was called out of the committee room when this bill was ordered reported, and I can not speak of it on that point. I think Senate bill 714, to which the Senator from Utah refers, was agreed to without any controversy, and it was ordered to be reported favorably.

Mr. SMOOT. We are creating so many additional judgeships of late that I thought we ought to have some explanation.

Mr. OVERMAN. Arizona is a very large State. The judge there is a hard-worked man. He has only had four weeks' holiday and they have a very large docket there. There is a great deal of smuggling. It is true there are only four places in which the court is held in the district, as I recollect, but the distance is 400 miles from one place to another, and he is holding court very nearly all the time.

Mr. SMOOT. That is not the case in the southern district of Florida.

Mr. OVERMAN. I can not say as to that.

Mr. SMOOT. Let the bill go over, and I will look into it.

The PRESIDING OFFICER. Objection having been made, the bill goes over.

DEMOCRACIES VERSUS AUTOCRACIES.

The next business on the calendar was Senate resolution 196, to print the pamphlet entitled "An International Confederation of Democracies Under a Constitution" as a Senate document.

Mr. SMOOT. Let that go over.

The PRESIDING OFFICER. The resolution will go over.

ADDITIONAL JUDGE IN ARIZONA.

The bill (S. 714) providing for an additional judge for the district of Arizona was considered as in Committee of the Whole.

The bill was reported from the Committee on the Judiciary with an amendment to strike out all of section 2 of the bill and

to renumber section 3 so as to stand as section 2, making the bill read:

Be it enacted, etc., That the President of the United States shall appoint, by and with the advice and consent of the Senate, an additional judge for the district of Arizona, who shall reside in said district and shall possess the same qualifications and have the same powers and jurisdiction and receive the same salary now prescribed by law in respect of the present district judge therein.

SEC. 2. That the clerk of the district court for the district of Arizona and the marshal and district attorney for said district shall perform the duties appertaining to their offices, respectively, for said court.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

ORION MATHEWS.

The bill (S. 922) for the relief of Orion Mathews was considered as in Committee of the Whole, and it was read, as follows:

Be it enacted, etc., That in the administration of the pension laws and laws conferring rights and privileges upon honorably discharged soldiers, Orion Mathews, late of Battery D, Second Regiment United States Artillery, shall be held and considered to have been honorably discharged as a private from said battery and regiment on the 22d day of March, 1865: *Provided*, That no pension shall accrue prior to the passage of this act.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PAYMASTER ALVIN HOVEY-KING.

The bill (S. 3403) for the relief of Paymaster Alvin Hovey-King, United States Navy, was considered as in Committee of the Whole. It authorizes the Comptroller of the Treasury to consider appeals from settlements of the Auditor for the Navy Department under date of April 25, 1916, in which settlements certain disallowances were made in the accounts of Paymaster Alvin Hovey-King, United States Navy, and in which cases the time within which appeal may lawfully be made to the comptroller has expired.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

EXECUTIVE SESSION.

Mr. MARTIN. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened and (at 3 o'clock and 45 minutes p. m.) the Senate adjourned until to-morrow, Wednesday, February 6, 1918, at 12 o'clock meridian.

CONFIRMATIONS.

Executive nominations confirmed by the Senate February 5, 1918.

COLLECTOR OF CUSTOMS.

Edmund Billings to be collector of customs for customs collection district No. 4, with headquarters at Boston, Mass.

NAVAL OFFICER OF CUSTOMS.

H. Otto Wittpenn to be naval officer of customs in customs collection district No. 10, with headquarters at New York, N. Y.

SURVEYOR OF CUSTOMS.

Joseph A. Maynard to be surveyor of customs in customs collection district No. 4, with headquarters at Boston, Mass.

CONSULAR SERVICE.

CLASS 8.

Lloyd Burlingham to be a consul of class 8.
Leonard G. Dawson to be a consul of class 8.
Shelby F. Strother to be a consul of class 8.
Harry L. Walsh to be a consul of class 8.
Romeyn Wormuth to be a consul of class 8.

COAST GUARD.

Third Lieut. of Engineers Paul Revere Smith to be second lieutenant of Engineers.

POSTMASTERS.

GEORGIA.

D. F. Davenport, Americus.
Vivian L. Stanley, Dublin.
J. A. Stokes, Gordon.
W. Custis Nottingham, Macon.

MONTANA.

John J. Courtney, Antelope.
T. C. Armitage, Billings.
Elmer C. Sprague, Box Elder.
Lulu C. Woolson, Brady.
William Krofft, Choteau.
Fred T. Tasa, Flaxville.
Robert B. McNeil, Inverness.
Richard T. Sjordal, Kremlin.
Grant Robinson, Lewistown.
Rose M. Sargent, Nashua.
Israel A. Oakes, Plentywood.
Letta Conser, Plevna.
L. H. Adams, Somers.
Lizzie Gorsuch, Winnett.

PENNSYLVANIA.

Albin P. Yarnall, Ashbourne.
James W. Taylor, Dallastown.
Andrew Wahl, Evans City.
E. K. Eichelberger, Hanover.
John Orth, Marietta.
Edward S. Haws, Narberth.
Albert K. Kneule, Norristown.
James W. Hatch, North Girard.
J. B. Esch, Spangler.
John H. Krumbine, Vintondale.
James H. Alcorn, Waterford.
C. J. D. Strohecker, Zelienople.

HOUSE OF REPRESENTATIVES.

TUESDAY, *February 5, 1918.*

The House met at 12 o'clock noon.

Rev. William Couden, of Washington, D. C., offered the following prayer:

Father of all souls, Thou hast kept us through the dark hours of the night; lead us through the complexities of the day's dangers, opportunities, and responsibilities.

In times past Thou hast blessed our country. Continue Thy blessing upon us in these critical present times. Strengthen us on land and sea, at home and abroad. Give us wisdom and skill in the use of our powers and resources. And back of all our outward might and organization, make us strongest of all in personal and social righteousness, justice, and faith; for Christ's sake. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Waldorf, its enrolling clerk, announced that the Senate had passed bill of the following title, in which the concurrence of the House of Representatives was requested:

S. 2116. An act to increase the salary of the United States district attorney for the district of Rhode Island.

SENATE BILLS REFERRED.

Under clause 2 of Rule XXIV, Senate bills of the following titles were taken from the Speaker's table and referred to their appropriate committees, as indicated below:

S. 2116. An act to increase the salary of the United States district attorney for the district of Rhode Island; to the Committee on the Judiciary.

S. 3126. An act to provide temporary promotion for retired officers of the Navy and Marine Corps performing active duty during the period of the present war; to the Committee on Naval Affairs.

S. 3427. An act for the relief of certain ex-paymasters' clerks; to the Committee on Naval Affairs.

S. 3445. An act to authorize the payment of gun pointers and gun captains while temporarily absent from their regular stations, and for other purposes; to the Committee on Naval Affairs.

S. 3402. An act to fix the age limit for candidates for admission to the United States Naval Academy; to the Committee on Naval Affairs.

S. 3129. An act to provide for the disposition of the effects of deceased persons in the naval service; to the Committee on Naval Affairs.

S. 3130. An act to amend section 1570 of the Revised Statutes of the United States; to the Committee on Naval Affairs.

S. 3400. An act to regulate the pay of retired chief warrant officers on active duty; to the Committee on Naval Affairs.

S. 3404. An act to authorize the President to drop from the rolls any Naval or Marine Corps officer absent without leave for three months, or who has been convicted of any offense by

the civil authorities, and prohibiting such officer's reappointment; to the Committee on Naval Affairs.

S. 3406. An act to authorize the Secretary of the Navy to determine where and when there are no public quarters available for officers of the Navy and Marine Corps; to the Committee on Naval Affairs.

S. 3401. An act to authorize the President to reduce temporarily the course of instruction at the United States Naval Academy; to the Committee on Naval Affairs.

LEAVE TO ADDRESS THE HOUSE.

Mr. MONDELL. Mr. Speaker, I ask unanimous consent that on Thursday morning, immediately after the reading of the Journal, the gentleman from Connecticut [Mr. TILSON] may have opportunity to address the House for 40 minutes. He desires to have a definite time fixed in view of the fact that he expects to have here some exhibits of considerable weight and volume, and have them here at a given time.

The SPEAKER. Are the exhibits going to be loaded or not? [Laughter.]

Mr. MONDELL. The gentleman has promised that they shall not be loaded.

The SPEAKER. The gentleman from Wyoming asks unanimous consent that on Thursday morning, after the reading of the Journal and the disposition of the business on the Speaker's table, the gentleman from Connecticut, Col. TILSON, shall have 40 minutes in which to address the House on the subject of explosives, not to interfere with privileged matters one way or other, or appropriation bills, conference reports, and so forth. Is there objection?

There was no objection.

LEAVE OF ABSENCE.

Mr. GREGG, by unanimous consent, was granted leave of absence indefinitely, on account of illness.

HOUSING EMPLOYEES, EMERGENCY FLEET CORPORATION.

Mr. ALEXANDER. Mr. Speaker, I ask unanimous consent that the bill (S. 3389) to authorize and empower the United States Shipping Board Emergency Fleet Corporation to purchase, lease, requisition, or otherwise acquire improved or unimproved land, houses, buildings, and for other purposes, be made a special order to follow the disposition of the Diplomatic and Consular appropriation bill.

Mr. MADDEN. Reserving the right to object, Mr. Speaker, is this the bill for the housing of the men to build the ships?

Mr. ALEXANDER. Yes.

Mr. MADDEN. Does it deal with any other subject?

Mr. ALEXANDER. No.

Mr. MADDEN. What does the bill propose to do?

Mr. ALEXANDER. It authorizes the expenditure of $50,000,000 to be expended at the shipyards at which the United States is building ships under the control and direction of the Emergency Fleet Corporation.

Mr. MADDEN. Has the gentleman from Missouri any information as to the number of shipyards that are in operation now, building ships for the Emergency Fleet?

Mr. ALEXANDER. I think 132.

Mr. MADDEN. One hundred and thirty-two yards?

Mr. ALEXANDER. Yes.

Mr. MADDEN. Where they are building ships or building yards?

Mr. ALEXANDER. There are two or three yards that the Government is constructing that are not yet completed and at which they are not yet building ships, and it is at those yards particularly—for instance, Newport News, Va.; Hog Island, Pa.; and that of the Submarine Boat Corporation at Newark, N. J.—where these housing facilities are the most urgent at this time. If we would speed up this shipbuilding program, I think the gentleman from Illinois will agree with me that we must make arrangements for increased transportation and housing facilities at once. We now have about 180,000 men employed in the shipyards building ships for the Government, and the turnover of labor amounts, as Admiral Bowles says, to 500 or 600 per cent, and it is absolutely necessary to make provision for housing these men if we would speed up the shipbuilding program and increase the number of men from 180,000 to 300,000 men.

Mr. MADDEN. I agree that it is one of the most important things we have on hand, and if anything can be done to facilitate the building of ships and putting them into the water and getting them ready for transportation, we ought to do it. Does the gentleman think we will be able to get the increased number of men if we have the houses?

Mr. ALEXANDER. I think so.

Mr. MADDEN. Does anybody know how long it will take to build these houses after we authorize them?

Mr. ALEXANDER. The bureau of the Fleet Corporation, having this matter in charge, has been giving it great study for some time past; their plans are not fully developed yet, and it is impossible to determine in advance how long it will take and what the expenditure will be. This bill authorizes the expenditure of $50,000,000. It will be necessary for the Fleet Corporation to go to the Committee on Appropriations and submit their plans and get an appropriation made available at once for the balance of this fiscal year and for the next fiscal year to prosecute this work.

Mr. MADDEN. It seems to me the matter is so urgent that we ought not to have to wait. We ought to pass this bill and make the appropriations in the bill and let the Committee on Appropriations wait awhile, and let us get the ships moving.

Mr. ALEXANDER. This is a Senate bill. It was referred to the Committee on the Merchant Marine and Fisheries, and it is reported to the House with a unanimous report, and the committee feel the urgency of beginning the work at the earliest possible date. For that reason I am making this request at this time.

The SPEAKER. Is there objection?

Mr. MONDELL. Reserving the right to object, when was the bill reported?

Mr. ALEXANDER. Yesterday.

Mr. MONDELL. The bill was reported yesterday. The Members of the House are not familiar with it. I do not think it is very good practice to fix by unanimous consent a time for the consideration of a measure the provisions of which are not generally understood. It seems to me there would probably be no objection to having a time fixed later, before we get through with the consideration of the diplomatic bill, and I hope that the gentleman will withdraw his request for the present and make it a little later. I should have to object at this time in view of the fact that the Members are not familiar with the bill.

Mr. ALEXANDER. I sincerely hope the gentleman will not do so. I have word from the chairman of the Committee on Foreign Affairs that it will take at least two days to dispose of the diplomatic appropriation bill, and there will be ample time for the gentleman from Wyoming and the Members of the House to inform themselves about the provisions of this bill before it comes up for consideration if the unanimous-consent request is granted.

Mr. MONDELL. Mr. Speaker, that information should be had to a certain extent before the House by unanimous consent fixes a special time for the consideration of a measure. I presume that there will be no objection if the gentleman proffers his request before we conclude consideration of the diplomatic bill. There will be plenty of time.

Mr. ALEXANDER. I will certainly renew my request from day to day, because I do not care to carry the responsibility myself for any unnecessary delay.

Mr. EDMONDS. Mr. Speaker——

Mr. MOORE of Pennsylvania. May I ask the gentleman——

Mr. COX. I demand the regular order.

The SPEAKER. The regular order is, Is there objection to the request of the gentleman from Missouri [Mr. ALEXANDER]?

Mr. MONDELL. For the present I shall have to object.

LEAVE TO EXTEND REMARKS.

Mr. POWERS. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. On what subject?

Mr. POWERS. On the coal situation.

The SPEAKER. Is there objection?

There was no objection.

CIVIL-SERVICE EXAMINATIONS.

Mr. GODWIN of North Carolina. Mr. Speaker, I again ask unanimous consent to bring up Senate joint resolution 117, in reference to holding civil-service examinations.

The SPEAKER. The gentleman from North Carolina asks unanimous consent for the present consideration of a bill, which the Clerk will report.

The Clerk read the title of Senate joint resolution 117, amending the act of July 2, 1909, governing the holding of civil-service examinations.

The SPEAKER. Is there objection?

Mr. STAFFORD. Mr. Speaker, reserving the right to object, I wish to inquire whether the gentleman from Illinois [Mr. FOSTER], who had some objections to the bill in its present form, has withdrawn his objection? There have been objections to certain provisions of the bill raised on this side. I wish to inquire of the gentleman whether he proposes to offer any amendments in addition to those that are recommended by the committee?

Mr. GODWIN of North Carolina. The amendment suggested by Dr. FOSTER would require those from the States taking the examination in the District of Columbia to have resided here for not exceeding a year. For instance, permanent residents in the District of Columbia could not take advantage of the opportunity to take the examination in the District of Columbia. In other words, it would be restricted to those who had been here a year or less. That was the suggestion he made.

Mr. CAMPBELL of Kansas. A year or less.

Mr. GODWIN of North Carolina. A year or less, not more than a year. I have no objection to that amendment myself.

Mr. STAFFORD. Mr. Speaker, the gentleman from Pennsylvania [Mr. ROBBINS] spoke to me about the bill yesterday. He is not in the Chamber at this moment. I ask that the gentleman withdraw his request for the time being.

Mr. GODWIN of North Carolina. Did he have an amendment to suggest?

Mr. STAFFORD. The gentleman from Pennsylvania desired to offer an amendment. He is not in the Chamber at the present time.
